Agenda #	Relate To	Position	Name	Comments	
5.		Favor	Susan Zahnter	The health of oak trees, on agricultural land, (most of the North County) is also at risk from mulch (Item 89-E) infected with invasive plant and insect species. Furthermore, mulch can contain traces of pesticides, fungicides, and herbicides that can affect Significant Ecological Areas, adjoining conservation lands, county sanctuaries, State Parks, and National Forest Lands. This motion should include services to North County oak forests, as well. Please note: The SEA ordinance does not protect agriculturally zoned lands in the Antelope Valley. This also needs to be addressed.
