

LCAHSA Experts' Presentation

Gradients of Agreement Tool (Note: May be used for Slide

No. 5 of the LCAHSA Experts' Presentation) The Gradients of Agreement is a non-binding way to gauge levels of support and divergence with a goal of achieving a basic temperature check on a suggested idea and to identify areas of divergence that warrant more discussion at a later time, before a separate formal vote or final decision-making process. It is not a voting tool and does not replace a formal vote of the Board)
