4.		Favor	<p>Aaron Mezzano</p> <p>I'm writing just to show my support for keeping the Royal Vista golf course into the foreseeable future. It offers homeowners a nice and lovely way to observe nature in the safety of their own homes, provides space for wildlife and fresh air, and an open space for wildlife to flourish. It would really be unfortunate to see that disappear, so I hope they decide to keep it and I fully support them keeping that golf course in the area.</p> <p>Best, Aaron Mezzano, Save Royal Vista Supporters</p>
			<p>April Bailey</p> <p>I am writing today to save the space of the old golf course threaten. The reasons not only include positive of improving the air quality, keeping the open space that is beneficial to the residents and those in the farther areas as well. Also the possible increase around our schools and the traffic for the area. Thank you.</p> <p>Save Royal Vista Supporter</p>
			<p>Aziz Amiri</p>
			<p>Aziz A Amiri</p> <p>Will revitalize a distressed and closed 75-acre golf course property</p> <ul style="list-style-type: none"> • Creates job opportunities, provides additional property tax revenues and new funding for local schools. • Helps to support local business employment needs, provides local roadway improvements, enhances clean stormwater solutions, and provides four times the number of trees that exist on the Project site today.

4.		Favor	Beverly Pekar	<p>Traffic and the pollution it produces are one of the major objections I have. Entering and exiting the proposed development safely has not been addressed. With the possibility of adding 720+ cars, how will everyone be able to evacuate in case of an emergency, such as a fire? Will we end up like the poor souls in Lahaina, being cremated in our cars? Traffic is one thing, it is everywhere, but this could involve our lives. It seems that it is expected that many people will be using public transportation, or bicycles. I would not feel safe riding on a bus and I am too old to ride a bicycle. Will people be riding bikes to work or grocery shopping in the rain? They also assume that many people will be working from home but that is not always possible. Those cars exiting the development from Walnut St will most likely turn east on Walnut and south on Calbourne to get to the traffic signal at Golden Springs heading east. See map. Calbourne is a quiet 60' right of way that would be turned into a traffic mess. It is almost twice as far to go to Fairway, then Colima to get to the intersection of Calbourne & Golden Springs with 4 traffic signals.</p> <p>Parking in the proposed development could be an issue. The larger houses will have 5-6 bedrooms with a 2-car garage. There is the possibility of 5 to 6 cars at each house, since many adult children still live with their parents. Where are they going to park?</p> <p>I see an abundance of birds every day. I have watched young hawks learning to fly and hunt. I have seen mockingbirds chase the hawks away from their nests. There have been bunnies and coyotes in my yard. There have been geese in the middle of Colima. The Canadian geese use the lakes as a resting place on their migration route and are here for several months. Where will they go when the lakes are removed? Also, the fire department uses the lakes to get water to fight wildfires.</p> <p>I am concerned about the water availability for the project. We are supposed to conserve water, yet 360 residences are proposed. Even with water saving fixtures, the demand will still be high.</p> <p>In summary, the proposed project will affect many aspects of our lives that the EIR did not address or deemed to be insignificant. Maybe it is insignificant to them, but not to the surrounding neighborhoods. It is not just the Rowland Heights area, but also Diamond Bar, Walnut and Hacienda Heights that will suffer.</p> <p>Would you approve a project like this if it were in your neighborhood???</p> <p>Beverly Pekar, 40-year resident</p>

Agenda #	Relate To	Position	Name	Comments
4.		Favor	Breanna Fetters	Strain on Local Infrastructure: The development of 360 units will significantly strain our local infrastructure. Our roads are already congested, and the addition of hundreds of new residents and thousands more vehicles will exacerbate traffic problems. This will make daily commutes more difficult and increase the risk of accidents. Each new household typically generates between 7 to 10 vehicle trips per day, potentially adding 2,520 to 3,600 additional vehicle trips daily
			Christian Mezzano	To Whom It May Concern: It is with sadness in my heart that I write to save the space I've known as the Royal Vista Golf Coarse Space. The golf course space was what made the area unique and different from other areas. The residents and property owners bought in this area because of the open space and breathing room the golf course and space offered. It is not morally right to take the space and what it was, and completely transform it into high density, congested living quarters. It brings a ton of other environmental and social issues to the area that the current populace in the surrounding area should not have to deal with. I ask that the people making the decisions put themselves into the shoes of the current residents and property owners, many who have lived on the golf course area for decades. Thanks, C.Mezzano
			Coleen Garcia	In favor of appealing approval of this project. Please DENY this development!!!
			Cynthia Bailey	I write this email to provide support and to save Royal Vista golf course. It has provided a wonderful open air space as well as a haven for small animals and viewing enjoyment for the entire neighborhood. Thank you signed, Royal Vista supporter

			The following individuals submitted comments on agenda item:	
4.		Favor	Henry Fung	I strongly support this project as we need more housing. The project is infill housing on a failed golf course, is of an appropriate density, adjacent to transit service (both Foothill Transit local line 482 and express line 493 with direct buses to Downtown Los Angeles every 20 minutes during rush hours), and adds open space. The projects mitigates traffic by offering bus pass subsidies and a free electric bike to all homeowners. It also provides opportunities for workforce housing. I would reinforce the conditions for the developer to ensure that the open space is open to the public, by not gating the walking trails, exercise equipment, etc. and not posting signs restricting their use to development residents, as sometimes happens on similarly situated open space. Also if there is excess demand for the workforce housing, it should be resolved through a lottery and not through any other selection process. Thank you.

4.		Favor	Jim Galvey	I am opposing this housing development project as it will have several negative impact on our environment and the quality of life of the residents in this community. The general area is very much congested so it will be very crowded and traffic will be much worse if all these homes are added to this area. This will be constructed literally right next to our homes and backyard, and the pollution that the years of construction will bring about will cause many health issues among our neighbors, especially the elderly. And when these new homes are occupied, we will have much more pollution and congestion in this area.
			Linda Kuo	See attached letter from Rowland Heights Community Coordinating Council.
			Machelle Hernandez	
			Marcella Ramos	This email is in regards to saving the Royal Vista Golf Course. This is a landmark to the people of Walnut, Diamond Bar, and Rowland Heights. the proposed development of 360 units under the Royal Vista Residential Project (PRJ2021-002011). This project will have a significant negative impact on our local infrastructure, environment, and community. Below are my primary concerns:

Strain on Local Infrastructure: The development of 360 units will greatly strain our local infrastructure. Our roads are already congested, and the addition of hundreds of new residents, and thousands more vehicles, will exacerbate traffic problems, making daily commutes more difficult and increasing the risk of accidents.

Destruction of Wildlife Habitat: The open space at Royal Vista is a crucial habitat for a wide variety of wildlife, including Cooper's Hawks, raccoons, skunks, possums, foxes, cottontail rabbits, coyotes, and frogs. This area serves as a vital refuge for these animals in our increasingly urbanized landscape. The proposed development will destroy their habitat and limit their passageway to the nearby undeveloped hills, putting these species at risk.

Threats to Native Birds: Many native bird species, such as swallows, rely on the open space at Royal Vista for breeding and nesting. These birds are already facing growing threats due to ongoing development and urbanization. Protecting their habitat is essential for their survival.

Impact on Migration Corridors: The open spaces at Royal Vista serve as migration corridors for many species, allowing them to move between habitats, find mates, and access seasonal resources. Disrupting these corridors will have a detrimental effect on the local wildlife population.

Loss of Biodiversity: Open spaces support biodiversity by creating a mosaic of different ecosystems. This diversity of plants and animals contributes to ecosystem health and resilience. The proposed development will reduce this biodiversity, weakening the local ecosystem.

Reduction of Groundwater Permeability: The permeable ground in open spaces helps replenish underground aquifers by allowing rainwater to seep into the earth. This process contributes to a sustainable and reliable source of groundwater. Additionally, by absorbing rainwater, permeable surfaces reduce the risk of flooding during heavy rainfall and mitigate the urban heat island effect. The proposed development will limit groundwater permeability, leading to increased runoff and potential flooding.

Natural Pest Control: Predatory species in open spaces help control pest populations, reducing the need for chemical pesticides in agricultural areas adjacent to these spaces. The development will disrupt this natural pest control, potentially increasing the use of harmful chemicals.

Water Quality Protection: Open spaces act as buffers, filtering pollutants and preventing runoff from reaching rivers and streams, which benefits aquatic life. The loss of these natural buffers will degrade water quality in our local waterways.

For these reasons, I urge you to deny the approval of the Royal Vista Residential Project. The environmental and infrastructural impacts of this development will be detrimental to our community and the wildlife that calls it home.

Considering these detailed points and facts, I urge the Board of Supervisors to make a well-informed decision that prioritizes the greater community and environment over speculative development.

Kevin Rohman	offer the following comments. First, I support the Royal Vista Residential Project and urge the Board deny the appeal and approve the project. It offers a range of housing options for people at various income levels. It will provide more opportunities for families and first time home buyers to have a safe, comfortable place to live and raise children. Second, we simply need more housing supply at all levels. We have to move beyond "not in my backyard" and recognize that every community must do its part to increase the housing supply in the County. We need solutions that serve all people not just a select few who want nothing new built near them. I support this project and urge the Board to approve it. Thank you.

Dear Members of the Board of Supervisors,

I urge you to support the appeal filed against the Royal Vista Residential Residential Project No. PRJ2021-0021011 and DENY the Project's entitlements.

The residents of Roland Heights and Diamond Bar oppose the intense, urban densification of the former Royal Vista Golf Course. The FEIR fails to explain adequate plans to mitigate development impacts to local air and water qualities, to traffic intensities and crime increase, which will be caused by this speculation development.

We call the Los Angeles County Board of Supervisors to recognize the loss of the largest open space in Rowland Heights, presently is habitat to wildlife and a source of climate-extremes relief for human residents, living in an already intensely densified area.

The following issues are the most concerning regarding the rezoning of the 156 acres of open space:

1. The lead agency has failed to use the most comprehensive approach to analyzing the cumulative projects most likely to have an impact on the environment of Rowland Heights unincorporated to "provide the most accurate picture practically possible of the project's impacts", dismissing evidence of the golf course properties contiguous and to the west of the project, sold to developer Sunjoint in March 2023, as well as the PAC report of 4/25/24, public record **during** the FEIR analysis. The cumulative analysis must address what is **reasonable and foreseeable** for the remainder of the golf course property, since the proposed Project will render future use of the property for full golf purposes infeasible, and how the remainder of the golf course property is used going forward will impact nearby residents.

2. Royal Vista has evidence of many unmaintained Mexican fan palms with years of extensive accumulated sheaths, which are habitat to the bats we see regularly. See photos below. The FEIR states the palms were regularly maintained after "a desktop aerial review on Google Earth of the palms on the Project site." This is erroneous. The California Department of Fish and Wildlife recommended a bat survey be conducted **during the FEIR process**. "Prior to construction activities, a qualified bat specialist shall conduct bat surveys in order to identify potential habitat that could provide daytime and/or nighttime roost sites, and any maternity roosts. **A discussion of survey results, including negative findings shall be included in the final EIR.**" The lead agency blatantly ignored the recommendation of the CDFW and stated a bat survey will be conducted 14 days prior to construction. I request the Board of Supervisors direct DRP to conduct the surveys and recirculate the EIR to include the negative findings.

3. The golf course provides **156 acres of habitat** to hundreds of animals. The project, with its paved roads, and 3,000 sq ft houses and 360 units will not provide habitat with its proclaimed 37% of parks and trails occupied by people. No blue heron or Canada goose or coyote pictured below on Royal Vista will approach those areas in the project. It is preposterous to state that the project's small parks, narrow trails and young saplings are a replacement to the expansive **golf course habitat with 60-year-old trees and seasonal streams**. Golf courses are proven to provide habitat to many species. For 44 years, I have observed the animals that travel through the neighborhood yards and pockets of oak woodlands near the golf course as their corridor between the habitat of the golf course on their way to the Puente Hills SEA.

4. Rowland Heights Community Coordinating Council, nonprofit liaison to Los Angeles County government, is opposed to the loss of the open space consisting of the closed Royal Vista Golf Course and opposed to amending the general plan to rezone the land to residential. What agency advocates for parks in unincorporated areas such as Rowland Heights, if not the Supervisor Solis? Rowland Heights was denied the opportunity to voice serious concerns regarding Project No. PRJ2021-002011 due to the removal of the Hearing Examiner Public Hearing by the Director of LA Regional Planning. DRP also refused to inform the residents within 1000 feet of the project by mail of the July 24 continued public hearing after canceling the June 26 public hearing on short notice. Their suggestion was a small group of concerned residents should inform the community of the changed date. The lack of transparency of the DRP is unacceptable.

Public safety and **BLIGHT** are expected to rise as indicated in the **inadequate mitigation plan descriptions** written in the FEIR. The county's response was dismissive and did not meaningfully respond to all citations.

Supervisors, you must to recognize the over-engineered, intense density project fails to meet basic, Climate Resiliency goals. Los Angeles County must not continue to favor projects that negatively impact communities such as ours.

Los Angeles, CA 90012

Subject: Final Environmental Impact Report for the Royal Vista
Residential and Parks Project (Project No. PRJ2021-002011)

Dear Planning Commission:

The Rowland Heights Community Coordinating Council ("RHCCC") has reviewed the Final Environmental Impact Report (FEIR) from the Los Angeles County Department of Regional Planning ("LACDRP") for the Royal Vista Residential and Parks Project ("Project"). RHCCC appreciates the opportunity to provide comments regarding aspects of the Project that will affect the Rowland Heights community.

RHCCC is an organization formed to serve as a liaison between the local community and various entities such as local government, businesses, schools, and nonprofit organizations. Its purposes include community representation of interests and concerns of the residents to Los Angeles County and other relevant governmental entities. It serves as a platform for community members to voice their opinions and address local issues. The council disseminates important information to the community and advocates for policies or changes that align with the interests and needs of the community in areas such as infrastructure, public safety, housing, economic development, and education.

After review of the FEIR, RHCCC would like to highlight certain issues the FEIR has not adequately addressed pertaining to environmental impacts of this Project.

1. **Traffic**

Although the lead agency analyzed traffic impact in the immediate project surroundings, the FEIR lacks a comprehensive traffic analysis for the anticipated increase in vehicles along Colima Rd. between Desire Ave. and S. Larkvane Rd., an area already prone to persistent traffic congestion. The deterioration of traffic congestions and mitigations of such congestions have not been studied nor addressed. This area of traffic congestion is one of the greatest concerns for Rowland Heights residents.

2. **Sunjoint Development**

The western portion of the golf course has been sold to Sunjoint Development, LLC ("Sunjoint"). Sunjoint is proposing 1,591 homes, including 1,261 apartment units directly adjacent to the Project. The FEIR failed to address the cumulative effect of the Sunjoint project regarding traffic congestion, water supplies, air quality and noise. Cumulative impacts refer to the effects of a project when combined with other reasonably foreseeable future projects. The purpose of studying cumulative effects under CEQA is to understand the combined potential adverse effects of multiple projects on the environment over time and implement mitigating measures to minimize negative environmental effects on the community.

The lead agency has determined that the Notice of Preparation (NOP) release date for the Royal Vista Residential Project was October 13, 2022. This date establishes the cut-off for considering cumulative projects, as per CEQA Guidelines Section 15125(a). However, upon further reading, CEQA Guidelines Section 15125(a) also provides:

"Where existing conditions change or fluctuate over time, and where necessary to provide the most accurate picture practically possible of the project's impacts, a lead agency may define existing conditions by referencing historic conditions, or conditions expected when the project becomes operational, or both, that are supported with substantial evidence. In addition, a lead agency may also use baselines consisting of both existing conditions and projected future conditions that are supported by reliable projections based on substantial evidence in the record."

By excluding the Sunjoint project from the cumulative analysis, the FIER fails to provide an accurate assessment of the project's impacts on the surrounding neighborhoods.

On January 30, 2024, the Board of Supervisors approved the *East San Gabriel Valley Area Plan* which guides development decisions in 24 unincorporated communities within the East San Gabriel planning area. On a monthly basis, RHCCC Community Development Committee convened with Planning staff over a two year period to consider all aspects of land use (i.e. commercial, residential, mixed use and open space) in the Rowland Heights Community Plan. The updated plan continues to uphold the Royal Vista Golf Course as open space. RHCCC respectfully request the commission to uphold the Rowland Heights Community Plan and to deny the land use change.

We appreciate the opportunity to comment on aspects of this Project that will impact the Rowland Heights community.

Sincerely,

A handwritten signature in black ink, appearing to read "Yvette Romo". The signature is fluid and cursive, with the first name "Yvette" being more prominent than the last name "Romo".

Yvette Romo
President, RHCCC

CC: Ryan Serrano - First District

I would like to appeal to save the golf course space until 2036. I am a previous homeowner and lived on Tierra Luna for over 40 years.

The reason is the open space is beneficial to the residents and the traffic would be unbearable for the area if you did it prior to 2036 please save the golf course space until 2036.

Thank you

Rose Sanchez

To whom it may concern,

This email is in regards to saving the Royal Vista Golf Course. This is a landmark to the people of Walnut, Diamond Bar, and Rowland Heights. To remove it would be a huge mistake and would cause a lot of negative attention from the surrounding residents of Walnut. The golf course is beneficial to the residents and visitors of Royal Vista! Its open area and views are priceless! Please do not take Royal Vista away!

Sincerely,
Marcella Ramos

Save Royal Vista Supporter

To Whom It May Concern:

It is with sadness in my heart that I write to save the space I've known as the Royal Vista Golf Course Space. The golf course space was what made the area unique and different from other areas. The residents and property owners bought in this area because of the open space and breathing room the golf course and space offered.

It is not morally right to take the space and what it was, and completely transform it into high density, congested living quarters. It brings a ton of other environmental and social issues to the area that the current populace in the surrounding area should not have to deal with.

I ask that the people making the decisions put themselves into the shoes of the current residents and property owners, many who have lived on the golf course area for decades.

Thanks.

C. Mezzano

To Whom It May Concern,

I am writing to express my deep concern regarding the proposed development of new homes on the Royal Vista Golf Course in our community. As a resident and homeowner in this area, I urge The City of Los Angeles to reject this plan, as it poses several significant issues for both the local environment and the well being of our neighborhood.

First and foremost, this development will exacerbate traffic congestion. The current road infrastructure is already strained during peak hours, adding more homes will only increase the number of vehicles on the road. This will lead to more frequent traffic jams, longer commute times, and greater frustration for residents who rely on these roads for daily activities.

Moreover, this project threatens the environment. The golf course currently serves as an open green space that supports local wildlife and contributes to the ecological balance of the area. By paving over this land, we will be disrupting the habitats of various species, and replacing greenery with concrete will additionally reduce the overall air quality.

Additionally, the presence of the golf course as an open space provides recreational and mental health benefits to residents. It serves as a peaceful area for walking, relaxing and enjoying nature, and it enhances the overall quality of life in our neighborhood. The value of this space extends beyond financial considerations; it contributes to the well being and tranquility of the entire community.

For these reasons, I strongly urge the City of Los Angeles to deny approval for this development. The long term effects on traffic, environmental sustainability, and air quality far outweigh any short term gains from the construction of new homes. Protecting our open spaces is crucial to maintaining the health and livability of our city for generations to come.

Thank you for taking the time to read this plea and considering my concerns. I hope the city will prioritize the well being of its residents and the environment over this new development.

Much Thanks,
Machelle & Ignacio Hernandez

Dear Members of the Board of Supervisors,

We strongly urge you to support the appeal filed against the Royal Vista Residential Residential Project No. PRJ2021-0021011 and deny the project's entitlements.

We are writing to express our deep concerns, and disappointment with the process of the proposed development of 360 units on Royal Vista and the subsequent 1500+ unit Sunjoint development. As you consider this project, we urge you to make a fully informed decision by carefully evaluating all the facts and potential impacts. It is crucial to recognize that the Sunjoint development is likely timing its application to follow the approval of this project, thereby avoiding inclusion in the cumulative effects of the EIR.

Our community's comments and concerns must be addressed, not dismissed as they were in the current EIR, which overlooked the input of professionals and biologists who have studied the area extensively.

Errors and Misrepresentations in the FEIR

The EIR contains multiple errors and false statements, one of which concerns the presence of bats on Royal Vista. It falsely claims that the palm tree skirts are regularly maintained and trimmed. In truth, these palm tree skirts are not maintained or trimmed, and serve as a chosen habitat for local bats. Many community members, including members of RVOS have witnessed and heard bats on and near Royal Vista, directly contradicting the EIR's assertions.

CDFW stated the following on p. 55 of the FEIR:

“Prior to construction activities, a qualified bat specialist shall conduct bat surveys within Project areas (plus a 100-foot buffer as access allows) in order to identify potential habitat that could provide daytime and/or nighttime roost sites, and any maternity roosts. Acoustic recognition technology shall be used to maximize detection of bat species and to minimize impacts to sensitive bat species. A discussion of survey results, including negative findings shall be included in the final EIR. The final EIR shall also discuss potentially significant effects of the Project on bats and include species specific mitigation measures to reduce impacts to below a level of significance (CEQA Guidelines, § 15125).”

The EIR response (p. 56) states that a bat study will be conducted 14 days prior to construction. How can these findings be addressed in an EIR of an approved project, far along in the process, while the developer is eagerly awaiting to recoup their investment?

1. False Claim in the EIR Response on p. 373

“A desktop review of the palms on the Project site (based on Google Earth aerial from February 2024) **show that nearly all the palms are regularly maintained** such that the dead fronds are regularly removed and there are few to none fan palms with extensive frond skirts. The regular maintenance substantially limits the development of potential roost sites, precluding suitable habitat. In other words, regular maintenance of palms substantially limits or fully eliminates potential habitat.”

As you can see in the images below, the palms are NOT regularly maintained, as they have long skirts that take several years to develop.

[Project planning areas 4 & 5]

2. False Claim in the EIR Response on p. 353

“The Project will include a net gain in the number of trees on the Project site from 411 trees to **1,8643 trees.**”

This total number is incorrect, the developer is not planting 18,000+ trees. Only 8 of the 30 species of trees being planted are native to California. One of the best tree species for absorbing carbon is oaks, due to their large canopies, dense wood and long lifespans. The developer informed the community that native plants and oaks would be planted in the proposed development. The two oak species listed on the Tree Planting Legend are **NOT** California natives but the Quercus Ilex, native to the Mediterranean and the Quercus Virginiana, native to Southeastern United States. There are five prominent species that thrive in southern California, which should be the obvious choice when planting an oak. Native oaks are a keystone species meaning they are trees that **entire ecosystems depend on for survival and habitat**. One oak tree in its native habitat can provide food for hundreds of different caterpillars, more than 100 animals feed on the oak's acorns and up to 2300 species are associated with oaks.

3. Misrepresentation in the EIR pp. 8, 58

Organizations	
ORG 1a	Royal Vista Open Space (RVOP)
ORG 1b	South Coast Air Quality Management District submitted by RVOP
ORG 2	Rowland Heights Community Coordinating Council
ORG 3a	Pierce Law Firm submitted by RVOP
ORG 3b	Pierce Law Firm email submitted by RVOP
ORG 4	Pavone & Fonner, LLP submitted by RVOP
ORG 5	Allen Mathias Jack, Castle Mathias & Mathias LLP submitted by RVOP

Our organization RVOS (Royal Vista Open Space), was erroneously referred to as **RVOP** multiple times in the document.

The Environmental Impact Report addresses facts, reports, and statements, but **the responses often lack accuracy**, and fail to directly address the issues raised. Instead, they may focus on specific wording without substantive engagement, and dismiss the entire point. This situation represents a significant conflict of interest, as the project developer funds the entity responsible for the EIR. How can the process be trusted, accurate, factual, or truthful?

We have been actively notifying and involving the local community for three years, and almost no one we have spoken to supports this development. The developer has produced support letters including businesses and realtors who don't even reside in the area. For three years, we have been acknowledged but ignored by our elected officials. For three years, our voices have been heard but not heeded. It's as though anyone who starts an application is given assistance throughout the process and ultimately granted their development wishes, purely for monetary gain. This occurs regardless of the detrimental impacts on our community, surrounding areas, and the planet.

It is imperative that the FEIR be recirculated to accurately address the significant concerns raised by our community and the expert analyses. Dismissing these issues undermines the integrity of the planning process and the wellbeing of our community.

We want to trust that you will read and listen to our comments and ensure that a thorough and transparent review is conducted. Our goal is to foster meaningful public participation, and informed decision making. You are making a decision that should reflect the best interests of the residents of Los Angeles County.

Thank you for your attention to this critical matter.

Royal Vista Open Space

Nonprofit Organization (RVOS)

Rowland Heights

Subject: PRJ2021-002011, Royal Vista Residential Project (Agenda Item #4)

Dear Members of the Board of Supervisors,

I am writing to express my strong opposition to the proposed development of 360 units under the Royal Vista Residential Project (PRJ2021-002011). This project will have a significant negative impact on our local infrastructure, environment, and community.

Below are my primary concerns:

Strain on Local Infrastructure: The development of 360 units will greatly strain our local infrastructure. Our roads are already congested, and the addition of hundreds of new residents, and thousands more vehicles, will exacerbate traffic problems, making daily commutes more difficult and increasing the risk of accidents.

Destruction of Wildlife Habitat: The open space at Royal Vista is a crucial habitat for a wide variety of wildlife, including Cooper's Hawks, raccoons, skunks, possums, foxes, cottontail rabbits, coyotes, and frogs. This area serves as a vital refuge for these animals in our increasingly urbanized landscape. The proposed development will destroy their habitat and limit their passageway to the nearby undeveloped hills, putting these species at risk.

Threats to Native Birds: Many native bird species, such as swallows, rely on the open space at Royal Vista for breeding and nesting. These birds are already facing growing threats due to ongoing development and urbanization. Protecting their habitat is essential for their survival.

Impact on Migration Corridors: The open spaces at Royal Vista serve as migration corridors for many species, allowing them to move between habitats, find mates, and access seasonal resources. Disrupting these corridors will have a detrimental effect on the local wildlife population.

Loss of Biodiversity: Open spaces support biodiversity by creating a mosaic of different ecosystems. This diversity of plants and animals contributes to ecosystem health and resilience. The proposed development will reduce this biodiversity, weakening the local ecosystem.

Reduction of Groundwater Permeability: The permeable ground in open spaces helps replenish underground aquifers by allowing rainwater to seep into the earth. This process contributes to a sustainable and reliable source of groundwater. Additionally, by absorbing rainwater, permeable surfaces reduce the risk of flooding during heavy rainfall and mitigate the urban heat island effect. The proposed development will limit groundwater permeability, leading to increased runoff and potential flooding.

Natural Pest Control: Predatory species in open spaces help control pest populations, reducing the need for chemical pesticides in agricultural areas adjacent to these

spaces. The development will disrupt this natural pest control, potentially increasing the use of harmful chemicals.

Water Quality Protection: Open spaces act as buffers, filtering pollutants and preventing runoff from reaching rivers and streams, which benefits aquatic life. The loss of these natural buffers will degrade water quality in our local waterways.

For these reasons, I urge you to deny the approval of the Royal Vista Residential Project. The environmental and infrastructural impacts of this development will be detrimental to our community and the wildlife that calls it home.

Considering these detailed points and facts, I urge the Board of Supervisors to make a well-informed decision that prioritizes the greater community and environment over speculative development.

Sincerely,

Ren Ewing

NIMBYism and housing development: A case study from Rowland Heights

Chuck and Deborah Pierce join other folks rallying/protesting in front of the Royal Vista Golf Course in Walnut on Saturday August 21, 2021 in opposition of a major housing project that would be built on a large portion of the course. (Photo by Michael Goulding/Contributing Photographer)

By **LOREENA GARCIA**

PUBLISHED: September 14, 2024 at 7:05 a.m.

Los Angeles is enduring a housing crisis of staggering proportions, a reality acknowledged by nearly every elected official, business group, and credible research organization. Despite this widespread recognition, the pervasive Not In My Back Yard (NIMBY) attitudes continue to obstruct progress, preventing the creation of affordable housing and exacerbating the county's housing deficit.

A striking example of this phenomenon can be observed in Rowland Heights, an unincorporated community within Los Angeles County. Here, a small but contentious group of neighbors is fighting the county over the Royal Vista Residential Project, a well-planned development proposed for 75-acres of privately owned land once occupied by a portion of a golf course. Despite the project's promise of 360 new homes, including 82 units designated for moderate-income residents, and a substantial allocation of 28 acres for open space and trails, the NIMBY messaging remains fierce.

The scale of the project—comprising mainly single-family homes and townhomes—does not align with the apocalyptic visions of a towering, low-income housing complex that some critics suggest. Yet, the opposition's rhetoric paints a picture of an encroaching development that will undermine the character of the neighborhood. Ironically, some critics have argued that the land should either remain vacant or be transformed into a park, while simultaneously expressing concerns that such green spaces could lead to increased crime and homelessness. This contradictory stance highlights the challenges in addressing the root causes of opposition.

The Royal Vista Residential Project stands as a critical opportunity for addressing Los Angeles' housing needs. It is designed to offer attainable housing for essential workers, such as teachers and public safety personnel, and first-time homebuyers. These are groups that contribute significantly to the community's well-being and would benefit from the affordable for-sale housing options provided. Additionally, the project promises to generate essential revenue for local schools, which have experienced a troubling 20% decline in enrollment over the past decade.

The reality that this land, being privately owned, will inevitably undergo some form of development should not be overlooked. The choice is not between a pristine, unused golf course and an undesirable high-density development, but rather between a thoughtfully designed residential community with substantial open space and an indefinite void that will offer no benefits to the community.

NIMBYism's impact on housing development extends beyond specific projects like

In addressing these challenges, it is essential to recognize that well-planned developments, such as the Royal Vista Residential Project, offer solutions to the housing crisis without compromising community values. Responsible opposition should be rooted in constructive dialogue and a willingness to consider the broader societal benefits of new housing projects.

As Los Angeles grapples with its housing dilemma, it is crucial to move beyond NIMBY attitudes and embrace a vision for growth that balances individual concerns with the collective need for affordable housing. By doing so, we can work towards a future where housing is accessible to all, economic development is fostered, and communities are enriched, rather than stifled, by thoughtful and inclusive planning.

Loreena M. Garcia is a YIMBY Action Volunteer in San Gabriel Valley and housing advocate. The views expressed are her own.

Los Angeles County Board of Supervisors
Board Hearing Room 381B
Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Submitted via: <https://publiccomment.bos.lacounty.gov/>

RE: County of Los Angeles, Hearing on Appeal of Project No. PRJ2021-002011-(1) Royal Vista Residential Project (Agenda Item No. 4.)

Dear Board of Supervisors,

On behalf of the Western States Regional Council of Carpenters (“**WSRCC**”), formerly known as Southwest Mountain States Regional Council of Carpenters, my Office is submitting these comments to the County of Los Angeles (“**County**”) for the appeal hearing of the Royal Vista Residential Project (Project No. PRJ2021-002011-(1)) (SCH No. 2022100204) (“**Project**”).

The proposed Project would redevelop the Project Site with 360 residential units in four residential planning areas and open space in two open space planning areas. Three of the four proposed residential planning areas will include 200 detached single-family homes, and 88 condominium units provided as 58 duplex units, and 30 triplex units. The fourth residential planning area will include 72 townhouse condominium units. (DEIR, ES-4).

The Western States Regional Council of Carpenters is a labor union representing almost 90,000 union carpenters in 12 states, including California, and has a strong interest in well-ordered land use planning and in addressing the environmental impacts of development projects.

Individual members of the Western Carpenters live, work, and recreate in the County and surrounding communities and would be directly affected by Project’s environmental impacts.

The Western Carpenters expressly reserves the right to supplement these comments at or prior to hearings on the Project, and at any later hearing and proceeding related to this Project. Gov. Code, § 65009, subd. (b); Pub. Res. Code, § 21177, subd. (a); see *Bakersfield Citizens for Local Control v. Bakersfield* (2004) 124 Cal.App.4th 1184, 1199-1203; see also *Galante Vineyards v. Monterey Water Dist.* (1997) 60 Cal.App.4th 1109, 1121.

The Western Carpenters incorporates by reference all comments raising issues regarding the Environmental Impact Report (EIR) submitted prior to certification of the EIR for the Project. See *Citizens for Clean Energy v City of Woodland* (2014) 225 Cal.App.4th 173, 191 (finding that any party who has objected to the project’s environmental documentation may assert any issue timely raised by other parties).

Moreover, the Western Carpenters requests that the County provide notice for any and all notices referring or related to the Project issued under the California Environmental Quality Act (CEQA) (Pub. Res. Code, § 21000 et seq.), and the California Planning and Zoning Law (“Planning and Zoning Law”) (Gov. Code, §§ 65000–65010). California Public Resources Code Sections 21092.2, and 21167(f) and California Government Code Section 65092 require agencies to mail such notices to any person who has filed a written request for them with the clerk of the agency’s governing body.

I. THE COUNTY SHOULD REQUIRE THE USE OF A LOCAL WORKFORCE TO BENEFIT THE COMMUNITY’S ECONOMIC DEVELOPMENT AND ENVIRONMENT

The County should require that the Project be built using local workers who have graduated from a Joint Labor-Management Apprenticeship Program approved by the State of California, have at least as many hours of on-the-job experience in the applicable craft which would be required to graduate from such a state-approved apprenticeship training program, or who are registered apprentices in a state-approved apprenticeship training program.

Community benefits such as local hire can also be helpful to reduce environmental impacts and improve the positive economic impact of the Project. Local hire

provisions requiring that a certain percentage of workers reside within 10 miles or less of the Project site can reduce the length of vendor trips, reduce greenhouse gas emissions, and provide localized economic benefits. As environmental consultants Matt Hagemann and Paul E. Rosenfeld note:

[A]ny local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

March 8, 2021, SWAPE Letter to Mitchell M. Tsai re Local Hire Requirements and Considerations for Greenhouse Gas Modeling.

Workforce requirements promote the development of skilled trades that yield sustainable economic development. As the California Workforce Development Board and the University of California, Berkeley Center for Labor Research and Education concluded:

[L]abor should be considered an investment rather than a cost—and investments in growing, diversifying, and upskilling California’s workforce can positively affect returns on climate mitigation efforts. In other words, well-trained workers are key to delivering emissions reductions and moving California closer to its climate targets.¹

Furthermore, workforce policies have significant environmental benefits given that they improve an area’s jobs-housing balance, decreasing the amount and length of job commutes and the associated greenhouse gas (**GHG**) emissions. In fact, on May 7, 2021, the South Coast Air Quality Management District found that that the “[u]se of a local state-certified apprenticeship program” can result in air pollutant reductions.²

¹ California Workforce Development Board (2020) Putting California on the High Road: A Jobs and Climate Action Plan for 2030 at p. ii, *available at* <https://laborcenter.berkeley.edu/wp-content/uploads/2020/09/Putting-California-on-the-High-Road.pdf>.

² South Coast Air Quality Management District (May 7, 2021) Certify Final Environmental Assessment and Adopt Proposed Rule 2305 – Warehouse Indirect Source Rule – Warehouse Actions and Investments to Reduce Emissions Program, and Proposed Rule 316 – Fees for Rule 2305, Submit Rule 2305 for Inclusion Into the SIP, and Approve Supporting Budget Actions, *available at* <http://www.aqmd.gov/docs/default-source/Agendas/Governing-Board/2021/2021-May7-027.pdf?sfvrsn=10>.

Recently, the State of California verified its commitment towards workforce development through the Affordable Housing and High Road Jobs Act of 2022, otherwise known as Assembly Bill No. 2011 (**AB2011**). AB2011 amended the Planning and Zoning Law to

Locating jobs closer to residential areas can have significant environmental benefits. As the California Planning Roundtable noted in 2008:

People who live and work in the same jurisdiction would be more likely to take transit, walk, or bicycle to work than residents of less balanced communities and their vehicle trips would be shorter. Benefits would include potential reductions in both vehicle miles traveled and vehicle hours traveled.³

Moreover, local hire mandates and skill-training are critical facets of a strategy to reduce vehicle miles traveled (VMT). As planning experts Robert Cervero and Michael Duncan have noted, simply placing jobs near housing stock is insufficient to achieve VMT reductions given that the skill requirements of available local jobs must match those held by local residents.⁴ Some municipalities have even tied local hire and other workforce policies to local development permits to address transportation issues. Cervero and Duncan note that:

In nearly built-out Berkeley, CA, the approach to balancing jobs and housing is to create local jobs rather than to develop new housing. The city's First Source program encourages businesses to hire local residents, especially for entry- and intermediate-level jobs, and sponsors vocational training to ensure residents are employment-ready. While the program is voluntary, some 300 businesses have used it to date, placing more than 3,000 city residents in local jobs since it was launched in 1986. When needed, these carrots are matched by sticks, since the city is not shy about

³ California Planning Roundtable (2008) Deconstructing Jobs-Housing Balance at p. 6, available at <https://cproundtable.org/static/media/uploads/publications/cpr-jobs-housing.pdf>

⁴ Cervero, Robert and Duncan, Michael (2006) Which Reduces Vehicle Travel More: Jobs-Housing Balance or Retail-Housing Mixing? Journal of the American Planning Association 72 (4), 475-490, 482, available at <http://reconnectingamerica.org/assets/Uploads/UTCT-825.pdf>.

negotiating corporate participation in First Source as a condition of approval for development permits.

Therefore, the County should consider utilizing local workforce policies and requirements to benefit the local area economically and to mitigate greenhouse gas, improve air quality, and reduce transportation impacts.

II. THE COUNTY SHOULD IMPOSE TRAINING REQUIREMENTS FOR THE PROJECT'S CONSTRUCTION ACTIVITIES TO PREVENT COMMUNITY SPREAD OF COVID-19 AND OTHER INFECTIOUS DISEASES

Construction work has been defined as a lower to high-risk activity for COVID-19 spread by the Occupational Safety and Health Administration. Recently, several construction sites have been identified as sources of community spread of COVID-19.⁵

WSRCC recommends that the County adopt additional requirements to mitigate public health risks from the Project's construction activities. WSRCC requests that the County require safe on-site construction work practices as well as training and certification for any construction workers on the Project Site.

In particular, based upon WSRCC's experience with safe construction site work practices, WSRCC recommends that the County require that while construction activities are being conducted at the Project Site:

Construction Site Design:

- The Project Site will be limited to two controlled entry points.
- Entry points will have temperature screening technicians taking temperature readings when the entry point is open.
- The Temperature Screening Site Plan shows details regarding access to the Project Site and Project Site logistics for conducting temperature screening.

⁵ Santa Clara County Public Health (June 12, 2020) COVID-19 CASES AT CONSTRUCTION SITES HIGHLIGHT NEED FOR CONTINUED VIGILANCE IN SECTORS THAT HAVE REOPENED, available at <https://www.sccgov.org/sites/covid19/Pages/press-release-06-12-2020-cases-at-construction-sites.aspx>.

- A 48-hour advance notice will be provided to all trades prior to the first day of temperature screening.
- The perimeter fence directly adjacent to the entry points will be clearly marked indicating the appropriate 6-foot social distancing position for when you approach the screening area. Please reference the Apex temperature screening site map for additional details.
- There will be clear signage posted at the project site directing you through temperature screening.
- Provide hand washing stations throughout the construction site.

Testing Procedures:

- The temperature screening being used are non-contact devices.
- Temperature readings will not be recorded.
- Personnel will be screened upon entering the testing center and should only take 1-2 seconds per individual.
- Hard hats, head coverings, sweat, dirt, sunscreen or any other cosmetics must be removed on the forehead before temperature screening.
- Anyone who refuses to submit to a temperature screening or does not answer the health screening questions will be refused access to the Project Site.
- Screening will be performed at both entrances from 5:30 am to 7:30 am.; main gate [ZONE 1] and personnel gate [ZONE 2]
- After 7:30 am only the main gate entrance [ZONE 1] will continue to be used for temperature testing for anybody gaining entry to the project site such as returning personnel, deliveries, and visitors.

- If the digital thermometer displays a temperature reading above 100.0 degrees Fahrenheit, a second reading will be taken to verify an accurate reading.
- If the second reading confirms an elevated temperature, DHS will instruct the individual that he/she will not be allowed to enter the Project Site. DHS will also instruct the individual to promptly notify his/her supervisor and his/her human resources (HR) representative and provide them with a copy of Annex A.

Planning

- Require the development of an Infectious Disease Preparedness and Response Plan that will include basic infection prevention measures (requiring the use of personal protection equipment), policies and procedures for prompt identification and isolation of sick individuals, social distancing (prohibiting gatherings of no more than 10 people including all-hands meetings and all-hands lunches) communication and training and workplace controls that meet standards that may be promulgated by the Center for Disease Control, Occupational Safety and Health Administration, Cal/OSHA, California Department of Public Health or applicable local public health agencies.⁶

The United Brotherhood of Carpenters and Carpenters International Training Fund has developed COVID-19 Training and Certification to ensure that WSRCC members and apprentices conduct safe work practices. The County should require that all construction workers undergo COVID-19 Training and Certification before being allowed to conduct construction activities at the Project Site.

⁶ See also The Center for Construction Research and Training, North America's Building Trades Unions (April 27 2020) NABTU and CPWR COVID-19 Standards for U.S. Construction Sites, available at https://www.cpwr.com/sites/default/files/NABTU_CPWR_Standards_COVID-19.pdf; Los Angeles County Department of Public Works (2020) Guidelines for Construction Sites During COVID-19 Pandemic, available at https://dpw.lacounty.gov/building-and-safety/docs/pw_guidelines-construction-sites.pdf.

WSRCC has also developed a rigorous Infection Control Risk Assessment (**ICRA**) training program to ensure it delivers a workforce that understands how to identify and control infection risks by implementing protocols to protect themselves and all others during renovation and construction projects in healthcare environments.⁷

ICRA protocols are intended to contain pathogens, control airflow, and protect patients during the construction, maintenance, and renovation of healthcare facilities. ICRA protocols prevent cross contamination, minimizing the risk of secondary infections in patients at hospital facilities.

The County should require the Project to be built using a workforce trained in ICRA protocols.

III. THE PROJECT WOULD BE APPROVED IN VIOLATION OF THE CALIFORNIA ENVIRONMENTAL QUALITY ACT

A. Background Concerning the California Environmental Quality Act

The California Environmental Quality Act is a California statute designed to inform decision-makers and the public about the potential significant environmental effects of a project. 14 California Code of Regulations (“**CEQA Guidelines**”), § 15002, subd. (a)(1).⁸ At its core, its purpose is to “inform the public and its responsible officials of the environmental consequences of their decisions *before* they are made.” *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553, 564.

CEQA directs public agencies to avoid or reduce environmental damage, when possible, by requiring alternatives or mitigation measures. CEQA Guidelines, § 15002, subds. (a)(2)-(3); see also *Berkeley Keep Jets Over the Bay Committee v. Board of Port Comes* (2001) 91 Cal.App.4th 1344, 1354; *Citizens of Goleta Valley v. Board of Supervisors* (1990) 52 Cal.3d 553; *Laurel Heights Improvement Assn.*, 47 Cal.3d at p. 400. The EIR serves to provide public agencies and the public in general with information about the effect that a proposed project is likely to have on the environment and to “identify ways that environmental damage can be avoided or significantly reduced.” CEQA

⁷ For details concerning Carpenters’ ICRA training program, see [ICRA Best Practices in Health-Care Construction \(swmsctf.org\)](https://swmsctf.org)

⁸ The CEQA Guidelines, codified in Title 14 of the California Code of Regulations, section 15000 et seq., are regulatory guidelines promulgated by the state Natural Resources Agency for the implementation of CEQA. Cal. Pub. Res. Code, § 21083. The CEQA Guidelines are given “great weight in interpreting CEQA except when . . . clearly unauthorized or erroneous.” *Center for Biological Diversity v. Dept. of Fish & Wildlife* (2015) 62 Cal.4th 204, 217.

Guidelines, § 15002, subd. (a)(2). If the project has a significant effect on the environment, the agency may approve the project only upon finding that it has “eliminated or substantially lessened all significant effects on the environment where feasible” and that any unavoidable significant effects on the environment are “acceptable due to overriding concerns” specified in Public Resources Code section 21081. See CEQA Guidelines, § 15092, subds. (b)(2)(A)-(B).

While the courts review an EIR using an ‘abuse of discretion’ standard, the reviewing court is not to *uncritically* rely on every study or analysis presented by a project proponent in support of its position. *Berkeley Jets*, 91 Cal.App.4th at p. 1355 (quoting *Laurel Heights Improvement Assn.*, 47 Cal.3d at pp. 391, 409 fn. 12) (internal quotations omitted). A clearly inadequate or unsupported study is entitled to no judicial deference. *Id.* Drawing this line and determining whether the EIR complies with CEQA’s information disclosure requirements presents a question of law subject to independent review by the courts. *Sierra Club v. County of Fresno* (2018) 6 Cal.5th 502, 515; *Madera Oversight Coalition, Inc. v. County of Madera* (2011) 199 Cal.App.4th 48, 102, 131. As the court stated in *Berkeley Jets*, prejudicial abuse of discretion occurs if the failure to include relevant information precludes informed decision-making and informed public participation, thereby thwarting the statutory goals of the EIR process. 91 Cal.App.4th at p. 1355 (internal quotations omitted).

The preparation and circulation of an EIR is more than a set of technical hurdles for agencies and developers to overcome. *Communities for a Better Environment v. Richmond* (2010) 184 Cal.App.4th 70, 80 (quoting *Vineyard Area Citizens for Responsible Growth, Inc. v. City of Rancho Cordova* (2007) 40 Cal.4th 412, 449-450). The EIR’s function is to ensure that government officials who decide to build or approve a project do so with a full understanding of the environmental consequences and, equally important, that the public is assured those consequences have been considered. *Id.* For the EIR to serve these goals it must present information so that the foreseeable impacts of pursuing the project can be understood and weighed, and the public must be given an adequate opportunity to comment on that presentation before the decision to go forward is made. *Id.*

A strong presumption in favor of requiring preparation of an EIR is built into CEQA. This presumption is reflected in what is known as the “fair argument” standard under which an EIR must be prepared whenever substantial evidence in the record supports a fair argument that a project may have a significant effect on the environment. *Quail*

Botanical Gardens Found., Inc. v. City of Encinitas (1994) 29 Cal.App.4th 1597, 1602;
Friends of “B” St. v. City of Hayward (1980) 106 Cal.3d 988, 1002.

The fair argument test stems from the statutory mandate that an EIR be prepared for any project that “may have a significant effect on the environment.” PRC, § 21151; see *No Oil, Inc. v. City of Los Angeles* (1974) 13 Cal.App.3d 68, 75; accord *Jensen v. City of Santa Rosa* (2018) 23 Cal.App.5th 877, 884. Under this test, if a proposed project is not exempt and may cause a significant effect on the environment, the lead agency must prepare an EIR. PRC, §§ 21100 (a), 21151; CEQA Guidelines, § 15064 (a)(1), (f)(1). An EIR may be dispensed with only if the lead agency finds no substantial evidence in the initial study or elsewhere in the record that the project may have a significant effect on the environment. *Parker Shattuck Neighbors v. Berkeley City Council* (2013) 222 Cal.App.4th 768, 785. In such a situation, the agency must adopt a negative declaration. PRC, § 21080, subd. (c)(1); CEQA Guidelines, §§ 15063 (b)(2), 15064(f)(3).

“Significant effect upon the environment” is defined as “a substantial or potentially substantial adverse change in the environment.” PRC, § 21068; CEQA Guidelines, § 15382. A project may have a significant effect on the environment if there is a reasonable probability that it will result in a significant impact. *No Oil, Inc.*, 13 Cal.3d at p. 83 fn. 16; see *Sundstrom v. County of Mendocino* (1988) 202 Cal.App.3d 296, 309. If any aspect of the project may result in a significant impact on the environment, an EIR must be prepared even if the overall effect of the project is beneficial. CEQA Guidelines, § 15063(b)(1); see *County Sanitation Dist. No. 2 v. County of Kern* (2005) 127 Cal.App.4th 1544, 1580.

This standard sets a “low threshold” for preparation of an EIR. *Consolidated Irrigation Dist. v. City of Selma* (2012) 204 Cal.App.4th 187, 207; *Nelson v. County of Kern* (2010) 190 Cal.App.4th 252; *Pocket Protectors v. City of Sacramento* (2004) 124 Cal.App.4th 903, 928; *Bowman v. City of Berkeley* (2004) 122 Cal.App.4th 572, 580; *Citizen Action to Serve All Students v. Thornley* (1990) 222 Cal.App.3d 748, 754; *Sundstrom*, 202 Cal.App.3d at p. 310. If substantial evidence in the record supports a fair argument that the project may have a significant environmental effect, the lead agency must prepare an EIR even if other substantial evidence before it indicates the project will have no significant effect. See *Jensen*, 23 Cal.App.5th at p. 886; *Clews Land & Livestock v. City of San Diego* (2017) 19 Cal.App.5th 161, 183; *Stanislaus Audubon Society, Inc. v. County of Stanislaus* (1995) 33 Cal.App.4th 144, 150; *Brentwood Assn. for No Drilling, Inc. v. City of*

Los Angeles (1982) 134 Cal.App.3d 491; *Friends of “B” St.*, 106 Cal.App.3d 988; CEQA Guidelines, § 15064(f)(1).

B. CEQA Requires Subsequent or Supplemental Environmental Review When Substantial Changes or New Information Comes to Light

Section 21092.1 of the California Public Resources Code requires that “[w]hen significant new information is added to an environmental impact report after notice has been given pursuant to Section 21092 ... but prior to certification, the public agency shall give notice again pursuant to Section 21092, and consult again pursuant to Sections 21104 and 21153 before certifying the environmental impact report” in order to give the public a chance to review and comment upon the information. (CEQA Guidelines § 15088.5.)

Significant new information includes “changes in the project or environmental setting as well as additional data or other information” that “deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative).” (CEQA Guidelines § 15088.5(a).) Examples of significant new information requiring recirculation include “new significant environmental impacts from the project or from a new mitigation measure,” “substantial increase in the severity of an environmental impact,” “feasible project alternative or mitigation measure considerably different from others previously analyzed” as well as when “the draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded.” (*Id.*)

An agency has an obligation to recirculate an environmental impact report for public notice and comment due to “significant new information” regardless of whether the agency opts to include it in a project’s environmental impact report. (*Cadiz Land Co. v. Rail Cycle* (2000) 83 Cal.App.4th 74, 95 [finding that in light of a new expert report disclosing potentially significant impacts to groundwater supply “the EIR should have been revised and recirculated for purposes of informing the public and governmental agencies of the volume of groundwater at risk and to allow the public and governmental agencies to respond to such information.”].) If significant new information was brought to the attention of an agency prior to certification, an agency is required to revise and recirculate that information as part of the environmental impact report.

1. *New Information on Special Status Species Was Introduced in the FEIR.*

In the FEIR, **four additional bat special status bat species** were identified through Appendix O, a 2024 memorandum prepared by Glenn Lukos Associates. The memorandum identifies the Western yellow bat (*Lasiurus xanthinus*), Western red bat (*Lasiurus blossevillii*), Hoary bat (*Lasiurus cinereus*), and Yuma myotis (*Myotis yumanensis*). These additional bats were “added to the DEIR biological resources analysis to clarify and amplify the analysis, but d[id] not change the DEIR impact conclusions.” (Appendix O, pg 1).

However, these survey results are based on field surveys performed **six years ago**; focused surveys were conducted by GLA biologists on July 10, 2018, July 23, July 30, 2018, and August 29, 2018 (Appendix O, pg. 5). The addition of these new species **raises additional concerns over other special status species in the area that may have been absent at the time of the original studies.**

1. *The Biological Surveys are Outdated and Need to be Updated.*

While the original survey methodology seems sound, the results are significantly less reliable six years later as **bats change roosts seasonally.** (See Caltrans Bat Mitigation: A Guide to Developing Feasible and Effective Solutions, 2019). Indeed, the change in use of the golf course, which closed earlier this year, may have been a significant enough change to result in more frequent use of the site by bat colonies. As such, a more recent set of surveys is necessary to determine whether the special status species of bats are present on the site.

The BIO-3 mitigation measure is not sufficient to address these concerns as it does not allow for a timely set of surveys to occur as 14-days pre-construction would not allow for a full picture of bat presence on site, especially considering that bats are migratory animals.

As noted above, the change in conditions on the site may have brought in special status species that were originally absent when the surveys were performed. Additionally, the increased rainfall over the past few years resulted in a resurgence of many species in areas that were previously abandoned due to drought.⁹ Importantly,

⁹ LA Times, *SoCal can expect more birds, rabbits, rats and snakes in wildlife surge after record rain*, April 2023, available at: <https://www.latimes.com/california/story/2023-04-13/wildlife-rebounds-after-heavy-rains>

the increases in wildlife population will likely take at least a year to develop after these heavy rain seasons.¹⁰

The updated memorandum, while appreciated for expanding the scope, is ultimately insufficient as *the data relied upon is out of date*. BIO-3, while important for validating any site surveys performed, is insufficient to clarify the full presence of bats on site as it does not allow for multiple surveys to be conducted over a longer period.

As the surveys are out of date, the other biological resource mitigations, BIO-1 and BIO-2, should also be reevaluated with up-to-date information on the site's special status species and their presence, especially avian species whose migratory practices are heavily influenced by a location's food availability. The increased rain has brought an increase in many of these species' food sources, which has led to an increase in population numbers.¹¹ The remaining mitigations do not allow sufficient time to collect updated surveys or to fully understand the changes in the jurisdictional resources.

These comments raise significant new information as to the need for updated biological resource surveys on the Project Site. As such, WSRCC requests the County perform further analysis of the site and its potential impacts on the special status species through a revised and recirculated EIR.

IV. CONCLUSION

In sum, WSRCC requests that the Board of Supervisors grant the appeal, require a local workforce, impose training requirements for the Project's construction activities to prevent community spread of Covid-19 and other infectious diseases, and that the County conduct further site surveys relating to potential special status on the Project site due to the change in site conditions. If the City has any questions, feel free to contact my office.

Subject: Local Hire Requirements and Considerations for Greenhouse Gas Modeling

Dear Mr. Tsai,

Soil Water Air Protection Enterprise (“SWAPE”) is pleased to provide the following draft technical report explaining the significance of worker trips required for construction of land use development projects with respect to the estimation of greenhouse gas (“GHG”) emissions. The report will also discuss the potential for local hire requirements to reduce the length of worker trips, and consequently, reduced or mitigate the potential GHG impacts.

Worker Trips and Greenhouse Gas Calculations

The California Emissions Estimator Model (“CalEEMod”) is a “statewide land use emissions computer model designed to provide a uniform platform for government agencies, land use planners, and environmental professionals to quantify potential criteria pollutant and greenhouse gas (GHG) emissions associated with both construction and operations from a variety of land use projects.”¹ CalEEMod quantifies construction-related emissions associated with land use projects resulting from off-road construction equipment; on-road mobile equipment associated with workers, vendors, and hauling; fugitive dust associated with grading, demolition, truck loading, and on-road vehicles traveling along paved and unpaved roads; and architectural coating activities; and paving.²

The number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.³

¹ “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

² “California Emissions Estimator Model.” CAPCOA, 2017, available at: <http://www.aqmd.gov/caleemod/home>.

³ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

Specifically, the number and length of vehicle trips is utilized to estimate the vehicle miles travelled (“VMT”) associated with construction. Then, utilizing vehicle-class specific EMFAC 2014 emission factors, CalEEMod calculates the vehicle exhaust, evaporative, and dust emissions resulting from construction-related VMT, including personal vehicles for worker commuting.⁴

Specifically, in order to calculate VMT, CalEEMod multiplies the average daily trip rate by the average overall trip length (see excerpt below):

$$\text{“VMT}_d = \Sigma(\text{Average Daily Trip Rate}_i * \text{Average Overall Trip Length}_i)_n$$

Where:

n = Number of land uses being modeled.”⁵

Furthermore, to calculate the on-road emissions associated with worker trips, CalEEMod utilizes the following equation (see excerpt below):

$$\text{“Emissions}_{\text{pollutant}} = \text{VMT} * \text{EF}_{\text{running,pollutant}}$$

Where:

$\text{Emissions}_{\text{pollutant}}$ = emissions from vehicle running for each pollutant

VMT = vehicle miles traveled

$\text{EF}_{\text{running,pollutant}}$ = emission factor for running emissions.”⁶

Thus, there is a direct relationship between trip length and VMT, as well as a direct relationship between VMT and vehicle running emissions. In other words, when the trip length is increased, the VMT and vehicle running emissions increase as a result. Thus, vehicle running emissions can be reduced by decreasing the average overall trip length, by way of a local hire requirement or otherwise.

Default Worker Trip Parameters and Potential Local Hire Requirements

As previously discussed, the number, length, and vehicle class of worker trips are utilized by CalEEMod to calculate emissions associated with the on-road vehicle trips required to transport workers to and from the Project site during construction.⁷ In order to understand how local hire requirements and associated worker trip length reductions impact GHG emissions calculations, it is important to consider the CalEEMod default worker trip parameters. CalEEMod provides recommended default values based on site-specific information, such as land use type, meteorological data, total lot acreage, project type and typical equipment associated with project type. If more specific project information is known, the user can change the default values and input project-specific values, but the California Environmental Quality Act (“CEQA”) requires that such changes be justified by substantial evidence.⁸ The default number of construction-related worker trips is calculated by multiplying the

⁵ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 23.

⁶ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

⁷ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

⁸ CalEEMod User Guide, available at: <http://www.caleemod.com/>, p. 1, 9.

number of pieces of equipment for all phases by 1.25, with the exception of worker trips required for the building construction and architectural coating phases.⁹ Furthermore, the worker trip vehicle class is a 50/25/25 percent mix of light duty autos, light duty truck class 1 and light duty truck class 2, respectively.”¹⁰ Finally, the default worker trip length is consistent with the length of the operational home-to-work vehicle trips.¹¹ The operational home-to-work vehicle trip lengths are:

“[B]ased on the *location* and *urbanization* selected on the project characteristic screen. These values were *supplied by the air districts or use a default average for the state*. Each district (or county) also assigns trip lengths for urban and rural settings” (emphasis added).¹²

Thus, the default worker trip length is based on the location and urbanization level selected by the User when modeling emissions. The below table shows the CalEEMod default rural and urban worker trip lengths by air basin (see excerpt below and Attachment A).¹³

Worker Trip Length by Air Basin		
Air Basin	Rural (miles)	Urban (miles)
Great Basin Valleys	16.8	10.8
Lake County	16.8	10.8
Lake Tahoe	16.8	10.8
Mojave Desert	16.8	10.8
Mountain Counties	16.8	10.8
North Central Coast	17.1	12.3
North Coast	16.8	10.8
Northeast Plateau	16.8	10.8
Sacramento Valley	16.8	10.8
Salton Sea	14.6	11
San Diego	16.8	10.8
San Francisco Bay Area	10.8	10.8
San Joaquin Valley	16.8	10.8
South Central Coast	16.8	10.8
South Coast	19.8	14.7
Average	16.47	11.17
Minimum	10.80	10.80
Maximum	19.80	14.70
Range	9.00	3.90

⁹ “CalEEMod User’s Guide.” CAPCOA, November 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/01_user-39-s-guide2016-3-2_15november2017.pdf?sfvrsn=4, p. 34.

¹⁰ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 15.

¹¹ “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 14.

¹² “Appendix A Calculation Details for CalEEMod.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/02_appendix-a2016-3-2.pdf?sfvrsn=6, p. 21.

¹³ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-84 – D-86.

As demonstrated above, default rural worker trip lengths for air basins in California vary from 10.8- to 19.8- miles, with an average of 16.47 miles. Furthermore, default urban worker trip lengths vary from 10.8- to 14.7- miles, with an average of 11.17 miles. Thus, while default worker trip lengths vary by location, default urban worker trip lengths tend to be shorter in length. Based on these trends evident in the CalEEMod default worker trip lengths, we can reasonably assume that the efficacy of a local hire requirement is especially dependent upon the urbanization of the project site, as well as the project location.

Practical Application of a Local Hire Requirement and Associated Impact

To provide an example of the potential impact of a local hire provision on construction-related GHG emissions, we estimated the significance of a local hire provision for the Village South Specific Plan (“Project”) located in the City of Claremont (“City”). The Project proposed to construct 1,000 residential units, 100,000-SF of retail space, 45,000-SF of office space, as well as a 50-room hotel, on the 24-acre site. The Project location is classified as Urban and lies within the Los Angeles-South Coast County. As a result, the Project has a default worker trip length of 14.7 miles.¹⁴ In an effort to evaluate the potential for a local hire provision to reduce the Project’s construction-related GHG emissions, we prepared an updated model, reducing all worker trip lengths to 10 miles (see Attachment B). Our analysis estimates that if a local hire provision with a 10-mile radius were to be implemented, the GHG emissions associated with Project construction would decrease by approximately 17% (see table below and Attachment C).

Local Hire Provision Net Change	
Without Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,623
Amortized Construction GHG Emissions (MT CO ₂ e/year)	120.77
With Local Hire Provision	
Total Construction GHG Emissions (MT CO ₂ e)	3,024
Amortized Construction GHG Emissions (MT CO ₂ e/year)	100.80
% Decrease in Construction-related GHG Emissions	17%

As demonstrated above, by implementing a local hire provision requiring 10 mile worker trip lengths, the Project could reduce potential GHG emissions associated with construction worker trips. More broadly, any local hire requirement that results in a decreased worker trip length from the default value has the potential to result in a reduction of construction-related GHG emissions, though the significance of the reduction would vary based on the location and urbanization level of the project site.

This serves as an example of the potential impacts of local hire requirements on estimated project-level GHG emissions, though it does not indicate that local hire requirements would result in reduced construction-related GHG emission for all projects. As previously described, the significance of a local hire requirement depends on the worker trip length enforced and the default worker trip length for the project’s urbanization level and location.

¹⁴ “Appendix D Default Data Tables.” CAPCOA, October 2017, available at: http://www.aqmd.gov/docs/default-source/caleemod/05_appendix-d2016-3-2.pdf?sfvrsn=4, p. D-85.

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Annual

1.0 Project Characteristics**1.1 Land Usage**

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Village South Specific Plan (Proposed)
Los Angeles-South Coast County, Summer

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Los Angeles-South Coast County, Winter

1.0 Project Characteristics

1.1 Land Usage

Land Uses	Size	Metric	Lot Acreage	Floor Surface Area	Population
General Office Building	45.00	1000sqft	1.03	45,000.00	0
High Turnover (Sit Down Restaurant)	36.00	1000sqft	0.83	36,000.00	0
Hotel	50.00	Room	1.67	72,600.00	0
Quality Restaurant	8.00	1000sqft	0.18	8,000.00	0
Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Annual

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Apartments Low Rise	25.00	Dwelling Unit	1.56	25,000.00	72
Apartments Mid Rise	975.00	Dwelling Unit	25.66	975,000.00	2789
Regional Shopping Center	56.00	1000sqft	1.29	56,000.00	0

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Summer

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

1.2 Other Project Characteristics

Urbanization	Urban	Wind Speed (m/s)	2.2	Precipitation Freq (Days)	33
Climate Zone	9			Operational Year	2028
Utility Company	Southern California Edison				
CO2 Intensity (lb/MW hr)	702.44	CH4 Intensity (lb/MW hr)	0.029	N2O Intensity (lb/MW hr)	0.006

1.3 User Entered Comments & Non-Default Data

Village South Specific Plan (Proposed) - Los Angeles-South Coast County, Winter

Project Characteristics - Consistent with the DEIR's model.

Land Use - See SWAPE comment regarding residential and retail land uses.

Construction Phase - See SWAPE comment regarding individual construction phase lengths.

Demolition - Consistent with the DEIR's model. See SWAPE comment regarding demolition.

Vehicle Trips - Saturday trips consistent with the DEIR's model. See SWAPE comment regarding weekday and Sunday trips.

Woodstoves - Woodstoves and wood-burning fireplaces consistent with the DEIR's model. See SWAPE comment regarding gas fireplaces.

Energy Use -

Construction Off-road Equipment Mitigation - See SWAPE comment on construction-related mitigation.

Area Mitigation - See SWAPE comment regarding operational mitigation measures.

Water Mitigation - See SWAPE comment regarding operational mitigation measures.

Trips and VMT - Local hire provision

Amortized (MT CO2e/year)	100.80
<i>% Decrease in Construction-related GHG Emissions</i>	17%

EXHIBIT B

Paul Rosenfeld, Ph.D.

Principal Environmental Chemist

Chemical Fate and Transport & Air Dispersion Modeling

Risk Assessment & Remediation Specialist

Education

Ph.D. Soil Chemistry, University of Washington, 1999. Dissertation on volatile organic compound filtration.

M.S. Environmental Science, U.C. Berkeley, 1995. Thesis on organic waste economics.

B.A. Environmental Studies, U.C. Santa Barbara, 1991. Thesis on wastewater treatment.

Professional Experience

Dr. Rosenfeld has over 25 years' experience conducting environmental investigations and risk assessments for evaluating impacts to human health, property, and ecological receptors. His expertise focuses on the fate and transport of environmental contaminants, human health risk, exposure assessment, and ecological restoration. Dr. Rosenfeld has evaluated and modeled emissions from unconventional oil drilling operations, oil spills, landfills, boilers and incinerators, process stacks, storage tanks, confined animal feeding operations, and many other industrial and agricultural sources. His project experience ranges from monitoring and modeling of pollution sources to evaluating impacts of pollution on workers at industrial facilities and residents in surrounding communities.

Dr. Rosenfeld has investigated and designed remediation programs and risk assessments for contaminated sites containing lead, heavy metals, mold, bacteria, particulate matter, petroleum hydrocarbons, chlorinated solvents, pesticides, radioactive waste, dioxins and furans, semi- and volatile organic compounds, PCBs, PAHs, perchlorate, asbestos, per- and poly-fluoroalkyl substances (PFOA/PFOS), unusual polymers, fuel oxygenates (MTBE), among other pollutants. Dr. Rosenfeld also has experience evaluating greenhouse gas emissions from various projects and is an expert on the assessment of odors from industrial and agricultural sites, as well as the evaluation of odor nuisance impacts and technologies for abatement of odorous emissions. As a principal scientist at SWAPE, Dr. Rosenfeld directs air dispersion modeling and exposure assessments. He has served as an expert witness and testified about pollution sources causing nuisance and/or personal injury at dozens of sites and has testified as an expert witness on more than ten cases involving exposure to air contaminants from industrial sources.

Professional History:

Soil Water Air Protection Enterprise (SWAPE); 2003 to present; Principal and Founding Partner
UCLA School of Public Health; 2007 to 2011; Lecturer (Assistant Researcher)
UCLA School of Public Health; 2003 to 2006; Adjunct Professor
UCLA Environmental Science and Engineering Program; 2002-2004; Doctoral Intern Coordinator
UCLA Institute of the Environment, 2001-2002; Research Associate
Komex H₂O Science, 2001 to 2003; Senior Remediation Scientist
National Groundwater Association, 2002-2004; Lecturer
San Diego State University, 1999-2001; Adjunct Professor
Anteon Corp., San Diego, 2000-2001; Remediation Project Manager
Ogden (now Amec), San Diego, 2000-2000; Remediation Project Manager
Bechtel, San Diego, California, 1999 – 2000; Risk Assessor
King County, Seattle, 1996 – 1999; Scientist
James River Corp., Washington, 1995-96; Scientist
Big Creek Lumber, Davenport, California, 1995; Scientist
Plumas Corp., California and USFS, Tahoe 1993-1995; Scientist
Peace Corps and World Wildlife Fund, St. Kitts, West Indies, 1991-1993; Scientist

Rosenfeld, P.E., C.L. Henry. (1998). Characterization, Quantification, and Control of Odor Emissions from Biosolids Application To Forest Soil. *Biofest*. Lecture conducted from Lake Chelan, Washington.

Rosenfeld, P.E., C.L. Henry, R. Harrison. (1998). Oat and Grass Seed Germination and Nitrogen and Sulfur Emissions Following Biosolids Incorporation With High-Carbon Wood-Ash. Water Environment Federation 12th Annual Residuals and Biosolids Management Conference Proceedings. Lecture conducted from Bellevue Washington.

Rosenfeld, P.E., C.L. Henry, R. B. Harrison, and R. Dills. (1997). Comparison of Odor Emissions From Three Different Biosolids Applied to Forest Soil. *Soil Science Society of America*. Lecture conducted from Anaheim California.

Teaching Experience:

UCLA Department of Environmental Health (Summer 2003 through 2010) Taught Environmental Health Science 100 to students, including undergrad, medical doctors, public health professionals and nurses. Course focused on the health effects of environmental contaminants.

National Ground Water Association, Successful Remediation Technologies. Custom Course in Sante Fe, New Mexico. May 21, 2002. Focused on fate and transport of fuel contaminants associated with underground storage tanks.

National Ground Water Association; Successful Remediation Technologies Course in Chicago Illinois. April 1, 2002. Focused on fate and transport of contaminants associated with Superfund and RCRA sites.

California Integrated Waste Management Board, April and May, 2001. Alternative Landfill Caps Seminar in San Diego, Ventura, and San Francisco. Focused on both prescriptive and innovative landfill cover design.

UCLA Department of Environmental Engineering, February 5, 2002. Seminar on Successful Remediation Technologies focusing on Groundwater Remediation.

University Of Washington, Soil Science Program, Teaching Assistant for several courses including: Soil Chemistry, Organic Soil Amendments, and Soil Stability.

U.C. Berkeley, Environmental Science Program Teaching Assistant for Environmental Science 10.

Academic Grants Awarded:

California Integrated Waste Management Board. \$41,000 grant awarded to UCLA Institute of the Environment. Goal: To investigate effect of high carbon wood ash on volatile organic emissions from compost. 2001.

Synagro Technologies, Corona California: \$10,000 grant awarded to San Diego State University. Goal: investigate effect of biosolids for restoration and remediation of degraded coastal sage soils. 2000.

King County, Department of Research and Technology, Washington State. \$100,000 grant awarded to University of Washington: Goal: To investigate odor emissions from biosolids application and the effect of polymers and ash on VOC emissions. 1998.

Northwest Biosolids Management Association, Washington State. \$20,000 grant awarded to investigate effect of polymers and ash on VOC emissions from biosolids. 1997.

James River Corporation, Oregon: \$10,000 grant was awarded to investigate the success of genetically engineered Poplar trees with resistance to round-up. 1996.

United State Forest Service, Tahoe National Forest: \$15,000 grant was awarded to investigating fire ecology of the Tahoe National Forest. 1995.

Kellogg Foundation, Washington D.C. \$500 grant was awarded to construct a large anaerobic digester on St. Kitts in West Indies. 1993

Deposition and/or Trial Testimony:

In the United States District Court For The District of New Jersey

Duarte et al, *Plaintiffs*, vs. United States Metals Refining Company et. al. *Defendant*.

Case No.: 2:17-cv-01624-ES-SCM

Rosenfeld Deposition. 6-7-2019

In the United States District Court of Southern District of Texas Galveston Division

M/T Carla Maersk, *Plaintiffs*, vs. Conti 168., Schiffahrts-GMBH & Co. Bulker KG MS “Conti Perdido”
Defendant.

Case No.: 3:15-CV-00106 consolidated with 3:15-CV-00237

Rosenfeld Deposition. 5-9-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

Carole-Taddeo-Bates et al., vs. Ifran Khan et al., Defendants

Case No.: No. BC615636

Rosenfeld Deposition, 1-26-2019

In The Superior Court of the State of California In And For The County Of Los Angeles – Santa Monica

The San Gabriel Valley Council of Governments et al. vs El Adobe Apts. Inc. et al., Defendants

Case No.: No. BC646857

Rosenfeld Deposition, 10-6-2018; Trial 3-7-19

In United States District Court For The District of Colorado

Bells et al. Plaintiff vs. The 3M Company et al., Defendants

Case: No 1:16-cv-02531-RBJ

Rosenfeld Deposition, 3-15-2018 and 4-3-2018

In The District Court Of Regan County, Texas, 112th Judicial District

Phillip Bales et al., Plaintiff vs. Dow Agrosiences, LLC, et al., Defendants

Cause No 1923

Rosenfeld Deposition, 11-17-2017

In The Superior Court of the State of California In And For The County Of Contra Costa

Simons et al., Plaintiffs vs. Chevron Corporation, et al., Defendants

Cause No C12-01481

Rosenfeld Deposition, 11-20-2017

In The Circuit Court Of The Twentieth Judicial Circuit, St Clair County, Illinois

Martha Custer et al., Plaintiff vs. Cerro Flow Products, Inc., Defendants

Case No.: No. 0i9-L-2295

Rosenfeld Deposition, 8-23-2017

In The Superior Court of the State of California, For The County of Los Angeles

Warrn Gilbert and Penny Gilber, Plaintiff vs. BMW of North America LLC

Case No.: LC102019 (c/w BC582154)

Rosenfeld Deposition, 8-16-2017, Trail 8-28-2018

In the Northern District Court of Mississippi, Greenville Division

Brenda J. Cooper, et al., *Plaintiffs*, vs. Meritor Inc., et al., *Defendants*

Case Number: 4:16-cv-52-DMB-JVM

Rosenfeld Deposition: July 2017

In The Superior Court of the State of Washington, County of Snohomish
Michael Davis and Julie Davis et al., Plaintiff vs. Cedar Grove Composting Inc., Defendants
Case No.: No. 13-2-03987-5
Rosenfeld Deposition, February 2017
Trial, March 2017

In The Superior Court of the State of California, County of Alameda
Charles Spain., Plaintiff vs. Thermo Fisher Scientific, et al., Defendants
Case No.: RG14711115
Rosenfeld Deposition, September 2015

In The Iowa District Court In And For Poweshiek County
Russell D. Winburn, et al., Plaintiffs vs. Doug Hoksbergen, et al., Defendants
Case No.: LALA002187
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Jerry Dovico, et al., Plaintiffs vs. Valley View Sine LLC, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Iowa District Court For Wapello County
Doug Pauls, et al., et al., Plaintiffs vs. Richard Warren, et al., Defendants
Law No.: LALA105144 - Division A
Rosenfeld Deposition, August 2015

In The Circuit Court of Ohio County, West Virginia
Robert Andrews, et al. v. Antero, et al.
Civil Action NO. 14-C-30000
Rosenfeld Deposition, June 2015

In The Third Judicial District County of Dona Ana, New Mexico
Betty Gonzalez, et al. Plaintiffs vs. Del Oro Dairy, Del Oro Real Estate LLC, Jerry Settles and Deward
DeRuyter, Defendants
Rosenfeld Deposition: July 2015

In The Iowa District Court For Muscatine County
Laurie Freeman et. al. Plaintiffs vs. Grain Processing Corporation, Defendant
Case No 4980
Rosenfeld Deposition: May 2015

In the Circuit Court of the 17th Judicial Circuit, in and For Broward County, Florida
Walter Hinton, et. al. Plaintiff, vs. City of Fort Lauderdale, Florida, a Municipality, Defendant.
Case Number CACE07030358 (26)
Rosenfeld Deposition: December 2014

In the United States District Court Western District of Oklahoma
Tommy McCarty, et al., Plaintiffs, v. Oklahoma City Landfill, LLC d/b/a Southeast Oklahoma City
Landfill, et al. Defendants.
Case No. 5:12-cv-01152-C
Rosenfeld Deposition: July 2014

In the County Court of Dallas County Texas
Lisa Parr et al, *Plaintiff*, vs. Aruba et al, *Defendant*.
Case Number cc-11-01650-E
Rosenfeld Deposition: March and September 2013
Rosenfeld Trial: April 2014

In the Court of Common Pleas of Tuscarawas County Ohio
John Michael Abicht, et al., *Plaintiffs*, vs. Republic Services, Inc., et al., *Defendants*
Case Number: 2008 CT 10 0741 (Cons. w/ 2009 CV 10 0987)
Rosenfeld Deposition: October 2012

In the United States District Court of Southern District of Texas Galveston Division
Kyle Cannon, Eugene Donovan, Genaro Ramirez, Carol Sassler, and Harvey Walton, each Individually and on behalf of those similarly situated, *Plaintiffs*, vs. BP Products North America, Inc., *Defendant*.
Case 3:10-cv-00622
Rosenfeld Deposition: February 2012
Rosenfeld Trial: April 2013

In the Circuit Court of Baltimore County Maryland
Philip E. Cvach, II et al., *Plaintiffs* vs. Two Farms, Inc. d/b/a Royal Farms, Defendants
Case Number: 03-C-12-012487 OT
Rosenfeld Deposition: September 2013

Matthew F. Hagemann, P.G., C.Hg., QSD, QSP

**Geologic and Hydrogeologic Characterization
Industrial Stormwater Compliance
Investigation and Remediation Strategies
Litigation Support and Testifying Expert
CEQA Review**

Education:

M.S. Degree, Geology, California State University Los Angeles, Los Angeles, CA, 1984.

B.A. Degree, Geology, Humboldt State University, Arcata, CA, 1982.

Professional Certifications:

California Professional Geologist

California Certified Hydrogeologist

Qualified SWPPP Developer and Practitioner

Professional Experience:

Matt has 25 years of experience in environmental policy, assessment and remediation. He spent nine years with the U.S. EPA in the RCRA and Superfund programs and served as EPA's Senior Science Policy Advisor in the Western Regional Office where he identified emerging threats to groundwater from perchlorate and MTBE. While with EPA, Matt also served as a Senior Hydrogeologist in the oversight of the assessment of seven major military facilities undergoing base closure. He led numerous enforcement actions under provisions of the Resource Conservation and Recovery Act (RCRA) while also working with permit holders to improve hydrogeologic characterization and water quality monitoring.

Matt has worked closely with U.S. EPA legal counsel and the technical staff of several states in the application and enforcement of RCRA, Safe Drinking Water Act and Clean Water Act regulations. Matt has trained the technical staff in the States of California, Hawaii, Nevada, Arizona and the Territory of Guam in the conduct of investigations, groundwater fundamentals, and sampling techniques.

Positions Matt has held include:

- Founding Partner, Soil/Water/Air Protection Enterprise (SWAPE) (2003 – present);
- Geology Instructor, Golden West College, 2010 – 2014;
- Senior Environmental Analyst, Komex H2O Science, Inc. (2000 -- 2003);

- Executive Director, Orange Coast Watch (2001 – 2004);
- Senior Science Policy Advisor and Hydrogeologist, U.S. Environmental Protection Agency (1989–1998);
- Hydrogeologist, National Park Service, Water Resources Division (1998 – 2000);
- Adjunct Faculty Member, San Francisco State University, Department of Geosciences (1993 – 1998);
- Instructor, College of Marin, Department of Science (1990 – 1995);
- Geologist, U.S. Forest Service (1986 – 1998); and
- Geologist, Dames & Moore (1984 – 1986).

Senior Regulatory and Litigation Support Analyst:

With SWAPE, Matt’s responsibilities have included:

- Lead analyst and testifying expert in the review of over 100 environmental impact reports since 2003 under CEQA that identify significant issues with regard to hazardous waste, water resources, water quality, air quality, Valley Fever, greenhouse gas emissions, and geologic hazards. Make recommendations for additional mitigation measures to lead agencies at the local and county level to include additional characterization of health risks and implementation of protective measures to reduce worker exposure to hazards from toxins and Valley Fever.
- Stormwater analysis, sampling and best management practice evaluation at industrial facilities.
- Manager of a project to provide technical assistance to a community adjacent to a former Naval shipyard under a grant from the U.S. EPA.
- Technical assistance and litigation support for vapor intrusion concerns.
- Lead analyst and testifying expert in the review of environmental issues in license applications for large solar power plants before the California Energy Commission.
- Manager of a project to evaluate numerous formerly used military sites in the western U.S.
- Manager of a comprehensive evaluation of potential sources of perchlorate contamination in Southern California drinking water wells.
- Manager and designated expert for litigation support under provisions of Proposition 65 in the review of releases of gasoline to sources drinking water at major refineries and hundreds of gas stations throughout California.
- Expert witness on two cases involving MTBE litigation.
- Expert witness and litigation support on the impact of air toxins and hazards at a school.
- Expert witness in litigation at a former plywood plant.

With Komex H2O Science Inc., Matt’s duties included the following:

- Senior author of a report on the extent of perchlorate contamination that was used in testimony by the former U.S. EPA Administrator and General Counsel.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of MTBE use, research, and regulation.
- Senior researcher in the development of a comprehensive, electronically interactive chronology of perchlorate use, research, and regulation.
- Senior researcher in a study that estimates nationwide costs for MTBE remediation and drinking water treatment, results of which were published in newspapers nationwide and in testimony against provisions of an energy bill that would limit liability for oil companies.
- Research to support litigation to restore drinking water supplies that have been contaminated by MTBE in California and New York.

- Expert witness testimony in a case of oil production-related contamination in Mississippi.
- Lead author for a multi-volume remedial investigation report for an operating school in Los Angeles that met strict regulatory requirements and rigorous deadlines.

- Development of strategic approaches for cleanup of contaminated sites in consultation with clients and regulators.

Executive Director:

As Executive Director with Orange Coast Watch, Matt led efforts to restore water quality at Orange County beaches from multiple sources of contamination including urban runoff and the discharge of wastewater. In reporting to a Board of Directors that included representatives from leading Orange County universities and businesses, Matt prepared issue papers in the areas of treatment and disinfection of wastewater and control of the discharge of grease to sewer systems. Matt actively participated in the development of countywide water quality permits for the control of urban runoff and permits for the discharge of wastewater. Matt worked with other nonprofits to protect and restore water quality, including Surfrider, Natural Resources Defense Council and Orange County CoastKeeper as well as with business institutions including the Orange County Business Council.

Hydrogeology:

As a Senior Hydrogeologist with the U.S. Environmental Protection Agency, Matt led investigations to characterize and cleanup closing military bases, including Mare Island Naval Shipyard, Hunters Point Naval Shipyard, Treasure Island Naval Station, Alameda Naval Station, Moffett Field, Mather Army Airfield, and Sacramento Army Depot. Specific activities were as follows:

- Led efforts to model groundwater flow and contaminant transport, ensured adequacy of monitoring networks, and assessed cleanup alternatives for contaminated sediment, soil, and groundwater.
- Initiated a regional program for evaluation of groundwater sampling practices and laboratory analysis at military bases.
- Identified emerging issues, wrote technical guidance, and assisted in policy and regulation development through work on four national U.S. EPA workgroups, including the Superfund Groundwater Technical Forum and the Federal Facilities Forum.

At the request of the State of Hawaii, Matt developed a methodology to determine the vulnerability of groundwater to contamination on the islands of Maui and Oahu. He used analytical models and a GIS to show zones of vulnerability, and the results were adopted and published by the State of Hawaii and County of Maui.

As a hydrogeologist with the EPA Groundwater Protection Section, Matt worked with provisions of the Safe Drinking Water Act and NEPA to prevent drinking water contamination. Specific activities included the following:

- Received an EPA Bronze Medal for his contribution to the development of national guidance for the protection of drinking water.
- Managed the Sole Source Aquifer Program and protected the drinking water of two communities through designation under the Safe Drinking Water Act. He prepared geologic reports, conducted public hearings, and responded to public comments from residents who were very concerned about the impact of designation.

- Reviewed a number of Environmental Impact Statements for planned major developments, including large hazardous and solid waste disposal facilities, mine reclamation, and water transfer.

Matt served as a hydrogeologist with the RCRA Hazardous Waste program. Duties were as follows:

- Supervised the hydrogeologic investigation of hazardous waste sites to determine compliance with Subtitle C requirements.
- Reviewed and wrote "part B" permits for the disposal of hazardous waste.
- Conducted RCRA Corrective Action investigations of waste sites and led inspections that formed the basis for significant enforcement actions that were developed in close coordination with U.S. EPA legal counsel.
- Wrote contract specifications and supervised contractor's investigations of waste sites.

With the National Park Service, Matt directed service-wide investigations of contaminant sources to prevent degradation of water quality, including the following tasks:

- Applied pertinent laws and regulations including CERCLA, RCRA, NEPA, NRDA, and the Clean Water Act to control military, mining, and landfill contaminants.
- Conducted watershed-scale investigations of contaminants at parks, including Yellowstone and Olympic National Park.
- Identified high-levels of perchlorate in soil adjacent to a national park in New Mexico and advised park superintendent on appropriate response actions under CERCLA.
- Served as a Park Service representative on the Interagency Perchlorate Steering Committee, a national workgroup.
- Developed a program to conduct environmental compliance audits of all National Parks while serving on a national workgroup.
- Co-authored two papers on the potential for water contamination from the operation of personal watercraft and snowmobiles, these papers serving as the basis for the development of nation-wide policy on the use of these vehicles in National Parks.
- Contributed to the Federal Multi-Agency Source Water Agreement under the Clean Water Action Plan.

Policy:

Served senior management as the Senior Science Policy Advisor with the U.S. Environmental Protection Agency, Region 9. Activities included the following:

- Advised the Regional Administrator and senior management on emerging issues such as the potential for the gasoline additive MTBE and ammonium perchlorate to contaminate drinking water supplies.
- Shaped EPA's national response to these threats by serving on workgroups and by contributing to guidance, including the Office of Research and Development publication, *Oxygenates in Water: Critical Information and Research Needs*.
- Improved the technical training of EPA's scientific and engineering staff.
- Earned an EPA Bronze Medal for representing the region's 300 scientists and engineers in negotiations with the Administrator and senior management to better integrate scientific principles into the policy-making process.
- Established national protocol for the peer review of scientific documents.

Geology:

With the U.S. Forest Service, Matt led investigations to determine hillslope stability of areas proposed for timber harvest in the central Oregon Coast Range. Specific activities were as follows:

- Mapped geology in the field, and used aerial photographic interpretation and mathematical models to determine slope stability.
- Coordinated his research with community members who were concerned with natural resource protection.
- Characterized the geology of an aquifer that serves as the sole source of drinking water for the city of Medford, Oregon.

As a consultant with Dames and Moore, Matt led geologic investigations of two contaminated sites (later listed on the Superfund NPL) in the Portland, Oregon, area and a large hazardous waste site in eastern Oregon. Duties included the following:

- Supervised year-long effort for soil and groundwater sampling.
- Conducted aquifer tests.
- Investigated active faults beneath sites proposed for hazardous waste disposal.

Teaching:

From 1990 to 1998, Matt taught at least one course per semester at the community college and university levels:

- At San Francisco State University, held an adjunct faculty position and taught courses in environmental geology, oceanography (lab and lecture), hydrogeology, and groundwater contamination.
- Served as a committee member for graduate and undergraduate students.
- Taught courses in environmental geology and oceanography at the College of Marin.

Matt taught physical geology (lecture and lab and introductory geology at Golden West College in Huntington Beach, California from 2010 to 2014.

Invited Testimony, Reports, Papers and Presentations:

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Presentation to the Public Environmental Law Conference, Eugene, Oregon.

Hagemann, M.F., 2008. Disclosure of Hazardous Waste Issues under CEQA. Invited presentation to U.S. EPA Region 9, San Francisco, California.

Hagemann, M.F., 2005. Use of Electronic Databases in Environmental Regulation, Policy Making and Public Participation. Brownfields 2005, Denver, Colorado.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Nevada and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Las Vegas, NV (served on conference organizing committee).

Hagemann, M.F., 2004. Invited testimony to a California Senate committee hearing on air toxins at schools in Southern California, Los Angeles.

Brown, A., Farrow, J., Gray, A. and **Hagemann, M.**, 2004. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to the Ground Water and Environmental Law Conference, National Groundwater Association.

Hagemann, M.F., 2004. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in Arizona and the Southwestern U.S. Presentation to a meeting of the American Groundwater Trust, Phoenix, AZ (served on conference organizing committee).

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River and Impacts to Drinking Water in the Southwestern U.S. Invited presentation to a special committee meeting of the National Academy of Sciences, Irvine, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a tribal EPA meeting, Pechanga, CA.

Hagemann, M.F., 2003. Perchlorate Contamination of the Colorado River. Invited presentation to a meeting of tribal representatives, Parker, AZ.

Hagemann, M.F., 2003. Impact of Perchlorate on the Colorado River and Associated Drinking Water Supplies. Invited presentation to the Inter-Tribal Meeting, Torres Martinez Tribe.

Hagemann, M.F., 2003. The Emergence of Perchlorate as a Widespread Drinking Water Contaminant. Invited presentation to the U.S. EPA Region 9.

Hagemann, M.F., 2003. A Deductive Approach to the Assessment of Perchlorate Contamination. Invited presentation to the California Assembly Natural Resources Committee.

Hagemann, M.F., 2003. Perchlorate: A Cold War Legacy in Drinking Water. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. From Tank to Tap: A Chronology of MTBE in Groundwater. Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. A Chronology of MTBE in Groundwater and an Estimate of Costs to Address Impacts to Groundwater. Presentation to the annual meeting of the Society of Environmental Journalists.

Hagemann, M.F., 2002. An Estimate of the Cost to Address MTBE Contamination in Groundwater (and Who Will Pay). Presentation to a meeting of the National Groundwater Association.

Hagemann, M.F., 2002. An Estimate of Costs to Address MTBE Releases from Underground Storage Tanks and the Resulting Impact to Drinking Water Wells. Presentation to a meeting of the U.S. EPA and State Underground Storage Tank Program managers.

Hagemann, M.F., 2001. From Tank to Tap: A Chronology of MTBE in Groundwater. Unpublished report.

Attn: Los Angeles County Board of Supervisors

Subject: Project No. PRJ2021-002011

To Whom It May Concern:

I am writing today to voice my opposition to the Special Project No. PRJ2021-002011, and give my wholehearted support of the pending appeal.

I have written ad nauseum to Los Angeles Co. officials about the many reasons this project should not be approved. There are issues with this being the only open space left in Rowland Heights, the displacement of animals living on the golf course, the overcrowding and noise it will bring to about to 5 different already existing residential housing tracks, and more pollution in an area that is already a stone's throw from the ultimate pollution maker, the very overcrowded 60 freeway. These issues alone should be pause for thought about changing the parcels zoning and allowing additional housing in this area.

My main concern though, is really the way the existing community has been treated by both the developers and publicly elected officials. The project as it stands has got to this point without one single concession given to the neighborhoods that will have to live with this mess that is being created. While the county might have made the developer to make changes to the nearby freeway entrances and exits, or made the developer provide every new homeowner with an electric bicycle (which is insane when you consider the already existing traffic nightmare Colima can be, knowing full well that bicyclists will not be very safe).

Probably the biggest issue is that the developer will be building trails, a pocket park and another park on very sloped land which will be open to the general public. Many of the surrounding homes to said trails and parks have short chain link fences that were great for backing to the golf course but were not designed for the general public to wander the trails right up to their backyard fences. This will bring easy access for someone who wants to break and enter into the homes, but the county, which is supposed to have the best interest of the voter in mind, has failed to require the developer to at least provide proper fencing that would insure some level of deterrent for the homeowners.

There were also many concerns brought up with the additional traffic that will be added to Colima, with the developer proposing a stop sign exit for some 300 new homes and expects new homeowners to be able to make a left-hand turn during rush hour to be able to head east on Colima. This created a very dangerous situation, yet the county could care less. This with the knowledge that there have already been people killed on Colima using a stop sign to cross Colima on the opposite of the street. The only other exit for those wishing to travel East on Colima will cause cut through traffic on Calbourne Drive, which is a small residential street for about 250 homes built

in the early 1960s. Almost every single resident in this community signed a petition asking that some other solution be found, as we already get cut-through traffic from Harvard Estates and Direction Apps like Waze and Google Maps. The developer was never required to even do a simple traffic study, instead pulling numbers out of their ass to support their desired outcome.

There is also a traffic safety issue with leaving an opening from the trails and the park north of Tierra Luna. There is a blind curve there, and people are going to jaywalk across there. Eventually, someone will be hit and killed there, despite homeowners warning both the county and the developer.

It has appeared to me that the Los Angeles Co. Supervisors do not in any way represent the voters in the communities, instead, local control is not existent, and instead they are slaves to the State. This is not democracy and is not the "Freedom" we so often hear as a rally cry when politicians are trying to con us when asking for our votes. Am I wrong?

Signed:
Shelley Gentry

RE: SUPPORT // Project No. PRJ2021-002011-(1)

Dear Honorable Members of the Board of Supervisors,

On behalf of the Los Angeles County Business Federation (BizFed), a grassroots alliance of more than 240 diverse business groups mobilizing 410,000 employers with 5 million employees throughout Southern California, we wish to affirm our support for the Royal Vista Residential Project in unincorporated Rowland Heights. We respectfully urge you to deny an appeal filed by nearby homeowners and to **APPROVE** the Project's entitlements as recommended in a unanimous vote by the Regional Planning Commission on July 24, 2024.

BizFed members have worked tirelessly to champion policies and projects that will create new housing opportunities for local families and our local workforce. The Royal Vista Residential Project represents an important such opportunity as it will re-use a portion of the now closed Royal Vista Golf Course to provide 360 new dwelling units – close to public transportation and job centers. Of the proposed units, 82 (nearly 23%) are reserved for sale as affordable moderate- or middle-income units to accommodate a variety of income levels.

Unfortunately, a small group of homeowners have filed an appeal based on their desire to stop new housing in their neighborhood. We can not allow such attitudes to hold us hostage. We must build new housing. The Royal Vista Residential Project is a creative for-sale, owner-occupied housing proposal designed to be sensitive to the adjacent existing neighborhoods, maintaining 35% of the project site as open space, greenway buffers, and trails for public use. In addition, it is estimated to generate more than \$2.86 million annually for the County and more than 1,170 construction jobs.

For these reasons and more, we urge your approval of the Royal Vista Residential Project for Los Angeles County. If you have any questions, please don't hesitate to contact our Director of Advocacy Chris Wilson at (562) 201-6034 or chris.wilson@bizfed.org.

Sincerely,

Fran Inman

DENY!!!! // Project No. PRJ2021-002011-(1)

Dear Honorable Members of the Board of Supervisors:

I am writing to urge you to HONOR an appeal filed on the Royal Vista Residential Project No. PRJ2021-002011-(1) and to VOTE NO on the Project's entitlements that was sadly recommended in a unanimous vote by the Regional Planning Commission on July 24, 2024. Where is the AFFORDABLE HOUSING??? They have no desire to spread it out!!!!

The appeal was filed by a BIG group of nearby homeowners who do not want any housing built adjacent to their neighborhood. Even though you say we have a critical housing shortage, it is because people can't afford homes in all parts of Los Angeles County. The 75-acre Royal Vista Residential Project in Rowland Heights will destroy our large open spaces on the previous Royal Vista Golf Course, which has been permanently closed. RV Development has no desire to offer affordable housing. As I had mentioned before, the housing across the street is three stories, but there are two or three families living in each home. It's because people cannot afford to live around here.

We have had severe flooding in the golf course and the surrounding areas. At the corner of Walnut Leaf and Colima Road there have been two fatalities. I have not seen any plans to put in a signal there. A four-way stop is not appropriate for that busy street.

You are elected officials who need to listen to the people who voted for you and not the builders and count ly that is \$\$\$ hungry.

For these reasons, I again urge you to APPROVE the opponents appeal and to DENY the Royal Vista Residential Project.

Sincerely,

Coleen Garcia & family

Dear Honorable Members of the Board of Supervisors:

I am writing to urge you to deny an appeal filed on the Royal Vista Residential Project No. PRJ2021-002011-(1) and to APPROVE the Project's entitlements as recommended in a unanimous vote by the Regional Planning Commission on July 24, 2024.

The appeal was filed by a small group of nearby homeowners who do not want any housing built adjacent to their neighborhood. Meanwhile, we continue to have a critical housing shortage in all parts of Los Angeles County. The 75-acre Royal Vista Residential Project in Rowland Heights combines a diverse mix of new housing with publicly accessible trails, and large open spaces on the previous Royal Vista Golf Course, which has been permanently closed. The Project has been thoughtfully designed to provide 360 new for-sale homes to accommodate various income levels, including 82 affordable for sale homes per county ordinance for work-force housing. The Project also maintains more than 37% of the site as open space with over 2 miles of recreational trails for public use that will be maintained by the new Project's homeowners association.

The Royal Vista Residential Project will create job opportunities, generate additional property tax revenues, provide new funding—and students—for local schools with declining enrollment, create funding for LACDA needs, help support local business employment needs, provide local roadway improvements, enhance clean stormwater solutions, and provide four times the number of trees that exist on the Project site today.

For these reasons, I again urge you to deny the opponents appeal and to APPROVE the Royal Vista Residential Project.

Sincerely,

Thank you,

Joanne

Go whom this may concern, my family and I have grave concerns about the upcoming development. We believe that this would not be in the best interest of the community especially the ones who reside near the building site. The construction does not fit with the fabric of the community and adds to the already strained infrastructure and schools, lastly this would destroy the last open and valuable space we have a community.

We adamantly oppose the building project and hope our public leaders will both hear and understand our position and table this development for now.

Dear LA County Board of Supervisors,

I'm writing urgently to ask you to please SUPPORT the Royal Vista Residential Project in unincorporated Rowland Heights.

We are in a housing crisis, where every new housing unit makes a difference. This project represents an important opportunity to deliver 360 new housing units close to public transportation and job centers. Importantly, nearly

one-quarter of the homes are reserved for sale as affordable moderate-income or middle-income units to accommodate a variety of income levels.

This creative for-sale, owner-occupied housing proposal is also sensitive to the adjacent existing neighborhoods, maintaining 35% of the project site as open space, greenway buffers and trails for public use. In addition, it is estimated to generate more than \$2.86 million annually for the County and more than 1,170 construction jobs.

For these reasons and more, I urge your approval of the Royal Vista Residential Project for Los Angeles County.

Sincerely,

Nancy Starczyk

This project significantly impact our community for nearly a decade. We have serious concerns about the environmental damage, increased traffic congestion, loss of cooling green space, and further stress on local resources

caused by this overdevelopment.

In this era of extreme heat, the value of preserving our local nature to combat the climate crisis is clearer than ever. We need your help to protect it.

Neighbor Ray
