			Hector Ramirez	During these past months where we have experience extreme heat in LA County may senior and disable individuals could not access the emergency cooling center opened up through LA County because of of a lack of accessible, affordable, and emergency transportation from where they live and to the nearest cooling shelter. I ask that the county develop mitigation strategies to increase access to transportation for seniors and people with disabilities during extreme heat events where cooling centers and or similar climate impact facility operates. Similarly I urge the county to develop an equitable outreach campaign so people know that they can call a dedicated like 211 or designated outreach line and get information and resources to address the impacts of the extreme heat with weatherization's, HEAP funding, emergency power shut off services for seniors, people with disabilities, and homes with pregnant individual.
			Melody Taylor Stark	
			Stephany Campos	My name is Stephany Campos and I'm with Homeless Health Care LA and I oversee a 24/7 hygiene center in Skid Row. I would like to speak in support of Item #51. I want to thank Supervisor Hilda Solis for requesting this public briefing to highlight the need for the County to continue addressing extreme heat and for the public to hear about all the work being done. I request the Board to support this work to address extreme heat and climate change. The most vulnerable in our community suffer from heat first and have the highest impact on their health. The County must continue the work that is being done and go even further to protect our children, seniors, the unhoused and those with underlying health conditions from extreme heat and the poor air quality that it brings. Thank you.
