Elevation:	210 ft. above sea level

USGS TOPOGRAPHIC MAP

Target Property Map:	12021699 LOS ANGELES, CA
Version Date:	2018

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General South

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

<u>Flood Plain Panel at Target Property</u>	<u>FEMA Source Type</u>

NATIONAL WETLAND INVENTORY

<u>NWI Quad at Target Property</u>	<u>NWI Electronic Data Coverage</u>
LOS ANGELES	YES - refer to the Overview Map and Detail Map

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Site-Specific Hydrogeological Data*:

Search Radius:	1.25 miles
Location Relative to TP:	1/2 - 1 Mile SSW
Site Name:	Sinclair Paint Co
Site EPA ID Number:	CAD076242064
Surficial Aquifer Flow Dir.:	East-Southeast
Measured Depth to Water:	less than 60 feet in the semi-perched aquifer.
Hydraulic Connection:	The aquiclude underlying the surficial semi-perched aquifer may be permeable enough to allow downward migration of ground water to the lower aquifers and may not be continuous across the site.
Sole Source Aquifer:	No information about a sole source aquifer is available
Data Quality:	Information based on site-specific subsurface investigations is documented in the CERCLIS investigation report(s)

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

<u>MAP ID</u>	<u>LOCATION FROM TP</u>	<u>GENERAL DIRECTION GROUNDWATER FLOW</u>
Not Reported		

* ©1996 Site-specific hydrogeological data gathered by CERCLIS Alerts, Inc., Bainbridge Island, WA. All rights reserved. All of the information and opinions presented are those of the cited EPA report(s), which were completed under a Comprehensive Environmental Response Compensation and Liability Information System (CERCLIS) investigation.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Quaternary
Series: Quaternary
Code: Q (*decoded above as Era, System & Series*)

GEOLOGIC AGE IDENTIFICATION

Category: Stratified Sequence

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: URBAN LAND

Soil Surface Texture: variable

Hydrologic Group: Not reported

Soil Drainage Class: Not reported

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: Not Reported

Depth to Bedrock Min: > 10 inches

Depth to Bedrock Max: > 10 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

Soil Layer Information							
Layer	Boundary		Soil Texture Class	Classification		Permeability Rate (in/hr)	Soil Reaction (pH)
	Upper	Lower		AASHTO Group	Unified Soil		
1	0 inches	6 inches	variable	Not reported	Not reported	Max: 0.00 Min: 0.00	Max: 0.00 Min: 0.00

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Surficial Soil Types: sandy loam
 gravelly - sandy loam
 silt loam
 clay
 fine sand
 gravelly - sand
 sand
 fine sandy loam

Shallow Soil Types: fine sandy loam
 gravelly - loam
 sandy clay
 sandy clay loam
 clay
 silty clay
 sand

Deeper Soil Types: gravelly - sandy loam
 sandy loam
 very gravelly - sandy loam
 stratified
 very fine sandy loam
 weathered bedrock
 sand
 gravelly - fine sandy loam
 silty clay loam
 clay loam

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Fish and Wildlife

Telephone: 916-445-0411

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

OTHER STATE DATABASE INFORMATION

Groundwater Ambient Monitoring & Assessment Program

State Water Resources Control Board

Telephone: 916-341-5577

The GAMA Program is California's comprehensive groundwater quality monitoring program. GAMA collects data by testing the untreated, raw water in different types of wells for naturally-occurring and man-made chemicals. The GAMA data includes Domestic, Monitoring and Municipal well types from the following sources, Department of Water Resources, Department of Health Services, EDF, Agricultural Lands, Lawrence Livermore National Laboratory, Department of Pesticide Regulation, United States Geological Survey, Groundwater Ambient Monitoring and Assessment Program and Local Groundwater Projects.

Water Well Database

Source: Department of Water Resources

Telephone: 916-651-9648

California Drinking Water Quality Database

Source: Department of Public Health

Telephone: 916-324-2319

The database includes all drinking water compliance and special studies monitoring for the state of California since 1984. It consists of over 3,200,000 individual analyses along with well and water system information.

California Oil and Gas Well Locations

Source: Dept of Conservation, Geologic Energy Management Division

Telephone: 916-323-1779

Oil and Gas well locations in the state.

California Earthquake Fault Lines

Source: California Division of Mines and Geology

The fault lines displayed on EDR's Topographic map are digitized quaternary fault lines prepared in 1975 by the United State Geological Survey. Additional information (also from 1975) regarding activity at specific fault lines comes from California's Preliminary Fault Activity Map prepared by the California Division of Mines and Geology.

Soil Sampling Summary Report for Property RP2942
Exide XRF Scanning, Sampling, and Analysis
Department of Toxic Substances Control
Los Angeles County, California

Section 1 — Date of Sampling

April 6, 2017

Section 2 — Purpose of Sampling

1. Soil XRF scanning and sampling to evaluate lead concentrations in soil.
2. XRF scanning and sampling of potential lead-based paint on the exterior of buildings.

Section 3 — Property Information

Property ID: RP2942
 Property APN: 5239012028
 Property Address: 1059 S Gage Ave, Los Angeles CA 90023
 Type of Structure: Church

Section 4 — Owner of Structure

Primary Contact: [REDACTED]
 Contact Number: [REDACTED]

Section 5 — Summary of Soil XRF Scanning and Sampling

No. of Soil XRF Scan Locations:	15
No. of Soil XRF Scan Samples:	20
Range of Soil XRF Lead Results (mg/kg):	--
No. of Soil Samples for Laboratory Analysis:	20
Range of Lead Concentration in Soil Samples (mg/kg):	12.9 - 352
No. of Soil Samples Above Lead Screening Level of 80 mg/kg:	9

Section 6 — Summary of Paint XRF Scanning and Sampling

No. of Paint XRF Scan Locations:	6
Range of Paint XRF Lead Results (mg/cm ²):	Not Detected
No. of Paint Locations Above Lead LAC Action Level of 0.7 mg/cm ² :	0
Range of Lead Concentration in Paint Samples (mg/kg):	Not Available

Section 7 — Deviations from the Work Plan

East side of drip zone covered with concrete and therefore, no soil available for sampling.
 Subsurface sample from 12-18 inches was not collected at RP2942-03 due to refusal at 12 inches below surface.
 As requested by Department of Toxic Substances Control, all soil samples from this property were submitted for laboratory analysis; and XRF scanning and soil moisture measurements were not conducted.

Section 8 — Attachments

LEAD HAZARD EVALUATION REPORT

Section 1 – Date of Lead Hazard Evaluation 04/06/2017

Section 2 – Type of Lead Hazard Evaluation (Check one box only)
 Lead Inspection Risk assessment Clearance Inspection Other (specify) Per the DTSC Work Plan

Section 3 – Structure Where Lead Hazard Evaluation Was Conducted

Address [number, street, apartment (if applicable)]		City	County	Zip Code
1059 S Gage Ave		Los Angeles	Los Angeles	90023
Construction date (year) of structure	Type of structure		Children living in structure?	
1953	<input type="checkbox"/> Multi-unit building <input type="checkbox"/> School or daycare <input type="checkbox"/> Single family dwelling <input checked="" type="checkbox"/> Other Church		[REDACTED]	

Section 4 – Owner of Structure (if business/agency, list contact person)

Name		Telephone number	
[REDACTED]		[REDACTED]	
Address [number, street, apartment (if applicable)]		City	State
[REDACTED]		[REDACTED]	[REDACTED]

Section 5 – Results of Lead Hazard Evaluation (check all that apply)

No lead-based paint detected Intact lead-based paint detected Deteriorated lead-based paint detected
 No lead hazards detected Lead-contaminated dust found Lead-contaminated soil found Other [REDACTED]

Section 6 – Individual Conducting Lead Hazard Evaluation

Name		Telephone number	
Eugene Sulyma		714-730-9052	
Address [number, street, apartment (if applicable)]		City	State
320 Commerce, Suite 200		Irvine	CA
CDPH certification number	Signature	Date	
25373		04/06/2017	

Name and CDPH certification number of any other individuals conducting sampling or testing (if applicable)

Section 7 – Attachments

A. A foundation diagram or sketch of the structure indicating the specific locations of each lead hazard or presence of lead-based paint;
 B. Each testing method, device, and sampling procedure used;
 C. All data collected, including quality control data, laboratory results, including laboratory name, address, and phone number.

Notes

1. Shaded soil lead result indicates exceedance above the soil lead screening level of 80 mg/kg.
2. Duplicate sample results are included in brackets.

-- = not available/applicable

APN = Assessor Parcel Number

J = The analyte was positively identified; however, the associated numerical value is an estimated concentration only.

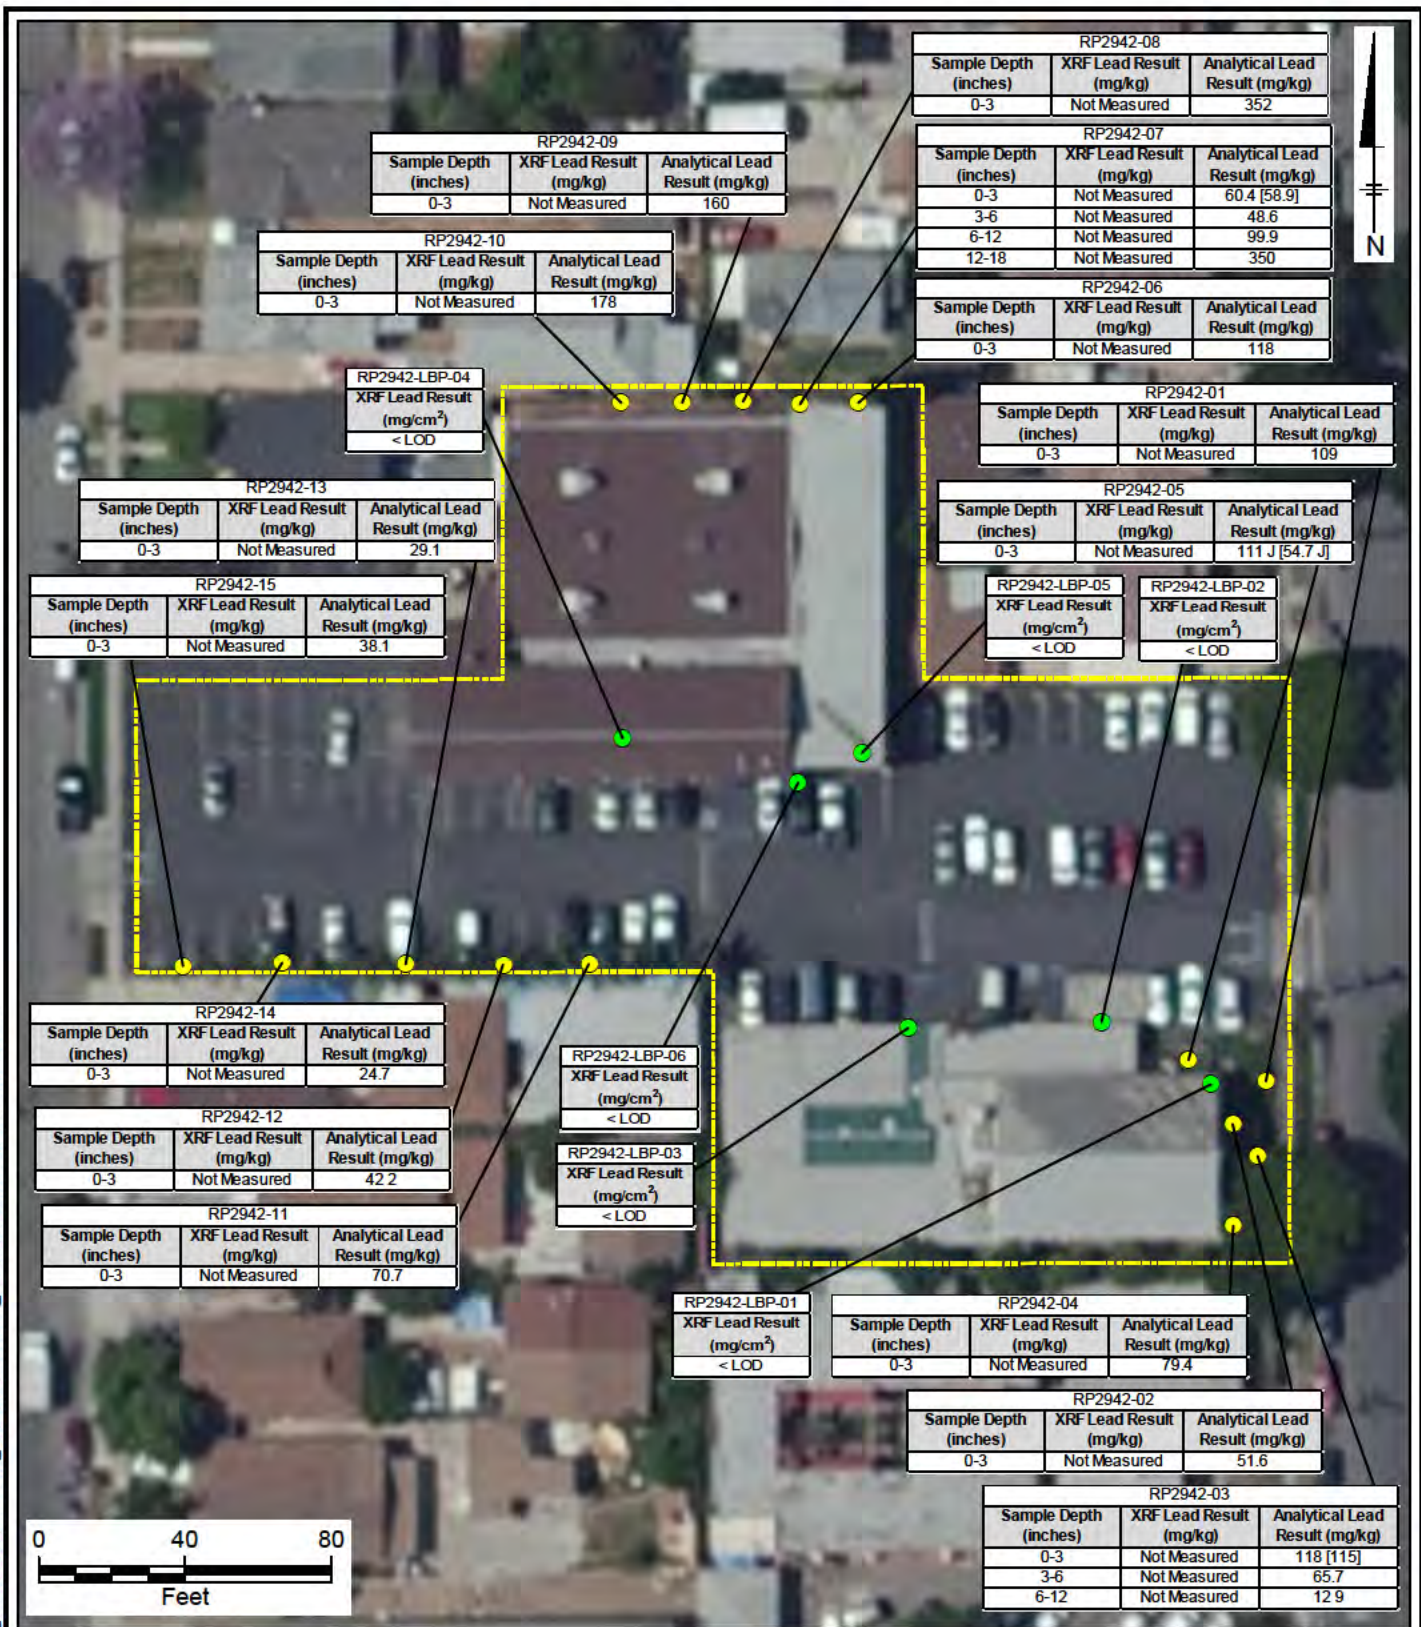

mg/kg = milligrams per kilogram

U = The analyte was analyzed for but not detected. The associated value is the analyte reporting limit.

Location ID	Soil Sample ID	Photograph
RP2942-04	RP2942-04-(0-3)	 A photograph showing a soil sample site on a grassy area. A white container is placed on the ground next to a pink marker. The soil appears to be a mix of brown and greyish particles.
RP2942-05	RP2942-05-(0-3)	 A photograph showing a soil sample site on a grassy area. A white container is placed on the ground next to a pink marker. The soil is dark brown and appears to be a mix of particles.

PHOTOGRAPH LOG

Department of Toxic Substances Control
Exide XRF Scanning, Sampling, and Analysis
Los Angeles County, California

Location ID	Soil Sample ID	Photograph
RP2942-06	RP2942-06-(0-3)	 A photograph showing a soil sample location. A white circular marker is placed on the ground in a patch of green weeds. An orange marker is visible further back. The background is a light-colored, textured wall.
RP2942-07	RP2942-07-(12-18)	 A photograph showing a soil sample location. A hole has been dug into the ground, and a black rod is inserted into it. The ground is covered with green weeds. An orange container is visible in the bottom right corner.

PHOTOGRAPH LOG

Department of Toxic Substances Control
Exide XRF Scanning, Sampling, and Analysis
Los Angeles County, California

Location ID	Soil Sample ID	Photograph
RP2942-07	Subsurface Samples	 A photograph showing three white, circular soil sample containers arranged in a triangle on a patch of grass and dirt. A hole has been dug in the ground nearby. An orange equipment case is partially visible in the lower right corner.
RP2942-08	RP2942-08-(0-3)	 A photograph showing a single white, circular soil sample container placed on the ground next to a hole. The surrounding area is grassy with some dry leaves and twigs.

43	nu hat (MLE)				63.87				nu star (bias corrected)				52.43			
44	MLE Mean (bias corrected)				102.8				MLE Sd (bias corrected)				77.77			
45									Approximate Chi Square Value (0.05)				36.79			
46	Adjusted Level of Significance				0.0324				Adjusted Chi Square Value				35.19			
47																
48	Assuming Gamma Distribution															
49	95% Approximate Gamma UCL (use when n>=50)				146.5				95% Adjusted Gamma UCL (use when n<50)				153.2			
50																
51	Lognormal GOF Test															
52	Shapiro Wilk Test Statistic				0.978				Shapiro Wilk Lognormal GOF Test							
53	5% Shapiro Wilk Critical Value				0.881				Data appear Lognormal at 5% Significance Level							
54	Lilliefors Test Statistic				0.132				Lilliefors Lognormal GOF Test							
55	5% Lilliefors Critical Value				0.22				Data appear Lognormal at 5% Significance Level							
56	Data appear Lognormal at 5% Significance Level															

	A	B	C	D	E	F	G	H	I	J	K	L
57												
58	Lognormal Statistics											
59	Minimum of Logged Data					3.207	Mean of logged Data					4.38
60	Maximum of Logged Data					5.864	SD of logged Data					0.73
61												
62	Assuming Lognormal Distribution											
63	95% H-UCL					164.8	90% Chebyshev (MVUE) UCL					163.1
64	95% Chebyshev (MVUE) UCL					190.8	97.5% Chebyshev (MVUE) UCL					229.2
65	99% Chebyshev (MVUE) UCL					304.6						
66												
67	Nonparametric Distribution Free UCL Statistics											
68	Data appear to follow a Discernible Distribution at 5% Significance Level											
69												
70	Nonparametric Distribution Free UCLs											
71	95% CLT UCL					138.2	95% Jackknife UCL					140.7
72	95% Standard Bootstrap UCL					136.8	95% Bootstrap-t UCL					161.7
73	95% Hall's Bootstrap UCL					304.9	95% Percentile Bootstrap UCL					138.5
74	95% BCA Bootstrap UCL					149.7						
75	90% Chebyshev(Mean, Sd) UCL					167.3	95% Chebyshev(Mean, Sd) UCL					196.5
76	97.5% Chebyshev(Mean, Sd) UCL					237	99% Chebyshev(Mean, Sd) UCL					316.6
77												
78	Suggested UCL to Use											
79	95% Adjusted Gamma UCL					153.2						
80												
81	Note: Suggestions regarding the selection of a 95% UCL are provided to help the user to select the most appropriate 95% UCL.											
82	Recommendations are based upon data size, data distribution, and skewness.											
83	These recommendations are based upon the results of the simulation studies summarized in Singh, Maichle, and Lee (2006).											
84	However, simulations results will not cover all Real World data sets; for additional insight the user may want to consult a statistician.

The test results in this report meet all 2003 NELAC and 2009 TNI requirements for accredited parameters, exceptions are noted in this report. This report may not be reproduced except in full, and with written approval from the laboratory. For questions please contact the Project Manager at the e-mail address or telephone number listed on this page.

This report has been electronically signed and authorized by the signatory. Electronic signature is intended to be the legally binding equivalent of a traditionally handwritten signature.

Results relate only to the items tested and the sample(s) as received by the laboratory.

Comments

No additional comments.

Receipt

The samples were received on 4/7/2017 10:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 23.3° C.

Receipt Exceptions

The Field Sampler was not listed on the Chain of Custody.

Metals

Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 440-400221 and analytical batch 440-400899 were outside control limits for Antimony. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 440-400217 and analytical batch 440-401045 were outside control limits for Antimony. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.(440-181628-A-10-B MS) and (440-181628-A-10-C MS)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Definitions/Glossary

Client: ARCADIS U.S. Inc
Project/Site: DTSC Exide

TestAmerica Job ID: 440-181622-1

Qualifiers

Metals

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Question	Answer	Comment
Radioactivity wasn't checked or is \leq background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	Thermal preservation not required.
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	False	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <math><6\text{mm}</math> (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

The analytical laboratory data package was reviewed for completeness and compliance with quality control sample acceptance criteria using automated data review (ADR) tool. The analyses were performed according to United States Environmental Protection Agency (USEPA) SW-846 Method 6010B. Data were reviewed in accordance with USEPA National Functional Guidelines (NFGs) of September 2016. USEPA NFGs were followed for qualification purposes. The ADR included a review of analysis holding time, blank contamination, laboratory and field duplicate relative percent difference, laboratory control sample recovery, and matrix spike sample recovery. Only analytical data as reported by the laboratory were reviewed for this validation. Field documentation was not included in this review. These qualifiers have been incorporated into the project database.

The data review process is an evaluation of data on a technical basis rather than a determination of contract compliance. As such, the standards against which the data are being weighed may differ from those specified in the analytical method. It is assumed that the data package represents the best efforts of the laboratory and that it was already subjected to adequate and sufficient quality review prior to submission.

During the review process, laboratory qualified and unqualified data are verified against the supporting documentation. Based on this evaluation, qualifier codes may be added, deleted, or modified by the data reviewer. The ADR Qualifier Summary Report attached to the laboratory data package includes a summary of the data validation qualifiers that were changed/added/removed, if any, during the ADR process. ADR outlier report(s) summarizing the basis for the qualification have also been attached to the laboratory data package, if applicable. Results are qualified with the following codes in accordance with the USEPA NFGs:

- Validation Qualifiers

- J The analyte was positively identified; however, the associated numerical value is an estimated concentration only.
- J+ The result is an estimated quantity, but the result may be biased high.
- J- The result is an estimated quantity, but the result may be biased low.
- R The sample results are rejected as unusable. The compound may or may not be present in the sample.
- U The analyte was analyzed for but not detected. The associated value is the analyte reporting limit.
- UJ The analyte was not detected above the reported sample detection limit. However, the reported limit is approximate and may or may not represent the actual limit of detection.

Two facts should be noted by all data users. First, the "R" flag means that the associated value is unusable. In other words, due to significant quality control (QC) problems, the analysis is invalid and provides no information as to whether the compound is present or not. "R" values cannot be relied upon, even as a last resort. The second fact to keep in mind is that no compound concentration, even if it has passed all QC tests, is guaranteed to be accurate. Strict QC serves to increase confidence in data but any value potentially contains error.

TestAmerica Job ID: 440-181622-1

Qualifiers

Metals

Qualifier	Qualifier Description
F1	MS and/or MSD Recovery is outside acceptance limits.
4	MS, MSD: The analyte present in the original sample is greater than 4 times the matrix spike concentration; therefore, control limits are not applicable.

Glossary

Abbreviation	These commonly used abbreviations may or may not be present in this report.
α	Listed under the "D" column to designate that the result is reported on a dry weight basis
%R	Percent Recovery
CFL	Contains Free Liquid
CNF	Contains no Free Liquid
DER	Duplicate error ratio (normalized absolute difference)
Dil Fac	Dilution Factor
DL, RA, RE, IN	Indicates a Dilution, Re-analysis, Re-extraction, or additional Initial metals/anion analysis of the sample
DLC	Decision level concentration
MDA	Minimum detectable activity
EDL	Estimated Detection Limit
MDC	Minimum detectable concentration
MDL	Method Detection Limit
ML	Minimum Level (Dioxin)
NC	Not Calculated
ND	Not detected at the reporting limit (or MDL or EDL if shown)
PQL	Practical Quantitation Limit
QC	Quality Control
RER	Relative error ratio
RL	Reporting Limit or Requested Limit (Radiochemistry)
RPD	Relative Percent Difference, a measure of the relative difference between two points
TEF	Toxicity Equivalent Factor (Dioxin)
TEQ	Toxicity Equivalent Quotient (Dioxin)

Job Narrative
440-181622-1

Comments

No additional comments.

Receipt

The samples were received on 4/7/2017 10:10 AM; the samples arrived in good condition, properly preserved and, where required, on ice. The temperature of the cooler at receipt was 23.3° C.

Receipt Exceptions

The Field Sampler was not listed on the Chain of Custody.

Metals

Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 440-400221 and analytical batch 440-400899 were outside control limits for Antimony. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.

Method(s) 6010B: The matrix spike / matrix spike duplicate (MS/MSD) recoveries for preparation batch 440-400217 and analytical batch 440-401045 were outside control limits for Antimony. Sample matrix interference is suspected because the associated laboratory control sample (LCS) recovery was within acceptance limits.(440-181628-A-10-B MS) and (440-181628-A-10-C MS)

No additional analytical or quality issues were noted, other than those described above or in the Definitions/Glossary page.

Quantitation Limit Exceptions Summary

Client: ARCADIS U.S. Inc
Project/Site: DTSC Exide

TestAmerica Job ID: 440-181622-1

The requested project specific reporting limits listed below were less than laboratory standard quantitation limits (PQL) but greater than or equal to the laboratory method detection limits (MDL). It must be noted that results reported below lab standard quantitation limits may result in false positive/false negative values and less accurate quantitation. Routine laboratory procedures do not indicate corrective action for detections below the laboratory's PQL.

<u>Method</u>	<u>Matrix</u>	<u>Analyte</u>	<u>Units</u>	<u>Client RL</u>	<u>Lab PQL</u>
6010B	Solid	Lead	mg/Kg	1.00	2.0

The pound sign (#) in the amount added field denotes that the reagent was used undiluted. All calculations are performed using the stated concentration for this reagent.

METALS BATCH WORKSHEET

Lab Name: TestAmerica Irvine Job No.: 440-181622-1

SDG No.: _____

Batch Number: 400221 Batch Start Date: 04/14/17 12:15 Batch Analyst: Tolentino, Danilo

Batch Method: 3050B Batch End Date: 04/15/17 16:02

Batch Notes	
Balance ID	63
Batch Comment	S.Tan, danilo (digestion) Spike A & NB = 1000 uL
Blank Soil Lot Number	D1069103
First End time	12:45
Filter Paper ID	16-042 Gr. . 389
Hydrogen Peroxide ID	165728
Lot # of hydrochloric acid	0000162118
Logbook ID for diluted Nitric	4017802
Lot # of Nitric Acid	160739
Hot Block ID	8
Oven, Bath or Block Temperature 1	94 Degrees C
Oven, Bath or Block Temperature 2	94 Degrees C
Pipette ID	#200
Perform Calculation (0=No, 1=Yes)	0
First Start time	07:10 (4/15/17)
Thermometer ID	P-120 (Loc A#18) CF = 0.00
Digestion Tube/Cup ID	1610138
Uncorrected Temperature	94 CF = 0.00 Celsius
Uncorrected Temperature 2	94 CF = 0.00 Degrees C

Basis	Basis Description
T	Total/NA

The pound sign (#) in the amount added field denotes that the reagent was used undiluted. All calculations are performed using the stated concentration for this reagent.

Question	Answer	Comment
Radioactivity wasn't checked or is <=/ background as measured by a survey meter.	True	
The cooler's custody seal, if present, is intact.	True	
Sample custody seals, if present, are intact.	True	
The cooler or samples do not appear to have been compromised or tampered with.	True	
Samples were received on ice.	N/A	Thermal preservation not required.
Cooler Temperature is acceptable.	True	
Cooler Temperature is recorded.	True	
COC is present.	True	
COC is filled out in ink and legible.	True	
COC is filled out with all pertinent information.	True	
Is the Field Sampler's name present on COC?	False	
There are no discrepancies between the containers received and the COC.	True	
Samples are received within Holding Time (excluding tests with immediate HTs)	True	
Sample containers have legible labels.	True	
Containers are not broken or leaking.	True	
Sample collection date/times are provided.	True	
Appropriate sample containers are used.	True	
Sample bottles are completely filled.	True	
Sample Preservation Verified.	N/A	
There is sufficient vol. for all requested analyses, incl. any requested MS/MSDs	True	
Containers requiring zero headspace have no headspace or bubble is <6mm (1/4").	True	
Multiphasic samples are not present.	True	
Samples do not require splitting or compositing.	True	
Residual Chlorine Checked.	N/A	

Level III Validation Report for Property RP2942

This data validation report summarizes the Level III review of Sample Delivery Group (SDG) 440-181622-1 for samples collected on April 06, 2017 in association with Property RP2942. This report serves as an addendum to the Level II review of this SDG which was performed using automated data review (ADR). Only those elements that were reviewed as part of the Level III data validation are included. Any additional qualification required due to the Level III documentation is documented below.

1. Instrument Blank Contamination

Instrument blanks [i.e., initial calibration blank (ICB) and continuing calibration blank (CCB)] are prepared to determine the validity of the analytical results based on the blank responses by determining the existence and magnitude of contamination resulting from laboratory activities or baseline drift during analysis. No contaminants should be found in the blanks.

Analytes were not detected above the method detection limit (MDL) in the associated instrument blanks; therefore detected sample results were not associated with instrument blank contamination.

2. Calibration

Satisfactory instrument calibration is established to provide that the instrument is capable of producing acceptable quantitative data. An initial calibration demonstrates that the instrument is capable of acceptable performance at the beginning of an experimental sequence. The continuing calibration verifies that the instrument's continuing performance is satisfactory.

2.1 Initial Calibration and Continuing Calibration

The correct number and type of standards were analyzed. The correlation coefficient of the initial calibration was greater than 0.995. All initial calibration verification (ICV) and continuing calibration verification (CCV) standard recoveries were within the control limit of 90-110%.

2.2 RL Check Standard

The RL check standard serves to verify the linearity of calibration of the analysis at the reporting limit. The RL check standard recoveries were within the control limits of 50-150%.

2.3 Interference Check Sample

The Interference Check Sample (ICS) determines the laboratory's ability to overcome interferences typical of those found in samples. All ICS exhibited recoveries within the control limit of 80-120%.

3. Serial Dilution

The serial dilution analysis is used to assess if a significant physical or chemical interference exists due to sample matrix. Analytes exhibiting concentrations greater than 50 times the MDL in the undiluted sample are evaluated to determine if matrix interference exists. These analytes are required to have less than a 10% difference (%D) between sample results from the undiluted (parent) sample and results associated with the same sample analyzed with a five-fold dilution.

The serial dilution performed on sample location RP2942-03-(6-12) exhibited %D less than the control limit of 10%.

Data Qualifier Summary Table

SDG	Sample ID	Method	Analyte	Result	Units	Lab Qualifier	Validation Qualifier	Reason for Final Qualifier
440-181622-1								No qualifiers assigned

Montebello CA 90640

NOTICE OF VIOLATION

Inspection File No.: EF040070

To Whom It May Concern:

An inspection was conducted at 1059 S Gage Avenue in East Los Angeles. This inspection disclosed the following violation(s):

1) A church is being conducted without Regional Planning approval (Directors Review).

This is not a permitted use in zone R-3 and is in violation of the provisions of the Los Angeles County Zoning Ordinance, Section(s) 22.20.010, 22.20.015, 22.20.260 and 22.20.280

Please consider this an order to comply with the provisions of the zoning ordinance **upon receipt** of this letter. Failure to comply as requested may cause this matter to be referred to the District Attorney with the request that a criminal complaint be filed if compliance is not achieved. Conviction can result in a penalty of up to six months in jail and/or a one thousand dollar fine, each day in violation constituting a separate offense. **In addition to criminal prosecution, you may be subject to a noncompliance fee of \$548 and the imposition of further administrative and collection fees totaling approximately \$1,918.**

Any inquiry regarding this matter may be addressed to the Department of Regional Planning, 320 W. Temple Street, Los Angeles, CA 90012, Attention: Zoning Enforcement. To speak directly with the investigator, **Erika Sawyer**, please call (213) 974-6453 before 10:00 a.m. Monday through Thursday. Our offices are closed on Fridays.

Very truly yours,

DEPARTMENT OF REGIONAL PLANNING
James E. Hartl, AICP, Director of Planning

Rose C. Hamilton, AICP
Supervising Regional Planner

Los Angeles, Ca 90022

Dear Building and Safety Division Inspector

This letter is in regards to the electrical work done on the block wall. An electrical permit was required by inspector Sergio Leyva. We have determined for the moment we will terminate all work based on the advice of Contractor Keith Johnson Lic # C10348-021. He gave us an estimate that exceeds our budget, so we have removed all wires.

Therefore we're asking if you can send an inspector to approved and confirm the foregoing is true.

Thank you for the time render to this matter

RE: CALIFORNIA PUBLIC RECORDS ACT REQUEST RELATING TO THE
FORMER EXIDE TECHNOLOGIES FACILITY LOCATED IN VERNON,
CALIFORNIA; DTSC REFERENCE NO. PR8-072922-01

Dear Mr. Costales:

This letter is regarding your above-referenced California Public Records Act (PRA) request to the Department of Toxic Substances Control (DTSC) (DTSC PRA tracking number PR8-072922-01), which you sent to DTSC via email on July 29, 2022.

DTSC has identified records responsive to your request and is transmitting the records in DTSC's possession that are responsive to your request (See Index of Records, below). DTSC has redacted portions of the enclosed records under the balancing test (Gov. Code § 6255).

DTSC believes it has provided all responsive records to your request. If your request was intended to seek additional records, please clarify which specific additional records you are seeking so that DTSC may provide any such additional records in a timely manner.

Gage Costales
September 15, 2022
Page 2

Please contact me at Colin.Hendricks@dtsc.ca.gov if you wish to address any matter concerning your PRA request. In future communications with DTSC regarding this PRA request, please refer to DTSC reference number PR8-072922-01.

Sincerely,

Colin Hendricks

ESA USER QUESTIONNAIRE
Phase I Environmental Site Assessment
ASTM Standard 1527-05

Site: 1059 S GAGE

In order to qualify for one of the *Landowner Liability Protections (LLPs)*³⁵ offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"),³⁶ the *user*¹ must provide the following information (if available) to the *environmental professional*. Failure to provide this information could result in a determination that "*all appropriate inquiry*" is not complete.

(Note: double-click boxes to check or uncheck)

(1) Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

No Yes (if yes, please describe)

(2) Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the Site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No Yes (if yes, please describe)

(3) As the user of this ESA do you have any specialized knowledge or experience related to the Site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the Site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business?

No Yes (if yes, please describe)

¹ A User as defined in ASTM 1527-05 is the party seeking to use Practice E 1527 to complete an environmental site assessment of the property. A user may include, without limitation, a potential purchaser of the property, a potential tenant of property, an owner of property, a lender, or a property manager. The User has specific obligations for completing a successful application of this process as outlined in Section 6 of this standard.

(4) Does the purchase price being paid for this Site reasonably reflect the fair market value of the Site? If you conclude that there is a difference, have you considered whether the lower purchase price is because contamination is known or believed to be present at the Site?

No Yes (if yes, please describe)

(5) Are you aware of commonly known or *reasonably ascertainable* information about the Site that would help the *environmental professional* to identify conditions indicative of releases or threatened releases? For example, as *user*,

(a.) Do you know the past uses of the Site?

No Yes (if yes, please describe)

(b.) Do you know of specific chemicals that are present or once were present at the Site?

No Yes (if yes, please describe)

(c.) Do you know of spills or other chemical releases that have taken place at the Site?

No Yes (if yes, please describe)

(d.) Do you know of any environmental cleanups that have taken place at the Site?

No Yes (if yes, please describe)

(6) As the *user* of this *ESA*, based on your knowledge and experience related to the Site are there any *obvious* indicators that point to the presence or likely presence of contamination at the Site?

No Yes (if yes, please describe)

Additional Information

This information is intended to assist the *environmental professional* conducting the ESA, but is not necessarily required to qualify for one of the *LLPs*. The information includes:

(a) Why is the Phase I being conducted?

Purchase of the subject site for the development of a new school facility.

(b) What is the type of property and type of property transaction, for example, sale, purchase, exchange, etc. ?

Purchase

(c) What is the complete and correct address for the Site (a map or other documentation showing Site location and boundaries is helpful),

1059 South Gage Avenue, Los Angeles CA 90023; see below for photo of site

(d) the scope of services desired for the Phase I (including whether any parties to the *property* transaction may have a required standard scope of services on whether any considerations beyond the requirements of Practice E 1527 are to be considered),

(e) Please identify all parties who will rely on the Phase I *report*.

Extera Public Schools, project architect and development team

(f) Please identify the Site contact and how the contact can be reached,

Kathy Dominguez
323-493-3415

(g) Please indicate any other knowledge or experience with the Site that may be pertinent to the *environmental professional* (for example, copies of any available prior *environmental site assessment reports*, documents, correspondence, etc., concerning the Site and its environmental condition) and any environmental permits such as air quality management district, stormwater, wastewater, underground storage tanks or aboveground tanks.

N/A

(g) Can you provide a recent Chain of Title report for the Site?

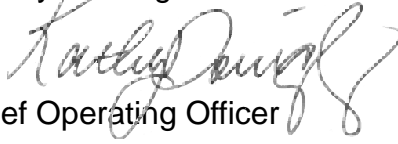

Yes, attached.

This questionnaire was completed by:

Name: Kathy Dominguez

Signature:

Date: 09-30-2022

Title: Chief Operating Officer

Please describe the length of and nature of your experience/knowledge of the Site.

I have known this site for several months through negotiating a purchase and sale agreement. No other knowledge beyond that.

ESA OWNER/OPERATOR QUESTIONNAIRE
Phase I Environmental Site Assessment
ASTM Standard 1527-13

Site:

In order to assist the purchaser qualify for one of the *Landowner Liability Protections (LLPs)* offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the "*Brownfields Amendments*"), the *Owner/Operators* are requested to provide the following information (if available) to the *environmental professional*.
(Note: double-click boxes to check or uncheck)

Current Site Condition and Site History

(1) Please list all addresses currently and previously used for the Site.

1059 S. GAGE AVE. Los Angeles, CA. 90023

(2) Please list the providers of the following utilities for the Site:

Water:	CALIFORNIA WATER SERVICE
Natural Gas or Propane:	THE GAS COMPANY
Electricity:	EDISON
Sanitary Waste (or Septic Tank?):	N/A

(3) Are there any groundwater wells at the Site?

No Yes (if yes, please describe)

(4) Please describe the current use of the Site.

RELIGIOUS EDUCATION, PRAYER AND PRAISE NIGHTS

(5) Are you aware of previous uses of the Site?

No Yes (if yes, please describe)

① CHURCH SERVICES ② SCHOOL

(6) Can you provide contact information for previous owners, operators or occupants of the Site?

No Yes (if yes, please list)

CHARISMA IN MISSIONS (323) 260-7031

(7) To the best of your knowledge, has the Site been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?

No Yes (if yes, please describe)

(8) To the best of your knowledge, have any adjoining properties been used as a gasoline station, motor repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, landfill, or as a waste treatment, storage, disposal, processing, or recycling facility?

No Yes (if yes, please describe and provide name and location)

Chemical and Hazardous Materials

(9) Other than routine janitorial and office supplies in usual and customary quantities, are chemicals, petroleum products or hazardous chemicals/substances used or stored on Site, now or previously?

No Yes (if yes, please describe)

(10) Are liquid or solid wastes generated at the Site other than general municipal waste now or previously?

No Yes (if yes, please describe)

(11) Are there or have there been wastewater disposal or treatment processes at the Site from equipment washdown or industrial operations?

No Yes (if yes, please describe, including any pits, sumps, ponds, dry wells, etc.)

(12) Are there or have there been any electrical transformers, capacitors, ballasts, or hydraulic equipment in use at the Site? Have there been leaks? Are there records indicating the presence or absence of PCBs?

No Yes (if yes, please describe as appropriate)

(13) Do you know of spills or other chemical releases that have taken place at the Site?

No Yes (if yes, please describe)

(14) Has fill or waste soil been brought onto the Site?

No Yes (if yes, please describe source of origin if available)

(15) To the best of your knowledge, is or has there been any significantly stained or discolored soil on the Site?

No Yes (if yes, please describe)

(16) Do you know of any environmental cleanups that have taken place at the Site?

No Yes (if yes, please describe)

(17) Do you know of any adverse environmental conditions or cleanups that have taken place at the neighboring properties?

No Yes (if yes, please describe)

, Administrative Action, Violation Notices

(18) To your knowledge, are or have there been any above ground or underground tanks or other activities that included the use of significant quantities of hazardous materials at the Site?

No Yes (if yes, please describe)

(19) Do you know of any pending, threatened or past litigation or administrative actions relative to hazardous materials, hazardous waste or petroleum products associated with the Site?

No Yes (if yes, please describe)

(20) Do you know of any current or previous notices from any governmental entity regarding possible violations of environmental laws or possible liability relating to hazardous substances or petroleum products?

No Yes (if yes, please describe)

(21) Are you aware of any environmental cleanup liens against the Site that are filed or recorded under federal, tribal, state or local law?

No Yes (if yes, please describe and provide dates)

(22) Are you aware of any Activity and Use Limitations (AULs), such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

No Yes (if yes, please describe)

Additional and Supportive Information

Please indicate and provide any other knowledge, or documentation with the Site that may be pertinent to the *environmental professional* (for example, copies of any available prior environmental site assessment **reports**, documents, correspondence, etc., concerning the Site and its environmental condition) and any environmental **permits** such as air quality management district, stormwater, wastewater, underground storage tanks or aboveground tanks, especially in support of "yes" answers above.

Thank you very much for your cooperation.

This questionnaire was completed by:

Name: Rigo F. Santa Cruz

Signature: RFS

Date: 09-28-2022

Title: CEO

Please describe the length of and nature of your experience/knowledge of the Site.

I HAVE KNOWN ABOUT THE SITE SINCE 1990. I WAS A REGULAR ATTENDEE AT THE CHURCH CHARISMA IN MISSIONS, WHOM AT THE TIME WERE THE OWNERS OF THE PROPERTY. THEIR USE OF THE SITE WERE SOLELY RELIGIOUS ACTIVITIES. THEY CONTINUED USING THE SITE UP UNTIL 2004. OASIS OF MERCY PURCHASED THE PROPERTY FROM CHARISMA IN MISSIONS. IN 2005 I WAS HIRED AS AN EMPLOYEE AT OASIS OF MERCY AND IN 2008 I JOINED THE BOARD OF DIRECTORS. ALL THE YEARS I HAVE KNOWN ABOUT THE SITE, HAS ALWAYS BEEN USED AS A CHURCH.

IN 2021 I MET THE OWNER OF WASTE AND RECYCLING SERVICES (COMPANY THAT PICKS UP OUR GENERAL WASTE) INFORMED ME THAT THE SITE USED TO BE HIS CHILDHOOD CHURCH IN THE 60'S. HE NOTED THAT THEY USED TO HAVE A SCHOOL.

Title Officer Email: taylorsteam@ticortitle.comPROPERTY: **1059 South Gage Avenue, Los Angeles County, CA 90023****PRELIMINARY REPORT**

*In response to the application for a policy of title insurance referenced herein, **Ticor Title Company of California** hereby reports that it is prepared to issue, or cause to be issued, as of the date hereof, a policy or policies of title insurance describing the land and the estate or interest therein hereinafter set forth, insuring against loss which may be sustained by reason of any defect, lien or encumbrance not shown or referred to as an exception herein or not excluded from coverage pursuant to the printed Schedules, Conditions and Stipulations or Conditions of said policy forms.*

The printed Exceptions and Exclusions from the coverage and Limitations on Covered Risks of said policy or policies are set forth in Attachment One. The policy to be issued may contain an arbitration clause. When the Amount of Insurance is less than that set forth in the arbitration clause, all arbitrable matters shall be arbitrated at the option of either the Company or the Insured as the exclusive remedy of the parties. Limitations on Covered Risks applicable to the CLTA and ALTA Homeowner's Policies of Title Insurance which establish a Deductible Amount and a Maximum Dollar Limit of Liability for certain coverages are also set forth in Attachment One. Copies of the policy forms should be read. They are available from the office which issued this report.

This report (and any supplements or amendments hereto) is issued solely for the purpose of facilitating the issuance of a policy of title insurance and no liability is assumed hereby. If it is desired that liability be assumed prior to the issuance of a policy of title insurance, a Binder or Commitment should be requested.

The policy(s) of title insurance to be issued hereunder will be policy(s) of Chicago Title Insurance Company, a Florida Corporation.

Please read the exceptions shown or referred to herein and the exceptions and exclusions set forth in Attachment One of this report carefully. The exceptions and exclusions are meant to provide you with notice of matters which are not covered under the terms of the title insurance policy and should be carefully considered.

It is important to note that this preliminary report is not a written representation as to the condition of title and may not list all liens, defects and encumbrances affecting title to the land.

The lien of supplemental or escaped assessments of property taxes, if any, made pursuant to the provisions of Chapter 3.5 (commencing with Section 75) or Part 2, Chapter 3, Articles 3 and 4, respectively, of the Revenue and Taxation Code of the State of California as a result of the transfer of title to the vestee named in Schedule A or as a result of changes in ownership or new construction occurring prior to Date of Policy.
- 5. Water rights, claims or title to water, whether or not disclosed by the public records.
- 6. Easement(s) for the purpose(s) shown below and rights incidental thereto as set forth in a document:

Purpose:	Utilities
Recording Date:	December 3, 1957
Recording No:	3031, of Official Records
Affects:	A portion of said land as more particularly described in said document

EXCEPTIONS (Continued)

7. A deed of trust to secure an indebtedness in the amount shown below,

Amount: \$1,350,000.00
Dated: November 15, 2016
Trustor/Grantor: Oasis of Mercy, A California Corporation
Trustee: Stewart Title of California, Inc.
Beneficiary: Pacific West Mortgage Fund, LLC, a California limited liability company
Loan No.: Not set out
Recording Date: December 9, 2016
[Recording No:](#) [2016-1564010, of Official Records](#)

An assignment of the beneficial interest under said deed of trust which names:

Assignee: Pacific West Mortgage Fund, LLC, a California limited liability company
Loan No.: Not set out
Recording Date: February 23, 2017
[Recording No:](#) [2017-0219373, of Official Records](#)

An agreement to modify the terms and provisions of said deed of trust as therein provided

Executed by: Pacific West Mortgage Fund, LLC, a California limited liability company and
Oasis of Mercy, a California corporation
Recording Date: November 19, 2019
[Recording No:](#) [2019-1260036, of Official Records](#)

An agreement to modify the terms and provisions of said deed of trust as therein provided

Executed by: Pacific West Mortgage Fund, LLC, a California limited liability company and
Oasis of Mercy, a California corporation
Recording Date: October 23, 2020
Recording No: 20201325750, of Official Records

- 8. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other matters which a correct survey would disclose and which are not shown by the public records.
- 9. Any easements not disclosed by the public records as to matters affecting title to real property, whether or not said easements are visible and apparent.
- 10. Matters which may be disclosed by an inspection and/or by a correct ALTA/ACSM Land Title Survey of said Land that is satisfactory to the Company, and/or by inquiry of the parties in possession thereof.
- 11. Any rights of the parties in possession of a portion of, or all of, said Land, which rights are not disclosed by the public records.

The Company will require, for review, a full and complete copy of any unrecorded agreement, contract, license and/or lease, together with all supplements, assignments and amendments thereto, before issuing any policy of title insurance without excepting this item from coverage.

The Company reserves the right to except additional items and/or make additional requirements after reviewing said documents.

**EXCEPTIONS
(Continued)**

12. This transaction requires high liability approval prior to close of escrow together with an inspection of the subject property.

Please advise title department with an estimated date that your transaction will close so we can schedule the necessary approvals and inspections.

13. Unrecorded matters which may be disclosed by an Owner's Affidavit or Declaration. A form of the Owner's Affidavit/Declaration is attached to this Preliminary Report/Commitment. This Affidavit/Declaration is to be completed by the record owner of the land and submitted for review prior to the closing of this transaction. Your prompt attention to this requirement will help avoid delays in the closing of this transaction. Thank you.

The Company reserves the right to add additional items or make further requirements after review of the requested Affidavit/Declaration.

PLEASE REFER TO THE "INFORMATIONAL NOTES" AND "REQUIREMENTS" SECTIONS WHICH FOLLOW FOR INFORMATION NECESSARY TO COMPLETE THIS TRANSACTION.

END OF EXCEPTIONS

REQUIREMENTS SECTION

1. The Company will require the following documents for review prior to the issuance of any title insurance predicated upon a conveyance or encumbrance by the corporation named below:

Name of Corporation: Oasis of Mercy, A California Corporation

- a) A Copy of the corporation By-laws and Articles of Incorporation
- b) An original or certified copy of a resolution authorizing the transaction contemplated herein
- c) If the Articles and/or By-laws require approval by a 'parent' organization, a copy of the Articles and By-laws of the parent

The Company reserves the right to add additional items or make further requirements after review of the requested documentation.

2. In order to complete this report, the Company requires a Statement of Information to be completed by the following party(s),

Party(s): All Parties

The Company reserves the right to add additional items or make further requirements after review of the requested Statement of Information.

NOTE: The Statement of Information is necessary to complete the search and examination of title under this order. Any title search includes matters that are indexed by name only, and having a completed Statement of Information assists the Company in the elimination of certain matters which appear to involve the parties but in fact affect another party with the same or similar name. Be assured that the Statement of Information is essential and will be kept strictly confidential to this file.

END OF REQUIREMENTS

INFORMATIONAL NOTES SECTION

1. Note: There are NO conveyances affecting said Land recorded within 24 months of the date of this report.
2. None of the items shown in this report will cause the Company to decline to attach ALTA Endorsement Form 9 to an Extended Coverage Loan Policy, when issued.
3. The Company is not aware of any matters which would cause it to decline to attach CLTA Endorsement Form 116 indicating that there is located on said Land Commercial properties, known as 1059 South Gage Avenue, located within the city of Los Angeles County, California, 90023, to an Extended Coverage Loan Policy.
4. Note: The policy of title insurance will include an arbitration provision. The Company or the insured may demand arbitration. Arbitrable matters may include, but are not limited to, any controversy or claim between the Company and the insured arising out of or relating to this policy, any service of the Company in connection with its issuance or the breach of a policy provision or other obligation. Please ask your escrow or title officer for a sample copy of the policy to be issued if you wish to review the arbitration provisions and any other provisions pertaining to your Title Insurance coverage.
5. Notice: Please be aware that due to the conflict between federal and state laws concerning the cultivation, distribution, manufacture or sale of marijuana, the Company is not able to close or insure any transaction involving Land that is associated with these activities.
6. Pursuant to Government Code Section 27388.1, as amended and effective as of 1-1-2018, a Documentary Transfer Tax (DTT) Affidavit may be required to be completed and submitted with each document when DTT is being paid or when an exemption is being claimed from paying the tax. If a governmental agency is a party to the document, the form will not be required. DTT Affidavits may be available at a Tax Assessor-County Clerk-Recorder.
7. The following Exclusion(s) are added to preliminary reports, commitments and will be included as an endorsement in the following policies:
 - A. 2006 ALTA Owner's Policy (06-17-06).
 6. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.
 - B. 2006 ALTA Loan Policy (06-17-06).
 8. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.
 9. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.
 - C. ALTA Homeowner's Policy of Title Insurance (12-02-13) and CLTA Homeowner's Policy of Title Insurance (12-02-13).
 10. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.
 - D. ALTA Expanded Coverage Residential Loan Policy - Assessments Priority (04-02-15).
 12. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the Public Records but that would be disclosed by an examination of any records maintained by or on behalf of a Tribe or on behalf of its members.

**INFORMATIONAL NOTES
(Continued)**

13. Any claim of invalidity, unenforceability, or lack of priority of the lien of the Insured Mortgage based on the application of a Tribe's law resulting from the failure of the Insured Mortgage to specify State law as the governing law with respect to the lien of the Insured Mortgage.
- E. CLTA Standard Coverage Policy 1990 (11-09-18).
 7. Defects, liens, encumbrances, adverse claims, notices, or other matters not appearing in the public records but that would be disclosed by an examination of any records maintained by or on behalf of a tribe or on behalf of its members.
 8. Any claim of invalidity, unenforceability, or lack of priority of the lien of the insured mortgage based on the application of a tribe's law resulting from the failure of the insured mortgage to specify state law as the governing law with respect to the lien of the insured mortgage.
8. The Company and its policy issuing agents are required by Federal law to collect additional information about certain transactions in specified geographic areas in accordance with the Bank Secrecy Act. If this transaction is required to be reported under a Geographic Targeting Order issued by FinCEN, the Company or its policy issuing agent must be supplied with a completed ALTA Information Collection Form ("ICF") prior to closing the transaction contemplated herein.

To protect the private information contained in the attached form and photo ID, please return via a secured method.

Wire Fraud Alert

This Notice is not intended to provide legal or professional advice. If you have any questions, please consult with a lawyer.

All parties to a real estate transaction are targets for wire fraud and many have lost hundreds of thousands of dollars because they simply relied on the wire instructions received via email, without further verification. **If funds are to be wired in conjunction with this real estate transaction, we strongly recommend verbal verification of wire instructions through a known, trusted phone number prior to sending funds.**

In addition, the following non-exclusive self-protection strategies are recommended to minimize exposure to possible wire fraud.

- **NEVER RELY** on emails purporting to change wire instructions. Parties to a transaction rarely change wire instructions in the course of a transaction.
- **ALWAYS VERIFY** wire instructions, specifically the ABA routing number and account number, by calling the party who sent the instructions to you. **DO NOT** use the phone number provided in the email containing the instructions, use phone numbers you have called before or can otherwise verify. **Obtain the phone number of relevant parties to the transaction as soon as an escrow account is opened.** **DO NOT** send an email to verify as the email address may be incorrect or the email may be intercepted by the fraudster.
- **USE COMPLEX EMAIL PASSWORDS** that employ a combination of mixed case, numbers, and symbols. Make your passwords greater than eight (8) characters. Also, change your password often and do **NOT** reuse the same password for other online accounts.
- **USE MULTI-FACTOR AUTHENTICATION** for email accounts. Your email provider or IT staff may have specific instructions on how to implement this feature.

For more information on wire-fraud scams or to report an incident, please refer to the following links:

Notice of Available Discounts

Pursuant to Section 2355.3 in Title 10 of the California Code of Regulations Fidelity National Financial, Inc. and its subsidiaries ("FNF") must deliver a notice of each discount available under our current rate filing along with the delivery of escrow instructions, a preliminary report or commitment. Please be aware that the provision of this notice does not constitute a waiver of the consumer's right to be charged the filed rate. As such, your transaction may not qualify for the below discounts.

You are encouraged to discuss the applicability of one or more of the below discounts with a Company representative. These discounts are generally described below; consult the rate manual for a full description of the terms, conditions and requirements for such discount. These discounts only apply to transactions involving services rendered by the FNF Family of Companies. This notice only applies to transactions involving property improved with a one-to-four family residential dwelling.

Not all discounts are offered by every FNF Company. The discount will only be applicable to the FNF Company as indicated by the named discount.

FIDELITY NATIONAL FINANCIAL, INC. PRIVACY NOTICE

Effective August 1, 2021

Fidelity National Financial, Inc. and its majority-owned subsidiary companies (collectively, "FNF," "our," or "we") respect and are committed to protecting your privacy. This Privacy Notice explains how we collect, use, and protect personal information, when and to whom we disclose such information, and the choices you have about the use and disclosure of that information.

A limited number of FNF subsidiaries have their own privacy notices. If a subsidiary has its own privacy notice, the privacy notice will be available on the subsidiary's website and this Privacy Notice does not apply.

Collection of Personal Information

FNF may collect the following categories of Personal Information:

- contact information (e.g., name, address, phone number, email address);
- demographic information (e.g., date of birth, gender, marital status);
- identity information (e.g. Social Security Number, driver's license, passport, or other government ID number);
- financial account information (e.g. loan or bank account information); and
- other personal information necessary to provide products or services to you.

We may collect Personal Information about you from:

- information we receive from you or your agent;
- information about your transactions with FNF, our affiliates, or others; and
- information we receive from consumer reporting agencies and/or governmental entities, either directly from these entities or through others.

Collection of Browsing Information

FNF automatically collects the following types of Browsing Information when you access an FNF website, online service, or application (each an "FNF Website") from your Internet browser, computer, and/or device:

- Internet Protocol (IP) address and operating system;
- browser version, language, and type;
- domain name system requests; and
- browsing history on the FNF Website, such as date and time of your visit to the FNF Website and visits to the pages within the FNF Website.

Like most websites, our servers automatically log each visitor to the FNF Website and may collect the Browsing Information described above. We use Browsing Information for system administration, troubleshooting, fraud investigation, and to improve our websites. Browsing Information generally does not reveal anything personal about you, though if you have created a user account for an FNF Website and are logged into that account, the FNF Website may be able to link certain browsing activity to your user account.

Other Online Specifics

Cookies. When you visit an FNF Website, a "cookie" may be sent to your computer. A cookie is a small piece of data that is sent to your Internet browser from a web server and stored on your computer's hard drive. Information gathered using cookies helps us improve your user experience. For example, a cookie can help the website load properly or can customize the display page based on your browser type and user preferences. You can choose whether or not to accept cookies by changing your Internet browser settings. Be aware that doing so may impair or limit some functionality of the FNF Website.

Web Beacons. We use web beacons to determine when and how many times a page has been viewed. This information is used to improve our websites.

Do Not Track. Currently our FNF Websites do not respond to "Do Not Track" features enabled through your browser.

Links to Other Sites. FNF Websites may contain links to unaffiliated third-party websites. FNF is not responsible for the privacy practices or content of those websites. We recommend that you read the privacy policy of every website you visit.

Use of Personal Information

FNF uses Personal Information for three main purposes:

- To provide products and services to you or in connection with a transaction involving you.
- To improve our products and services.
- To communicate with you about our, our affiliates', and others' products and services, jointly or independently.

When Information Is Disclosed

We may disclose your Personal Information and Browsing Information in the following circumstances:

- to enable us to detect or prevent criminal activity, fraud, material misrepresentation, or nondisclosure;
- to nonaffiliated service providers who provide or perform services or functions on our behalf and who agree to use the information only to provide such services or functions;

- to nonaffiliated third party service providers with whom we perform joint marketing, pursuant to an agreement with them to jointly market financial products or services to you;
- to law enforcement or authorities in connection with an investigation, or in response to a subpoena or court order; or
- in the good-faith belief that such disclosure is necessary to comply with legal process or applicable laws, or to protect the rights, property, or safety of FNF, its customers, or the public.

The law does not require your prior authorization and does not allow you to restrict the disclosures described above. Additionally, we may disclose your information to third parties for whom you have given us authorization or consent to make such disclosure. We do not otherwise share your Personal Information or Browsing Information with nonaffiliated third parties, except as required or permitted by law. We may share your Personal Information with affiliates (other companies owned by FNF) to directly market to you. Please see "Choices with Your Information" to learn how to restrict that sharing.

We reserve the right to transfer your Personal Information, Browsing Information, and any other information, in connection with the sale or other disposition of all or part of the FNF business and/or assets, or in the event of bankruptcy, reorganization, insolvency, receivership, or an assignment for the benefit of creditors. By submitting Personal Information and/or Browsing Information to FNF, you expressly agree and consent to the use and/or transfer of the foregoing information in connection with any of the above described proceedings.

Security of Your Information

We maintain physical, electronic, and procedural safeguards to protect your Personal Information.

Choices With Your Information

If you do not want FNF to share your information among our affiliates to directly market to you, you may send an "opt out" request as directed at the end of this Privacy Notice. We do not share your Personal Information with nonaffiliates for their use to direct market to you without your consent.

Whether you submit Personal Information or Browsing Information to FNF is entirely up to you. If you decide not to submit Personal Information or Browsing Information, FNF may not be able to provide certain services or products to you.

For California Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties, except as permitted by California law. For additional information about your California privacy rights, please visit the "California Privacy" link on our website (<https://fnf.com/pages/californiaprivacy.aspx>) or call (888) 413-1748.

For Nevada Residents: You may be placed on our internal Do Not Call List by calling (888) 714-2710 or by contacting us via the information set forth at the end of this Privacy Notice. Nevada law requires that we also provide you with the following contact information: Bureau of Consumer Protection, Office of the Nevada Attorney General, 555 E. Washington St., Suite 3900, Las Vegas, NV 89101; Phone number: (702) 486-3132; email: BCPINFO@ag.state.nv.us.

For Oregon Residents: We will not share your Personal Information or Browsing Information with nonaffiliated third parties for marketing purposes, except after you have been informed by us of such sharing and had an opportunity to indicate that you do not want a disclosure made for marketing purposes.

For Vermont Residents: We will not disclose information about your creditworthiness to our affiliates and will not disclose your personal information, financial information, credit report, or health information to nonaffiliated third parties to market to you, other than as permitted by Vermont law, unless you authorize us to make those disclosures.

Information From Children

The FNF Websites are not intended or designed to attract persons under the age of eighteen (18). We do not collect Personal Information from any person that we know to be under the age of thirteen (13) without permission from a parent or guardian.

International Users

FNF's headquarters is located within the United States. If you reside outside the United States and choose to provide Personal Information or Browsing Information to us, please note that we may transfer that information outside of your country of residence. By providing FNF with your Personal Information and/or Browsing Information, you consent to our collection, transfer, and use of such information in accordance with this Privacy Notice.

FNF Website Services for Mortgage Loans

Certain FNF companies provide services to mortgage loan servicers, including hosting websites that collect customer information on behalf of mortgage loan servicers (the "Service Websites"). The Service Websites may contain links to both this Privacy Notice and the mortgage loan servicer or lender's privacy notice. The sections of this Privacy Notice titled When Information is Disclosed, Choices with Your Information, and Accessing and Correcting Information do not apply to the Service Websites. The mortgage loan servicer or lender's privacy notice governs use, disclosure, and access to your Personal Information. FNF does not share Personal Information collected through the Service Websites, except as required or authorized by contract with the mortgage loan servicer or lender, or as required by law or in the good-faith belief that such disclosure is necessary: to comply with a legal process or applicable law, to enforce this Privacy Notice, or to protect the rights, property, or safety of FNF or the public.

Your Consent To This Privacy Notice; Notice Changes

By submitting Personal Information and/or Browsing Information to FNF, you consent to the collection and use of the information in accordance with this Privacy Notice. We may change this Privacy Notice at any time. The Privacy Notice's effective date will show the last date changes were made. If you provide information to us following any change of the Privacy Notice, that signifies your assent to and acceptance of the changes to the Privacy Notice.

Accessing and Correcting Information; Contact Us

If you have questions, would like to correct your Personal Information, or want to opt-out of information sharing for affiliate marketing, visit FNF's [Opt Out Page](#) or contact us by phone at (888) 714-2710 or by mail to:

Fidelity National Financial, Inc.
601 Riverside Avenue,
Jacksonville, Florida 32204
Attn: Chief Privacy Officer

ATTACHMENT ONE (Revised 05-06-16)

CALIFORNIA LAND TITLE ASSOCIATION STANDARD COVERAGE POLICY – 1990

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance or governmental regulation (including but not limited to building or zoning laws, ordinances, or regulations) restricting, regulating, prohibiting or relating (i) the occupancy, use, or enjoyment of the land; (ii) the character, dimensions or location of any improvement now or hereafter erected on the land; (iii) a separation in ownership or a change in the dimensions or area of the land or any parcel of which the land is or was a part; or (iv) environmental protection, or the effect of any violation of these laws, ordinances or governmental regulations, except to the extent that a notice of the enforcement thereof or a notice of a defect, lien, or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
- (b) Any governmental police power not excluded by (a) above, except to the extent that a notice of the exercise thereof or notice of a defect, lien or encumbrance resulting from a violation or alleged violation affecting the land has been recorded in the public records at Date of Policy.
2. Rights of eminent domain unless notice of the exercise thereof has been recorded in the public records at Date of Policy, but not excluding from coverage any taking which has occurred prior to Date of Policy which would be binding on the rights of a purchaser for value without knowledge.
3. Defects, liens, encumbrances, adverse claims or other matters:
 - (a) whether or not recorded in the public records at Date of Policy, but created, suffered, assumed or agreed to by the insured claimant;
 - (b) not known to the Company, not recorded in the public records at Date of Policy, but known to the insured claimant and not disclosed in writing to the Company by the insured claimant prior to the date the insured claimant became an insured under this policy;
 - (c) resulting in no loss or damage to the insured claimant;
 - (d) attaching or created subsequent to Date of Policy; or
 - (e) resulting in loss or damage which would not have been sustained if the insured claimant had paid value for the insured mortgage or for the estate or interest insured by this policy.
4. Unenforceability of the lien of the insured mortgage because of the inability or failure of the insured at Date of Policy, or the inability or failure of any subsequent owner of the indebtedness, to comply with the applicable doing business laws of the state in which the land is situated.
5. Invalidity or unenforceability of the lien of the insured mortgage, or claim thereof, which arises out of the transaction evidenced by the insured mortgage and is based upon usury or any consumer credit protection or truth in lending law.
6. Any claim, which arises out of the transaction vesting in the insured the estate of interest insured by this policy or the transaction creating the interest of the insured lender, by reason of the operation of federal bankruptcy, state insolvency or similar creditors' rights laws.

EXCEPTIONS FROM COVERAGE - SCHEDULE B, PART I

This policy does not insure against loss or damage (and the Company will not pay costs, attorneys' fees or expenses) which arise by reason of:

1. Taxes or assessments which are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the public records.
Proceedings by a public agency which may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the public records.
2. Any facts, rights, interests, or claims which are not shown by the public records but which could be ascertained by an inspection of the land or which may be asserted by persons in possession thereof.
3. Easements, liens or encumbrances, or claims thereof, not shown by the public records.
4. Discrepancies, conflicts in boundary lines, shortage in area, encroachments, or any other facts which a correct survey would disclose, and which are not shown by the public records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b) or (c) are shown by the public records.
6. Any lien or right to a lien for services, labor or material not shown by the public records.

CLTA HOMEOWNER'S POLICY OF TITLE INSURANCE (12-02-13) ALTA HOMEOWNER'S POLICY OF TITLE INSURANCE

EXCLUSIONS

In addition to the Exceptions in Schedule B, You are not insured against loss, costs, attorneys' fees, and expenses resulting from:

1. Governmental police power, and the existence or violation of those portions of any law or government regulation concerning:
 - a. building;
 - b. zoning;
 - c. land use;
 - d. improvements on the Land;
 - e. land division; and
 - f. environmental protection.This Exclusion does not limit the coverage described in Covered Risk 8.a., 14, 15, 16, 18, 19, 20, 23 or 27.
2. The failure of Your existing structures, or any part of them, to be constructed in accordance with applicable building codes. This Exclusion does not limit the coverage described in Covered Risk 14 or 15.
3. The right to take the Land by condemning it. This Exclusion does not limit the coverage described in Covered Risk 17.
4. Risks:
 - a. that are created, allowed, or agreed to by You, whether or not they are recorded in the Public Records;
 - b. that are Known to You at the Policy Date, but not to Us, unless they are recorded in the Public Records at the Policy Date;

- c. that result in no loss to You; or
 - d. that first occur after the Policy Date - this does not limit the coverage described in Covered Risk 7, 8.e., 25, 26, 27 or 28.
5. Failure to pay value for Your Title.
 6. Lack of a right:
 - a. to any land outside the area specifically described and referred to in paragraph 3 of Schedule A; and
 - b. in streets, alleys, or waterways that touch the Land.
 This Exclusion does not limit the coverage described in Covered Risk 11 or 21.
 7. The transfer of the Title to You is invalid as a preferential transfer or as a fraudulent transfer or conveyance under federal bankruptcy, state insolvency, or similar creditors' rights laws.
 8. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
 9. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

LIMITATIONS ON COVERED RISKS

Your insurance for the following Covered Risks is limited on the Owner's Coverage Statement as follows:

- For Covered Risk 16, 18, 19, and 21 Your Deductible Amount and Our Maximum Dollar Limit of Liability shown in Schedule A.

The deductible amounts and maximum dollar limits shown on Schedule A are as follows:

	Your Deductible Amount	Our Maximum Dollar Limit of Liability
Covered Risk 16:	1.00% of Policy Amount Shown in Schedule A or \$2,500.00 (whichever is less)	\$ 10,000.00
Covered Risk 18:	1.00% of Policy Amount Shown in Schedule A or \$5,000.00 (whichever is less)	\$ 25,000.00
Covered Risk 19:	1.00% of Policy Amount Shown in Schedule A or \$5,000.00 (whichever is less)	\$ 25,000.00
Covered Risk 21:	1.00% of Policy Amount Shown in Schedule A or \$2,500.00 (whichever is less)	\$ 5,000.00

2006 ALTA LOAN POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;
 or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 13 or 14); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury or any consumer credit protection or truth-in-lending law.
6. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 13(b) of this policy.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the Insured Mortgage in the Public Records. This Exclusion does not modify or limit the coverage provided under Covered Risk 11(b).

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

{Except as provided in Schedule B - Part II, { t{or T}his policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

{PART I

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown by the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records.}

PART II

In addition to the matters set forth in Part I of this Schedule, the Title is subject to the following matters, and the Company insures against loss or damage sustained in the event that they are not subordinate to the lien of the Insured Mortgage:}

2006 ALTA OWNER'S POLICY (06-17-06)

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy, and the Company will not pay loss or damage, costs, attorneys' fees, or expenses that arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 6.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 9 and 10); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Title.
4. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction vesting the Title as shown in Schedule A, is
 - (a) a fraudulent conveyance or fraudulent transfer; or
 - (b) a preferential transfer for any reason not stated in Covered Risk 9 of this policy.
5. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching between Date of Policy and the date of recording of the deed or other instrument of transfer in the Public Records that vests Title as shown in Schedule A.

The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

EXCEPTIONS FROM COVERAGE

This policy does not insure against loss or damage, and the Company will not pay costs, attorneys' fees or expenses, that arise by reason of:

{The above policy form may be issued to afford either Standard Coverage or Extended Coverage. In addition to the above Exclusions from Coverage, the Exceptions from Coverage in a Standard Coverage policy will also include the following Exceptions from Coverage:

1. (a) Taxes or assessments that are not shown as existing liens by the records of any taxing authority that levies taxes or assessments on real property or by the Public Records; (b) proceedings by a public agency that may result in taxes or assessments, or notices of such proceedings, whether or not shown by the records of such agency or by the Public Records.
2. Any facts, rights, interests, or claims that are not shown in the Public Records but that could be ascertained by an inspection of the Land or that may be asserted by persons in possession of the Land.
3. Easements, liens or encumbrances, or claims thereof, not shown by the Public Records.
4. Any encroachment, encumbrance, violation, variation, or adverse circumstance affecting the Title that would be disclosed by an accurate and complete land survey of the Land and that are not shown by the Public Records.
5. (a) Unpatented mining claims; (b) reservations or exceptions in patents or in Acts authorizing the issuance thereof; (c) water rights, claims or title to water, whether or not the matters excepted under (a), (b), or (c) are shown by the Public Records.
6. Any lien or right to a lien for services, labor or material not shown by the Public Records. }
7. {Variable exceptions such as taxes, easements, CC&R's, etc. shown here.}

ALTA EXPANDED COVERAGE RESIDENTIAL LOAN POLICY – ASSESSMENTS PRIORITY (04-02-15)

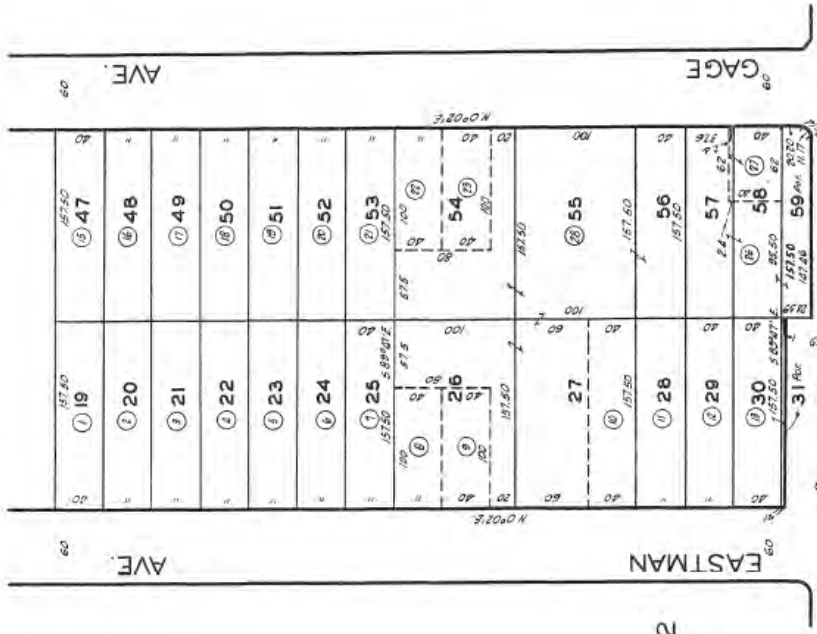

EXCLUSIONS FROM COVERAGE

The following matters are expressly excluded from the coverage of this policy and the Company will not pay loss or damage, costs, attorneys' fees or expenses which arise by reason of:

1. (a) Any law, ordinance, permit, or governmental regulation (including those relating to building and zoning) restricting, regulating, prohibiting, or relating to
 - (i) the occupancy, use, or enjoyment of the Land;
 - (ii) the character, dimensions, or location of any improvement erected on the Land;
 - (iii) the subdivision of land; or
 - (iv) environmental protection;or the effect of any violation of these laws, ordinances, or governmental regulations. This Exclusion 1(a) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
- (b) Any governmental police power. This Exclusion 1(b) does not modify or limit the coverage provided under Covered Risk 5, 6, 13(c), 13(d), 14 or 16.
2. Rights of eminent domain. This Exclusion does not modify or limit the coverage provided under Covered Risk 7 or 8.
3. Defects, liens, encumbrances, adverse claims, or other matters
 - (a) created, suffered, assumed, or agreed to by the Insured Claimant;
 - (b) not Known to the Company, not recorded in the Public Records at Date of Policy, but Known to the Insured Claimant and not disclosed in writing to the Company by the Insured Claimant prior to the date the Insured Claimant became an Insured under this policy;
 - (c) resulting in no loss or damage to the Insured Claimant;
 - (d) attaching or created subsequent to Date of Policy (however, this does not modify or limit the coverage provided under Covered Risk 11, 16, 17, 18, 19, 20, 21, 22, 23, 24, 27 or 28); or
 - (e) resulting in loss or damage that would not have been sustained if the Insured Claimant had paid value for the Insured Mortgage.
4. Unenforceability of the lien of the Insured Mortgage because of the inability or failure of an Insured to comply with applicable doing-business laws of the state where the Land is situated.
5. Invalidity or unenforceability in whole or in part of the lien of the Insured Mortgage that arises out of the transaction evidenced by the Insured Mortgage and is based upon usury, or any consumer credit protection or truth-in-lending law. This Exclusion does not modify or limit the coverage provided in Covered Risk 26.
6. Any claim of invalidity, unenforceability or lack of priority of the lien of the Insured Mortgage as to Advances or modifications made after the Insured has Knowledge that the vestee shown in Schedule A is no longer the owner of the estate or interest covered by this policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11.
7. Any lien on the Title for real estate taxes or assessments imposed by governmental authority and created or attaching subsequent to Date of Policy. This Exclusion does not modify or limit the coverage provided in Covered Risk 11(b) or 25.
8. The failure of the residential structure, or any portion of it, to have been constructed before, on or after Date of Policy in accordance with applicable building codes. This Exclusion does not modify or limit the coverage provided in Covered Risk 5 or 6.
9. Any claim, by reason of the operation of federal bankruptcy, state insolvency, or similar creditors' rights laws, that the transaction creating the lien of the Insured Mortgage, is
 - (a) a fraudulent conveyance or fraudulent transfer, or
 - (b) a preferential transfer for any reason not stated in Covered Risk 27(b) of this policy.
10. Contamination, explosion, fire, flooding, vibration, fracturing, earthquake, or subsidence.
11. Negligence by a person or an Entity exercising a right to extract or develop minerals, water, or any other substances.

OWNER'S DECLARATION

Escrow No.: 00902741-020-SC0-BLA
Property Address: 1059 South Gage Avenue
Los Angeles County, CA 90023

The undersigned hereby declares as follows:

1. (Fill in the applicable paragraph and strike the other)
 - a. Declarant ("Owner") is the owner or lessee, as the case may be, of certain premises located at 1059 South Gage Avenue, Los Angeles County, CA 90023, further described as follows: See Preliminary Report/Commitment No. for full legal description (the "Land").
 - b. Declarant is the _____ of _____ ("Owner"), which is the owner or lessee, as the case may be, of certain premises located at 1059 South Gage Avenue, Los Angeles County, CA 90023, further described as follows: See Preliminary Report/Commitment No. for full legal description (the "Land").
2. (Fill in the applicable paragraph and strike the other)
 - a. During the period of six months immediately preceding the date of this declaration no work has been done, no surveys or architectural or engineering plans have been prepared, and no materials have been furnished in connection with the erection, equipment, repair, protection or removal of any building or other structure on the Land or in connection with the improvement of the Land in any manner whatsoever.
 - b. During the period of six months immediately preceding the date of this declaration certain work has been done and materials furnished in connection with _____ upon the Land in the approximate total sum of \$_____, but no work whatever remains to be done and no materials remain to be furnished to complete the construction in full compliance with the plans and specifications, nor are there any unpaid bills incurred for labor and materials used in making such improvements or repairs upon the Land, or for the services of architects, surveyors or engineers, except as follows: _____ . Owner, by the undersigned Declarant, agrees to and does hereby indemnify and hold harmless Ticor Title Company of California against any and all claims arising therefrom.
3. Owner has not previously conveyed the Land; is not a debtor in bankruptcy (and if a partnership, the general partner thereof is not a debtor in bankruptcy); and has not received notice of any pending court action affecting the title to the Land.
4. Except as shown in the above-referenced Preliminary Report/Commitment, there are no unpaid or unsatisfied mortgages, deeds of trust, Uniform Commercial Code financing statements, regular assessments, special assessments, periodic assessments or any assessment from any source, claims of lien, special assessments, or taxes that constitute a lien against the Land or that affect the Land but have not been recorded in the public records. There are no violations of the covenants, conditions and restrictions as shown in the above-referenced Preliminary Report/Commitment.
5. The Land is currently in use as _____; _____ occupy/occupies the Land; and the following are all of the leases or other occupancy rights affecting the Land:

6. There are no other persons or entities that assert an ownership interest in the Land, nor are there unrecorded easements, claims of easement, or boundary disputes that affect the Land.
7. There are no outstanding options to purchase or rights of first refusal affecting the Land.
8. Between the most recent Effective Date of the above-referenced Preliminary Report/Commitment and the date of recording of the Insured Instrument(s), Owner has not taken or allowed, and will not take or allow, any action or inaction to encumber or otherwise affect title to the Land.

This declaration is made with the intention that Ticor Title Company of California (the "Company") and its policy issuing agents will rely upon it in issuing their title insurance policies and endorsements. Owner, by the undersigned Declarant, agrees to indemnify the Company against loss or damage (including attorneys fees, expenses, and costs) incurred by the Company as a result of any untrue statement made herein.

I declare under penalty of perjury that the foregoing is true and correct and that this declaration was executed on _____ at _____.

PROJECT DESCRIPTION

This project is located on east of S Eastman Ave and west of S Gage Ave, between Whittier Blvd and Dennison St in Unincorporated Los Angeles County, State of California. The total area is approximately 50,994 SF (1.171 Acres). All area will be disturbed.

In pre-development period, the project site is commercial building with parking lots. All structures and pavement will be demolished. The existing impervious surface is approximately 49,741 SF (98%). The drainage area is divided in 2 part: east and west. In the west part, the runoff flows from east to west and drain into S Eastman Ave. In the east part, the runoff flows from west to east and drain into S Gage Ave by gravity. The runoff from project site both street flow south approximately 200 feet and be captured by open-curb catch basin at Dennison St. There is no offsite runoff drains into this project both pre- and post-development period.

The development will construct a School building with parking lots. More landscaping (pervious area) will be provided than in the existing condition. Total landscape area is 5,558 SF. The impervious surface is about 89%. The runoff will be collected by roof system, area drains, trench drains and catch basins. All stormwater will discharge to proposed infiltration trench located at northeast corner of project under parking and driveway area. The overflow from infiltration trench will directly drain to S Eastman Ave by gravity.

From <http://www.dpw.lacounty.gov/wrd/hydrologygis>, the Final 85th Percentile, 24-hr Rainfall Isohyet is 0.92" that is more than 0.75" isohyet. Therefore this analysis will use 0.92" for determine the peak mitigated runoff and SWQDv.

From Soil Report by Geotechnologies, Inc date September 23, 2022, File No.22311, the infiltration rate of 0.72 inch per hour may be utilized for the design of an infiltration system.

Since the runoff from the project site discharges to public stormdrain system and the post-developed runoff is less than pre-developed runoff, this project is exempted from hydromodification. This development is not adversely impacted to the downstream properties.

AND <http://www.dpw.lacounty.gov/wrd/hydrologygis/>

SOIL CLASSIFICATION: 013 (42%) AND 016 (58%)

50 YEAR FREQUENCY RAINFALL = 5.8"

THE EXISTING CONDITION: AVERAGE STREET SLOPE = 1.3%

TOTAL AREA = 3.23 AC, LENGTH = 739 FT, IMP = 1

USE HYDROCALC PROGRAM:

FOR AREA IN 013 SOIL: AREA = 0.87 AC, $Q_{25Y} = 1.8047$ CFS

FOR AREA IN 016 SOIL: AREA = 2.36 AC, $Q_{25Y} = 4.8956$ CFS

TOTAL $Q_{25Y} = 6.7003$ CFS

TYPICAL SECTION S EASTMAN AVE

CHECK STREET CAPACITY ONLY HALF WIDTH:

$$Q = \frac{1.486}{n} (R)^{2/3} (S)^{1/2} A$$

$$n = 0.013$$

$$A = 6.7 \text{ SF}$$

$$S = 0.013 = 1.3\% \text{ (AVG SLOPE OF STREET)}$$

$$P = 20 \text{ FT}$$

$$R = A/P = 0.335$$

$$Q = (114.31) (0.335)^{2/3} (0.013)^{1/2} (6.7)$$

$$Q_{\text{CAPACITY}} = 42.12 \text{ CFS}$$

THE QUANTITY AFTER DEVELOPMENT AT 9.8859 CFS (3.1856 CFS FROM PROJECT SITE PLUS EXISTING QUANTITY AT 6.7003 CFS) IS LESS THAN STREET CAPACITY. THEREFORE THE RUNOFF FROM PROJECT SITE DOES NOT ADVERSELY IMPACT TO DOWNSTREAM PROPERTIES.

LOW IMPACT DEVELOPMENT DESIGN

PROJECT CATEGORY

This project is a designated project.

Category	YES	NO
1. Development ^a of a new project equal to 1 acre or greater of disturbed area and adding more than 10,000 square feet of impervious area ^b	<input type="checkbox"/>	<input type="checkbox"/>
2. Development ^a of a new industrial park with 10,000 square feet or more of surface area ^c	<input type="checkbox"/>	<input type="checkbox"/>
3. Development ^a of a new commercial mall with 10,000 square feet or more surface area ^c	<input type="checkbox"/>	<input type="checkbox"/>
4. Development ^a of a new retail gasoline outlet with 5,000 square feet or more of surface area ^c	<input type="checkbox"/>	<input type="checkbox"/>
5. Development ^a of a new restaurant (SIC 5812) with 5,000 square feet or more of surface area ^c	<input type="checkbox"/>	<input type="checkbox"/>
6. Development ^a of a new parking lot with either 5,000 ft ² or more of impervious area ^b or with 25 or more parking spaces	<input type="checkbox"/>	<input type="checkbox"/>
7. Development ^a of a new automotive service facility (SIC 5013, 5014, 5511, 5541, 7532-7534 and 7536-7539) with 5,000 square feet or more of surface area ^c	<input type="checkbox"/>	<input type="checkbox"/>
8. Projects located in or directly adjacent to, or discharging directly to a Significant Ecological Area (SEA), ^d where the development will: a. Discharge stormwater runoff that is likely to impact a sensitive biological species or habitat; and b. Create 2,500 square feet or more of impervious area ^b	<input type="checkbox"/>	<input type="checkbox"/>
9. Redevelopment ^e of 5,000 square feet or more in one of the categories listed above If yes, list redevelopment category here: 1 and 6	<input checked="" type="checkbox"/>	<input type="checkbox"/>
10. Redevelopment ^e of 10,000 square feet or more to a Single Family Home, without a change in landuse.	<input type="checkbox"/>	<input type="checkbox"/>

a Development includes any construction or demolition activity, clearing, grading, grubbing, or excavation or any other activity that results in land disturbance.

b Surfaces that do not allow stormwater runoff to percolate into the ground. Typical impervious surfaces include: concrete, asphalt, roofing materials, etc.

c The surface area is the total footprint of an area. Not to include the cumulative area above or below the ground surface.

d An area in which plant or animal life or their habitats are either rare or especially valuable because of their special nature or role in an ecosystem and would be disturbed or degraded by human activities and developments. Also, an area designated by the City as approved by the Regional Water Quality Control Board.

e Land-disturbing activities that result in the creation, addition, or replacement of a certain amount of impervious surface area on an already developed site. Redevelopment does not include routine maintenance activities that are conducted to maintain the original line and grade, hydraulic capacity, or original purpose of facility, nor does it include modifications to existing single family structures, or emergency construction activities required to immediately protect public health and safety.

PROPOSED CONDITIONS

Condition	Area (ft ²)	Percentage (%)
Pervious Area:	5,558	11
Impervious Area:	45,436	89

SITE CHARACTERISTICS

DRAINAGE PATTERNS/CONNECTIONS	<p>Existing:</p> <p>The drainage area is divided in 2 part: east and west. In the west part, the runoff flows from east to west and drain into S Eastman Ave. In the east part, the runoff flows from west to east and drain into S Gage Ave by gravity. The runoff from project both street flow south approximately 200 feet and be captured by open-curb catch basin at Dennison St. There is no offsite runoff drains into this project both pre- and post-development period.</p>
	<p>Proposed:</p> <p>The runoff will be collected by roof system, area drains, trench drains and catch basins. All stormwater will discharge to proposed infiltration trench located at northeast corner of project under parking and driveway area. The overflow from infiltration trench will directly drain to S Eastman Ave by gravity.</p>

<p>NARRATIVE PROJECT DESCRIPTION:</p>	<p>This project is located on east of S Eastman Ave and west of S Gage Ave, between Whittier Blvd and Dennison St in Unincorporated Los Angeles County, State of California. The total area is approximately 50,994 SF (1.171 Acres). All area will be disturbed.</p> <p>The development will construct a School building with parking lots. More landscaping (pervious area) will be provided than in the existing condition. Total landscape area is 5,558 SF. The impervious surface is about 89%.</p> <p>In pre-development period, the project site is commercial building with parking lots. All structures and pavement will be demolished. The existing impervious surface is approximately 49,741 SF (98%).</p>
<p>OFFSITE RUNON</p>	<p>There is no offsite runoff flows to project site both pre- and post-development.</p>
<p>SIGNIFICANT ECOLOGICAL AREAS (SEAs)</p>	<p>N/A</p>

FEASIBILITY OF INFILTRATION	From Soil Report by Geotechnologies, Inc date September 23, 2022, File No.22311, the infiltration rate of 0.72 inch per hour may be utilized for the design of an infiltration system.
-----------------------------	--

CALCULATION

INFILTRATION TRENCH: FOR ALL AREA

SWQD_v = 3,151.80 CF (85TH PERCENTILE RUNOFF)

GRAVEL VOID RATIO = 40%

THE MEASURE INFILTRATION RATE $K_{MEAS, SAT} = 0.72$ INCH/HOUR (PER SOIL REPORT)

SAFETY FACTOR = 3

THE DESIGN INFILTRATION RATE $K_{DESIGN, SAT} = 0.72/3 = 0.24$ INCH/HOUR (PER SOIL REPORT)

INFILTRATION DRAINS IN 96 HOURS, T = 96

$$d_{MAX} = \frac{f_{DESIGN}}{12} \times TIME = \frac{0.24}{12} (96) = 1.92 \text{ FT}$$

$$d_T = \frac{d_{MAX}}{0.4} = \frac{1.92}{0.4} = 4.8 \text{ FT}$$

USE DEPTH OF INFILTRATION TRENCH = 3'

THEREFORE THE MINIMUM SURFACE AREA = $A_{MIN} = \frac{3,151.80}{3.0 \times 0.4} = 2,626.50 \text{ SF}$

PROVIDE 53'-WIDE, 55'-LONG, 3'-DEEP INFILTRATION TRENCH

THE BOTTOM AREA = 53 x 55 = 2,915 SF > 2,626.50 SF OK

THE VOLUME OF TRENCH = 53' x 55' x 3' x 0.4 = 3,498 CF > 3,151.80 CF OK

INFILTRATION TRENCH
THE BOTTOM AREA = 2,915 SF , DEPTH OF INFILTRATION TRENCH = 3'
VOID = 0.4, THE VOLUME OF TRENCH = 3,498 CF

DETAIL A

ADDITIONAL INLETS NOT TO SCALE

NOTES:

1. Inlet flume & bypass weir frame shall be constructed from stainless steel Type 304.
2. Matrix filter element is constructed from durable polypropylene woven monofilament geotextile surrounding a polypropylene matrix skeleton. Filter element shall not allow the retention of water between storm events.
3. Filter inserts are supplied with "clip-in" filter pouches utilizing fossil rock™ filter medium for the collection and retention of petroleum hydrocarbons (oils & greases).
4. FloGard® LoPro™ filter inserts and fossil rock™ filter medium pouches must be maintained in accordance with manufacturer recommendations.
5. Device requires a minimum catch basin depth of 6.50" beneath grate. See sheet 2 of 2.
6. Additional inlets are limited to one only with a 6" diameter maximum, and to a wall opposite or at a right angle to outlet. See detail A.

ADDITIONAL INLET OPTIONS CAN BE ACCOMODATED. SEE NOTE 6.

Common Area Catch Basin Inspection	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Street Sweeping Private Streets and Parking Lots	<input checked="" type="checkbox"/>	<input type="checkbox"/>

EDUCATION FOR PROPERTY OWNERS, TENANTS AND OCCUPANTS

- Owner shall continue to familiar himself about the impacts that stormwater runoff can have on water quality
- Owner shall be aware of proper disposal of used materials or hazardous wastes
- Owner shall implement all BMP maintenance schedule as indicated in the LID Covenant

COMMON AREA LANDSCAPE MANAGEMENT

- Owner shall place the plant debris and street litter immediately into trash containers to prevent the pollutants from entering the storm drains
- Employees or Staffs that will be in-charge of landscaping maintenance must be given training by the Owner to properly place the leaves and lawn-clippings into trash after doing the maintenance.

Common Area Litter Control

- Owner shall implement trash management and litter control procedures aimed at reducing off site migration of trash.
- Owner shall inspect the site to ensure that all litter is removed and proper disposal.
- Owner shall post "No Littering" signs & enforce anti-litter laws in the site from the completion of the project
- Owner shall maintain the signage "No Littering" to be visible

COMMON AREA CATCH BASIN INSPECTION

- Owner shall inspect drainage facilities to ensure immediate repair of any deterioration threatening structural integrity
- Owner shall inspect & clean the catch basin before rainy season, the time period between October 1 and April 15 of each year, and re-cleaned as needed before they are 40%full

STREET SWEEPING PRIVATE STREETS AND PARKING LOTS

- Owner shall keep the driveway aisles, private driveway and parking lot area clean & orderly.
- Owner shall implement sweeping of driveway aisle, private street and parking lot area by a vacuum type cleaner/sweeper.
- A contractor shall be hired by the Owner to sweep the site at a regular basis.
- Owner shall ensure that driveway aisles and parking area is properly maintain and shall be responsible for the ongoing maintenance that is consistent with Los Angeles County Guidelines.

STRUCTURAL SOURCE CONTROL BMPs

NAME	CHECK ONE	
	Included	Not Applicable
Provide storm drain system stenciling and signage	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Design and construct outdoor material storage areas to reduce pollution introduction	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Design and construct trash and waste storage areas to reduce pollution introduction	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Use efficient irrigation systems & landscape design, water conservation, smart controllers, and source control	<input checked="" type="checkbox"/>	<input type="checkbox"/>
Protect slopes and channels and provide energy dissipation	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Loading docks	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Maintenance bays	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Vehicle wash areas	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Equipment wash areas/racks	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Fueling areas	<input type="checkbox"/>	<input checked="" type="checkbox"/>
Hillside landscaping	<input type="checkbox"/>	<input checked="" type="checkbox"/>

Provide Storm Drain System Stenciling and Signage

- Owner shall maintain the prohibitive language marking, such as “No Dumping-Drains to Ocean” or equally effective phrase on each catch basin on-site

Design and Construct Trash and Waste Storage Areas to Reduce Pollutant Introduction

- Owner shall implement trash management and litter control procedures aimed at reducing off site migration of trash
- Owner/tenants/employees shall inspect the site to ensure that all litter is removed and proper disposal
- Owner shall post and maintain the signage “No Littering” to be visible and enforce anti-litter laws in the site from completion of the project.

Use Efficient Irrigation Systems & Landscape Design

- Owner shall hire a licensed landscape to design the irrigation system
- Owner shall inspect the plants, shrubs, and trees are properly irrigated.
- Employees or Staffs shall report the deviated sprinkle heads to owner immediately direct the sprinkler heads onto the plants.

Operations and Maintenance (O&M) Plan

RESPONSIBLE PARTY

The owner is aware of the maintenance responsibilities of the proposed BMPs. A funding mechanism is in place to maintain the BMPs at the frequency stated in the LID Plan. The contact information for the entity responsible is below:

Subject: Geotechnical Engineering Investigation
 Proposed Charter School
 1059 South Gage Avenue
 Los Angeles, California

Ladies and Gentlemen:

This letter transmits the Geotechnical Engineering Investigation for the subject property prepared by Geotechnologies, Inc. This report provides geotechnical recommendations for the development of the site, including earthwork, seismic design, retaining walls, excavations, and foundation design. Engineering for the proposed project should not begin until approval of the geotechnical investigation is granted by the local building official. Significant changes in the geotechnical recommendations may result due to the building department review process.

The validity of the recommendations presented herein is dependent upon review of the geotechnical aspects of the project during construction by this firm. The subsurface conditions described herein have been projected from limited subsurface exploration and laboratory testing. The exploration and testing presented in this report should in no way be construed to reflect any variations which may occur between the exploration locations, or which may result from changes in subsurface conditions.

Should you have any questions please contact this office.

Respectfully submitted,
 GEOTECHNOLOGIES, INC.

EDWARD F. HILL
 G.E. ENGINEER

**GEOTECHNICAL ENGINEERING INVESTIGATION
PROPOSED CHARTER SCHOOL
1059 SOUTH GAGE AVENUE
LOS ANGELES, CALIFORNIA**

INTRODUCTION

This report presents the results of the geotechnical engineering investigation performed on the subject property. The purpose of this investigation was to identify the distribution and engineering properties of the earth materials underlying the site, and to provide geotechnical recommendations for the design of the proposed development.

This investigation included six exploratory excavations, collection of representative samples, laboratory testing, engineering analysis, review of published geologic data, review of available geotechnical engineering information and the preparation of this report. The exploratory excavation locations are shown on the enclosed Plot Plan. The results of the exploration and the laboratory testing are presented in the Appendix of this report.

PROPOSED DEVELOPMENT

Information concerning the proposed development was furnished by the design team. The proposed project consists of a charter school. The site is currently occupied by several structures. The larger structure on the north side of the site will be demolished and a new structure will be built. The structure is proposed to be two stories built at existing site grades. Structural loading is expected to be light. Grading will consist of removal and recompaction of existing unsuitable soils. It is the understanding of this office that the structures on the south side of the site are to remain and be remodeled.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 2

Any changes in the design of the project or location of any structure, as outlined in this report, should be reviewed by this office. The recommendations contained in this report should not be considered valid until reviewed and modified or reaffirmed, in writing, subsequent to such review.

SITE CONDITIONS

The property is located at 1059 South Gage Avenue in the City Terrace area of the County of Los Angeles, California. The site is relatively level with very little elevation change. The ALTA survey shows about 1-1/2 feet of elevation change falling generally to the west. Drainage across the site is by sheetflow to the improved streets.

The site is currently developed with several building associated with a church. The buildings on the north side of the property will be demolished and replaced with a new structure. The building on the south side of the property will remain and be remodeled. Vegetation on the site consists of small trees and shrubs in planters generally on the periphery of the property.

The neighboring development consists of a mixture of single-story single-family homes as well as one to two story commercial structures.

GEOTECHNICAL EXPLORATION

FIELD EXPLORATION

The site was explored on August 23 and 24, 2022 by excavating six exploratory excavations. The exploratory excavations varied in depth from 20 to 50 feet. The exploration was prosecuted with the aid of a truck-mounted drilling machine using 8-inch diameter hollowstem augers. The exploration locations are shown on the Plot Plan and the geologic materials encountered are logged on Plates A-1 through A-6.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 3

The location of exploratory excavations was determined by information furnished by the client. Elevations of the exploratory excavations were determined by hand level or interpolation from data provided. The location and elevation of the exploratory excavations should be considered accurate only to the degree implied by the method used.

Geologic Materials

Fill earth materials were encountered in each of the exploratory excavations. The fill was found to be three to eight feet in depth and consists of silty sands to sandy silts which are dark brown and yellowish brown, moist, medium dense, fine grained and stiff. Debris was observed in the fill materials. The native soils underlying the site consist of silty sands and sandy silts. The soils are dark and yellowish brown, moist, medium dense to very dense and fine grained. With depth occasional clay and silt layers were observed which are dark brown, moist and stiff to very stiff.

The geologic materials consist of detrital sediments deposited by river and stream action typical to this area of Los Angeles County. More detailed descriptions of the earth materials encountered may be obtained from individual logs of the subsurface excavations.

Groundwater

Groundwater was not encountered during exploration to 50 feet in depth. The historic high groundwater level was established by review of California Geological Survey Seismic Hazard Evaluation Report 029 Plate 1.2 entitled "Historically Highest Ground Water Contours". Review of this plate indicates that the historically highest groundwater level is on the order of 85 feet below site grade.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 4

Fluctuations in the level of groundwater may occur due to variations in rainfall, temperature, and other factors not evident at the time of the measurements reported herein. Fluctuations also may occur across the site. High groundwater levels can result in changed conditions.

Caving

Caving could not be directly observed during exploration due to the type of excavation equipment utilized. Based on the experience of this firm, large diameter excavations, excavations that encounter granular, cohesionless soils and excavations below the groundwater table will most likely experience caving.

SEISMIC EVALUATION

REGIONAL GEOLOGIC SETTING

The subject property is located in the northern portion of the Peninsular Ranges Geomorphic Province. The Peninsular Ranges are characterized by northwest-trending blocks of mountain ridges and sediment-floored valleys. The dominant geologic structural features are northwest trending fault zones that either die out to the northwest or terminate at east-trending reverse faults that form the southern margin of the Transverse Ranges.

The Los Angeles Basin is located at the northern end of the Peninsular Ranges Geomorphic Province. The basin is bounded by the east and southeast by the Santa Ana Mountains and San Joaquin Hills, to the northwest by the Santa Monica Mountains. Over 22 million years ago the Los Angeles basin was a deep marine basin formed by tectonic forces between the North American and Pacific plates. Since that time, over 5 miles of marine and non-marine sedimentary rock as well as intrusive and extrusive igneous rocks have filled the basin. During the last 2 million years, defined by the Pleistocene and Holocene epochs, the Los Angeles basin and surrounding mountain ranges have been uplifted to form the present-day landscape. Erosion of

Geotechnologies, Inc.

September 23, 2022
File No. 22311
Page 5

the surrounding mountains has resulted in deposition of unconsolidated sediments in low-lying areas by rivers such as the Los Angeles River. Areas that have experienced subtle uplift have been eroded with gullies.

The site is underlain by unconsolidated alluvial sediments deposited by river and stream action that are deeper than 200 feet.

REGIONAL FAULTING

Based on criteria established by the California Division of Mines and Geology (CDMG) now called California Geologic Survey (CGS), Faults may be categorized as Holocene-active, Pre-Holocene faults, and Age-undetermined faults. Holocene-active faults are those which show evidence of surface displacement within the last 11,700 years. Pre-Holocene faults are those that have not moved in the past 11,700 years. Age-undetermined faults are faults where the recency of fault movement has not been determined.

Buried thrust faults are faults without a surface expression but are a significant source of seismic activity. They are typically broadly defined based on the analysis of seismic wave recordings of hundreds of small and large earthquakes in the southern California area. Due to the buried nature of these thrust faults, their existence is usually not known until they produce an earthquake. The risk for surface rupture potential of these buried thrust faults is inferred to be low (Leighton, 1990). However, the seismic risk of these buried structures in terms of recurrence and maximum potential magnitude is not well established. Therefore, the potential for surface rupture on these surface-verging splays at magnitudes higher than 6.0 cannot be precluded.

Page 6

SEISMIC HAZARDS AND DESIGN CONSIDERATIONS

The primary geologic hazard at the site is moderate to strong ground motion (acceleration) caused by an earthquake on any of the local or regional faults. The potential for other earthquake-induced hazards was also evaluated including surface rupture, liquefaction, dynamic settlement, inundation and landsliding.

Surface Rupture

In 1972, the Alquist-Priolo Special Studies Zones Act (now known as the Alquist-Priolo Earthquake Fault Zoning Act) was passed into law. As revised in 2018, The Act defines "Holocene-active" Faults utilizing the same aging criteria as that used by California Geological Survey (CGS). However, established state policy has been to zone only those faults which have direct evidence of movement within the last 11,700 years. It is this recency of fault movement that the CGS considers as a characteristic for faults that have a relatively high potential for ground rupture in the future.

CGS policy is to delineate a boundary from 200 to 500 feet wide on each side of the Holocene-Active fault trace based on the location precision, the complexity, or the regional significance of the fault. If a site lies within an Earthquake Fault Zone, a geologic fault rupture investigation must be performed that demonstrates that the proposed building site is not threatened by surface displacement from the fault before development permits may be issued.

Ground rupture is defined as surface displacement which occurs along the surface trace of the causative fault during an earthquake. Based on research of available literature and results of site reconnaissance, no known Holocene-active or Pre-Holocene faults underlie the subject site. In addition, the subject site is not located within an Alquist-Priolo Earthquake Fault Zone. Based on these considerations, the potential for surface ground rupture at the subject site is considered low.

Geotechnologies, Inc.

www.geoteq.com

September 23, 2022
File No. 22311
Page 7

Liquefaction

Liquefaction is a phenomenon in which saturated silty to cohesionless soils below the groundwater table are subject to a temporary loss of strength due to the buildup of excess pore pressure during cyclic loading conditions such as those induced by an earthquake. Liquefaction-related effects include loss of bearing strength, amplified ground oscillations, lateral spreading, and flow failures.

The Seismic Hazards Maps of the State of California (CDMG, 1999), does not classify the site as part of the potentially "Liquefiable" area. This determination is based on groundwater depth records, soil type and distance to a fault capable of producing a substantial earthquake.

Based on the dense nature of the underlying soils, the lack of groundwater to 50 feet, and the depth to historic highest groundwater level, the potential for liquefaction occurring at the site is considered to be remote.

Dynamic Dry Settlement

Seismically-induced settlement or compaction of dry or moist, cohesionless soils can be an effect related to earthquake ground motion. Such settlements are typically most damaging when the settlements are differential in nature across the length of structures.

Calculations indicate that the seismically induced dry sands settlement could be on the order of 0.23 inches. This is considered to be within the tolerance of a well-designed structure.

Tsunamis, Seiches and Flooding

Tsunamis are large ocean waves generated by sudden water displacement caused by a submarine earthquake, landslide, or volcanic eruption. Review of the City of Los Angeles Inundation and Tsunami Hazard Areas map indicates the site does not lie within the mapped tsunami inundation boundaries.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 8

Seiches are oscillations generated in enclosed bodies of water which can be caused by ground shaking associated with an earthquake. Review of the County of Los Angeles Flood and Inundation Hazards Map, Leighton (1990) indicates the site does not appear to not lie within mapped inundation boundaries due to a seiche or a breached upgradient reservoir.

Landsliding

The probability of seismically-induced landslides occurring on the site is considered to be low due to the general lack of elevation difference slope geometry across or adjacent to the site.

CONCLUSIONS AND RECOMMENDATIONS

Based upon the exploration, laboratory testing, and research, it is the finding of Geotechnologies, Inc. that construction of the proposed charter school is considered feasible from a geotechnical engineering standpoint provided the advice and recommendations presented herein are followed and implemented during construction.

The existing fill materials are not suitable for support of the proposed foundations, floor slabs or additional fill. Existing fill materials should be completely removed within the building area and recompacted. In addition, earth materials should be removed to a minimum depth of three feet below proposed foundations and recompacted as controlled fill prior to foundation excavation. Conventional foundations bearing in newly placed controlled fill are recommended for foundation support. For the structures which are to be remodeled, any new foundations which are necessary should penetrate existing fill materials to bear in competent native soils.

The following statement is made in regard to Los Angeles County Code Sections 110 and 111: It is the opinion of the undersigned based on the findings of this investigation that provided the recommendations presented in this report are followed, the proposed development will be safe

Geotechnologies, Inc.

 File No. 22311
 Page 9

for its intended use against hazard from landsliding, settlement or slippage. The proposed development will have no adverse effect on the stability of the site of adjoining properties.

Foundations for small outlying structures, such as property line walls, which will not be tied-in to the proposed school building may be supported on conventional foundations bearing in native geologic materials.

SEISMIC DESIGN CONSIDERATIONS

California Building Code Seismic Parameters

Based on information derived from the subsurface investigation, the subject site is classified as Site Class D, which corresponds to a "Stiff Soil" Profile, according to Table 20.3-1 of ASCE 7-16. This information and the site coordinates were input into the OSHPD seismic utility program in order to calculate ground motion parameters for the site.

CALIFORNIA BUILDING CODE SEISMIC PARAMETERS	
California Building Code	2019
ASCE Design Standard	7-16
Risk Category	II
Site Class	D
Mapped Spectral Acceleration at Short Periods (S_s)	1.884g
Site Coefficient (F_a)	1.0
Maximum Considered Earthquake Spectral Response for Short Periods (S_{MS})	1.884g
Five-Percent Damped Design Spectral Response Acceleration at Short Periods (S_{DS})	1.256g
Mapped Spectral Acceleration at One-Second Period (S_1)	0.673g
Site Coefficient (F_v)	1.7*
Maximum Considered Earthquake Spectral Response for One-Second Period (S_{M1})	1.144g*
Five-Percent Damped Design Spectral Response Acceleration for One-Second Period (S_{D1})	0.767g*

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 10

** According to ASCE 7-16, a Long Period Site Coefficient (F_v) of 1.7 may be utilized provided that the value of the Seismic Response Coefficient (C_s) is determined by Equation 12.8-2 for values of $T \leq 1.5T_s$ and taken as equal to 1.5 times the value computed in accordance with either Equation 12.8-3 for $T_L \geq T > 1.5T_s$ or equation 12.8-4 for $T > T_L$. Alternatively, a site-specific ground motion hazard analysis may be performed in accordance with ASCE 7-16 Section 21.1 and/or a ground motion hazard analysis in accordance with ASCE 7-16 Section 21.2 to determine ground motions for any structure.*

FILL SOILS

The maximum depth of fill encountered on the site was eight feet. This material and any fill generated during demolition should be removed and recompacted as controlled fill prior to foundation excavation.

EXPANSIVE SOILS

The onsite geologic materials are in the very low to moderate expansion range. The Expansion Index was found to be between 20 and 58 for bulk samples remolded to 90 percent of the laboratory maximum density. Additional reinforcing is required as noted in the "Foundation Design" and "Slabs-On-Grade" sections of this report.

WATER-SOLUBLE SULFATES

The Portland cement portion of concrete is subject to attack when exposed to water-soluble sulfates. Usually the two most common sources of exposure are from soil and marine environments.

The sources of natural sulfate minerals in soils include the sulfates of calcium, magnesium, sodium, and potassium. When these minerals interact and dissolve in subsurface water, a sulfate concentration is created, which will react with exposed concrete. Over time sulfate attack will destroy improperly proportioned concrete well before the end of its intended service life.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 11

The water-soluble sulfate content of the onsite geologic materials was tested by California Test 417. The water-soluble sulfate content was determined to be less than 0.1% percentage by weight for the soils tested. Based on the most recent revision to American Concrete Institute (ACI) Standard 318, the sulfate exposure is considered to be negligible for geologic materials with less than 0.1% and Type I cement may be utilized for concrete foundations in contact with the site soils.

GRADING GUIDELINES

Site Preparation

- A thorough search should be made for possible underground utilities and/or structures. Any existing or abandoned utilities or structures located within the footprint of the proposed grading should be removed or relocated as appropriate.
- All vegetation, existing fill, and soft or disturbed geologic materials should be removed from the areas to receive controlled fill. All existing fill materials and any disturbed geologic materials resulting from grading operations shall be completely removed and properly recompacted prior to foundation excavation.
- Any vegetation or associated root system located within the footprint of the proposed structures should be removed during grading.
- Subsequent to the indicated removals, the exposed grade shall be scarified to a depth of six inches, moistened to optimum moisture content, and recompacted in excess of the minimum required comparative density.
- The excavated areas shall be observed by the geotechnical engineer prior to placing compacted fill.

Recommended Overexcavation

The proposed building area shall be excavated to a minimum depth of three feet below the bottom of all foundations. The excavation shall extend at least three feet beyond the edge of foundations or for a distance equal to the depth of fill below the foundations, whichever is greater. It is very important that the position of the proposed structure is accurately located so that the limits of the graded area are accurate and the grading operation proceeds efficiently.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

Compaction

Comparative compaction is defined, for purposes of these guidelines, as the ratio of the in-place density to the maximum density as determined by applicable ASTM testing.

All fill should be mechanically compacted in layers not more than 8 inches thick. The materials placed should be moisture conditions to within 3 percent of the optimum moisture content of the particular material placed. All fill shall be compacted to at least 90 percent of the maximum laboratory density for the materials used. The maximum density shall be determined by the laboratory operated by Geotechnologies, Inc. in general accordance with the most recent revision of ASTM D 1557.

Field observation and testing shall be performed by a representative of the geotechnical engineer during grading to assist the contractor in obtaining the required degree of compaction and the proper moisture content. Where compaction is less than required, additional compactive effort shall be made with adjustment of the moisture content, as necessary, until a minimum of 90 percent compaction is obtained.

Acceptable Materials

The excavated onsite materials are considered satisfactory for reuse in the controlled fills as long as any debris and/or organic matter is removed.

Any imported materials shall be observed and tested by the representative of the geotechnical engineer prior to use in fill areas. Imported materials should contain sufficient fines so as to be relatively impermeable and result in a stable subgrade when compacted. Any required import materials should consist of geologic materials with an expansion index of less than 20. The water-soluble sulfate content of the import materials should be less than 0.1% percentage by weight.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 13

Imported materials should be free from chemical or organic substances which could affect the proposed development. A competent professional should be retained in order to test imported materials and address environmental issues and organic substances which might affect the proposed development.

Utility Trench Backfill

Utility trenches should be backfilled with controlled fill. The utility should be bedded with clean sands at least one foot over the crown. The remainder of the backfill may be onsite soil compacted to 90 percent of the laboratory maximum density. Utility trench backfill should be tested by representatives of this firm in general accordance with the most recent revision of ASTM D 1557.

Wet Soils

At the time of exploration the soils which will be exposed during grading were above optimum moisture content. It is anticipated that the excavated material to be placed as compacted fill, and the materials exposed at the bottom of excavated plane may require significant drying and aeration prior to recompaction.

Pumping (yielding or vertical deflection) of the high-moisture content soils at the bottom of the excavation may occur during operation of heavy equipment. Where pumping is encountered, angular minimum ¾-inch gravel and/or crushed concrete should be placed and worked into the subgrade. The exact thickness of the gravel would be a trial and error procedure, and would be determined in the field. It would likely be on the order of 1 to 2 feet thick.

The gravel will help to densify the subgrade as well as function as a stabilization material upon which heavy equipment may operate. It is not recommended that rubber tire construction equipment attempt to operate directly on the pumping subgrade soils prior to placing the gravel.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 14

Direct operation of rubber tire equipment on the soft subgrade soils will likely result in excessive disturbance to the soils, which in turn will result in a delay to the construction schedule since those disturbed soils would then have to be removed and properly recompacted. Extreme care should be utilized to place gravel as the subgrade becomes exposed.

Shrinkage

Shrinkage results when a volume of soil removed at one density is compacted to a higher density. A shrinkage factor between 5 and 15 percent should be anticipated when excavating and recompacting the existing fill and underlying native geologic materials on the site to an average comparative compaction of 92 percent.

Weather Related Grading Considerations

When rain is forecast all fill that has been spread and awaits compaction shall be properly compacted prior to stopping work for the day or prior to stopping due to inclement weather. These fills, once compacted, shall have the surface sloped to drain to an area where water can be removed.

Temporary drainage devices should be installed to collect and transfer excess water to the street in non-erosive drainage devices. Drainage should not be allowed to pond anywhere on the site, and especially not against any foundation or retaining wall. Drainage should not be allowed to flow uncontrolled over any descending slope.

Work may start again, after a period of rainfall, once the site has been reviewed by a representative of this office. Any soils saturated by the rain shall be removed and aerated so that the moisture content will fall within three percent of the optimum moisture content.

Geotechnologies, Inc.

www.geoteq.com

September 23, 2022
File No. 22311
Page 15

Surface materials previously compacted before the rain shall be scarified, brought to the proper moisture content and recompact prior to placing additional fill, if considered necessary by a representative of this firm.

Abandoned Seepage Pits

No abandoned seepage pits were encountered during exploration and none are known to exist on the site. However, should such a structure be encountered during grading, options to permanently abandon seepage pits include complete removal and backfill of the excavation with compacted fill, or drilling out the loose materials and backfilling to within a few feet of grade with slurry, followed by a compacted fill cap.

If the subsurface structures are to be removed by grading, the entire structure should be demolished. The resulting void may be refilled with compacted soil. Concrete and brick generated during the seepage pit removal may be reused in the fill as long as all fragments are less than 6 inches in longest dimension and the debris comprise less than 15 percent of the fill by volume. All grading should comply with the recommendations of this report.

Where the seepage pit structure is to be left in place, the seepage pits should be cleaned of all soil and debris. This may be accomplished by drilling. The pits should be filled with minimum 1-1/2 sack concrete slurry to within 5 feet of the bottom of the proposed foundations. In order to provide a more uniform foundation condition, the remainder of the void should be filled with controlled fill.

Geotechnical Observations and Testing During Grading

Geotechnical observations and testing during grading are considered to be a continuation of the geotechnical investigation. It is critical that the geotechnical aspects of the project be reviewed by representatives of Geotechnologies, Inc. during the construction process. Compliance with the

Geotechnologies, Inc.

September 23, 2022
File No. 22311
Page 16

design concepts, specifications or recommendations during construction requires review by this firm during the course of construction. Any fill which is placed should be observed, tested, and verified if used for engineered purposes. Please advise this office at least twenty-four hours prior to any required site visit.

Proper compaction is necessary to reduce settlement of overlying improvements. Some settlement of compacted fill should be anticipated. Any utilities supported therein should be designed to accept differential settlement. Differential settlement should also be considered at the points of entry to the structure.

LEED Considerations

The Leadership in Energy and Environmental Design (LEED) Green Building Rating System encourages adoption of sustainable green building and development practices. Credit for LEED Certification can be assigned for reuse of construction waste and diversion of materials from landfills in new construction.

In an effort to provide the design team with a viable option in this regard, demolition debris could be crushed onsite in order to use it in the ongoing grading operations. The environmental ramifications of this option, if any, should be considered by the team.

The demolition debris should be limited to concrete, asphalt and other non-deleterious materials. All deleterious materials should be removed including, but not limited to, paper, garbage, ceramic materials and wood.

For structural fill applications, the materials should be crushed to 2 inches in maximum dimension or smaller. The crushed materials should be thoroughly blended and mixed with onsite soils prior to placement as compacted fill. The amount of crushed material should not exceed 20 percent. The blended and mixed materials should be tested by this office prior to

Page 17

placement to ensure it is suitable for compaction purposes. The blended and mixed materials should be tested by Geotechnologies, Inc. during placement to ensure that it has been compacted in a suitable manner.

FOUNDATION DESIGN

Conventional

Conventional foundations for the new structures may bear in newly placed controlled fill. Where additional foundations are necessary for the proposed structures which are to be remodeled, conventional foundations should be deepened to penetrate any existing fill and bear in competent native soils. All conventional foundations for a structure should bear in the same material.

Continuous foundations may be designed for a bearing capacity of 2,500 pounds per square foot, and should be a minimum of 12 inches in width, 18 inches in depth below the lowest adjacent grade and 18 inches into the recommended bearing material.

Column foundations may be designed for a bearing capacity of 3,000 pounds per square foot, and should be a minimum of 24 inches in width, 18 inches in depth below the lowest adjacent grade and 18 inches into the recommended bearing material.

The bearing capacity increase for each additional foot of width is 200 pounds per square foot. The bearing capacity increase for each additional foot of depth is 600 pounds per square foot. The maximum recommended bearing capacity is 5,000 pounds per square foot.

The bearing capacities indicated above are for the total of dead and frequently applied live loads and may be increased by one third for short duration loading, which includes the effects of wind or seismic forces.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 18

Miscellaneous Foundations

Conventional foundations for structures such as privacy walls or trash enclosures which will not be rigidly connected to the proposed school structures may bear in native soils. Continuous footings may be designed for a bearing capacity of 2,000 pounds per square foot, and should be a minimum of 12 inches in width, 18 inches in depth below the lowest adjacent grade and 18 inches into the recommended bearing material. No bearing capacity increases are recommended.

Since the recommended bearing capacity is a net value, the weight of concrete in the foundations may be taken as 50 pounds per cubic foot and the weight of the soil backfill may be neglected when determining the downward load on the foundations.

Foundation Reinforcement

All continuous foundations should be reinforced with a minimum of four #4 steel bars. Two should be placed near the top of the foundation, and two should be placed near the bottom.

Lateral Design

Resistance to lateral loading may be provided by friction acting at the base of foundations and by passive earth pressure. An allowable coefficient of friction of 0.37 may be used with the dead load forces.

Passive geologic pressure for the sides of foundations poured against undisturbed or recompacted soil may be computed as an equivalent fluid having a density of 300 pounds per cubic foot with a maximum earth pressure of 3,000 pounds per square foot.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
 File No. 22311
 Page 19

The passive and friction components may be combined for lateral resistance without reduction. A one-third increase in the passive value may be used for short duration loading such as wind or seismic forces.

Foundation Settlement

Settlement of the foundation system is expected to occur on initial application of loading. The maximum settlement is expected to be 1/2 inch and occur below the heaviest loaded columns. Differential settlement is not expected to exceed 1/4 inch.

Modulus of Subgrade Reaction

A unit modulus of subgrade reaction of 300 pounds per cubic inch (518 kcf) may be utilized for design of foundations. This value is a unit value for use with a one-foot square footing. The modulus should be reduced in accordance with the following equation when used with the larger footings:

$$K = K_1 * [(B+1)/(2*B)]^2$$

Where:

K = Reduced Subgrade Modulus

K₁ = Unit Subgrade Modulus

B = Foundation Width (feet)

Foundation Observations

It is critical that all foundation excavations are observed by a representative of this firm to verify penetration into the recommended bearing materials. The observation should be performed prior to the placement of reinforcement. Foundations should be deepened to extend into satisfactory geologic materials, if necessary.

Geotechnologies, Inc.

www.geoteq.com

September 23, 2022
File No. 22311
Page 20

Foundation excavations should be cleaned of all loose soils prior to placing steel and concrete. Any required foundation backfill should be mechanically compacted, flooding is not permitted.

RETAINING WALL DESIGN

Cantilever Retaining Walls

Retaining walls supporting a level backslope may be designed utilizing a triangular distribution of pressure. Cantilever retaining walls may be designed for 30 pounds per cubic foot for walls retaining up to 6 feet of earth.

For this equivalent fluid pressure to be valid, walls which are to be restrained at the top should be backfilled prior to the upper connection being made. Additional active pressure should be added for a surcharge condition due to sloping ground, vehicular traffic or adjacent structures.

Retaining Wall Drainage

Subdrains may consist of 4-inch diameter perforated pipes, placed with perforations facing down. The pipe shall be encased in at least one foot of gravel around the pipe. The gravel shall be wrapped in filter fabric. The gravel may consist of three-quarter inch to one-inch crushed rock. As an alternative, the use of gravel pockets and weepholes is an acceptable drainage method. Weepholes shall be a minimum of 2 inches in diameter, placed at 8 feet on center along the base of the wall. Gravel pockets shall be a minimum of 1 cubic foot in dimension and may consist of three-quarter inch to once inch crushed rock, wrapped in filter fabric.

Certain types of subdrain pipe are not acceptable to the various municipal agencies, it is recommended that prior to purchasing subdrainage pipe, the type and brand is cleared with the proper municipal agencies. Subdrainage pipes should outlet to an acceptable location.

Geotechnologies, Inc.

www.geoteq.com

September 23, 2022
File No. 22311
Page 21

Where retaining walls are to be constructed adjacent to property lines there is usually not enough space for emplacement of a standard pipe and gravel drainage system. Under these circumstances, the use of a flat drainage product is acceptable. Some municipalities do not allow the use of flat-drainage products. The use of such a product should be researched with the building official.

Dynamic (Seismic) Earth Pressure

The maximum dynamic active pressure is equal to the sum of the initial static pressure and the dynamic (seismic) pressure increment. Under the most recent building code, as interpreted by most building departments, seismic earth pressure is required in the design of restraining walls which support over 6 feet of earth. The proposed walls are less than 6 feet in height therefore the dynamic earth pressure may be omitted.

Waterproofing

Moisture effecting retaining walls is one of the most common post construction complaints. Poorly applied or omitted waterproofing can lead to efflorescence or standing water inside the building. Efflorescence is a process in which a powdery substance is produced on the surface of the concrete by the evaporation of water. The white powder usually consists of soluble salts such as gypsum, calcite, or common salt. Efflorescence is common to retaining walls and does not affect their strength or integrity.

Waterproofing is recommended for retaining walls. Waterproofing design and inspection of its installation is not the responsibility of the geotechnical engineer. A qualified waterproofing consultant should be retained in order to recommend a product or method which would provide protection to below grade walls.

Geotechnologies, Inc.

www.geoteq.com

September 23, 2022
File No. 22311
Page 22

Retaining Wall Backfill

Any required backfill should be mechanically compacted in layers not more than 8 inches thick, to at least 90 percent of the maximum density in general accordance with the most recent revision of ASTM D 1557 method of compaction. Flooding should not be permitted. Compaction within 5 feet, measured horizontally, behind a retaining structure should be achieved by use of light weight, hand operated compaction equipment.

Proper compaction of the backfill will be necessary to reduce settlement of overlying walks and paving. Some settlement of required backfill should be anticipated, and any utilities supported therein should be designed to accept differential settlement, particularly at the points of entry to the structure.

TEMPORARY EXCAVATIONS

Excavations on the order of 3 to 8 feet in vertical height will be required for the recommended recompaction. The excavations are expected to expose fill and dense native soils, which are suitable for vertical excavations up to 5 feet where not surcharged by adjacent traffic or structures. Excavations which will be surcharged by adjacent traffic or structures should be shored.

Where sufficient space is available, temporary unsurcharged embankments could be cut at a uniform 1:1 slope gradient. A uniform sloped excavation is sloped from bottom to top and does not have a vertical component.

Where sloped embankments are utilized, the tops of the slopes should be barricaded to prevent vehicles and storage loads near the top of slope within a horizontal distance equal to the depth of the excavation. If the temporary construction embankments are to be maintained during the rainy season, berms are strongly recommended along the tops of the slopes to prevent runoff water from entering the excavation and eroding the slope faces. Water should not be allowed to pond on top of the excavation or to flow towards it.

Geotechnologies, Inc.

September 23, 2022
File No. 22311
Page 23

Excavations Adjacent to Buildings or Property Lines

Where excavations necessary for the recommended grading will leave an adjacent foundation unsupported the foundation excavation should be slot cut. The slot cutting method employs the earth as a buttress and allows the earth excavation to proceed in phases. The initial excavation is made at a uniform 1:1 slope. Alternate "A" slots of 8 feet may be worked. The wall, foundation or backfill should proceed to a point where support for any offsite property and/or existing structure is restored before the "B" slots are excavated. The remaining earth buttresses ("B" and "C" slots) should each be 8 feet in width for a combined intervening length of 16 feet. The grading should be prosecuted in the "A" slots before the "B" slots are excavated. After completing the grading in the "B" slots, finally the "C" slots may be excavated.

Excavation Observations

It is critical that the soils exposed in the cut slopes are observed by a representative of Geotechnologies, Inc. during excavation so that modifications of the slopes can be made if variations in the geologic material conditions occur. Many building officials require that temporary excavations should be made during the continuous observations of the geotechnical engineer. All excavations should be stabilized within 30 days of initial excavation.

SLABS ON GRADE

Concrete Slabs-on Grade

Concrete floor slabs should be a minimum of 4 inches in thickness. Slabs-on-grade should be cast over undisturbed natural geologic materials or properly controlled fill materials. Any geologic materials loosened or over-excavated should be wasted from the site or properly compacted to 90 percent of the maximum dry density.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geotef.com

September 23, 2022
File No. 22311
Page 24

Outdoor concrete flatwork should be a minimum of 4 inches in thickness. Outdoor concrete flatwork should be cast over undisturbed natural geologic materials or properly controlled fill materials. Any geologic materials loosened or over-excavated should be wasted from the site or properly compacted to 90 percent of the maximum dry density.

Design of Slabs That Receive Moisture-Sensitive Floor Coverings

Geotechnologies, Inc. does not practice in the field of moisture vapor transmission evaluation and mitigation. Therefore, where necessary, it is recommended that a qualified consultant should be engaged to evaluate the general and specific moisture vapor transmission paths and any impact on the proposed construction. The qualified consultant should provide recommendations for mitigation of potential adverse impacts of moisture vapor on various components of the structure.

Where any dampness would be objectionable or where the slab will be cast below the historic high groundwater level, it is recommended that floor slabs should be waterproofed. A qualified waterproofing consultant should be engaged in order to recommend a product and/or method which would provide protection from unwanted moisture.

Based on ACI 302.2R-30, Chapter 7, for projects which do not have vapor sensitive coverings or humidity-controlled areas, a vapor retarder/barrier is not necessary. Where a vapor retarder/barrier is considered necessary, the design of the slab and the installation of the vapor retarder/barrier should comply with the most recent revisions of ASTM E 1643 and ASTM E 1745. The vapor retarder/barrier should comply with ASTM E 1745 Class A requirements. The necessity of a vapor retarder/barrier is not a geotechnical issue and should be confirmed by qualified members of the design team.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geotek.com

September 23, 2022
File No. 22311
Page 25

Based on ACI 302.2R-30, Chapter 7, for projects with vapor sensitive coverings, a vapor retarder/ barrier should be provided. Figure 7.1 shows that the slab should be poured on the vapor retarder/barrier. The ACI guide notes in 5.2.3.2 that the decision to locate the vapor retarder/barrier in direct contact with the slab's underside had long been debated. Experience has shown, however, that the greatest level of protection for floor coverings, coating, or building environments is provided when the vapor retarder/barrier is placed in direct contact with the slab. The necessity of a vapor retarder as well as the use of dry granular material, as discussed above are not a geotechnical issue and should be confirmed by qualified members of the design team.

Where a vapor retarder/barrier is used, it should be placed on a level and compact subgrade. Precautions should be taken to protect the vapor retarder/barrier from damage during installation of reinforcing, utilities and concrete. The use of stakes driven through the vapor retarder/barrier should be avoided. Repair any damaged areas of the vapor retarder/barrier prior to concrete placement.

Groundwater was not encountered on the subject site at to a depth of 50 feet. Proposed concrete slabs-on-grade do not need to be supported on a layer of compacted aggregate to provide a capillary break.

Concrete Crack Control

The recommendations presented in this report are intended to reduce the potential for cracking of concrete slabs-on-grade due to settlement. However even where these recommendations have been implemented, foundations, stucco walls and concrete slabs-on-grade may display some cracking due to minor soil movement and/or concrete shrinkage. The occurrence of concrete cracking may be reduced and/or controlled by limiting the slump of the concrete used, proper concrete placement and curing, and by placement of crack control joints at reasonable intervals, in particular, where re-entrant slab corners occur.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geotek.com

September 23, 2022
File No. 22311
Page 26

For standard control of concrete cracking, a maximum crack control joint spacing of 12 feet should not be exceeded. Lesser spacings would provide greater crack control. Joints at curves and angle points are recommended. The crack control joints should be installed as soon as practical following concrete placement. Crack control joints should extend a minimum depth of one-fourth the slab thickness. Construction joints should be designed by a structural engineer.

Complete removal of the existing fill soils beneath outdoor flatwork such as walkways or patio areas, is not required, however, due to the rigid nature of concrete, some cracking, a shorter design life and increased maintenance costs should be anticipated. In order to provide uniform support beneath the flatwork it is recommended that a minimum of 12 inches of the exposed subgrade beneath the flatwork be scarified and recompacted to 90 percent relative compaction.

Slab Reinforcing

Concrete slabs-on-grade should be reinforced with a minimum of #3 steel bars on 18-inch centers each way.

Outdoor flatwork should be reinforced with a minimum of #3 steel bars on 18-inch centers each way.

PAVEMENTS

Prior to placing paving, the existing grade should be scarified to a depth of 12 inches, moistened as required to obtain optimum moisture content, and recompacted to 90 percent of the maximum density as determined by the most recent revision of ASTM D 1557. The design team should be aware that removal of all existing fill in the area of new paving is not required, however, pavement constructed in this manner will most likely have a shorter design life and increased maintenance costs. The following pavement sections are recommended:

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
 File No. 22311
 Page 27

Service	Asphalt Pavement Thickness Inches	Base Course Inches
Passenger Cars	3	4
Moderate Truck	4	6

Aggregate base should be compacted to a minimum of 95 percent of the most recent revision of ASTM D 1557 laboratory maximum dry density. Base materials should consist of Crushed Aggregate Base which conforms with Section 200-2.2 of the most recent edition of "Standard Specifications for Public Works Construction", (Green Book).

The performance of pavement is highly dependent upon providing positive surface drainage away from the edges. Ponding of water on or adjacent to pavement can result in saturation of the subgrade materials and subsequent pavement distress. If planter islands are planned, the perimeter curb should extend a minimum of 12 inches below the bottom of the aggregate base. In addition where landscaping is planned adjacent to pavement, it is recommended that a cutoff wall should be provided along the edge of the pavement. The cutoff wall should extend at least 12 inches below the depth of the base course.

The management of pavement wear primarily is focused on the distress caused by vertical loads. The reduction of vertical loading from large vehicles is assisted by increasing the number of axles. Multi-axle groups reduce the peak vertical loading and, when closely spaced, reduce the magnitude of the strain cycles to which the pavement is subjected. However, where tight low-speed turns are executed, non-steering axle groups lead to transverse shear forces (scuffing) at the pavement-tire interface.

With asphaltic concrete pavements, tensile shear stresses from tires can cause surface cracking and raveling, thus, the increased use of non-steering axle groups results in increased pavement wear in the vicinity of intersections and turnarounds where tight low speed turns are executed.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 28

When designing intersections and turnarounds the turn radius should be as large as possible. This will lead to reduced “scuffing” forces. Where tight radius turns are unavoidable, the pavement surface design should take into account the high level of “scuffing” forces that will occur and thickened pavement and subgrade and base course keyways should be considered to assist in the reduction of lateral deflection.

SITE DRAINAGE

Proper surface drainage is critical to the future performance of the project. Saturation of a soil can cause it to lose internal shear strength and increase its compressibility, resulting in a change in the designed engineering properties. Proper site drainage should be maintained at all times.

All site drainage, with the exception of any required to be disposed of onsite by stormwater regulations, should be collected and transferred to the street in non-erosive drainage devices. The proposed structure should be provided with roof drainage. Discharge from downspouts, roof drains and scuppers should not be permitted on unprotected soils within five feet of the building perimeter. Drainage should not be allowed to pond anywhere on the site, and especially not against any foundation or retaining wall. Drainage should not be allowed to flow uncontrolled over any descending slope. Planters which are located within a distance equal to the depth of a retaining wall should be sealed to prevent moisture adversely affecting the wall. Planters which are located within five feet of a foundation should be sealed to prevent moisture affecting the earth materials supporting the foundation.

STORMWATER DISPOSAL

Introduction

Recently regulatory agencies have been requiring the disposal of a certain amount of stormwater generated on a site by infiltration into the site soils. Increasing the moisture content of a soil can cause it to lose internal shear strength and increase its compressibility, resulting in a change in the designed engineering properties. This means that any overlying structure, including

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 29

buildings, pavements and concrete flatwork, could sustain damage due to saturation of the subgrade soils. Structures serviced by subterranean levels could be adversely impacted by stormwater disposal by increasing the design fluid pressures on retaining walls and causing leaks in the walls. Proper site drainage is critical to the performance of any structure in the built environment.

Percolation Testing

Percolation testing was conducted following the excavation percolation test procedure provided in the Guidelines for Design, Investigation and Reporting Low Impact Development Stormwater Infiltration (GS200.1), dated June 30, 2017, presented in the Administrative Manual for the County of Los Angeles, Department of Public Works, Geotechnical and Material Engineering Division.

Boring 3 was drilled to a depth of 20 feet below the existing site grade with the aid of a truck-mounted drilling machine, equipped with 8-inch diameter hollowstem augers. The geologic materials encountered during excavation are presented on Plate A-3.

At the completion of drilling, a 2-inch diameter casing was placed within the center of the boreholes for the purpose of conducting percolation testing. The casing consisted of solid PVC pipes from the ground surface to a depth of 10 feet, and perforated PVC pipes between depths of 10 and 20 feet. A sand pack consisting of #3 Monterey Sand was poured into the annular space around the perforated portion of the casing. A 1-foot thick hydrated bentonite seal was placed over the sand.

After the casing was installed, the borehole was filled with water for the purpose of pre-soaking for a minimum of 3 hours. After presoaking, the borehole was refilled with water, and the rate of drop in the water level was measured. The percolation test readings were recorded a minimum of

Page 30

8 times or until a stabilized rate of drop was obtained, whichever occurred first. The percolation testing was performed within the native alluvial soils.

After a representative percolation rate was obtained from the testing, the Reduction Factor (Rf) required by the County of Los Angeles procedure to account for non-vertical flow was applied to obtain an infiltration rate. Based on the enclosed analyses, an infiltration rate of 0.72 inches per hour may be utilized for the design of an infiltration system. No other factors of safety or correction factors have been applied to this rate. The Civil Engineer must determine and apply any additional factors of safety, or correction factors, required for the design.

The Proposed System

The location(s) for potential stormwater disposal have not been specifically addressed on this site. It is the opinion of this office that stormwater infiltration is possible on this site, however until the plan achieves more definition, and this office can address the impacts, stormwater infiltration is not recommended.

Recommendations

The design and construction of stormwater infiltration facilities is not the responsibility of the geotechnical engineer. However, based on the experience of this firm, it is recommended that several aspects of the use of such facilities should be considered by the design and construction team:

- Open infiltration basins have many negative associated issues. Such a design must consider attractive nuisance, impacts to growing vegetation, impacts to air quality and vector control.
- All infiltration devices should be provided with overflow protection. Once the device is full of water, additional water flowing to the device should be diverted to another acceptable disposal area, or disposed offsite in an acceptable manner.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675
www.geoteq.com

September 23, 2022
File No. 22311
Page 31

- All connections associated with stormwater infiltration devices should be sealed and water-tight. Water leaking into the subgrade soils can lead to loss of strength, piping, erosion, settlement and/or expansion of the effected earth materials.
- Excavations proposed for the installation of stormwater facilities should comply with the "Temporary Excavations" sections of this (the referenced) reports well as CalOSHA Regulations where applicable.

DESIGN REVIEW

Engineering of the proposed project should not begin until approval of the geotechnical report by the Building Official is obtained in writing. Significant changes in the geotechnical recommendations may result during the building department review process.

It is recommended that the geotechnical aspects of the project be reviewed by this firm during the design process. This review provides assistance to the design team by providing specific recommendations for particular cases, as well as review of the proposed construction to evaluate whether the intent of the recommendations presented herein are satisfied.

CONSTRUCTION MONITORING

Geotechnical observations and testing during construction are considered to be a continuation of the geotechnical investigation. It is critical that this firm review the geotechnical aspects of the project during the construction process. Compliance with the design concepts, specifications or recommendations during construction requires review by this firm during the course of construction. All foundations should be observed by a representative of this firm prior to placing concrete or steel. Any fill which is placed should be observed, tested, and verified if used for engineered purposes. Please advise Geotechnologies, Inc. at least twenty-four hours prior to any required site visit.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675

September 23, 2022
File No. 22311
Page 32

If conditions encountered during construction appear to differ from those disclosed herein, notify Geotechnologies, Inc. immediately so the need for modifications may be considered in a timely manner.

It is the responsibility of the contractor to ensure that all excavations and trenches are properly sloped or shored. All temporary excavations should be cut and maintained in accordance with applicable OSHA rules and regulations.

EXCAVATION CHARACTERISTICS

The exploration performed for this investigation is limited to the geotechnical excavations described. Direct exploration of the entire site would not be economically feasible. The owner, design team and contractor must understand that differing excavation and drilling conditions may be encountered based on boulders, gravel, oversize materials, groundwater and many other conditions. Fill materials, especially when they were placed without benefit of modern grading codes, regularly contain materials which could impede efficient grading and drilling. Southern California sedimentary bedrock is known to contain variable layers which reflect differences in depositional environment. Such layers may include abundant gravel, cobbles and boulders. Similarly bedrock can contain concretions. Concretions are typically lenticular and follow the bedding. They are formed by mineral deposits. Concretions can be very hard. Excavation and drilling in these areas may require full size equipment and coring capability. The contractor should be familiar with the site and the geologic materials in the vicinity.

CLOSURE AND LIMITATIONS

The purpose of this report is to aid in the design and completion of the described project. Implementation of the advice presented in this report is intended to reduce certain risks associated with construction projects. The professional opinions and geotechnical advice contained in this report are sought because of special skill in engineering and geology and were prepared in accordance with generally accepted geotechnical engineering practice.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675

September 23, 2022
File No. 22311
Page 33

Geotechnologies, Inc. has a duty to exercise the ordinary skill and competence of members of the engineering profession. Those who hire Geotechnologies, Inc. are not justified in expecting infallibility, but can expect reasonable professional care and competence.

The recommendations of this report pertain only to the site investigated and are based upon the assumption that the geologic conditions do not deviate from those disclosed in the investigation. If any variations are encountered during construction, or if the proposed construction will differ from that anticipated herein, Geotechnologies, Inc. should be notified so that supplemental recommendations can be prepared.

This report is issued with the understanding that it is the responsibility of the owner, or the owner's representatives, to ensure that the information and recommendations contained herein are brought to the attention of the project architect and engineer and are incorporated into the plans. The owner is also responsible to see that the contractor and subcontractors carry out the geotechnical recommendations during construction.

The findings of this report are valid as of the date of this report. However, changes in the conditions of a property can occur with the passage of time, whether they are due to natural processes or the works of man on this or adjacent properties. In addition, changes in applicable or appropriate standards may occur, whether they result from legislation or the broadening of knowledge. Accordingly, the findings of this report may be invalidated wholly or partially by changes outside control of this firm. Therefore, this report is subject to review and should not be relied upon after a period of three years.

Geotechnical observations and testing during construction is considered to be a continuation of the geotechnical investigation. It is, therefore, most prudent to employ the consultant performing the initial investigative work to provide observation and testing services during construction. This practice enables the project to flow smoothly from the planning stages through to completion.

Geotechnologies, Inc.

439 Western Avenue, Glendale, California 91201-2837 • Tel: 818.240.9600 • Fax: 818.240.9675

File No. 22311
Page 34

Should another geotechnical firm be selected to provide the testing and observation services during construction, that firm should prepare a letter indicating their assumption of the responsibilities of geotechnical engineer of record. A copy of the letter should be provided to the regulatory agency for review. The letter should acknowledge the concurrence of the new geotechnical engineer with the recommendations presented in this report.

EXCLUSIONS

Geotechnologies, Inc. does not practice in the fields of methane gas, radon gas, environmental engineering, waterproofing, dewatering organic substances or the presence of corrosive soils or wetlands which could affect the proposed development including mold and toxic mold. Nothing in this report is intended to address these issues and/or their potential effect on the proposed development. A competent professional consultant should be retained in order to address environmental issues, waterproofing, organic substances and wetlands which might affect the proposed development.

GEOTECHNICAL TESTING

Classification and Sampling

The soil is continuously logged by a representative of this firm and classified by visual examination in accordance with the Unified Soil Classification system. The field classification is verified in the laboratory, also in accordance with the Unified Soil Classification System. Laboratory classification may include visual examination, Atterberg Limit Tests and grain size distribution. The final classification is shown on the excavation logs.

Samples of the geologic materials encountered in the exploratory excavations were collected and transported to the laboratory. Undisturbed samples of soil are obtained at frequent intervals. Unless noted on the excavation logs as an SPT sample, samples acquired while utilizing a hollow-stem auger drill rig are obtained by driving a thin-walled, California Modified Sampler

Geotechnologies, Inc.

September 23, 2022
File No. 22311
Page 35

with successive 30-inch drops of a 140-pound hammer. Samples from bucket-auger drilling are obtained utilizing a California Modified Sampler with successive 12-inch drops of a kelly bar, whose weight is noted on the excavation logs. The soil is retained in brass rings of 2.50 inches outside diameter and 1.00 inch in height. The central portion of the samples are stored in close fitting, waterproof containers for transportation to the laboratory. Samples noted on the excavation logs as SPT samples are obtained in general accordance with the most recent revision of ASTM D 1586. Samples are retained for 30 days after the date of the geotechnical report.

Grain Size Distribution

These tests cover the quantitative determination of the distribution of particle sizes in soils. Sieve analysis is used to determine the grain size distribution of the soil larger than the Number 200 sieve.

General accordance with the most recent revision of ASTM D 422 is used to determine particle sizes smaller than the Number 200 sieve. A hydrometer is used to determine the distribution of particle sizes by a sedimentation process.

The grain size distributions are plotted on the E-Plates presented in the Appendix of this report.

Moisture and Density Relationships

The field moisture content and dry unit weight are determined for each of the undisturbed soil samples, and the moisture content is determined for SPT samples in general accordance with the most recent revision of ASTM D 4959 or ASTM D 4643. This information is useful in providing a gross picture of the soil consistency between exploration locations and any local variations. The dry unit weight is determined in pounds per cubic foot and shown on the "Excavation Logs", A-Plates. The field moisture content is determined as a percentage of the dry unit weight.

September 23, 2022
File No. 22311
Page 36

Direct Shear Testing

Shear tests are performed in general accordance with the most recent revision of ASTM D 3080 with a strain controlled, direct shear machine manufactured by Soil Test, Inc. or a Direct Shear Apparatus manufactured by GeoMatic, Inc. The rate of deformation is approximately 0.025 inches per minute. Each sample is sheared under varying confining pressures in order to determine the Mohr-Coulomb shear strength parameters of the cohesion intercept and the angle of internal friction. Samples are generally tested in an artificially saturated condition. Depending upon the sample location and future site conditions, samples may be tested at field moisture content. The results are plotted on the "Shear Test Diagram," B-Plates.

The most recent revision of ASTM 3080 limits the particle size to 10 percent of the diameter of the direct shear test specimen. The sheared sample is inspected by the laboratory technician running the test. The inspection is performed by splitting the sample along the sheared plane and observing the soils exposed on both sides. Where oversize particles are observed in the shear plane, the results are discarded and the test run again with a fresh sample.

Consolidation Testing

Settlement predictions of the soil's behavior under load are made on the basis of the consolidation tests in general accordance with the most recent revision of ASTM D 2435. The consolidation apparatus is designed to receive a single one-inch high ring. Loads are applied in several increments in a geometric progression, and the resulting deformations are recorded at selected time intervals. Porous stones are placed in contact with the top and bottom of each specimen to permit addition and release of pore fluid. Samples are generally tested at increased moisture content to determine the effects of water on the bearing soil. The normal pressure at which the water is added is noted on the drawing. Results are plotted on the "Consolidation Test," C-Plates.

www.geotek.com

September 23, 2022
File No. 22311
Page 37

Expansion Index Testing

The expansion tests performed on the remolded samples are in accordance with the Expansion Index testing procedures, as described in the most recent revision of ASTM D 4829. The soil sample is compacted into a metal ring at a saturation degree of 50 percent. The ring sample is then placed in a consolidometer, under a vertical confining pressure of 1 lbf/square inch and inundated with distilled water. The deformation of the specimen is recorded for a period of 24 hour or until the rate of deformation becomes less than 0.0002 inches/hour, whichever occurs first. The expansion index, EI, is determined by dividing the difference between final and initial height of the ring sample by the initial height, and multiplied by 1,000.

Laboratory Compaction Characteristics

The maximum dry unit weight and optimum moisture content of a soil are determined in general accordance with the most recent revision of ASTM D 1557. A soil at a selected moisture content is placed in five layers into a mold of given dimensions, with each layer compacted by 25 blows of a 10 pound hammer dropped from a distance of 18 inches subjecting the soil to a total compactive effort of about 56,000 pounds per cubic foot. The resulting dry unit weight is determined. The procedure is repeated for a sufficient number of moisture contents to establish a relationship between the dry unit weight and the water content of the soil. The data when plotted represent a curvilinear relationship known as the compaction curve. The values of optimum moisture content and modified maximum dry unit weight are determined from the compaction curve.

- NOTES:
- Inlet flume & bypass weir frame shall be constructed from stainless steel Type 304.
 - Matrix filter element is constructed from durable polypropylene woven monofilament geotextile surrounding a polypropylene matrix skeleton. Filter element shall not allow the retention of water between storm events.
 - Filter inserts are supplied with "clip-in" filter pouches utilizing fossil rock™ filter medium for the collection and retention of petroleum hydrocarbons (oils & greases).
 - FloGard® LoPro™ filter inserts and fossil rock™ filter medium pouches must be maintained in accordance with manufacturer recommendations.
 - Device requires a minimum catch basin depth of 6.50" beneath grate. See sheet 2 of 2.
 - Additional inlets are limited to one only with a 6" diameter maximum, and to a wall opposite or at a right angle to outlet. See detail A.

NOISE ANALYSIS ASSUMPTIONS

Construction Schedule

- Construction Duration (11/1/2024-11/30/2025)
- Demolition (11/1/2024-11/30/2024)
- Site Preparation (12/1/2024-12/4/2024)
- Grading (12/5/2024-12/16/2024)
- Trenching (12/18/2024-3/16/2025)
- Building Construction (12/18/2024-3/16/2025)
- Paving (9/15/2025-9/29/2025)
- Architectural Coatings (8/1/2025-11/30/2025)

Days/Week of Construction: 5

Grading: 971 cubic yards of soil removal

- Assumes 10 cubic yard capacity for haul truck
- Assumes 25-mile distance to landfill
- Assumes grading of entire site on a given day

Demolition: 2,433 tons of debris

- Assumes 25,302 square feet of buildings @ 12' height = 3,711 CY @ 1,000 lb/CY
- Assumes 26,000 square feet of asphalt parking lot @ 6" depth = 481 CY @ 2,400 lb/CY
- Assumes 25-mile distance to landfill

On-Site Construction Noise

- Ambient Noise Measurements: 10/5/2022
- Sound Pressure: 75 dBA at 50 feet of distance pursuant to LAMC section 112.05
- Noise modeling: SoundPLAN Essential 5.1, full sphere propagation of sound power

Off-Site Construction Noise

- Assumes 838 haul truck trips during demolition
- Assumes 194 haul truck trips during grading
- Worker Trips (Daily)
 - Demolition – 12.5
 - Site Preparation – 7.5
 - Grading – 10
 - Trenching – 5
 - Building Construction – 13.5
 - Paving – 12.5
 - Architectural Coatings 2.7
- Vendor Trips 5.28
- Passenger Car Equivalent 19.1 for heavy-duty trucks

Operational Trip Generation for Existing Church (Source: Linscott, Law & Greenspan)

- 192 average daily trips

- 8 A.M. peak hour trips, 12 P.M. peak hour trips

Operational Trip Generation for Proposed Project (Source: Linscott, Law & Greenspan)

- 1,019 average daily trips
- 506 A.M. peak hour trips, 192 P.M. peak hour trips

NOISE TECHNICAL REPORT

Introduction

This technical report evaluates noise impacts from construction and operation of a Proposed Project at 1059 South Gage Avenue in the County of Los Angeles. The analysis discusses applicable regulations and compares impacts to appropriate thresholds of significance. Noise measurements, calculation worksheets, and a map of noise receptors and measurement locations are included in the Technical Appendix to this analysis.

Fundamentals of Noise

Characteristics of Sound

Sound can be described in terms of its loudness (amplitude) and frequency (pitch). The standard unit of measurement for sound is the decibel (dB). Because the human ear is not equally sensitive to sound at all frequencies, the A-weighted scale (dBA) is used to reflect the normal hearing sensitivity range. On this scale, the range of human hearing extends from 3 to 140 dBA. Table 1 provides examples of A-weighted noise levels from common sources.

Table 1
A-Weighted Decibel Scale

Typical A-Weighted Sound Levels	Sound Level (dBA L_{eq})
Near Jet Engine	130
Rock and Roll Band	110
Jet flyover at 1,000 feet	100
Power Motor	90
Food Blender	80
Living Room Music	70
Human Voice at 3 feet	60
Residential Air Conditioner at 50 feet	50
Bird Calls	40
Quiet Living Room	30
Average Whisper	20
Rustling Leaves	10

Source: Cowan, James P., Handbook of Environmental Acoustics, 1993.
These noise levels are approximations intended for general reference and informational use.

Noise Definitions. This noise analysis discusses sound levels in terms of equivalent noise level (L_{eq}), maximum noise level (L_{max}) and the Community Noise Equivalent Level (CNEL).

- **Equivalent Noise Level (L_{eq}):** L_{eq} represents the average noise level on an energy basis for a specific time period. Average noise level is based on the energy content (acoustic energy) of sound. For example, the L_{eq} for one hour is the energy average noise level

during that hour. L_{eq} can be thought of as a continuous noise level of a certain period equivalent in energy content to a fluctuating noise level of that same period.

- Maximum Noise Level (L_{max}): L_{max} represents the maximum instantaneous noise level measured during a given time period.
- Community Noise Equivalent Level (CNEL): CNEL is an adjusted noise measurement scale of average sound level during a 24-hour period. Due to increased noise sensitivities during evening and night hours, human reaction to sound between 7:00 P.M. and 10:00 P.M. is as if it were actually 5 dBA higher than had it occurred between 7:00 A.M. and 7:00 P.M. From 10:00 P.M. to 7:00 A.M., humans perceive sound as if it were 10 dBA higher. To account for these sensitivities, CNEL figures are obtained by adding an additional 5 dBA to evening noise levels between 7:00 P.M. and 10:00 P.M. and 10 dBA to nighttime noise levels between 10:00 P.M. and 7:00 A.M. As such, 24-hour CNEL figures are always higher than their corresponding actual 24-hour averages.

Effects of Noise. The degree to which noise can impact an environment ranges from levels that interfere with speech and sleep to levels that can cause adverse health effects. Most human response to noise is subjective. Factors that influence individual responses include the intensity, frequency, and pattern of noise; the amount of background noise present; and the nature of work or human activity exposed to intruding noise. According to the National Institute of Health (NIH), extended or repeated exposure to sounds at or above 85 dB can cause hearing loss. Sounds of 70 dBA or less, even after continuous exposure, are unlikely to cause hearing loss.¹ The World Health Organization (WHO) reports that adults should not be exposed to sudden “impulse” noise events of 140 dB or greater. For children, this limit is 120 dB.²

Exposure to elevated nighttime noise levels can disrupt sleep, leading to increased levels of fatigue and decreased work or school performance. For the preservation of healthy sleeping environments, the WHO recommends that continuous interior noise levels not exceed 30 dBA and that individual noise events of 45 dBA or higher be avoided.³ Assuming a conservative exterior to interior sound reduction of 15 dBA, continuous exterior noise levels should therefore not exceed 45 dBA. Individual exterior events of 60 dBA or higher should also be limited. Some epidemiological studies have shown a weak association between long-term exposure to noise levels of 65 to 70 dBA and cardiovascular effects, including ischemic heart disease and hypertension. However, at this time, the relationship is largely inconclusive.

People with normal hearing sensitivity can recognize small changes in sound levels of approximately 3 dBA. Changes of at least 5 dBA can be readily noticeable while sound level

1 National Institute of Health, National Institute on Deafness and Other Communication, www.nidcd.nih.gov/health/noise-induced-hearing-loss.

2 World Health Organization, Guidelines for Community Noise, 1999.

3 Ibid.

increases of 10 dBA or greater are perceived as a doubling in loudness.⁴ However, during daytime, few people are highly annoyed by noise levels below 55 dBA L_{eq} .⁵

Noise Attenuation. Noise levels decrease as the distance from noise sources to receivers increases. For each doubling of distance, noise from stationary sources can decrease by about 6 dBA over hard surfaces (e.g., reflective surfaces such as parking lots) and 7.5 dBA over soft surfaces (e.g., absorptive surfaces such as soft dirt and grass). For example, if a point source produces a noise level of 89 dBA at a reference distance of 50 feet over an asphalt surface, its noise level would be approximately 83 dBA at a distance of 100 feet, 77 dBA at 200 feet, etc. Noises generated by mobile sources such as roadways decrease by about 3 dBA over hard surfaces and 4.5 dBA over soft surfaces for each doubling of distance. It should be noted that because decibels are logarithmic units, they cannot be added or subtracted. For example, two cars each producing 60 dBA of noise would not produce a combined 120 dBA.

Noise is most audible when traveling by direct line of sight, an unobstructed visual path between noise source and receptor. Barriers that break line of sight between sources and receivers, such as walls and buildings, can greatly reduce source noise levels by allowing noise to reach receivers by diffraction only. As a result, sound barriers can generally reduce noise levels by up to 15 dBA.⁶ The effectiveness of barriers can be greatly reduced when they are not high or long enough to completely break line of sight from sources to receivers.

Regulatory Framework

Noise

Federal. No federal noise standards regulate environmental noise associated with short-term construction activities or long-term operations of development projects. As such, temporary and long-term noise impacts produced by the Project would be largely regulated or evaluated by State and County of Los Angeles standards designed to protect public well-being and health.

State. The State's 2017 General Plan Guidelines establish county and city standards for acceptable exterior noise levels based on land use. These standards are incorporated into land use planning processes to prevent or reduce noise and land use incompatibilities. Table 2 illustrates State compatibility considerations between land uses and exterior noise levels.

California Government Code Section 65302 also requires each county and city to prepare and adopt a comprehensive long-range general plan for its physical development. Section 65302(f) requires a noise element to be included in the general plan. This noise element must identify and appraise noise problems in the community, recognize Office of Noise Control guidelines, and analyze and quantify current and projected noise levels.

■	Normally Acceptable - Specified land use is satisfactory, based upon the assumption that any buildings involved are of normal conventional construction without any special noise insulation requirements.
▨	Conditionally Acceptable - New construction or development should be undertaken only after a detailed analysis of the noise reduction requirements is made and needed noise insulation features included in the design. Conventional construction, but with closed windows and fresh air supply system or air conditioning will normally suffice.
▨	Normally Unacceptable - New construction or development should generally be discouraged. If new construction or development does proceed, a detailed analysis of the noise reduction requirements must be made and needed noise insulation features included in the design.
■	Clearly Unacceptable - New construction or development should generally not be undertaken.

Source: California Office of Planning and Research "General Plan Guidelines, Noise Element Guidelines (Appendix D, Figure 2), 2017.

The State has also established noise insulation standards for new multi-family residential units, hotels, and motels that are subject to relatively high levels of noise from transportation. The noise insulation standards, collectively referred to as the California Noise Insulation Standards (Title 24, California Code of Regulations) set forth an interior standard of 45 dBA CNEL for habitable rooms. The standards require an acoustical analysis which indicates that dwelling units meet this interior standard where such units are proposed in areas subject to exterior noise levels greater than 60 dBA CNEL. Local jurisdictions typically enforce the California Noise Insulation Standards through the building permit application process.

Los Angeles County Airport Land Use Commission Comprehensive Land Use Plan. In Los Angeles County, the Regional Planning Commission has the responsibility for acting as the Airport Land Use Commission and for coordinating the airport planning of public agencies within the County. The Airport Land Use Commission coordinates planning for the areas surrounding public use airports. The Comprehensive Land Use Plan provides for the orderly expansion of Los Angeles County's public use airports and the areas surrounding them. It is intended to provide for the adoption of land use measures that will minimize the public's exposure to excessive noise and safety hazards. In formulating the Comprehensive Land Use Plan, the Los Angeles County Airport Land Use Commission has established provisions for safety, noise insulation, and the regulation of building height within areas adjacent to each of the public airports in the County.

County of Los Angeles General Plan Noise Element. The County of Los Angeles General Plan includes a Noise Element that includes policies and standards to guide the control of noise to protect residents, workers, and visitors. The noise standards identified in the Noise Element serve as guidelines to evaluate the acceptability of the transportation noise level impacts. These standards are used to assess the long-term traffic noise impacts on land uses. The following is a summary of General Plan policies that are relevant to the proposed project.

Policy N 1.3: Minimize impacts to noise-sensitive land uses by ensuring adequate site design, acoustical construction, and use of barriers, berms, or additional engineering controls through Best Available Technologies (BAT).

Policy N 1.4: Enhance and promote noise abatement programs in an effort to maintain acceptable levels of noise as defined by the Los Angeles County Exterior Noise Standards and other applicable noise standards.

Policy N 1.5: Ensure compliance with the jurisdictions of State Noise Insulation Standards (Title 24, California Code of Regulations and Chapter 35 of the Uniform Building Code), such as noise insulation of new multifamily dwellings constructed within the 60 dB (CNEL or Ldn) noise exposure contours.

Policy N 1.9: Require construction of suitable noise attenuation barriers on noise sensitive uses that would be exposed to exterior noise levels of 65 dBA CNEL and above, when unavoidable impacts are identified.

Policy N 1.12: Decisions on land adjacent to transportation facilities, such as the airports, freeways and other major highways, must consider both existing and future noise levels of these transportation facilities to assure the compatibility of proposed uses.

Based on these guidelines, an exterior noise level of 65 dBA CNEL is generally considered the maximum exterior noise level for noise-sensitive receptors.

County of Los Angeles Municipal Code. The County of Los Angeles noise control ordinance restricts unnecessary, excessive, and annoying noise. Examples of violations cited in the Noise Ordinance that would pertain to the proposed project include:

12.08.390. Exterior Noise Standards. Citations for violations are authorized when:

- A. Unless otherwise herein provided, the following exterior noise levels shall apply to all receptor properties within a designated noise zone:

Noise Zone	Designated Noise Zone Land Use (Receptor Property)	Time Interval	Exterior Noise Level (dB)
I	Noise Sensitive	Anytime	45
II	Residential	10:00 P.M. to 7:00 A.M.	45
		7:00 A.M. to 10:00 P.M.	50
III	Commercial	10:00 P.M. to 7:00 A.M.	55
		7:00 A.M. to 10:00 P.M.	60
IV	Industrial	Anytime	70
Source: DKA Planning, 2022.			

- B. Unless otherwise herein provided, no person shall operate or cause to be operated, any source of sound at any location within the unincorporated County, or allow the creation of any noise on property owned, leased, occupied or otherwise controlled by such person which causes the noise level, when measured on any other property either incorporated or unincorporated, to exceed any of the following exterior noise standards:⁷

⁷ Ambient noise levels were measured at the Project Site on November 1, 2023 from 1:55 P.M.-2:55 P.M. using a Larson Davis Sound Advisor 831C unit. This showed that while ambient noise levels for the area were consistent with exterior standards set by the County, noise levels for Standard 1 were slightly higher than the recommended standard.

Standard No. 1 shall be the exterior noise level which may not be exceeded for a cumulative period of more than 30 minutes in any hour. Standard No. 1 shall be the applicable noise level from subsection A of this section; or, if the ambient L50 exceeds the foregoing level, then the ambient L50 becomes the exterior noise level for Standard No. 1.

Standard No. 2 shall be the exterior noise level which may not be exceeded for a cumulative period of more than 15 minutes in any hour. Standard No. 2 shall be the applicable noise level from subsection A of this section plus 5 dB; or, if the ambient L25 exceeds the foregoing level, then the ambient L25 becomes the exterior noise level for Standard No. 2.

Standard No. 3 shall be the exterior noise level which may not be exceeded for a cumulative period of more than five minutes in any hour. Standard No. 3 shall be the applicable noise level from subsection A of this section plus 10 dB; or, if the ambient L8.3 exceeds the foregoing level, then the ambient L8.3 becomes exterior noise level for Standard No. 3.

Standard No. 4 shall be the exterior noise level which may not be exceeded for a cumulative period of more than one minute in any hour. Standard No. 4 shall be the applicable noise level from subsection A of this section plus 15 dB; or, if the ambient L1.7 exceeds the foregoing level, then the ambient L1.7 becomes the exterior noise level for Standard No. 4.

Standard No. 5 shall be the exterior noise level which may not be exceeded for any period of time. Standard No. 5 shall be the applicable noise level from subsection A of this section plus 20 dB; or, if the ambient L0 exceeds the foregoing level then the ambient L0 becomes the exterior noise level for Standard No. 5.

- C. If the measurement location is on a boundary property between two different zones, the exterior noise level utilized in subsection B of this section to determine the exterior standard shall be the arithmetic mean of the exterior noise levels in subsection A of the subject zones. Except as provided for above in this subsection C, when an intruding noise source originates on an industrial property and is impacting another noise zone, the applicable exterior noise level as designated in subsection A shall be the daytime exterior noise level for the subject receptor property.
- D. The ambient noise histogram shall be measured at the same location along the property line utilized in subsection B of this section, with the alleged intruding noise source inoperative. If for any reason the alleged intruding noise source cannot be turned off, the ambient noise histogram will be estimated by performing a measurement in the same general area of the alleged intruding noise source but at a sufficient distance such that the noise from the alleged

Exterior Noise Levels at Project Site (1059 S. Gage Avenue)

Exterior Noise Standards dBA - Industrial										
Duration	Std #1 = L50		Std #2 = L25		Std #3 = L8.3		Std #4 = L1.7		Std #5 = L0	
	30 min/hr	Result	15 min/hr	Result	5 min/hr	Result	1 min/hr	Result	At no time	Result
One hour	50.0	51.3	55.0	53.0	60.0	54.7	65.0	57.9	70.0	69.5
Shaded measurement represents standard dB exceedance for the cumulative period. Measurements taken November 1, 2023 from 1:55 P.M.-2:55 P.M.										

intruding noise source is at least 10 dB below the ambient noise histogram in order that only the actual ambient noise histogram be measured. If the difference between the ambient noise histogram and the alleged intruding noise source is 5 to 10 dB, then the level of the ambient noise histogram itself can be reasonably determined by subtracting a one- decibel correction to account for the contribution of the alleged intruding noise source.

- E. In the event the intrusive exceeds the exterior noise standards as set forth in subsections B and C of this section at a specific receptor property and the health officer has reason to believe that this violation at said specific receptor property was unanticipated and due to abnormal atmospheric conditions, the health officer shall issue an abatement notice in lieu of a citation. If the specific violation is abated, no citation shall be issued therefor. If, however, the specific violation is not abated, the health officer may issue a citation.

12.08.440 - Construction noise.

- A. Operating or causing the operation of any tools or equipment used in construction, drilling, repair, alteration or demolition work between weekday hours of 7:00 p.m. and 7:00 a.m., or at any time on Sundays or holidays, such that the sound therefrom creates a noise disturbance across a residential or commercial real-property line, except for emergency work of public service utilities or by variance issued by the health officer is prohibited.
- B. Noise Restrictions at Affected Structures. The contractor shall conduct construction activities in such a manner that the maximum noise levels at the affected buildings will not exceed those listed in the following schedule:

1. At Residential Structures.

- a. Mobile Equipment. Maximum noise levels for nonscheduled, intermittent, short-term operation (less than 10 days) of mobile equipment:

	Single-Family Residential	Multi-Family Residential	Semi-Residential/ Commercial
Daily, except Sundays and legal holidays, 7:00 A.M. to 8:00 P.M.	75 dBA	80 dBA	85 dBA
Daily, 8:00 P.M. to 7:00 A.M. and all day Sunday and legal holidays	60 dBA	64 dBA	70 dBA

Existing Conditions

Noise Sensitive Receptors

The Project Site is located in a residential area within East Los Angeles. Sensitive receptors within 0.25 miles of the Project Site include, but are not limited to, the following representative sampling:⁸

- Multi-Family Residences, 1067-1075 Gage Avenue; five feet south of the Project Site.
- Multi-Family Residences, 1049 Gage Avenue; five feet north and east of the Project Site.
- Multi-Family Residences, Eastman Avenue (east side); five feet north and south of the Project Site.

⁸ Land use classifications based on Los Angeles County Assessor Portal, www.portal.assessor.lacounty.gov.

- Multi-Family Residences, Gage Avenue (east side); 70 feet east of the Project Site. While most homes on that block are multi-family residences, 1070 Gage Avenue is a single-family residence.
- Multi-Family Residences, 1142 Eastman Avenue; 320 feet south of the Project Site.
- LA Community Hospital, 400 feet southwest of the Project Site.
- Eastman Avenue Elementary School, 740 feet south of the Project Site.

Existing Ambient Noise Levels

The Project Site is improved with two church-related buildings totaling 25,302 square feet with a surface parking lot. Operational noise from the Project Site includes six roof-top units providing air conditioning for the two main buildings on-site that occasionally generate minor levels of noise (approximately 81.9 dBA at one foot of distance).⁹

There is also minor noise from the operation of the church’s parking lot, including tire friction as vehicles navigate to and from parking spaces, minor engine acceleration, doors slamming, and occasional car alarms. Most of these sources are instantaneous (e.g., car alarm chirp, door slam) while others may last a few seconds. Intermittent noise from solid waste management and collection activities are of short duration, as are occasional loading of goods.

Existing development also produces noise off-site, as 192 daily vehicle trips travel to and from the Project Site,¹⁰ as traffic is the primary source of noise near the Project Site, largely from the operation of vehicles with internal combustion engines and frictional contact with the ground and air.¹¹

In October 2022, DKA Planning took short-term noise measurements near the Project site to determine the ambient noise conditions of the neighborhood near sensitive receptors.¹² As shown in Table 3, noise levels along roadways near the Project Site ranged from 53.6 to 68.1 dBA L_{eq} , which was generally consistent with the traffic volumes on the applicable street(s) and exposure to freeway traffic on the I-5 freeway, despite the presence of ten-foot high soundwalls on both the north- and southbound lanes of the freeway. Figure 1 illustrates where ambient noise levels were measured near the Project Site to establish the noise environment and their relationship to the applicable sensitive receptor(s). 24-hour CNEL noise levels are generally considered “Normally Acceptable” and “Conditionally Acceptable” for the types of land uses near the Project Site.

⁹ County of Pomona, Pomona Ranch Plaza WalMart Expansion Project, Table 4.4-5; August 2014. Source was cluster of mechanical rooftop condensers including two Krack MXE-04 four-fan units and one MXE-02 two-fan unit. Reference noise level based on 30 minutes per hour of activity.

¹¹ World Health Organization, <https://www.who.int/docstore/peh/noise/Comnoise-2.pdf> accessed March 18, 2021.

¹² Noise measurements were taken using a Quest Technologies Sound Examiner SE-400 Meter. The Sound Examiner meter complies with the American National Standards Institute (ANSI) and International Electrotechnical Commission (IEC) for general environmental measurement instrumentation. The meter was equipped with an omni-directional microphone, calibrated before the day’s measurements, and set at approximately five feet above the ground.

**Table 3
Existing Noise Levels**

Noise Measurement Locations	Primary Noise Source	Sound Levels		Nearest Sensitive Receptor(s)	Noise/Land Use Compatibility ^b
		dBA (L _{eq})	dBA (CNEL) ^a

When noise measurements apply to two or more land use categories, the more noise-sensitive land use category is used. See Table 2 above for definition of compatibility designations. Source: DKA Planning, 2022					

Project Impacts

Methodology

On-Site Construction Activities. Construction noise levels at off-site sensitive receptors were modeled employing the ISO 9613-2 sound attenuation methodologies using the SoundPLAN Essential model (version 5.1). This software package considers reference equipment noise levels, noise management techniques, distance to receptors, and any attenuating features to predict noise levels from sources like construction equipment. Construction noise sources were modeled as area sources to reflect the mobile nature of construction equipment. These vehicles would not operate directly where the Project's property line abuts adjacent structures, as they would retain some setback to preserve maneuverability. This equipment would also occasionally operate at reduced power and intensity to maintain precision at these locations.

Off-Site Construction Noise Activities. The Project's off-site construction noise impact from haul trucks, vendor deliveries, and other vehicles accessing the Project Site was analyzed by considering the Project's anticipated vehicle trip generation with existing traffic and roadway noise levels along local roadways, particularly those likely to be part of any haul route. Because it takes

a doubling of traffic volumes on a roadway to generate the increased sound energy it takes to elevate ambient noise levels by 3 dBA,¹³ the analysis focused on whether truck and auto traffic would double traffic volumes on key roadways to be used for hauling soils to and/or from the Project Site during construction activities. Because haul trucks generate more noise than traditional passenger vehicles, a 19.1 passenger car equivalency (PCE) was used to convert haul truck trips to a reference level conversion to an equivalent number of passenger vehicles.¹⁴ It should be noted that because an official haul route has not been approved as of the preparation of this analysis, assumptions were made about logical routes that would minimize haul truck traffic on local streets in favor of major arterials that can access regional-serving freeways.

On-Site Operational Noise Activities. The Project's potential to result in significant noise impacts from on-site operational noise sources was evaluated by identifying sources of on-site noise sources and considering the impact that they could produce given the nature of the source (i.e., loudness and whether noise would be produced during daytime or more-sensitive nighttime hours), distances to nearby sensitive receptors, ambient noise levels near the Project Site, the presence of similar noise sources in the vicinity, and maximum noise levels permitted by the County.

Off-Site Operational Noise Activities. The Project's off-site noise impact from Project-related traffic was evaluated based its potential to increase traffic volumes on local roadways that serve the Project site. Because it takes a doubling of traffic volumes on a roadway to generate the increased sound energy it takes to elevate ambient noise levels by 3 dBA, the analysis focused on whether auto trips generated by the Proposed Project would double traffic volumes on key roadways that access the Project site.

Thresholds of Significance

Construction Noise Thresholds. For this analysis, the on-site construction noise impact would be considered significant if:

- Construction activities would exceed standards in LA County Code Section 12.08.440¹⁵;
- Construction activities would exceed existing ambient exterior noise levels by 5 dBA (hourly L_{eq}) or more at a noise-sensitive use,

Operational Noise Thresholds. In addition to applicable County standards and guidelines that would regulate or otherwise moderate the Project's operational noise impacts, the following criteria are adopted to assess the impact of the Project's operational noise sources:

- Project operations would cause ambient noise levels at off-site locations to increase by 3 dBA CNEL or more to or within "normally unacceptable" or "clearly unacceptable"

¹³ Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual, September 2018.

¹⁴ Caltrans, Technical Noise Supplement Table 3-3, 2013.

¹⁵ The County's noise ordinance does not have standards for noise from mobile equipment lasting ten days or more. As a result, the standards for mobile source noise less than ten days (LA County Code Section 12.08.440) is used for longer construction activities.

noise/land use compatibility categories, as defined by the State's 2017 General Plan Guidelines.

- Project operations would cause any 5 dBA CNEL or greater noise increase.¹⁶

Analysis of Project Impacts

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?**

Less Than Significant Impact.

Construction

On-Site Construction Activities

Construction would generate noise during the construction process that would span twelve months of demolition, site preparation, grading, utilities trenching, building construction, paving, and application of architectural coatings, as shown in Table 4. During all construction phases, noise-generating activities could occur at the Project Site Monday through Saturday between 7:00 A.M. and 7:00 P.M. in accordance with Section 12.08.440 of the County's noise ordinance.

**Table 4
Construction Schedule Assumptions**

Phase	Duration	Notes
Demolition	Month 1	Removal of 25,302 square feet of building floor area and 26,000 square feet of asphalt/concrete parking lot hauled 25 miles to landfill in 10-cubic yard capacity trucks.
Site Preparation	Month 2 (one week)	Grubbing and removal of trees, plants, landscaping, weeds
Grading	Month 2 (two weeks)	Fine grading, with approximately 971 cubic yards of soil (including 15 percent swell factor for topsoil) hauled 25 miles to landfill in 10-cubic yard capacity trucks.
Trenching	Months 3-6	Trenching for utilities, including gas, water, electricity, and telecommunications.
Building Construction	Months 3-12	Footings and foundation work (e.g., pouring concrete pads), framing, welding; installing mechanical, electrical, and plumbing. Floor assembly, cabinetry and carpentry, elevator installations, low voltage systems, trash management.
Paving	Month 10	Flatwork, including paving of driveways and walkways

¹⁶ As a 3 dBA increase represents a slightly noticeable change in noise level, this threshold considers any increase in ambient noise levels to or within a land use's "normally unacceptable" or "clearly unacceptable" noise/land use compatibility categories to be significant so long as the noise level increase can be considered barely perceptible. In instances where the noise level increase would not necessarily result in "normally unacceptable" or "clearly unacceptable" noise/land use compatibility, a 5 dBA increase is still considered to be significant. Increases less than 3 dBA are unlikely to result in noticeably louder ambient noise conditions and would therefore be considered less than significant.

Table 4
Construction Schedule Assumptions

Architectural Coatings	Months 9-12	Application of interior and exterior coatings and sealants.
Source: DKA Planning, 2022.		

Noise levels would generally peak during the demolition and grading phases, when diesel-fueled heavy-duty equipment like excavators and dozers are used to move large amounts of debris and dirt, respectively. This equipment is mobile in nature and does not always operate at in a steady-state mode full load, but rather powers up and down depending on the duty cycle needed to conduct work. As such, equipment is occasionally idle during which time no noise is generated.

During other phases of construction (e.g., trenching, building construction, paving, architectural coatings), noise impacts are generally lesser than during grading because they are less reliant on using heavy equipment with internal combustion engines. Smaller equipment such as forklifts, generators, and various powered hand tools and pneumatic equipment would generally be utilized. Off-site secondary noises would be generated by construction worker vehicles, vendor deliveries, and haul trucks. Figure 2 illustrates how noise would propagate from the construction site during the demolition and grading phase.

Figure 2
Construction Noise Sound Contours (Without Mitigation)

For purposes of this analysis, the threshold of significance for the Project’s construction noise impacts is an increase of 5 dBA over existing ambient noise levels. As shown in Table 5, when considering ambient noise levels, the use of multiple pieces of powered equipment simultaneously would elevate ambient noise more than 5 dBA at two of the six analyzed sensitive receptors.

Table 5
Construction Noise Impacts at Off-Site Sensitive Receptors (Without Mitigation)

Receptor	Maximum Construction Noise Level (dBA L_{eq})	Absolute Noise Threshold*	Existing Ambient Noise Level (dBA L_{eq})	New Ambient Noise Level (dBA L_{eq})	Increase (dBA L_{eq})	Potentially Significant ?
1. LA Community Hospital	44.3	85.0	61.8	61.9	0.1	No
2. Multi-Family Residences – 1049 Gage Ave.	69.0	80.0	53.6	69.1	15.5	Yes
3. Multi-Family Residences – 1067-1075 Gage Ave.	67.2	80.0	68.1	70.7	2.6	No
4. Multi-Family Residences – 1142 Eastman Ave.	44.5	80.0	61.8	61.9	0.1	No

5. Multi-Family Residences – Eastman Ave.	65.0	80.0	57.5	65.7	8.2	Yes
6. Multi-Family Residences – Gage Ave. (east side)	70.9	75.0/80.0	68.1	72.7	4.6	No
<p>* Pursuant to LA County Code Section 12.08.440 for daytime construction between 7:00 A.M. and 8:00 P.M. ** Threshold for single-family and multi-family residential Source: DKA Planning, 2023.</p>						

For all the residential receptors near the Project Site, maximum noise levels would not violate County Noise Ordinance Section 12.08.440(a), which establishes maximum noise levels allowable during construction. Specifically, it sets an 80 dBA limit at multi-family residential and 75 dBA at single-family residences for construction that lasts less than ten days.¹⁷ The limit for commercial uses is 85 dBA. Therefore, the Project’s on-site construction noise impact would be significant but mitigable. Mitigation Measures MM-NOI-1 through MM-NOI-5 would help comply with Title 12, Section 12.08.440.

Mitigation Measures

- MM-NOI-1 A temporary noise barrier shall be installed along the northern perimeter of the Project Site from Eastman Avenue to Gage Avenue. The barrier shall be capable of reducing construction-related noise levels at the adjacent residences by at least 10.6 dBA and not have any gaps or holes between the panels or at the bottom.

- MM-NOI-2 A temporary noise barrier shall be installed along the perimeter of the Project Site that fronts on 1058 and 1064 Eastman Avenue. The barrier shall be capable of reducing construction-related noise levels at the adjacent residences by at least 3.3 dBA and not have any gaps or holes between the panels or at the bottom.

- MM-NOI-3 All construction equipment shall be equipped with the manufacturers’ recommended noise suppression devices, such as mufflers and engine covers. These devices shall be kept in good working condition throughout the construction process.

- MM-NOI-4 All construction equipment shall be properly maintained and tuned to minimize noise emissions.

- MM-NOI-5 Stationary noise sources (e.g., generators and compressors) shall be located as far from residential receptor location as is feasible.

Construction Noise Impacts After Mitigation

As summarized in Table 6, construction noise impacts at all sensitive receptors would be less than significant following implementation of Mitigation Measures MM-NOI-1 through MM-NOI-5.

**Table 6
Construction Noise Impacts at Off-Site Sensitive Receptors (With Mitigation)**

Receptor	Maximum Construction Noise Level (dBA L _{eq})	Absolute Noise Threshold*	Existing Ambient Noise	New Ambient Noise Level (dBA L _{eq})	Increase (dBA L _{eq})	Potentially Significant ?

¹⁷ The County’s noise ordinance does not have standards for noise from mobile equipment lasting ten days or more. As a result, the standards for mobile source noise less than ten days (LA County Code Section 12.08.440) is used for longer construction activities.

			Level (dBA Leq)			
1. LA Community Hospital	41.2	85.0	61.8	61.8	0.0	No

Off-Site Construction Activities

The Project would also generate noise at off-site locations from haul trucks moving debris and soil from the Project Site during demolition and grading activities, respectively; vendor and contractor trips; and worker commute trips. These activities would generate up to an estimated 116 peak hourly PCE vehicle trips, as summarized in Table 7, during the demolition phase, assuming all workers travel to the worksite at the same time and that all worker trips, vendor trips, and haul trips use the same route (Whittier Boulevard) to travel to and from the Project Site. This includes converting noise from heavy-duty truck trips to an equivalent number of passenger vehicle trips. During this phase, construction vehicle trips would represent 10.9 percent of the 1,068 vehicles that travel east-west on Whittier Boulevard at Ditman Avenue during the A.M. peak hour.¹⁸

Whittier Boulevard would serve as part of the haul route for any soil and debris exported from the Project Site given its connection to the Santa Ana Freeway via Ditman Avenue to the west or Downey Road to the east. Because the Project's construction-related trips would not cause a doubling in traffic volumes (i.e., 100 percent increase) on Whittier Boulevard, the Project's construction-related traffic would not increase existing noise levels by 3 dBA or more. Therefore, the Project's noise impacts from construction-related traffic would be less than significant.

¹⁸ County of Los Angeles Public Works. Machine Count Traffic Volumes <https://pw.lacounty.gov/tnl/trafficcounts/?street=Whittier&cross=Ditman>. 2020 traffic counts adjusted by one percent annually to reflect 2022 baseline conditions.

**Table 7
Construction Vehicle Trips (Maximum Hourly)**

Construction Phase	Worker Trips^a	Vendor Trips	Haul Trips	Total Trips	Percent of Peak A.M. Hour Trips on Whittier Blvd.^e
Demolition	13	0	104 ^b	117	10.9
Site Preparation	8	0	0	8	0.7
Grading	10	0	59 ^c	69	6.4
Trenching	5	0	0	5	0.5
Building Construction	14	14 ^d	0	28	2.6
Grading	13	0	0	13	1.2
Architectural Coating	3	0	0	3	0.3

^a Assumes all worker trips occur in the peak hour of construction activity.
^b The project would generate 838 haul trips over a 22-day period with seven-hour work days. Because haul trucks emit more noise than passenger vehicles, a 19.1 passenger car equivalency (PCE) was used to convert haul truck trips to a passenger car equivalent
^c The project would generate 194 haul trips over a ten-day period with seven-hour work days. Assumes a 19.1 PCE.
^d This phase would generate about five vendor truck trips daily over a seven-hour work day. Assumes a blend of vehicle types and a 9.55 PCE.
^e Percent of existing traffic volumes on Whittier Boulevard east of Ditman Avenue.

Source: DKA Planning, 2022

Operation

On-Site Operational Noise

During long-term operations, the proposed elementary and middle schools would produce noise from both on- and off-site sources. As discussed below, the Project would not result in an exposure of persons to or a generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies. The Project would also not increase surrounding noise levels by more than 5 dBA CNEL, the minimum threshold of significance based on the noise/land use category of sensitive receptors near the Project Site. As a result, the Project’s on-site operational noise impacts would be considered less than significant.

Mechanical Equipment

The Project would operate mechanical equipment on the roof that would generate incremental long-term noise impacts. HVAC equipment in the form of large rooftop units suitable for cooling large volumes of a building would be located on the rooftop. This equipment would include a number of sound sources, including compressors, condenser fans, supply fans, return fans, and

exhaust fans that could generate a sound pressure level of up to 81.9 dBA at one foot.¹⁹ This equipment would not be subject to County ordinance Section 12.08.530, which sets air conditioning noise limits for residential projects.

However, noise impacts from rooftop mechanical equipment on nearby sensitive receptors would be negligible for several reasons. First, there would be no line-of-sight from these rooftop units to the sensitive receptors, which are almost exclusively one-story in height. The setback of these rooftop units combined with the setbacks of the building from common property lines, the edge of the roof, and height of the building would ensure that noise impacts are substantially attenuated at the nearby residences. As a result, noise from HVAC units would negligibly elevate ambient noise levels, far less than the 5 dBA CNEL threshold of significance for operational impacts.

All equipment would be fully enclosed within the new school structure, shielded from outside sources, and would therefore produce minimal noise impacts for off-site sensitive receptors. This includes any electrical or mechanical room.

Auto-Related Activities

The majority of vehicle-related noise impacts at the Project Site would come from vehicles entering and exiting the two schools from a driveway off Gage Avenue. During the peak A.M. hour (i.e., 7:00 A.M. to 8:00 A.M), about 250 vehicles would generate noise entering onto the property for child drop-offs.²⁰ This is a conservative assumption assuming the elementary and middle school bell times are not staggered. Nearly all incoming vehicles would queue along the drop-off line along the north side of the new school building before approximately 226 vehicles exit onto Eastman Avenue. Noise would be generated by vehicles as engines idle, doors open and close, and children and staff talk during the drop-off process. While noise levels during this hour of student drop-off will be audible at off-site receptors, they will not result in substantial noise impacts over a 24-hour day.

Nearby residences across Gage Avenue and Eastman Avenue would have a direct line of sight to the driveway, approximately 80 feet away. As shown in Table 8, the peak use of the parking lot for vehicle drop-offs would elevate ambient noise levels by 0.6 dBA L_{eq} at residences on Gage Avenue and 0.2 dBA L_{eq} at residences on Eastman Avenue. Twenty-four hour CNEL levels would be well below the 5 dBA threshold of significance for operational sources of noise.

In the P.M. peak hour, about 32 vehicles would enter the Project Site and 50 would exit after bell times, resulting in less noise impacts than the morning peak hour.

Parking lot noise for vehicles parking throughout the day would include tire friction as vehicles navigate to and from parking spaces, doors slamming, car alarms, and minor engine acceleration. Most of these sources are instantaneous (e.g., car alarm chirp, door slam) while others may last

¹⁹ County of Pomona, Pomona Ranch Plaza WalMart Expansion Project, Table 4.4-5; August 2014. Source was cluster of mechanical rooftop condensers including two Krack MXE-04 four-fan units and one MXE-02 two-fan unit. Reference noise level based on 30 minutes per hour of activity.

²⁰ Linscott, Law & Greenspan, Project Trip Generation, Extera Public School; September 2022

a few seconds. As such, the Project's parking lot activities would not have a significant impact on the surrounding noise environment.

**Table 8
Parking Lot-Related Impacts at Off-Site Sensitive Receptors**

Outdoor Uses

While most operations would be conducted inside the development, outdoor activities could generate noise that could impact local sensitive receptors. This would include human conversation, special events, trash collection, landscape maintenance, and commercial loading. These are discussed below:

- Human conversation and recreation. Noise associated with everyday residential activities would largely be contained internally within the school buildings. Noise could include passive activities such as human conversation and socializing in outdoor spaces, including lunchtime activities in the outdoor lunch patio and the play area for transitional and kindergarten students.

During the lunch period, up to 157 middle school or elementary school students would socialize, generating noise from the 2,350 square-foot outdoor patio. These activities would produce noise from human speech, which would generally be a function of the Lombard effect. This phenomenon recognizes that voice noise levels in face-to-face conversations generally increase proportionally to background ambient noise levels, but only up to approximately 67 dBA at a reference distance of one meter. Specifically, vocal intensity increases about 0.38 dB for every 1.0 dB increase in noise levels above 55 dB, meaning people talk slightly above ambient noise levels in order to communicate.²¹ Residents to the south of the Project Site would be partially shielded by the existing building along the south boundary of the Project Site, while residences along Eastman Avenue would be partially shielded from lunch patio noise by the new school building. Nevertheless, noise levels would be elevated from students eating and socializing on the patio.

During the play period, transitional kindergarten and kindergarten children would play in the 1,200 square-foot outdoor play area between the existing and new school

²¹ Acoustical Society of America, Volume 134; Evidence that the Lombard effect is frequency-specific in humans, Stowe and Golob, July 2013.

buildings. This would result in elevated noise levels during that limited play period that would be audible at residences along both Eastman Avenue and Gage Avenue, particularly residences west of the play area along Eastman Avenue.

Regardless, noise from socializing and recreation at the outdoor lunch patio and play area, respectively, would not result in significant noise impacts, as noise standards for the operation of the school are based on 24-hour CNEL levels. Any noise at these outdoor spaces would be intermittent and would not elevate noise levels at the adjacent residences over a 24-hour period by 5 dBA CNEL or more.

Moreover, operational noise impacts would not violate exterior noise standards outlined in County ordinance 12.08.390. Specifically, the ordinance sets a standard that the exterior noise level of 70 dBA at residential receptors from 7:00 A.M. to 10:00 P.M.

- Special events. Throughout the course of the academic school year, there would be 10-20 events held at the school for a variety of academic and cultural events. Most of these events would be held during the day, either during school or afterward. These events could involve parents and/or students. Like the regular school activities, most of these special events would occur inside the two school buildings. Occasional events would be held in the late afternoon (e.g., spelling bee and Back to School Night from 4:00 P.M. to 6:00 P.M.). No activities are planned in the evenings. While some of these events could use outdoor spaces, noise impacts would be similar to and likely less than those associated with lunchtime activities and use of the outdoor play area.
- Trash collection. On-site trash and recyclable materials for the school would be managed from the waste collection area. Haul trucks would access solid waste from Gage or Eastman Avenue, where solid waste activities would include use of trash compactors and hydraulics associated with the refuse trucks themselves. Noise levels of approximately 71 dBA L_{eq} and 66 dBA L_{eq} could be generated by collection trucks and trash compactors, respectively, at 50 feet of distance.²² Intermittent solid waste management activities would operate during the day, similar to current service for the church facility. Trash collection activities would not substantially elevate 24-hour noise levels at off-site locations by 5 dBA CNEL or more.
- Landscape maintenance. Noise from gas-powered leaf blowers, lawnmowers, and other landscape equipment can generate substantial bursts of noise during regular maintenance. For example, gas powered leaf blowers and other equipment with two-stroke engines can generate 100 dBA L_{eq} and cause nuisance or potential noise impacts for nearby receptors.²³ The landscape plan focuses on a modest palette of accent trees and raised planters that will minimize the need for powered landscaping equipment, as some of this can be managed by hand. Any intermittent landscape

²² RK Engineering Group, Inc. Wal-Mart/Sam's Club reference noise level, 2003.

²³ Erica Walker et al, Harvard School of Public Health; Characteristics of Lawn and Garden Equipment Sound; 2017

equipment would operate during the day and would represent a negligible impact that would not increase 24-hour noise levels at off-site locations by 5 dBA CNEL or more.²⁴

- Commercial loading. On-site loading and unloading activities would be managed in the surface parking lot and would be similar to current deliveries to the church facility. As a result, there would be negligible noise impacts on off-site receptors and impacts would not substantially increase CNEL noise levels at off-site locations.

Based on an assessment of these on-site sources, the impact of on-site operational noise sources would be considered less than significant.

Off-Site Operational Noise

The majority of the Project's operational noise impacts would be off-site from vehicles traveling to and from the school. The Project would add up to 827 net vehicle trips to the local roadway network on a peak weekday at the start of operations in late 2025, including up to 468 net hourly vehicle trips.²⁵ This would represent 43.8 percent of the 1,068 vehicles that travel east-west on Whittier Boulevard at Ditman Avenue during the A.M. peak hour.²⁶

Because it takes a doubling of traffic volumes (i.e., 100 percent) to increase ambient noise levels by 3 dBA L_{eq} , the Project's traffic would neither increase ambient noise levels 3 dBA or more into "normally unacceptable" or "clearly unacceptable" noise/land use compatibility categories, nor increase ambient noise levels 5 dBA or more. Twenty-four hour CNEL impacts would similarly be minimal, far below criterion for significant operational noise impacts, which begin at 3 dBA. As such, this impact would be considered less than significant.

- b. For a project located within the vicinity of a private airstrip or an airport land use plan, or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?**

Less Than Significant Impact.

The Project Site is located about 17.6 miles east of the Santa Monica Airport and 17.2 miles east of Los Angeles International Airport. Because the Proposed Project would not be located within the vicinity of a private airstrip or within two miles of a public airport, the Project would not expose local workers or residents in the area to excessive noise levels. This would be considered a less than significant impact.

²⁴ While AB 1346 (Berman, 2021) bans the sale of new gas-powered leaf blowers by 2024, existing equipment can continue to operate indefinitely.

²⁵ Linscott, Law & Greenspan, Project Trip Generation, Extera Public School; September 2022.

Cumulative Impacts

Construction

On-Site Construction Noise

During construction of the proposed Project, there could be other construction activity in the area that contributes to cumulative noise impacts at sensitive receptors. Noise from construction of development projects is localized and can affect noise-sensitive uses within 500 feet. As such, noise from two construction sites within 1,000 feet of each other can contribute to cumulative noise impacts for receptors located between.

There are no current construction projects or reasonably foreseeable related projects within 1,000 feet of the Project Site, which is located in a mature residential area near the Santa Ana Freeway. Any potential related projects would likely be located on Whittier Boulevard, nearly 900 feet north of the Project Site or south of the Santa Ana Freeway in commercially-zoned arterials.

Construction-related noise levels from any related project would be intermittent and temporary. As with the Project, any related projects would comply with the County's restrictions, including restrictions on construction hours and noise from powered equipment. Noise associated with cumulative construction activities would be reduced to the degree reasonably and technically feasible through proposed mitigation measures for each individual related project and compliance with the noise ordinance.

As a result, there are no reasonably foreseeable related projects that could contribute to cumulative noise impacts at the analyzed sensitive receptors. Based on this, there would not be cumulative noise impacts at any nearby sensitive uses located near the Project Site and related projects in the event of concurrent construction activities.

Off-Site Construction Noise

Other concurrent construction activities from related projects can contribute to cumulative off-site impacts if haul trucks, vendor trucks, or worker trips for any related project(s) were to utilize the same roadways. Distributing trips to and from each related project construction site substantially reduces the potential that cumulative development could more than double traffic volumes on existing streets, which would be necessary to increase ambient noise levels by 3 dBA. The Proposed Project would contribute up to 116 peak hourly PCE vehicle trips, which would represent 10.9 percent of the 1,068 vehicles that travel east-west on Whittier Boulevard at Ditman Avenue during the A.M. peak hour.²⁷ Any related projects would have to add 952 peak hour vehicles trips to double volumes on Whittier Boulevard. As there are no known related projects within 1,000 feet of the Project Site, cumulative noise due to construction truck traffic from the Project and related projects do not have the potential to exceed the ambient noise levels along

²⁷ County of Los Angeles Public Works. Machine Count Traffic Volumes
<https://pw.lacounty.gov/tnl/trafficcounts/?street=Whittier&cross=Ditman>. 2020 traffic counts adjusted by one percent annually to reflect 2022 baseline conditions.

the haul route by 5 dBA. As such, cumulative noise impacts from off-site construction would be less than significant.

Operation

The Project Site and East Los Angeles has been developed with residential and commercial land uses that have previously generated, and will continue to generate, noise from a number of operational noise sources, including mechanical equipment (e.g., HVAC systems), outdoor activity areas, and vehicle travel. As there are no known related projects within 1,000 feet of the Project Site, cumulative noise due to operational traffic from the Project and related projects do not have the potential to exceed the ambient noise levels along the haul route by 5 dBA. As such, cumulative noise impacts from operations of new projects would be less than significant.

On-Site Stationary Noise Sources

Noise from on-site mechanical equipment (e.g., HVAC units) and any other human activities from related projects would not be typically associated with excessive noise generation that could result in increases of 5 dBA or more in ambient noise levels at sensitive receptors when combined with operational noise from the Proposed Project. As there are no known related projects within 1,000 feet of the Project Site, cumulative stationary source noise impacts associated with operation of the Project and related projects would be less than significant.

Off-Site Mobile Noise Sources

The Project would add up to 827 net vehicle trips to the local roadway network on a peak weekday at the start of operations in late 2025, including up to 468 net hourly vehicle trips.²⁸ This would represent 43.8 percent of the 1,068 vehicles that travel east-west on Whittier Boulevard at Ditman Avenue during the A.M. peak hour.²⁹ As there are known related projects within 1,000 feet of the Project Site, cumulative traffic associated with operation of the Project and related projects would not double traffic volumes on Whittier Boulevard that could increase ambient noise levels by 3 dBA to or within their respective “Normally Unacceptable” or “Clearly Unacceptable” noise categories. Further, such cumulative traffic would not elevate traffic noise levels by 5 dBA or greater overall. Additionally, the Project would not result in an exposure of persons to or a generation of noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies.

²⁸ Linscott, Law & Greenspan, Project Trip Generation, Extera Public School; September 2022.

VIBRATION TECHNICAL REPORT

Introduction

This section evaluates vibration impacts that would be generated by construction and operation of the Proposed 1059 South Gage Avenue Project in the County of Los Angeles. The analysis compares these impacts to applicable regulations and thresholds of significance. Vibration calculation worksheets are included in the Technical Appendix.

Fundamentals of Vibration

Characteristics of Vibration. Vibration is an oscillatory motion through a solid medium in which the motion's amplitude can be described in terms of displacement, velocity, and acceleration. Unlike noise, vibration is not a common environmental problem, as it is unusual for vibration from vehicle sources to be perceptible. Common sources of vibration include trains, construction activities, and certain industrial operations.

Vibration Definitions. This analysis discusses vibration in terms of Peak Particle Velocity (PPV). PPV is commonly used to describe and quantify vibration impacts to buildings and other structures. PPV levels represent the maximum instantaneous peak of a vibration signal and are usually measured in inches per second.¹ This analysis also discusses the vibration of events in decibel scale, known as Vibration Decibels (VdB), which is a unitless measure of vibration that is expressed on a logarithmic scale.

Effects of Vibration. High levels of vibration may cause physical personal injury or damage to buildings. However, groundborne vibration levels rarely affect human health. Instead, most people consider groundborne vibration to be an annoyance that can disrupt concentration or disturb sleep. Groundborne vibration can also interfere with certain types of highly sensitive equipment and machines, especially imaging devices used in medical laboratories.

Perceptible Vibration Changes. Unlike noise, groundborne vibration is not an environmental issue that most people experience every day. Background vibration levels in residential areas are usually well below the threshold of perception for humans, approximately 0.01 inches per second.² Perceptible indoor vibrations are most often caused by sources within buildings themselves, such as slamming doors or heavy footsteps. Common outdoor sources of groundborne vibration include construction equipment, trains, and traffic on rough or unpaved roads. Traffic vibration from smooth and well-maintained roads is typically not perceptible.

Regulatory Framework

¹ California Department of Transportation, Transportation and Construction Vibration Guidance Manual, September 2013.

² Ibid.

Federal

Federal Transit Administration (FTA). In 2018, the FTA published the Transit Noise and Vibration Impact Assessment Manual to aid in the estimation and analysis of vibration impacts. Typically, potential building and structural damages are the foremost concern when evaluating the impacts of construction-related vibrations. Table 1 summarizes FTA's vibration guidelines for building and structural damage. While these are reference values for vibration levels at 25 feet of distance, this analysis uses logarithmic equations to determine whether building damage would occur regardless of actual distance between construction activity and nearby buildings.

Table 1
FTA Vibration Damage Potential Threshold Criteria

Structure and Condition	Threshold Criteria (in/sec PPV) at 25 Feet
I. Reinforced-concrete, steel or timber (no plaster)	0.5
II. Engineered concrete and masonry (no plaster)	0.3
III. Non-engineered timber and masonry buildings	0.2
IV. Buildings extremely susceptible to vibration damage	0.12
Source: Federal Transit Administration "Transit Noise and Vibration Impact Assessment Manual", September 2018.	

The FTA Assessment Manual also cites criteria for cases where more detailed analysis may be required. For buildings consisting of concrete wall and floor foundations, masonry or concrete walls, or stone masonry retaining walls, continuous vibrations of 0.3 inches per second PPV can be damaging. For buildings consisting of steel or reinforced concrete, such as factories, retaining walls, bridges, steel towers, open channels, underground chambers and tunnels with and without concrete alignment, continuous vibrations of 0.5 inches per second PPV can be damaging.

State

California's Civil Code Section 832 protects adjacent properties when excavation of a site occurs.

Each coterminous owner is entitled to the lateral and subjacent support which his land receives from the adjoining land, subject to the right of the owner of the adjoining land to make proper and usual excavations on the same for purposes of construction or improvement, under the following conditions:

1. Any owner of land or his lessee intending to make or to permit an excavation shall give reasonable notice to the owner or owners of adjoining lands and of buildings or other structures, stating the depth to which such excavation is intended to be made, and when the excavating will begin.

2. In making any excavation, ordinary care and skill shall be used, and reasonable precautions taken to sustain the adjoining land as such, without

regard to any building or other structure which may be thereon, and there shall be no liability for damage done to any such building or other structure by reason of the excavation, except as otherwise provided or allowed by law.

3. If at any time it appears that the excavation is to be of a greater depth than are the walls or foundations of any adjoining building or other structure, and is to be so close as to endanger the building or other structure in any way, then the owner of the building or other structure must be allowed at least 30 days, if he so desires, in which to take measures to protect the same from any damage, or in which to extend the foundations thereof, and he must be given for the same purposes reasonable license to enter on the land on which the excavation is to be or is being made.

4. If the excavation is intended to be or is deeper than the standard depth of foundations, which depth is defined to be a depth of nine feet below the adjacent curb level, at the point where the joint property line intersects the curb and if on the land of the coterminous owner there is any building or other structure the wall or foundation of which goes to standard depth or deeper then the owner of the land on which the excavation is being made shall, if given the necessary license to enter on the adjoining land, protect the said adjoining land and any such building or other structure thereon without cost to the owner thereof, from any damage by reason of the excavation, and shall be liable to the owner of such property for any such damage, excepting only for minor settlement cracks in buildings or other structures.

Caltrans has identified building damage significance guidance that provides thresholds for different categories of structures, including historic buildings that may not be considered extremely fragile (Table 2).

**Table 2
Caltrans Vibration Damage Potential Threshold Criteria**

Structure and Condition	Significance Thresholds (in/sec PPV)	
	Transient Sources	Continuous/ Frequent/ Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.2	0.1
Historic and some old buildings	0.5	0.25
Older residential structures	0.5	0.3
New residential structures	1.0	0.5
Modern industrial/commercial buildings	2.0	0.5
Source: California Department of Transportation, 2013.		

County of Los Angeles. The Los Angeles County Municipal Code does not include criteria for assessing vibration impacts; therefore, for the purpose of determining the significance of

vibration impacts experienced at buildings and structures near the project, the FTA's guidelines are used to determine vibration impacts.

Methodology

Construction Vibration. Ground-borne vibration impacts during construction activities were evaluated for both on-site and off-site construction activities by identifying potential vibration sources (e.g., construction equipment), estimating the vibration levels at off-site structures, and comparing the proposed impacts against applicable vibration significance thresholds.

Operational Vibration. As with many non-industrial projects, the Proposed Project does not include land uses that would generate high levels of ground-borne vibration. Instead, any vibration related to operation of the Proposed Project would involve vehicle activity traveling to and from the Project Site. However, vibration from vehicle activities using rubber-tired wheels is unlikely to be perceptible by people. Rubber-tired vehicles traveling at a distance of 50 feet typically generate groundborne vibration of approximately 63.5 VdB.³ The typical threshold of perception for groundborne vibration is approximately 65 VdB.⁴ As such, operational impacts on ground-borne vibration are not analyzed further.

Threshold of Significance

Groundborne Vibration Thresholds. There are no adopted County standards or other applicable regulations that would govern the Project's vibration impacts. In assessing impacts related to noise and vibration in this section, the County uses Appendix G as the thresholds of significance. The FTA's criteria in its 2018 Transit Noise and Vibration Impact Assessment manual will be used where applicable and relevant to assist in analyzing the Appendix G thresholds. In addition, Caltrans' thresholds for historic buildings will be used when structures are not Category IV structures considered extremely susceptible to vibration damage.

Existing Conditions

Existing Ambient Vibration Levels

The Project Site is improved with a 25,302 square-foot church with a surface parking lot. Intermittent vibration from solid waste management and collection activities are of short duration and use Gage or Eastman Avenue. These activities occur intermittently for the residences nearby as well. Occasional loading activities generate negligible vibration from trucks that load and unload goods. None of these activities involve use of equipment or heavy-duty vehicles that generate substantive groundborne vibration.

³ Federal Transportation Administration, Transit Noise and Vibration Impact Assessment Manual; Generalized Ground Surface Vibration Equations (Table 6-10); September 2018.

⁴ Ibid.

The primary source of groundborne vibration near the Project Site is vehicle travel, including the 192 daily vehicle trips traveling to and from the Project Site.⁵ The blend of passenger vehicles, trucks, delivery trucks, and other vehicles generate minimal levels of vibration. As noted by federal guidance, “[i]t is unusual for vibration from sources such as buses and trucks to be perceptible...”⁶ As such, vehicle movement generates imperceptible ground vibration, with the occasional exception of heavy-duty vehicles that travel over speed bumps, potholes, and other street irregularities.

There are several residences adjacent to the Project Site that could be exposed to groundborne vibration during construction and operation of the proposed development that include:

- Residences, 1075 Gage Avenue; five feet south of the Project Site.
- Residences, 1049 Gage Avenue; five feet north and east of the Project Site.
- Residences, Eastman Avenue (east side); five feet north and south of the Project Site.

Analysis of Project Impacts

a. Generation of excessive groundborne vibration or groundborne noise levels?

Less Than Significant Impact.

Construction

Building Damage Vibration Impact – On-Site Sources

Construction equipment can produce groundborne vibration based on equipment and methods employed. While this spreads through the ground and diminishes in strength with distance, buildings on nearby soil can be affected. This ranges from no perceptible effects at the lowest levels, low rumbling sounds and perceptible vibration at moderate levels, and slight damage at the highest levels. Table 3 summarizes vibratory levels for common construction equipment.

**Table 3
Vibration Source Levels for Construction Equipment**

Equipment	Approximate PPV at 25 feet (in/sec)
Pile Driver (impact)	0.644
Pile Drive (sonic)	0.170
Clam shovel drop (slurry wall)	0.202
Hydromill (slurry wall)	0.008
Vibratory Roller	0.210
Hoe Ram	0.089
Large Bulldozer	0.089

⁵ Linscott, Law & Greenspan, Project Trip Generation, Extera Public School; September 2022.

⁶ Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual, September 2018.

Caisson Drilling	0.089
Loaded Truck	0.076
Jackhammer	0.035
Small Bulldozer	0.003
Source: Federal Transit Administration, Transit Noise and Vibration Impact Assessment Manual, 2018.	

Groundborne vibration would be generated by a number of construction activities at the Project site. As a result of equipment that could include on-site bulldozer operations or the vibrational equivalent, vibration velocities of up to 0.148 inches per second PPV are projected to occur at any of the residences nearest the Project Site. This impact is below the 0.20 inches per second PPV threshold from FTA that is considered potentially harmful to non-engineered timber and masonry buildings. More distant receptors would experience even lower levels of groundborne vibration. Other potential construction activities would produce less vibration and have lesser potential impacts on nearby sensitive receptors. As a result, construction-related structural vibration impacts would be considered less than significant.

**Table 4
Building Damage Vibration Levels – On-Site Sources**

Off-Site Receptor Location	Distance to Project Site (feet) ^a	Vibration Velocity Levels at Off-Site Sensitive Receptors from Construction Equipment (in/sec PPV)					Significance Criterion (PPV)	Potentially Significant Impact?
		Large Bulldozer	Caisson Drilling	Loaded Trucks	Jack-hammer	Small Bulldozer		
FTA Reference Vibration Level (25 Feet)	N/A	0.089	0.089	0.076	0.035	0.003	--	--
1075 Gage Ave.	15	0.148	0.148	0.127	0.058	0.005	0.20 ^b	No
1049 Gage Ave.	15	0.148	0.148	0.127	0.058	0.005	0.20 ^b	No
Eastman Ave residences	15	0.148	0.148	0.127	0.058	0.005	0.20 ^b	No
^a Includes ten-foot buffer for equipment maneuverability ^b FTA criterion for Category III (non-engineered timber and masonry buildings) Source: DKA Planning, 2022.								

Building Damage Vibration Impact – Off-Site Sources

Construction of the Project would generate trips from large trucks including haul trucks, concrete mixing trucks, concrete pumping trucks, and vendor delivery trucks. Regarding building damage, based on FTA data, the vibration generated by a typical heavy-duty truck would be approximately 63 VdB (0.006 PPV) at a distance of 50 feet from the truck.⁷ According to the FTA “[i]t is unusual for vibration from sources such as buses and trucks to be perceptible,

⁷ Federal Transit Administration, “Transit Noise and Vibration Impact Assessment,” May 2006, Figure 7-3.

even in locations close to major roads.” Nonetheless, there are buildings along the Project’s haul route on Whittier Boulevard that are situated away from the right-of-way and would be exposed to groundborne vibration levels of approximately 0.006 PPV. This estimated vibration generated by construction trucks traveling along the anticipated haul route(s) would be well below the most stringent building damage criteria of 0.12 PPV for buildings extremely susceptible to vibration. The Project’s potential to damage roadside buildings and structures as the result of groundborne vibration generated by its truck trips would therefore be considered less than significant.

Operation

During operation of the elementary and middle schools, there would be no significant stationary sources of groundborne vibration, such as heavy equipment or industrial operations. Operational groundborne vibration in the Project Site’s vicinity would be generated by its related vehicle travel on local roadways. However as previously discussed, road vehicles rarely create vibration levels perceptible to humans unless road surfaces are poorly maintained and have potholes or bumps. As a result, the Project’s long-term vibration impacts would be less than significant.

Cumulative Impacts

Construction

On-Site Construction Vibration

During construction of the Project, vibration impacts are generally limited to buildings and structures located near the construction site (i.e., within 15 feet as related to building damage). As noted earlier, the Project’s potential to damage nearby buildings is less than significant. However, nearby structures could be subject to cumulative vibration impacts if concurrent construction and vibration activities were to occur within close proximity. Any such projects would need to limit or avoid use of pile drivers or other impacting equipment for any shoring of structures.

There are no identified or reasonably foreseeable related projects that could generate cumulative vibration impacts when the Proposed Project begins construction in 2023. As such, there is no potential for a cumulative construction vibration impact that subjects nearby buildings to vibration levels that exceed the FTA’s vibration damage criteria.

Off-Site Construction Vibration

While haul trucks from any related projects and other concurrent construction projects could generate additional vibration along haul routes, the potential to damage buildings is extremely low. The FTA finds that “[i]t is unusual for vibration from sources such as buses and trucks to be perceptible, even in locations close to major roads.” The vibration generated by a typical heavy truck would be approximately 0.00566 in/sec PPV at a distance of 50 feet.

As discussed above, there are buildings near the right- of-way of the anticipated haul route for the Project (i.e., Whittier Boulevard). These buildings would be exposed to groundborne vibration levels that are far less than the levels identified by FTA as potential thresholds for building damage. Trucks from any related projects are expected to generate similar groundborne vibration levels. Therefore, the vibration levels generated from off-site construction trucks associated with the Project and other related projects along the anticipated haul route(s) would be below the most stringent building damage threshold of 0.12 PPV for buildings extremely susceptible to vibration. Therefore, potential cumulative vibration impacts with respect to building damage from off-site construction would be less than significant.

Summary of Cumulative Construction Vibration Impacts

Due to the rapid attenuation characteristics of groundborne vibration and the proximity of major development proposed in this part of the Whittier Boulevard corridor, there is no potential for a cumulative construction vibration impact with respect to building damage associated with groundborne vibration from on-site sources. In addition, potential cumulative vibration impacts with respect to building damage from off-site construction would be less than significant. Therefore, on-site and off-site construction activities associated with the Project and one or more potential related projects would not generate excessive groundborne vibration levels with respect to building damage.

Operation

The Project Site and surrounding Whittier Boulevard corridor have been developed with commercial, residential, medical, and other uses that will continue to generate minimal groundborne vibration. Similar to the Project, any related projects in the vicinity of the Project Site could generate vibration from ongoing day-to-day operations. However, given the commercial and residential zoning along Whittier Boulevard and adjacent residential neighborhoods, any related projects would not be typically associated with excessive groundborne vibration from on-site sources. However, each project would produce traffic volumes that are capable of generating roadway vibration impacts. The potential cumulative noise impacts associated with on-site and off-site vibration sources are addressed below.

On-Site Operation Vibration

During operation of the Project, vibration impacts are generally limited to buildings and structures located near the construction site (i.e., within 15 feet as related to building damage). In general, related projects in this corridor would be commercial retail, medical, or residential land uses that do not operate impact equipment and operations and would not generate substantial vibration. As a result, operation of new cumulative development in the area would have no potential to exceed FTA vibration damage standards at off-site receptors.

Off-Site Operation Vibration

Like the Project, any concurrent development near the Project Site would contribute normal passenger vehicle traffic that would generate negligible changes to roadway vibration. Use of

larger heavy-duty trucks for delivery of goods and materials would be intermittent and not result in significant, cumulative increases in groundborne vibration on Whittier Boulevard and other local roadways. Therefore, potential cumulative vibration impacts with respect to building damage from off-site operations would be less than significant.

Summary of Operational Construction Vibration Impacts

Due to the rapid attenuation characteristics of groundborne vibration and the proximity of major development proposed in this part of the Whittier Boulevard corridor, there is no potential for a cumulative operations vibration impact with respect to building damage associated with groundborne vibration from on-site sources. In addition, potential cumulative vibration impacts with respect to building damage from off-site construction would be less than significant. Therefore, on-site and off-site operations activities associated with the Project and one or more potential related projects would not generate excessive groundborne vibration levels with respect to building damage.

Re: Extera Public Schools Project

Dear Ms. Cruz,

In response to your request for information, please find a *LAUSD Schools Enrollments and Capacities Report* for the schools and programs serving the Extera Public Schools Project located at 1059 South Gage Avenue, Los Angeles, CA 90023. The project consists of a transitional kindergarten (TK) to 8th grade charter school serving 525 students, which will include 22 classrooms, offices, outdoor eating areas and play areas, and a multi-purpose room. At this time reporting is based on individual project address, without reporting on the combined impacts of other project addresses served by the same schools. This report contains the most recent data available on operating capacities and enrollments, and is designed to address any questions pertaining to overcrowding and factors related to school capacity. All schools operate on single track calendar.

Please note that no new school construction is planned and the data in this report *already take into account*: portable classrooms on site, additions being built onto existing schools, student permits and transfers, programs serving choice areas, and any other operational activities or educational programming affecting the operating capacities and enrollments among LAUSD schools.

Additional information about LAUSD's Capital improvement programs can be found on the Facilities Services Division main [webpage](#). Listings of residential schools and other programs serving the project can be found using [LAUSD's Residential School Finder](#).

Student generation rates can be found in the [Developer Fee Justification Study](#).

MASTER PLANNING AND DEMOGRAPHICS RESPONSE TO SPECIFIC QUESTIONS

Questions: 1 & 2 The project is located in a HS attendance choice/option area. Please see LAUSD Schools Enrollments and Capacities Report details;

Question: 3 Please contact the LAUSD Developer Fee Program Office (DFPO) at (213) 241-6266 if more information regarding fees and student generation rates is needed.

NOTES:

- ¹ School's ID code.
- ² School's name
- ³ School's operating capacity. The maximum number of students the school can serve with the school's classroom utilization. Excludes capacity allocated to charter co-locations. Includes capacity for dual language and magnet programs.
- ⁴ The total number of students living in the school's attendance area and who are eligible to be served by school programs as of the start of the school year. Includes resident students enrolled at any dual language or on-site magnet centers.
- ⁵ The number of all students actually attending all programs at the school at the start of the reported school year. Includes all dual language and magnet students.
- ⁶ Reported school year seating overage or (shortage): equal to (capacity) - (resident enrollment).
- ⁷ Reported school year overcrowding status of school. The school is overcrowded if any of these conditions exist:
 - There is a seating shortage.
 - There is a seating overage of LESS THAN or EQUAL TO a margin of 20 seats.
- ⁸ Projected 5-year total number of students living in the school's attendance area and who are eligible to be served by school programs as of the start of the school year. Includes resident students enrolled at any dual language or on-site magnet centers.
- ⁹ Projected seating overage or (shortage): equal to (capacity) - (projected enrollment).
- ¹⁰ Projected overcrowding status of school. The school will be considered overcrowded in the future if any of these conditions exist:
 - There is a seating shortage in the future.
 - There is a seating overage of LESS THAN or EQUAL TO a margin of 20 seats in the future.
- ^o Magnet Schools with Resident Kindergarten Enrollment: Resident enrollment is reported for Kindergarten only. Actual enrollment is reported for all grades in school. Projected data not reported.
- * Enrollment is by application only.

Dear Sherrie Cruz,

Please find below our responses to your questions:

1. The proposed project is located in the Unincorporated East Los Angeles - Northwest study area established as part of the 2016 Los Angeles Countywide Comprehensive Parks and Recreation Needs Assessment. The following table lists the parks in the study area:

Park Name	Address	Size (acres)	Classification	Park Features	Approximate Distance to Project (miles)
Ruben F Salazar Park	3864 Whittier Boulevard, Los Angeles, CA 90023	5.82	Neighborhood	The park includes a gymnasium, swimming pool, multi-purpose buildings, a senior center, children's play areas, sports courts, picnic areas, restrooms, multipurpose sports fields, walking paths, fitness zones, and two parking lots.	0.28
Belvedere Community Regional Park	4914 East Cesar Chavez Avenue Los Angeles, CA 90022	37.07	Community Regional	The park includes multipurpose sports fields, several community and recreation buildings, a skatepark, a swimming pool, children's play areas, sports courts, picnic areas, restrooms, walking paths, fitness zones, a splash pad, and three parking lots.	2.32
Eugene A. Obregon Park	4021 E. First St. Los Angeles, CA 90063	9.84	Neighborhood	The park includes a gymnasium, swimming pool, a community center, children's play areas, a sports court, picnic areas, restrooms, multipurpose sports fields, walking paths, fitness zones, and two parking lots.	1.4
City Terrace Park	1126 North Hazard Avenue East Los Angeles, CA 90063	15.45	Community	The park includes a gymnasium, swimming pool, a community center, children's play areas, sports courts, picnic areas, restrooms, a splash pad, multipurpose sports fields,	2..36

				walking paths, and one parking lot.	
Parque de los Suenos	1333 South Bonnie Beach Place Los Angeles, CA 90032	1.61	Pocket	The park includes sports courts, children's play areas, walking paths, picnic areas, restrooms and two parking lots	0.5

2. Ruben F Salazar Park Parkwide Modernization Project: The project will improve Salazar Park in the unincorporated community of East Los Angeles by building a new cultural and arts plaza with performance stage and multi-purpose event space, a splash pad with seating and shade, fitness zones with exercise stations, shade structures for events and gatherings, public art of historical significance, solar lighting, native drought-tolerant landscaping throughout the park and improving walking and jogging paths.
3. The Unincorporated East Los Angeles - Northwest study area has been determined to have a park need level of Very High. The study area has approximately 1 acre of parkland per 1,000 residents, which is much lower than the countywide average of 3.3 acres of parkland per 1,000 residents and the General Plan goal of 4 acres of local parkland per 1,000 residents. In total, there are 69.8 acres of parkland located throughout the community. About 45% of Unincorporated East Los Angeles - Northwest residents can walk to a park within walking distance (half-mile) of a park compared to the countywide average of 49%.

Please refer to the study area report for more details: https://lacountyparkneeds.org/wp-content/root/FinalReportAppendixA/StudyArea_070.pdf

REQUEST FOR LIBRARY SERVICES INFORMATION FOR THE EXTERA PUBLIC SCHOOLS PROJECT

Dear Ms. Cruz:

This is in response to your request for library services information regarding the Extera Public Schools Project which proposes the development of a charter school with 22 classrooms, offices, outdoor eating areas and play areas, and a multi-purpose room. Attached is a report of LA County Library's analysis of the development and the projected impact to services.

If you have any questions or need additional information, please contact Elsa Muñoz at (562) 940-8450 or EMunoz@library.lacounty.gov.

Very best,

J. Pina for
Skye Patrick
County Librarian

**LA COUNTY LIBRARY
EXTERA PUBLIC SCHOOLS PROJECT**

1. Which libraries would serve the proposed project? Please provide:

- a. **Name and address**
- b. **Size (Square feet)**
- c. **Number of volumes and circulation**
- d. **Staffing levels**
- e. **Current service population and future service population**
- f. **Whether there are planned improvements to add capacity through expansion**

The project area is served by the El Camino Real Library, located at 4264 E. Whittier Boulevard, Los Angeles, CA, 90023, which is 0.6 miles from the project site.

El Camino Real Library has a facility size of 5,529 square feet, a collection of 26,644 books and other library materials, and 11 public access computers (as of June 30, 2023). El Camino Real Library staffing includes 2 full-time staff, and 5 part-time staff. There are no volunteers that regularly assist in the running of the library.

The library serves the residents of unincorporated East Los Angeles area of the County of Los Angeles (County), a population of 22,979. Project implementation will not increase service population since it is not a residential project, and therefore will not create the need for added capacity or expansion of library facilities.

2. What are the current desired standards of services (i.e., facility size, number of volumes, etc.) for population?

LA County Library service level guidelines entail a minimum of 0.50 gross square foot of library facility space per capita, 3.0 items (books and other library materials) per capita for regional libraries and 2.75 items per capita for community libraries, and 1.0 public access computer per 1,000 people served.

El Camino Real Library is a community library and based on these guidelines does not currently meet the minimum requirements for the population of this service area. The current deficiency is 5,961 sq. ft. of facility space, 36,549 collection items, and 12 public access computers.

3. Are there plans to build any new libraries that would serve the project area?

Currently, LA County Library does not have plans for improvements or new construction of library facilities in the El Camino Real Library service area.

MEMORANDUM

To: Los Angeles County Public Works Date: January 3, 2024

From: David S. Shender, P.E. LLG Ref: 1-22-4500-1

Irvine
San Diego

This memorandum has been prepared by Linscott, Law & Greenspan, Engineers (“LLG”) to demonstrate that the proposed Extera Public School project (“Project”) located at 1059 S. Gage Avenue within the East Los Angeles Community Plan Area and Community Standards District of unincorporated Los Angeles County (“Project Site”) screens out from a Transportation Impact Analysis (“TIA”) per Section 3.1.2.3 of the *Los Angeles County Public Works Transportation Impact Analysis Guidelines*¹ (“TIA Guidelines”). The Project proposes the development and construction of a new permanent public charter school facility accommodating a maximum enrollment of 525 students. Specifically, the Project proposes to serve 336 students in Transitional Kindergarten (“TK”) through 5th grades and 189 students in the 6th through 8th grades. The Project Site location and general vicinity are shown in **Figure 1**. The site plan for the Project is illustrated in **Figure 2**.

Briefly, the Project will result in a less than significant transportation impact based on the TIA Guidelines. The Project is located within one-half mile of an existing stop along a High-Quality Transit Corridor (“HQTC”) and is located within a High-Quality Transit Area (“HQTA”) per *Connect SoCal*², the Regional Transportation Plan/Sustainable Communities Strategy (“RTP/SCS”) of the Southern California Association of Governments (“SCAG”). This memorandum provides additional details to demonstrate that the Project screens out from a TIA.

Existing Setting

As noted above, the Project Site is located at 1059 S. Gage Avenue (Assessor Parcel Nos. 5239-012-009 and 5239-012-028) within the East Los Angeles Community Plan Area and Community Standards District of unincorporated Los Angeles County. The Project Site is located within the County’s First Supervisorial District. The Project Site is occupied by the Oasis of Mercy Catholic Church (“Church”) and is improved with two buildings and a surface parking lot. Specifically, the Project Site is improved with a two-story building providing 18,309 square feet of floor area

¹ *Los Angeles County Public Works Transportation Impact Analysis Guidelines*, Los Angeles County Public Works, July 2020.

² *Connect SoCal – The 2020-2045 Regional Transportation Plan/Sustainable Communities Strategy of the Southern California Association of Governments*, Southern California Association of Governments, September 3, 2020.

(“Building 1”) and a one-story building providing 6,993 square feet of floor area (“Building 2”). The Project Site is generally bound by single-family residences to the north and south, Eastman Avenue to the west, and Gage Avenue to the east.

Project Description

The Project proposes to (i) renovate Building 2, including the removal of an existing 509 square-foot covered courtyard, and add a new 2,265 square-foot outdoor lunch patio and (ii) demolish and construct a new Building 1 in a different location on the Project Site. The new two-story Building 1 will provide 29,676 square feet of floor area (inclusive of a new 6,500 square-foot concrete deck covering the onsite parking spaces). The renovated Building 2 will provide a total of 8,749 square feet in floor area. In total, the Project will provide 38,425 square feet of total building floor area.

The Project consists of a new permanent public charter school facility serving a maximum enrollment of 525 students. Specifically, the Project proposes to serve 336 students in TK through 5th grades and 189 students in the 6th through 8th grades. The Project will include 22 classrooms, offices, outdoor eating and play areas, and a multi-purpose room. The Project proposes to provide 38 parking spaces within an onsite surface parking lot. Construction and occupancy of the Project is proposed to be completed by August 2025. As shown on *Figure 2*, vehicular access to the Project Site will be provided via one inbound-only driveway along the west side of Gage Avenue and one outbound-only driveway along the east side of Eastman Avenue.

Project Trip Generation

In conjunction with the County’s TIA Guidelines, a vehicular trip generation forecast has been prepared using trip rates provided in the Institute of Transportation Engineers’ (“ITE”) *Trip Generation Manual*.³ The following trip generation rates were used to forecast the traffic volumes expected to be generated by the Project land use components:

- Charter Elementary School: ITE Land Use Code 536 (Charter Elementary School) trip generation average rates were used to forecast the traffic volumes expected to be generated by the charter elementary school component of the Project during the weekday AM and PM peak hours of generator, as well as on a daily basis.

³ Institute of Transportation Engineers, *Trip Generation Manual*, 11th Edition, Washington, D.C., 2021.

- Charter Middle School: ITE Land Use Code 522 (Middle School/Junior High School) trip generation average rates were used to forecast the traffic volumes expected to be generated by the charter middle school component of the Project on a typical weekday.
- Charter Middle School: ITE Land Use Code 538 (Charter School K-12) trip generation average rates were used to forecast the traffic volumes expected to be generated by the charter middle school component of the Project during the weekday AM and PM peak hours of generator.

In addition to the trip generation forecasts for the proposed Project (which are essentially an estimate of the number of vehicles that could be expected to enter and exit the Project Site access points), an adjustment was made to the trip generation forecast based on the Project Site's existing land use. The existing land use to be removed is 25,302 square feet of church floor area, which is currently operational. ITE Land Use Code 560 (Church) trip generation average rates were used to estimate the trip reduction related to the existing use from the Project Site.

While it is anticipated that some students and employees will utilize public transportation for travel to and from the Project Site, a transit adjustment was not made to provide a conservative forecast of the Project's trip generation.

Table 1 attached to this memorandum provides the trip generation forecast for the Project. As shown in *Table 1*, the Project on a typical weekday is forecast to result in 827 net new daily trips (e.g., 414 inbound trips, 413 outbound trips), 530 net new AM peak hour trips (280 inbound trips and 250 outbound trips), and 368 net new PM peak hour trips (183 inbound trips and 185 outbound trips).

Vehicle Miles Traveled Analysis

The State of California Governor's Office of Planning and Research ("OPR") issued proposed updates to the CEQA Guidelines in November 2017 and an accompanying technical advisory guidance in April 2018 ("OPR *Technical Advisory*") that amends the Appendix G question for transportation impacts to delete reference to vehicle delay and level of service and instead refer to Section 15064.3, subdivision (b)(1) of the CEQA Guidelines asking if the project will result in a substantial increase in vehicle miles traveled ("VMT"). Section 15064.3, subdivision (b)(1) states the following:

- Development Projects. Vehicle miles traveled exceeding an applicable threshold of significance may indicate a significant impact. Generally, projects within one-half mile of either an existing major transit stop or a stop

along an existing high-quality transit corridor should be presumed to cause a less than significant transportation impact. Projects that decrease vehicle miles traveled in the project area compared to existing conditions should be considered to have a less than significant transportation impact.

The California Natural Resources Agency certified and adopted the CEQA Guidelines in December 2018, which are now in effect. Accordingly, Los Angeles County Public Works (“LACPW”) has adopted significance criteria for transportation impacts based on VMT for land use projects and plans in accordance with the amended Appendix G question:

- For a development project, would the project conflict or be inconsistent with CEQA Guidelines section 15064.3, subdivision (b)(1)?

For development projects, the intent of this question is to assess whether a proposed project or plan adequately reduces total VMT. LACPW provides the following guidance regarding screening and impact criteria to address this question. The following screening criteria and impact criteria are only meant to serve as guidance for projects to determine whether a TIA should be performed, and the criteria to determine if a project generates a significant transportation impact. The criteria shall be determined on a project-by-project basis as approved by LACPW.

Proximity to Transit Based Screening Criteria

Per Section 3.1.2.3 of the TIA Guidelines, if a project is located near a Major Transit Stop or HQTC, the following question should be answered:

- Is the project located within a one-half mile radius of a Major Transit Stop or an existing stop along a HQTC?

Per the California Public Resources Code Section 21155(b), a HQTC is defined as a corridor with fixed route bus service with service intervals no longer than 15 minutes during peak commute hours. The Project is located within 1,000 feet of eastbound and westbound transit stops along the Whittier Boulevard corridor. The Whittier Boulevard corridor is served by Metro Local Line 18 (“Metro 18”). Metro 18 provides eastbound and westbound service from the Wilshire & Western transit stop in the Koreatown area of the City of Los Angeles to the Montebello Metrolink Station in the City of Montebello. A radius map depicting the locations of the Project Site and Firestone Station is shown in *Figure 3*. A route map and schedule for Metro 18 is provided in *Appendix A*.

Page 83 of the *Connect SoCal* Transit Technical Appendix⁴ describes the relevant methodology for determining peak period bus service intervals (also called frequency). SCAG utilized the peak commute periods defined within the SCAG regional travel demand model (i.e., the weekday morning peak period is from 6:00 AM to 9:00 AM, and the afternoon peak period is from 3:00 PM to 7:00 PM). The peak frequency is calculated by dividing 420 minutes (i.e., the total seven-hour peak commute period converted to minutes) by the total population of bus trips occurring during the combined peak periods. Bus lines must have an average service frequency of 15 minutes or less over the seven-hour period to meet the HQTC criteria.

To identify the number of bus trips occurring during the peak commute hours, the total number of trips from the line's point of origin is looked at, and a trip is included if its median time falls within the AM or PM peak period. To calculate the median time, the time at the trip origin is subtracted from the arrival time at the final station, divided by two, and then added to the origin time. For example, for a westbound Metro 18 trip departing the Montebello Metrolink Station at 6:16 PM and arriving at Wilshire & Western at 7:38 PM, the total trip time is 82 minutes, therefore the median time would be 6:57 PM. This sample trip would therefore be included as occurring within the PM peak period.

An analysis for Metro 18 has been provided based on the current schedule provided on Metro's website. The peak hour headways and service frequency (in minutes), are summarized in **Table 2**, attached to this memorandum. A route map and schedule for Metro Local Line 18 is provided in *Appendix A*. Eligible trips are boxed in red on the schedules provided in *Appendix A*. As shown in *Table 2*, the average service frequency during the peak periods is 6.7 minutes for the eastbound direction and 6.8 minutes for the westbound direction. The average service frequency calculations are as follows:

- Eastbound Direction: $420 \text{ minutes (i.e., the total seven-hour peak commute period converted to minutes)} / 25 \text{ AM Peak Hour Trips} + 38 \text{ PM Peak Hour Trips} = 6.7\text{-minute average service frequency.}$
- Westbound Direction: $420 \text{ minutes} / 28 \text{ AM Peak Hour Trips} + 34 \text{ PM Peak Hour Trips} = 6.8\text{-minute average service frequency.}$

Therefore, Metro 18's current service frequency meets the SCAG threshold of 15 minutes or less in each direction. As a result, Whittier Boulevard currently qualifies as a HQTC.

⁴ https://scag.ca.gov/sites/main/files/file-attachments/0903fconnectsocial_transit.pdf?1606002122

It is noted that while the Wilshire & Western transit stop and the Montebello Metrolink Station are the start and end points for Metro 18, not all trips start or end at these stations. However, all Metro 18 trips serve the eastbound and westbound stops within the half-mile radius of the Project Site, and therefore, the peak hour headways and average service frequencies shown in *Table 2* are applicable.

According to the TIA Guidelines, if the answer to the question on Page 4 is yes, then the following subsequent questions should be considered. If the answer to all four questions is no, further analysis is not required, a less than significant determination can be made, and a TIA does not have to be prepared.

- Does the project have a Floor Area Ratio less than 0.75?

The Project’s overall lot area is 50,994 square feet. The Project’s building floor area was calculated per Section 22.04.050(E) of the Los Angeles County Code of Ordinances (“County Code”). Per Section 22.04.050(E) of the County Code, the first floor of the new Building 1 will provide 17,876 square feet of floor area and the second floor will provide 11,800 square feet of floor area. Building 2 will provide 8,749 square feet of floor area. The overall gross floor area of the building is 38,425 square feet, which results in a Floor Area Ratio (“FAR”) of 0.754.

- Does the project provide more parking than required by the County Code?

Per Table 22.112.070-A of the County Code, the parking requirements for the Project are shown in *Table 3* below.

Table 3 Los Angeles County Code of Ordinances Required Parking Spaces Calculation				
Use	Units	Quantity	Parking Rate	Required Spaces
School	Classrooms	22	1 space per classroom	22
Largest Assembly Space	Occupants	160	1 space per 5 occupants	32
Subtotal Required Parking Spaces				54
TOTAL PARKING SPACES PROVIDED				38

As summarized in *Table 3* above, the Project will provide a total of 38 parking spaces.

Per Table 22.112.100-A of the County Code, the bicycle parking requirements for the Project are shown in **Table 4** below.

Table 4 Los Angeles County Code of Ordinances Required Bicycle Parking Calculation				
Type	Units	Quantity	Parking Rate	Required Spaces
Short-Term	Classrooms	22	4 spaces per classroom	88
Long-Term	Classrooms	22	1 space per 10 classrooms	2

Additionally, as summarized in *Table 4* above, the Project is required to provide 88 short-term bicycle parking spaces and two long-term bicycle parking spaces. The Project will provide bicycle parking onsite in accordance with Table 22.112.100-A of the County Code.

- Is the project inconsistent with the SCAG RTP/SCS?

The 2020-2045 SCAG RTP/SCS entitled *Connect SoCal*, was adopted by SCAG in September 2020. “*Connect SoCal* is a long-range visioning plan that builds upon and expands land use and transportation strategies established over several planning cycles to increase mobility options and achieve a more sustainable growth pattern. It charts a path toward a more mobile, sustainable and prosperous region by making connections between transportation networks, between planning strategies and between the people whose collaboration can improve the quality of life for Southern Californians.”

The Project is consistent with the SCAG RTP/SCS. *Connect SoCal* prioritizes growth near destinations and mobility options that facilitate multimodal access to work, educational and other destinations. Additionally, *Connect SoCal* encourages infill development, and development in Priority Growth Areas, such as HQTAs. As the Project is an infill development located within one-half mile of transit stops along a HQTC, it will facilitate multimodal transportation. Additionally, the Project will provide bicycle parking facilities onsite, and is located within an area with excellent pedestrian infrastructure. Therefore, the Project is consistent with SCAG’s greenhouse gas reduction goals, and the overall goals of *Connect SoCal*. Chapter 3 of *Connect SoCal* provides the goals and visions of the plan. Relevant references from *Connect SoCal* are attached in **Appendix B**.

Conclusions

This memorandum has been prepared to demonstrate that the proposed Extera Public School project located at 1059 S. Gage Avenue within the East Los Angeles Community Plan Area and Community Standards District of unincorporated Los Angeles County screens out from a TIA per Section 3.1.2.3 of the County's TIA Guidelines. The conclusions are as follows:

- The Project consists of a new permanent public charter school facility serving a maximum enrollment of 525 students. Specifically, the Project proposes to serve 336 students in TK through 5th grades and 189 students in the 6th through 8th grades. The Project will include 22 classrooms, offices, outdoor eating and play areas, and a multi-purpose room. The Project proposes to provide 38 parking spaces within an onsite surface parking lot. Construction and occupancy of the Project is proposed to be completed by August 2025.
- The Project is forecast to generate 827 net new daily trips, 530 net new AM peak hour trips, and 368 net new PM peak hour trips during a typical weekday.
- The County's TIA Guidelines provide screening criteria for purposes of assessing whether a VMT analysis is required to evaluate potential transportation impacts related to development projects. The Project is located within 1,000 feet of eastbound and westbound transit stops along the Whittier Boulevard corridor, which are served by Metro 18, a local transit line providing service between the Koreatown area of the City of Los Angeles and the City of Montebello. Based on the Project's proximity to public transit and satisfying the related screening criteria provided in the County's TIA Guidelines, it is determined that the Project is presumed to have a less than significant transportation impact. No further analysis is required.

[2] Trips are one-way traffic movements, entering or leaving.

[3] ITE Land Use Code 536 (Charter Elementary School) trip generation average rates per number of students.
- Daily Trip Rate: 1.85 trips/student; 50% inbound and 50% outbound

[4] ITE Land Use Code 536 (Charter Elementary School) trip generation average rates per number of students.
- Weekday, AM Peak Hour of Generator Trip Rate: 1.07 trips/student; 53% inbound/47% outbound

[5] ITE Land Use Code 536 (Charter Elementary School) trip generation average rates per number of students.
- Weekday, PM Peak Hour of Generator Trip Rate: 0.72 trips/student; 49% inbound/51% outbound

[6] ITE Land Use Code 522 (Middle School/Junior High School) trip generation average rates per number of students.
- Daily Trip Rate: 2.10 trips/student; 50% inbound and 50% outbound

[7] ITE Land Use Code 538 (Charter School K-12) trip generation average rates per number of students.
- Weekday, AM Peak Hour of Generator Trip Rate: 0.94 trips/student; 53% inbound/47% outbound

[8] ITE Land Use Code 538 (Charter School K-12) trip generation average rates per number of students.
- Weekday, PM Peak Hour of Generator Trip Rate: 0.73 trips/student; 50% inbound/50% outbound

[9] ITE Land Use Code 560 (Church) trip generation average rates per 1,000 SF of floor area.
- Daily Trip Rate: 7.60 trips/1,000 SF of floor area; 50% inbound/50% outbound

- Weekday, Peak Hour of Adjacent Street Traffic, One Hour Between 7:00 and 9:00 AM: 0.32 trips/1,000 SF of floor area; 62% inbound/38% outbound
- Weekday, Peak Hour of Adjacent Street Traffic, One Hour Between 4:00 and 6:00 PM: 0.49 trips/1,000 SF of floor area; 44% inbound/56% outbound

CHAPTER 3

A PATH TO GREATER ACCESS, MOBILITY & SUSTAINABILITY

CORE VISION

Rooted in the 2008 and 2012 RTP/SCS plans, Connect SoCal's "Core Vision" centers on maintaining and better managing the transportation network we have for moving people and goods, while expanding mobility choices by locating housing, jobs and transit closer together and increasing investment in transit and complete streets. Examples of SCAG's Core Vision are embedded throughout this chapter in blue highlight boxes, and include progress made since the 2016 RTP/SCS. These highlights are presented alongside the narrative, which provides a more comprehensive overview of strategies planned to advance the region's core vision for mobility and sustainability. The Core Vision includes:

SUSTAINABLE DEVELOPMENT

SYSTEM PRESERVATION & RESILIENCE

DEMAND & SYSTEM MANAGEMENT

TRANSIT BACKBONE

COMPLETE STREETS

GOODS MOVEMENT

There is no one-size-fits-all solution for regional challenges. Instead, we must explore an integrated web of creative strategies to achieve the goals of Connect SoCal. In this chapter we will lay out clear policy guidance, action-oriented strategies and pragmatic tools that can be utilized to achieve a coordinated and balanced regional transportation system. This chapter also describes strategies to integrate the region's Forecasted Development Pattern with the transportation network to demonstrate reductions in greenhouse gas (GHG) emissions.

OUR VISION FOR A CONNECTED REGION

As the region's population increases, ages and diversifies, it is crucial that land use decisions and transportation investments made at the federal, state, regional and local levels are coordinated to be able to achieve Connect SoCal's regional goals. Developing compact centers with a robust mix of land uses, a range of building types and connected public spaces can strengthen the fabric of communities. Targeting rideshare and transportation demand management strategies near employment centers can reduce travel costs and improve air quality. Thoughtfully locating freight delivery facilities and logistics centers can reduce truck travel and the impact of goods movement on communities. While coordinating land-use and transportation strategies makes sense and can yield beneficial outcomes, implementation is difficult in a region where authority is divided among myriad agencies. This plan is not designed to dictate or supersede local actions and policies, but rather to lay out a path to achieving regional goals set by the Regional Council.

Our vision for the region incorporates a range of best practices for increasing transportation choices, reducing dependence on personal automobiles, further improving air quality and encouraging growth in walkable, mixed-use communities with ready access to transit infrastructure and employment. More and varied housing types and employment opportunities would be located in and near job centers, transit stations and walkable neighborhoods where goods and services are easily accessible via shorter trips. To support shorter trips, people would have the choice of using neighborhood bike networks, car share or micro-mobility services like shared bicycles or scooters. For longer commutes, people would have expanded regional transit services and more employer incentives to carpool or vanpool. Other longer trips

would be supported by on-demand services such as microtransit, carshare and citywide partnerships with ride hailing services. For those that choose to drive, hotspots of congestion would be less difficult to navigate due to cordon pricing, and using an electric vehicle will be easier thanks to an expanded regional charging network.

There are certainly inherent constraints to expansive regional growth, and areas that are susceptible to natural hazards and a changing climate must be recognized. Connect SoCal therefore emphasizes options that conserve important farmland, resource areas and habitat corridors, and de-prioritizes growth on lands that are vulnerable to wildfire, flooding and near term sea-level rise.

OUR APPROACH

Connect SoCal addresses regional challenges in several ways. A key, formative step is to develop a Regional Growth Forecast in collaboration with local jurisdictions, which helps SCAG identify opportunities and barriers to development. The plan forecasts the number of people, households and jobs (at the jurisdictional level) expected throughout SCAG's 191 cities and in unincorporated areas by 2045. This forecast helps the region understand in a very general sense where we expect growth and allows us to focus attention on areas experiencing change and increases in transportation needs. For additional details on growth forecast methodology, refer to the Demographics and Growth Forecast Technical Report.

The Regional Growth Forecast is then complemented by a set of strategies to guide integrated land use development decisions and transportation investments to achieve regional goals, called the Connect SoCal Growth Vision. The resulting Forecasted Development Pattern includes strategies to prioritize areas for new development, like near destinations and mobility options, and places enhanced conservation value on resource areas, key farm lands and areas vulnerable to natural hazards. However, Connect SoCal does not dictate or supersede local policies, actions or strategies – applying the Forecasted Development Pattern at the local level is the authority and responsibility of towns, cities and counties. The regional Forecasted Development Pattern identifies areas sufficient to house the region's population, including all economic segments of the population, through 2045. It takes into account

KEY CONNECTIONS

In this chapter, we also describe Connect SoCal's "Key Connections" in yellow highlight boxes. Key Connections augment the Core Vision of the plan to address trends and emerging challenges while "closing the gap" between what can be accomplished through intensification of core planning strategies alone, and what must be done to meet increasingly aggressive greenhouse gas reduction goals. These Key Connections lie at the intersection of land use, transportation and innovation, aiming to coalesce policy discussions and advance promising strategies for leveraging new technologies and partnerships to accelerate progress on regional planning goals. The Key Connections include:

SMART CITIES & JOB CENTERS

HOUSING SUPPORTIVE INFRASTRUCTURE

GO ZONES

ACCELERATED ELECTRIFICATION

SHARED MOBILITY & MOBILITY AS A SERVICE

CORE VISION SUSTAINABLE DEVELOPMENT

Through our continuing efforts to better align transportation investments and land use decisions, we strive to improve mobility and reduce greenhouse gases by bringing housing, jobs and transit closer together.

PROGRESS SINCE 2016

From 2008 to 2016, 71 percent of the region's household growth and 75 percent of the region's job growth occurred in Connect SoCal's priority growth areas. During this same period, only 11 percent of the region's household growth and 5 percent of the job growth occurred on constrained areas like prime farmland, and in areas vulnerable to rising seas.

PLANNING FOR 2045

From 2016 to 2045, 64 percent of new households and 74 percent of new jobs will occur in priority growth areas. During this same period, roughly 10 percent of new households and 9 percent of new jobs will occur in constrained areas.

SCAG's Sustainable Communities Program supports planning in local jurisdictions to advance the regional Growth Vision. In addition, new regional data tools, like the Regional Data Platform, will help local jurisdictions identify areas well suited for infill and redevelopment as well as natural and farm lands to be preserved. Studies and partnerships will also be pursued to establish a Regional Advanced Mitigation Program (RAMP), a strategic habitat and agricultural land conservation-planning program that identifies mitigation solutions for infrastructure projects early in the planning process.

net migration into the region, population growth, household formation and employment growth. Moreover, Connect SoCal identifies areas within the region sufficient to house near-term and long-term growth and support a diverse economy and workforce. For additional details on the Growth Vision and Forecasted Development Pattern, see the Sustainable Communities Strategy Technical Report.

Key investments are coupled with our Forecasted Development Pattern to optimize the regional transportation system and accommodate the increased service and infrastructure demands posed by land-use changes. Connect SoCal's transportation investments are financially constrained to reflect core and reasonably available revenues and are progressively integrated with projected land use patterns and coordinated across transportation modes to advance plan goals.

By integrating the Forecasted Development Pattern with a suite of financially constrained transportation investments, Connect SoCal can reach the regional target of reducing greenhouse gases, or GHGs, from autos and light-duty trucks by 8 percent per capita by 2020, and 19 percent by 2035 (compared to 2005 levels). Moreover, this integration can yield tangible outcomes that make our everyday travel needs easier when compared to a future without the plan — for example, the combined work trips made by carpooling, active transportation, and public transit increases by 3 percent and travel delay reduces by 26 percent per capita.

SUSTAINABLE COMMUNITIES STRATEGY

As part of the state's mandate to reduce per-capita GHG emissions from automobiles and light trucks, Connect SoCal presents strategies and tools that are consistent with local jurisdictions' land use policies and incorporate best practices for achieving the state-mandated reductions in GHG emissions at the regional level through reduced per-capita vehicle miles traveled (VMT).

These strategies identify how the SCAG region can implement Connect SoCal and achieve related GHG reductions. It is important to note that SCAG does not have a direct role in implementing the Sustainable Communities Strategy

—neither through decisions about what type of development goes where, nor what transportation projects are ultimately built. However, SCAG works to support local jurisdictions and partnerships by identifying ways to implement the Sustainable Communities Strategy (SCS) in a way that fits the vision and needs of each local community. Additionally, SCAG serves as a leader as well as a hub to convene stakeholders and to find ways to collaborate on broader regional initiatives. See the Sustainable Communities Strategy Technical Report for more details on GHG reduction and implementation of the SCS.

The following strategies are intended to be supportive of implementing the regional Sustainable Communities Strategy. Several are directly tied to supporting related GHG reductions while others support the broader goals of Connect SoCal:

Focus Growth Near Destinations & Mobility Options

- Emphasize land use patterns that facilitate multimodal access to work, educational and other destinations
- Focus on a regional jobs/housing balance to reduce commute times and distances and expand job opportunities near transit and along center-focused main streets
- Plan for growth near transit investments and support implementation of first/last mile strategies
- Promote the redevelopment of underperforming retail developments and other outmoded nonresidential uses
- Prioritize infill and redevelopment of underutilized land to accommodate new growth, increase amenities and connectivity in existing neighborhoods
- Encourage design and transportation options that reduce the reliance on and number of solo car trips (this could include mixed uses or locating and orienting close to existing destinations)
- Identify ways to “right size” parking requirements and promote alternative parking strategies (e.g. shared parking or smart parking)

Promote Diverse Housing Choices

- Preserve and rehabilitate affordable housing and prevent displacement
- Identify funding opportunities for new workforce and affordable housing development

- Create incentives and reduce regulatory barriers for building context-sensitive accessory dwelling units to increase housing supply
- Provide support to local jurisdictions to streamline and lessen barriers to housing development that supports reduction of greenhouse gas emissions

Leverage Technology Innovations

- Promote low emission technologies such as neighborhood electric vehicles, shared rides hailing, car sharing, bike sharing and scooters by providing supportive and safe infrastructure such as dedicated lanes, charging and parking/drop-off space
- Improve access to services through technology—such as telework and telemedicine as well as other incentives such as a “mobility wallet,” an app-based system for storing transit and other multi-modal payments
- Identify ways to incorporate “micro-power grids” in communities, for example solar energy, hydrogen fuel cell power storage and power generation

Support Implementation of Sustainability Policies

- Pursue funding opportunities to support local sustainable development implementation projects that reduce greenhouse gas emissions
- Support statewide legislation that reduces barriers to new construction and that incentivizes development near transit corridors and stations
- Support local jurisdictions in the establishment of Enhanced Infrastructure Financing Districts (EIFDs), Community Revitalization and Investment Authorities (CRIAs), or other tax increment or value capture tools to finance sustainable infrastructure and development projects, including parks and open space
- Work with local jurisdictions/communities to identify opportunities and assess barriers to implement sustainability strategies
- Enhance partnerships with other planning organizations to promote resources and best practices in the SCAG region
- Continue to support long range planning efforts by local jurisdictions
- Provide educational opportunities to local decisions makers and staff on new tools, best practices and policies related to implementing the Sustainable Communities Strategy

Promote a Green Region

- Support development of local climate adaptation and hazard mitigation plans, as well as project implementation that improves community resiliency to climate change and natural hazards
- Support local policies for renewable energy production, reduction of urban heat islands and carbon sequestration
- Integrate local food production into the regional landscape
- Promote more resource efficient development focused on conservation, recycling and reclamation
- Preserve, enhance and restore regional wildlife connectivity
- Reduce consumption of resource areas, including agricultural land
- Identify ways to improve access to public park space

LAND USE TOOLS

CENTER FOCUSED PLACEMAKING

Creating dynamic, connected built environments that support multimodal mobility, reduced reliance on single-occupancy vehicles, and reduced GHG emissions is critical throughout the region. Center focused placemaking is an approach that supports attractive and functional places for Southern California residents to live, work and play, in urban, suburban and rural settings. Although center focused placemaking can be applied in a wide range of settings, priority must be placed, however, on urban and suburban infill, in existing/planned service areas and, for unincorporated county growth, within the planning boundary known as “Spheres of Influence” (SOI) where applicable and feasible.

Successful centers are typically human-scale, compact and pedestrian-oriented with a variety of housing types and ranges of affordability. For example, transit-oriented development (TOD) in Transit Priority Areas (TPAs) and high quality transit areas (HQTAs) within centers and nodes along corridors can play a pivotal role in supporting compact development that is less reliant on single-occupancy vehicles. Elements of center-focused placemaking can be implemented when transit service is neither existing nor planned. Center-focused placemaking includes smart locations and linkages, neighborhood

patterns and design and green infrastructure and buildings. Some key elements are specified the Sustainable Communities Strategy Technical Report.

PRIORITY GROWTH AREAS

Priority Growth Areas (PGAs) follow the principles of center focused placemaking and are locations where many Connect SoCal strategies can be fully realized. Connect SoCal's PGAs—Job Centers, TPAs, HQTAs, Neighborhood Mobility Areas (NMAs), Livable Corridors and Spheres of Influence (SOIs)—account for only 4 percent of region's total land area, but implementation of SCAG's recommended growth strategies will help these areas accommodate 64 percent of forecasted household growth and 74 percent of forecasted employment growth between 2016 and 2045. This more compact form of regional development, if fully realized, can reduce travel distances, increase mobility options, improve access to workplaces, and conserve the region's resource areas.

Jurisdictions should continue to be sensitive to the possibility of gentrification and employ strategies to mitigate negative community impacts – particularly in PGAs. Although the region will see benefits from infill development, communities are encouraged to actively acknowledge and plan for potential impacts including displacement. Production and preservation of permanent affordable housing to complement infill strategies is essential to achieving equitable outcomes.

Exhibits for priority growth areas and growth constraints, spheres of influence, job centers, transit priority areas, high quality transit areas, and neighborhood mobility areas can be found at the end of this chapter (**EXHIBIT 3.4-3.10**). Following is a description of Connect SoCal's PGAs and their associated strategies.

JOB CENTERS

Job Centers are where regional strategies that support economic prosperity can be deployed in catalytic ways. Job Centers have been identified in all six counties in the SCAG region and represent areas that have a significantly higher employment density than surrounding areas. Employment growth and residential growth are prioritized in existing Job Centers in order to leverage existing density and infrastructure. However, it is recognized that capacity

for infrastructure or services may need to be evaluated before residential or employment population is increased in a given area. By encouraging regional growth and employing transportation strategies in the 70+ Job Centers throughout the region, Connect SoCal seeks to reinforce regional economic prosperity. SCAG's methodology to identify Job Centers is not all-inclusive and additional potential centers can be identified.

Job Centers represent areas with local employment peaks rather than simply places with the most jobs. Identified Job Centers are present in over 60 percent of the region's cities and contain about one-third of Southern California's jobs – but only cover less than 1 percent of the region's land area. These Job Centers range in size from over 250,000 jobs in the region's most urbanized areas, to roughly 1,500 jobs in rural areas – all with employment densities far higher than neighboring areas. When growth is concentrated in Job Centers, the length of vehicle trips for residents can be reduced.

TRANSIT PRIORITY AREAS

Transit Priority Areas (TPAs) are Priority Growth Areas that are within one half mile of existing or planned 'major' transit stops in the region. A 'major' transit stop is defined as a site containing an existing or planned rail or bus rapid transit station, a ferry terminal served by either a bus or rail transit service, or the intersection of two or more major bus routes with a frequency of service interval of 15 minutes or less during the morning and afternoon peak commute periods. TPAs are where TOD can be realized – where people can live, work and play in higher density, compact communities with ready access to a multitude of safe and convenient transportation alternatives.

Focusing regional growth in areas with planned or existing transit stops is key to achieving equity, economic, and environmental goals. Infill within TPAs can reinforce the assets of existing communities, efficiently leveraging existing infrastructure and potentially lessening impacts on natural and working lands. Growth within TPAs supports Connect SoCal's strategies for preserving natural lands and farmlands and alleviates development pressure in sensitive resource areas by promoting compact, focused infill development in established communities with access to high-quality transportation. Although TPAs comprise less than 1 percent of Southern California's land area, around 30 percent of new households are projected to occur within these transit rich areas.

HIGH QUALITY TRANSIT AREAS

High Quality Transit Areas (HQTAs) are corridor-focused Priority Growth Areas within one half mile of an existing or planned fixed guideway transit stop or a bus transit corridor where buses pick up passengers at a frequency of every 15 minutes (or less) during peak commuting hours. Freeway transit corridors with no bus stops on the freeway alignment do not have a directly associated HQTA. Like Transit Priority Areas, HQTAs are places where vibrant TOD can be realized and are a cornerstone of land use planning best practice in the SCAG region.

HQTAs represent under 3 percent of the region's acreage but are projected to be home to over 51 percent of new households between 2016 and 2045. Infrastructure investments that support walkable, compact communities that integrate land use and transportation planning for a better functioning built environment are essential within HQTAs. Active transportation and new developments should be context-sensitive, responding to the existing physical conditions of the surrounding area. Sensitively designed TODs can preserve existing development patterns and neighborhood character while providing a balance of modal and housing choices.

NEIGHBORHOOD MOBILITY AREAS

Neighborhood mobility area (NMAs) focus on creating, improving, restoring and enhancing safe and convenient connections to schools, shopping, services, places of worship, parks, greenways and other destinations. NMAs are Priority Growth Areas with robust residential to non-residential land use connections, high roadway intersection densities and low-to-moderate traffic speeds. NMAs can encourage safer, multimodal, short trips in existing and planned neighborhoods and reduce reliance on single occupancy vehicles. NMAs support the principles of center focused placemaking. Fundamental to neighborhood scale mobility in urban, suburban and rural settings is encouraging "walkability," active transportation and short, shared vehicular trips on a connected network through increased density, mixed land uses, neighborhood design, enhanced destination accessibility and reduced distance to transit.

From 2016 to 2045, nearly 29 percent of new households are projected to be located in NMAs. Although 38 percent of all trips made in the SCAG region are three miles or less, more than 78 percent of these short trips are made

by driving. Improving public health and reducing per-capita VMT, and GHG reductions relies on our region's ability to support safe and convenient short trips at the neighborhood scale—by foot, bicycle, micro-mobility devices and slow speed electric vehicles such as e-bikes, scooters, and neighborhood electric vehicles. Adopting and implementing Complete Streets policies supports safer neighborhood mobility and connected, economically dynamic communities. Targeting future growth in these areas has inherent benefits to Southern California residents – providing access to “walkable” and destination-rich neighborhoods to more people in the future.

LIVABLE CORRIDORS

The Livable Corridor strategy encourages local jurisdictions to plan and zone for increased density at nodes along key corridors, and to “redevelop” single-story under-performing retail with well-designed, higher density housing and employment centers. Growth at strategic nodes along key corridors, many of which are within HQTAs, will make transit a more convenient and viable option. The Livable Corridors strategy is comprised of three components that will encourage context sensitive density, improve retail performance, combat disinvestment, and improve fiscal outcomes for local communities:

- **Transit improvements:** Some corridors have been identified as candidates for on-street, dedicated lane Bus Rapid Transit (BRT) or semi-dedicated “BRT-lite” transit. Other corridors have the potential to support features that improve the user experience and bus performance, including enhanced bus shelters, real-time travel information, off-bus ticketing, all-door boarding and longer distances between stops to increase speeds.
- **Active transportation improvements:** Increased investments in Complete Streets within Livable Corridors and intersecting arterials are essential to support safe bicycling and walking. Investments should include protected lanes to encourage safe bicycling and lower speed mobility, improved pedestrian access and bicycle and micro-mobility parking.
- **Land use policies:** Mixed-use retail centers at key nodes along Livable Corridors are essential, as is increasing neighborhood-oriented retail at intersections, and flexible zoning that allows for the replacement of under-performing auto-oriented retail.

SPHERES OF INFLUENCE

Local Agency Formation Commissions, or LAFCo, are given the authority to determine SOIs for all local governmental agencies, and each county in the SCAG region has an associated LAFCo. An SOI is a planning boundary outside of a local agency's legal boundary (such as the city limit line) that designates the agency's probable future boundary and service area. The intent of an SOI is to promote the efficient, effective and equitable delivery of local and regional services for existing and future residents and to encourage a collaborative process between agencies. A city will periodically annex parcels in an SOI into the city limits to include new developments or areas with infrastructure needs. Some factors considered in an SOI designation focus on current and future land uses and the need and capacity for services.

Decisions made by LAFCos in the SCAG region can support the implementation of Connect SoCal goals related to infill development, GHG emissions reductions, and climate change resilience. Connect SoCal encourages future unincorporated county growth be prioritized within existing SOIs to discourage urban sprawl and the premature conversion of agricultural and natural lands, support alignment of policies across jurisdictions, and rehabilitate and utilize existing infrastructure. This strategy promotes growth in an efficient manner that limits sprawl and “leapfrog” development and minimizes costs to taxpayers. As a result, 4 percent of the region's future household growth will be located in SOIs outside of incorporated city boundaries from 2016 to 2045.

GREEN REGION

A sustainable, “green” region requires that the built environment and natural resource areas coexist in a well-balanced land use pattern that encourages mutual co-benefits. The quality and range of conservation, natural and agricultural areas present in the region can be reinforced and enhanced by a range of regional and local tools.

Paired with PGAs, Connect SoCal's conservation strategies consider the economic and ecological benefits of preserving natural areas and farmlands, while also maximizing their potential for GHG reduction. New housing and employment development is emphasized in PGAs such as Job Centers, TPAs, HQTAs and NMAs, and away from natural and farm lands on the edges of urban and suburban areas, to incentivize infill development and the concentration

MEMORANDUM

To: Los Angeles County Public Works Date: January 3, 2024

This memorandum has been prepared by Linscott, Law & Greenspan, Engineers (“LLG”) to provide a non-CEQA vehicle queuing analysis related to the Extera Public School project (“Project”) located at 1059 S. Gage Avenue (Assessor Parcel Nos. 5239-012-009 and 5239-012-028) within the East Los Angeles Community Plan Area and Community Standards District of unincorporated Los Angeles County (“Project Site”). The existing Project Site is occupied by the Oasis of Mercy Catholic Church (“Church”) and is improved with two buildings and a surface parking lot. Specifically, the Project Site is improved with a two-story building providing 18,309 square feet of floor area (“Building 1”) and a one-story building providing 6,993 square feet of floor area (“Building 2”). The Project Site is generally bound by single-family residences to the north and south, Eastman Avenue to the west, and Gage Avenue to the east.

The Project proposes to (i) renovate Building 2, including the removal of an existing 509 square-foot covered courtyard, and add a new 2,265 square-foot outdoor lunch patio and (ii) demolish and construct a new Building 1 in a different location on the Project Site. The new two-story Building 1 will provide 29,676 square feet of floor area (inclusive of a new 6,500 square-foot concrete deck covering the onsite parking spaces). The renovated Building 2 will provide a total of 8,749 square feet in floor area. In total, the Project will provide 38,425 square feet of total building floor area.

The Project consists of a new permanent public charter school facility serving a maximum enrollment of 525 students. Specifically, the Project proposes to serve 336 students in Transitional Kindergarten (“TK”) through 5th grades and 189 students in the 6th through 8th grades. The Project will include 22 classrooms, offices, outdoor eating and play areas, and a multi-purpose room. The Project would have a total of 28 full-time faculty members. The Project proposes to provide 38 parking spaces within an onsite surface parking lot. Construction and occupancy of the Project is proposed to be completed by August 2025. The Project Site location and general vicinity are shown in *Figure 1*. The site plan and proposed site access scheme for the Project is presented in *Figure 2*.

Vehicular Project Site Access and Student Drop-Off/Pick-Up Operations

The proposed student drop-off/pick-up plan is shown in *Figure 3*. As shown in *Figure 3*, ingress traffic movements to the Project Site are proposed to be accommodated via one inbound-only driveway along the west side of Gage Avenue, on the easterly portion of the Project Site. For student drop-off and pick-up operations, motorists will be instructed to make a right-turn into the Project Site's drop-off/pick-up area, travel within the proposed onsite drop-off/pick-up lane, complete the student drop-off or pick-up, and then exit from the proposed driveway along the east side of Eastman Avenue via a right-turn movement. Left-turn ingress and egress movements will be prohibited at all times. Traffic regulatory signs will be posted at the ingress and egress driveways indicating the turning restrictions. Onsite traffic monitors will also assist with indicating turning restrictions to motorists. Community outreach will be provided to the public, including administrative staff, parents/caregivers, and neighboring residents, regarding the school's queuing and traffic management plan.

In addition, parents/caregivers will be advised to have students sit in the rear of their vehicles so that the students can exit the vehicle on the driver's side (i.e., adjacent to the school building). Students sitting in the front passenger seat will wait for a traffic monitor to assist them in exiting the vehicle and crossing the onsite drop-off/pick-up lanes to access the school building. Similarly, students sitting in vehicles with no rear door on the driver's side will wait for a traffic monitor to assist them in exiting the vehicle from the rear door on the passenger's side and crossing the onsite drop-off/pick-up lanes to access the school building. Students sitting in vehicles within the outer drop-off/pick-up lane (i.e., the drop-off/pick-up lane that is not immediately adjacent to the school building) will wait for a traffic monitor to assist them in exiting the vehicle and crossing the onsite drop-off/pick-up lanes to access the school building. At the beginning of each semester, the school will distribute its queuing plan to parents and caregivers. Parents and caregivers will be required to review the student drop-off/pick-up operational plan and acknowledge acceptance of the plan by signature.

The drive aisle accommodating the onsite drop-off/pick-up area is approximately 26 feet in width, which is sufficient to accommodate two lanes of queued vehicles. Furthermore, each drive aisle provides approximately 233 feet of onsite queuing distance from the Gage Avenue driveway to the student drop-off/pick-up point. As such, the proposed drop-off/pick-up area can facilitate two lanes of queued vehicles within the site and can therefore accommodate a total of approximately 20 vehicles¹ queued within the site: six (6) vehicles in the designated drop-off/pick-up area and 14 vehicles in the onsite queue leading to the designated drop-off/pick-up zone. It is

¹ The vehicle queue capacity is based on a highly conservative ("worst case") design vehicle of 19 feet in length, plus additional space (at least three feet) between queued vehicles.

noted that a minimum of six (6) traffic monitors and one crossing guard will be onsite to assist students in safely crossing the double queue of vehicles during the drop-off and pick-up periods. Two additional traffic monitors will be stationed at the entrance and exit driveways (one per driveway) to direct vehicles entering the drop-off/pick-up area into two lanes and to direct vehicles exiting the drop-off/pick-up area out onto Eastman Avenue. In addition to directing vehicles, the driveway monitors will also serve as crossing guards to facilitate safe crossings across the driveways to avoid potential vehicle/pedestrian conflicts. During the student pick-up period, a staff member will announce when a student's ride has arrived to ensure an efficient pick-up. In addition to the student drop-off and pick-up periods, the school will station monitors throughout the onsite surface parking lot and at the driveways when hosting other school events when students are present. A letter from the Applicant, Extera Public Schools, describing the commitment to implement two lanes of onsite vehicle queuing during the drop-off and pick-up periods and to utilize traffic monitors during student drop-off and pick-up is provided in *Appendix A*.

As previously noted, the ingress driveway along the west side of Gage Avenue is proposed to accommodate right-turn vehicular ingress only (i.e., left-turn ingress movements will not be permitted, and egress movements will not be permitted). In addition, the egress driveway along the east side of Eastman Avenue is proposed to accommodate right-turn vehicular egress only at all times (i.e., ingress movements will not be permitted, and left-turn egress movements will not be permitted). Thus, motorists will not be permitted to make left-turn ingress movements outside of drop-off/pick-up periods. Signs will be posted at the ingress and egress driveways indicating the turning restrictions. The traffic monitors onsite will also assist with indicating turning restrictions to motorists. Community outreach will be provided to the public, including administrative staff, parents/caregivers, and neighboring residents, regarding the school's traffic management plan. Therefore, motorists destined to the Project will be aware of the right-turn only ingress operation at the Gage Avenue driveway and will plan their travel routes in advance so as to arrive at the Project Site via southbound Gage Avenue. A roadway signing/stripping plan will be prepared for the immediate Project Site vicinity and submitted to Public Works for approval prior to the issuance of building permits.

The Project's exact start and dismissal times are unknown at the time of preparation of this analysis. It is expected that both the elementary and middle school components would start between 7:00 and 9:00 AM, and that both would dismiss between 3:00 and 4:00 PM. However, the Project proposes to stagger the start and dismissal times of the proposed elementary and middle schools by a minimum of 20 minutes. For example, 175 students would commence at 7:30 AM, 175 students would commence at 7:50 AM, and 175 students would commence at 8:10 AM. By staggering the student start and dismissal times by 20 minutes, the peak one-hour period of traffic is dispersed over a longer period of time (i.e., to 80 minutes), which reduces the number of vehicles queuing at the Project Site during drop-off and pick-

up times. A letter from the Applicant describing the commitment to stagger the Project's start and dismissal times is provided in *Appendix A*.

Estimated Peak Vehicle Queue

Private vehicles are the only component that contributes to the vehicle queuing analysis during the peak student drop-off and pick-up periods. Students would not be bussed to the Project Site. Delivery and trash collection vehicles would not be permitted to access the Project Site during the student drop-off and pick-up periods. The analysis focuses on the morning student drop-off period because the pick-up of students tends to be dispersed on a relative basis throughout the afternoon, particularly as students are involved with after-school activities.

The proposed Project (without the consideration of an adjustment due to the removal of the existing Church) is forecast to generate a total of 285 inbound trips and 253 outbound trips during the AM peak hour as shown in *Table 1*. The trip generation forecast was prepared based on trip rates provided in the Institute of Transportation Engineers' ("ITE") *Trip Generation Manual*.²

As noted above, the Project proposes to stagger the start times of the proposed elementary and middle schools by at least 20 minutes, thereby likely resulting in the dispersing of Project-related trips beyond the 60-minute window for which the trip forecast is yielded through use of the ITE peak hour trip rates. However, to provide a conservative "worst case" analysis of vehicle queuing at the Project Site, it is assumed that the peak hour trip forecast provided by use of the ITE trip rates will occur within a 60-minute period.

A review of the Project Site location, pedestrian walkway network, and nearby public transit stops indicates that pedestrian movements can be accommodated as part of the Project. Streets in the immediate Project vicinity are improved with sidewalks. Students and employees traveling to and from the Project Site by walking or public transit can safely access the Project Site via the existing pedestrian network and enter the Project Site via pedestrian entrances along the Project Site's Gage Avenue and Eastman Avenue frontages. The pedestrian entrances are located away from the Project driveways to reduce the possibility of vehicle/pedestrian conflict. Furthermore, adult monitors will be stationed at the Project driveways to facilitate safe pedestrian crossings. It is also noted that the Project Site is located within 1,000 feet of eastbound and westbound transit stops located along Whitter Boulevard, a High-Quality Transit Corridor ("HQTC") as defined by the Southern California Association of Governments ("SCAG"), which is served by Metro Local Line 18. While it is anticipated that some students and employees will utilize public

² Institute of Transportation Engineers *Trip Generation Manual*, 11th Edition, Washington, D.C., 2021.

transportation for travel to and from the Project Site, a transit adjustment was not made to provide a conservative forecast of the Project's trip generation.

While the ITE trip rates do not distinguish between trips related to staff arrivals and student drop-offs in the morning, it can be generally assumed that the 253 outbound trips during the AM peak hour would correlate with at least 253 inbound trips during this period related to student drop-off operations. The remaining inbound vehicle trips during the AM peak hour are likely due to administrative staff, visitors, etc. Therefore, for this queuing analysis, it has been assumed that 253 vehicles would utilize the onsite vehicle queue area as part of the student drop-off operations.

It is noted that parking for the Project will be provided in an onsite surface parking lot. Administrative staff will be instructed to arrive at the Project Site prior to the commencement of the student drop-off period to prevent interference with student drop-off operations. Thus, by arriving at the Project Site before the drop-off period, staff are not expected to interfere with student drop-off operations.

The M/M/s queuing model was used to prepare the onsite queuing analysis. The M/M/s queuing model calculates average queuing, as well as peak queues at various confidence levels. For this analysis, the peak queue at the 95th percentile confidence level was utilized, which means the forecast vehicle queue will be equal to or less than the 95th percentile queue 95% of the time during the peak of the morning student drop-off period. By example, the 95th percentile peak hour confidence level is used by traffic engineers in the design of left-turn pocket lengths at intersections to accommodate peak hour vehicle queues.

The model requires the input of three parameters: 1) average arrival rate per hour, 2) the number of servers (i.e., adult monitors assisting students to and from cars), and 3) average service rate per hour for each adult monitor. For this analysis, the model inputs are based on an arrival rate of 253 vehicles per hour accommodated by the six monitors (servers), with each monitor able to process one car per minute (or 60 vehicles per hour) during the student drop-off period. As previously stated, the start times of the Project's middle school and elementary school will be staggered by a minimum of 20 minutes, thereby dispersing the arrival of traffic over a longer period of time. However, this analysis conservatively assumes that the forecast arrival of traffic will occur over a 60-minute period.

The M/M/s queuing calculations³ prepared for the Project are provided in *Appendix B*. As shown *Appendix B*, the expected average onsite queue at the Project Site is approximately 5.02 vehicles (customers). As further shown in the table provided in *Appendix B*, at the 95th percent confidence level (precisely, 95.90% as shown in *Appendix B*), the maximum onsite queue is calculated to be 11 vehicles.

³ *Tutorial on Queuing Theory*, Kardi Teknomo, 2014.

As previously noted, the onsite drop-off/pick-up area can accommodate 20 queued vehicles, which can readily accommodate the forecast peak queue of 11 vehicles. Accordingly, Project-related trips are not expected to queue onto Gage Avenue. Therefore, it is concluded that the planned onsite vehicle queuing area can adequately accommodate the forecast peak queue of 11 vehicles during the morning student drop-off operation at the Project. Furthermore, vehicle queuing will not have an adverse effect on public safety at the Project's driveways as 1) Project-related trips are not expected to queue onto Gage Avenue, and 2) adult monitors will be stationed at the Project driveways to facilitate the safe crossing of pedestrians as to avoid vehicle/pedestrian conflicts.

Summary

This memorandum has been prepared to provide a non-CEQA vehicle queuing analysis related to the proposed Extera Public School located at 1059 S. Gage Avenue within the East Los Angeles Community Plan Area and Community Standards District of unincorporated Los Angeles County. The Project proposes to remove the existing Church to accommodate the development and construction of a new permanent public charter school facility with 22 classrooms, offices, outdoor eating and play areas, and a multi-purpose room. The Project will accommodate a maximum enrollment of 525 students. Specifically, the Project proposes to serve 336 students in TK through 5th grades and 189 students in the 6th through 8th grades.

The findings of the queuing analysis are as follows:

- For student drop-off and pick-up operations, motorists will be directed to enter the Project Site's drop-off/pick-up area by making a right-turn from Gage Avenue, travel through the onsite drop-off/pick-up lane, complete the student drop-off or pick-up, and then exit onto Eastman Avenue via a right-turn movement. Signs will be posted at the ingress and egress driveways indicating turning restrictions. Traffic monitors will also assist in directing vehicles through the drop-off/pick-up area.
- The Project Applicant, Extera Public Schools, has provided a letter describing its commitment to stagger the student start and dismissal times, implement two lines of onsite vehicle queuing during the drop-off and pick-up periods, and to utilize traffic monitors to facilitate safe and efficient student drop-off and pick-up operations at the Project.

- The start and dismissal times of the Project's middle school and elementary school components will be staggered by a minimum of 20 minutes, thereby dispersing the arrival of traffic over a longer period of time.
- The Project's onsite drop-off/pick-up area can accommodate 20 queued vehicles within two lanes of queuing: six vehicles in the drop-off/pick-up zone and 14 vehicles queued onsite in advance of the drop-off/pick-up zone.
- Using trip generation rates published by ITE and based on the M/M/s queuing model, it is forecast that during the morning student drop-off period, the Project will generate an average queue of 5.02 vehicles and a peak queue of 11 vehicles. This peak queue can be accommodated by the Project's drop-off/pick-up area which can accommodate 20 queued vehicles onsite. The Project will not cause vehicles to queue onto Gage Avenue.

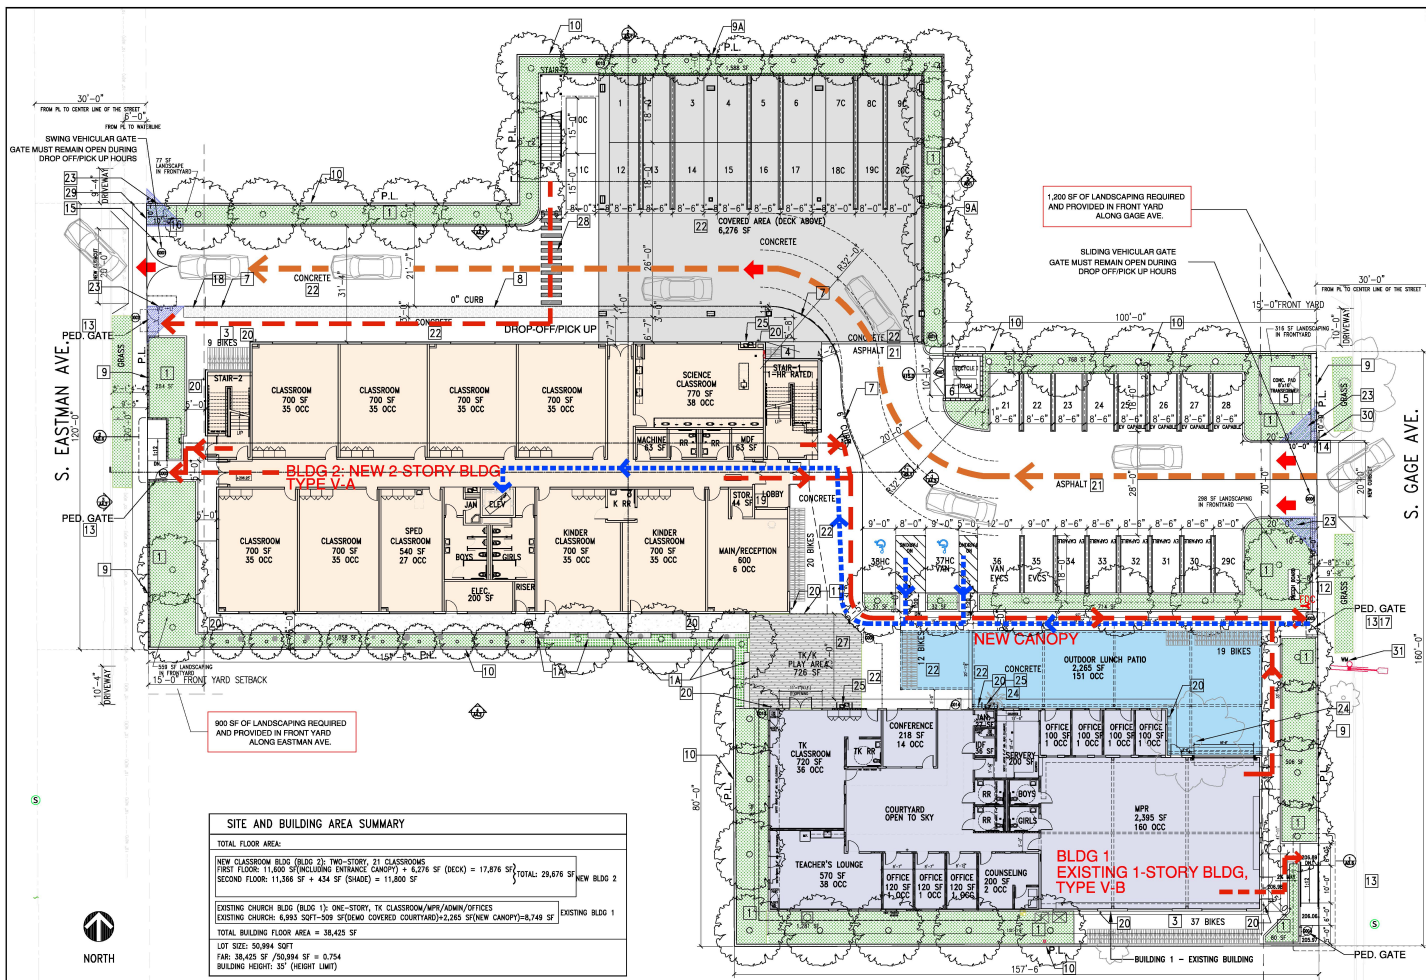

Figure 1
Vicinity Map

SITE AND BUILDING AREA SUMMARY	
TOTAL FLOOR AREA:	
NEW CLASSROOM BLDG (BLDG 2): TWO-STORY, 21 CLASSROOMS	
FIRST FLOOR: 11,800 SF (INCLUDING ENTRANCE CANOPY) + 6,276 SF (DECK) = 17,876 SF

APPENDIX A
EXTERA PUBLIC SCHOOLS LETTER

HOME OFFICE
3626 East Fifth Street, 2ND Floor, Los Angeles, CA 90063
Office 323.261.0059
WWW.EXTERASCHOOLS.ORG

January 3, 2024

Kent Tsujii, P.E.
Senior Civil Engineer
Los Angeles County Public Works

**SUBJECT: Proposed Extera Public School
1059 South Gage Avenue
Los Angeles, CA 90023**

Dear Mr. Tsujii:

This letter is provided by Extera Public Schools related to the vehicle queuing and circulation analysis prepared by Extera's transportation consultant, Linscott, Law & Greenspan, Engineers (LLG) for the proposed Extera Public School project at 1059 South Gage Avenue. We understand Public Works has requested a letter from Extera stating our commitment to implement the recommended transportation management measures identified in LLG's vehicle queuing analysis dated January 3, 2024. As the owner and operator of the proposed Extera Public School on South Gage Avenue, Extera commits to:

- Implement two lines of onsite vehicle queuing during the peak periods of student drop-off and pick-up as indicated in Figure 3 of the LLG vehicle queuing analysis;
- Utilize up to ten adult monitors during student drop-off and pick-up periods consisting of:
 - Six (6) monitors and one (1) crossing guard to safely assist students to and from their vehicles
 - One monitor in the student pick-up area to announce vehicle arrivals to waiting students (afternoon pick-up period only)
 - One monitor near the inbound driveway to, among other duties, discourage student drop-off/pick-up on Gage Avenue and encourage right-turns into the driveway from Gage Avenue
 - One monitor near the exit driveway to, among other duties, discourage student drop-off/pick-up on Eastman Avenue; and
- Implement staggered start and dismissal times by a minimum separation of 20 minutes.

Please let us know of any questions.

Sincerely,

Nicole Ann Duquette, M.Ed.
Interim CEO
Extera Public Schools

Jason,

TSM-Studies has no additional comments to the latest TIA Screen-out memo submitted on 1/3/2024 for the 1059 S Gage Avenue project (Extera Charter School project). We will inform the Department of Regional Planning and Public Works Land Development Division about our findings.

Note that the queuing analysis for this project is still with administration for review and is still pending.

Hi Etmny,

Attached is the Public Works memo of the items and the contact information that are still pending from Public Works prior to public hearing.

As discussed, you may need to contact the plan checkers and request if they can expedite the studies that are still pending.

For Traffic Items, We are processing the approval of the Screenout Memo and the Queuing Analysis. I will update you when the traffic items have been approved.

Let me know if you have any questions. You can contact me on my private cell.

Hi All,

Thank you for participating in the call this afternoon. Action items/next steps are summarized below:

- AB 2097 Language
 - EFG: Please send sample language/correspondence from KIPP Ignite related to AB 2097 to Melissa Liang (MLiang@dpw.lacounty.gov) and Isuda Esmaeilpour (IEsmaeilpour@dpw.lacounty.gov), with Ruben Cruz (RCRUZ@dpw.lacounty.gov) and Mingliang Shi (mshi@dpw.lacounty.gov) copied.
 - Public Works will be reaching out to DRP to discuss AB 2097 as it relates to this project.
- Site Plan Updates
 - Franco will update sheet A0.5 to show 1) the floor areas of all the buildings, and 2) provide a table with the floor area breakdown.

Let me know if there's anything else I'm missing. Once we have the updated site plan and AB 2097 information confirmed, we will be able to finalize and submit the memo within a day or so.

Thanks,
Jason

Subject: RE: 1059 S. Gage Avenue - Extera Public School

CAUTION: External Email. Proceed Responsibly.

Kent,

Hope all is well. I wanted to circle back with you on the Extera Public School project located at 1059 S. Gage Avenue. We were previously working under the assumption that the project would be categorically exempt from CEQA, and therefore, a TIA would not be required. There was a great deal of back and forth within DRP on this project, but they've ultimately determined that the project needs to prepare an MND, which in turn, would require a TIA. However, the project meets the Proximity to Transit Screening Criteria, and we will hopefully be submitting the supporting documentation sometime next week (similar to what was prepared for the KIPP Ignite project at 1628 E. 81st Street). It would be greatly appreciated if we could get the invoice for that shortly after submitting.

Additionally, we were working with Mingliang, Ruben, and Isuda on the queuing analysis for the project, and the architects adjusted the site plan to address some of their concerns. We had a call to go over other comments, which will be addressed in an updated queuing memo. We hope to submit that next week as well.

Given the time lost on this project, whatever can be done on your end to expedite these reviews would be greatly appreciated. Let me know of any questions.

Thanks,

Jason,

My staff was just reviewing the project and noted that the categorical exemption was not granted to the project yet, therefore they were providing the recommendation as a precautionary note. However, you are correct if an exemption is required then a TIA would not be required.

If you would like to discuss further please let me know.

Hi Kent,

Our project's planner received communication from Ed Gerlits at Public Works that based on the queuing analysis and turning movement analysis that a TIA would be required. As you may be aware, we've submitted one version of the queuing analysis and Isuda provided us with comments at the end of March. The project's architects are working with Isuda on requested revisions to the site plan. The latest version of the site plan was submitted to Isuda earlier this week. Isuda has confirmed receipt and stated that she'd complete her turning movement analysis by the end of next week. Once we get the site plan issue resolved, we would update the queuing analysis accordingly, incorporating the comments provided by Isuda.

Based on our initial conversations with yourself and County Counsel, it was understood that as long as the project was determined to be categorically exempt from CEQA that a TIA would not be required. We as a team are trying to understand why Ed is now telling Regional Planning that a TIA would be required. Any information you're able to provide would be greatly appreciated.

Thanks,

Dear Jason Shender:

1059 SOUTH GAGE AVENUE TRAFFIC QUEUING ANALYSIS UNINCORPORATED EAST LOS ANGELES AREA

We have reviewed the Traffic Queuing Analysis report dated January 3, 2024, for the proposed Extera Charter School project at 1059 South Gage Avenue in the unincorporated East Los Angeles area.

According to the Traffic Queueing Analysis report, the proposed school will accommodate the expected peak-hour vehicle queues on-site. We generally agree with the findings in the Traffic Queueing Analysis report; however, the project shall adhere to the conditions listed below:

Site Access Requirements

- The site shall accommodate at least 20 vehicles in queue.
- The site shall provide ingress via right-turn only on Gage Avenue and egress via right-turn only onto Eastman Avenue during drop-off and pick-up hours.
- The site shall restrict left turn ingress on Gage Avenue and left turn egress onto Eastman Avenue at all times.

Site Procedures

- To ensure the expected peak-hour vehicle queues are accommodated on-site, the project applicant shall provide at least 10 staff (six monitors, one crossing guard, two traffic monitors, and one additional afternoon monitor) to monitor and direct on-site vehicle traffic during drop-off and pick-up times and to assist students in safely crossing driveways and the double queue of vehicles.
- The project shall provide six designated drop-off/pick-up processing points.
- The project applicant shall install and maintain signs at the ingress/egress driveways indicating the turning restrictions.
- The project applicant shall stagger the start and dismissal times of the middle school and elementary school components by a minimum of 20 minutes to evenly distribute the number of students across an entire hour.

If you have any questions, please contact Ms. Isuda Esmailpour, Traffic Safety and Mobility Division, at (626) 300-4720 or iesmailpour@pw.lacounty.gov.

Very truly yours,

MARK PESTRELLA, PE

VIA EMAIL sherrie@ceqa-nepa.com

Ms. Sherrie Cruz
CAJA Environmental Services, LLC
9410 Topanga Canyon Boulevard, Suite 101
Chatsworth, CA 91311

Dear Ms. Cruz:

Will Serve Letter for Extera Public Schools Project

The Los Angeles County Sanitation Districts (Districts) received your will serve letter request for the subject project located in the City of Los Angeles on September 26, 2023. The proposed project is located within the jurisdictional boundaries of District No. 2. We offer the following comments regarding sewerage service:

1. The wastewater flow originating from the proposed project will discharge to a local sewer line, which is not maintained by the Districts, for conveyance to the Districts' Jane Street Branch Trunk Sewer, located in South Hicks Avenue at East Olympic Boulevard. The Districts' 12-inch diameter trunk sewer has a capacity of 2.1 million gallons per day (mgd) and conveyed a peak flow of 0.39 mgd when last measured in 2016.
2. The wastewater generated by the proposed project will be treated at the Joint Water Pollution Control Plant located in the City of Carson, which has a capacity of 400 mgd and currently processes an average flow of 243.1 mgd.
3. The expected increase in average wastewater flow from the project, described in the request letter as 38,425 square feet private school, is 2,625 gallons per day, after a 25,302 square feet private school building on the project site is demolished. For a copy of the Districts' average wastewater generation factors, go to www.lacsd.org, under Services, then Wastewater Program and Permits and select Will Serve Program, and click on the [Table 1, Loadings for Each Class of Land Use](#) link.
4. The Districts are empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the Districts' Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. This connection fee is used by the Districts for its capital facilities. Payment of a connection fee may be required before this project is permitted to discharge to the Districts' Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, under Services, then Wastewater (Sewage) and select Rates & Fees. In determining the impact to the Sewerage System and applicable connection fees, the Districts will determine the user category (e.g. Condominium, Single Family Home, etc.) that best represents the actual or anticipated use of the parcel(s) or facilities on the parcel(s) in the development. For more specific information regarding the connection fee application procedure and fees, please contact the Districts' Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

5. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CAA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service but is to advise the developer that the Districts intend to provide this service up to the levels that are legally permitted and to inform the developer of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2742, or phorsley@lacsdsd.org.

Very truly yours,

Patricia Horsley

9. ASSESSOR'S MAP

I. INTRODUCTION

The following Sewer Area Study has been prepared by Trittech Engineering Group, Inc. to determine and show:

- a) The capacity of the existing sewer segments from proposed development site to the Los Angeles County Sanitation District (LACSD) maintained trunk sewers.

- b) Some of the existing sewer facility will not be adequate for the proposed development, new sewer pipe lines need to be install to service the new developments.

II. SITE DESCRIPTION

The subject property is located on the east of S Eastman Ave and west of S Gage Ave between Whittier Blvd and Dennison St in the city of Los Angeles, County of Los Angeles. Before development, the project is the commercial site that consisted of 2 commercial buildings and parking lots. The building at north of property will be demolished. The building at southeast corner will remain and remodel. The APN number is 5239-012-009 & 5239-012-028 and the site is approximately 50,994 SF (1.171 ACRES).

III. PROJECT DESCRIPTION

The project site is occupied by a new school building, EXTERA PUBLIC SCHOOLS. The school will have max. 500 students and 37 teachers. This project will propose 6" VCP sewer lateral with minimum 1% slope (by gravity), it will be connected to ex. sewer main line between manhole No.289 and No.290 per PC#08589 (Existing 8"-VCP pipe with 2% slope) located on Gage St.

IV. SEWER PIPE CAPACITY ANALYSIS

Calculations were performed in accordance with the Los Angeles County Department of Public Works design criteria. Each pipe segment between the point of connection and the Sanitation District's trunk main was analyzed to determine capacity based on size and slope utilizing the monograph from County Standard S-C4. The monograph is based on Kutter's formula and 1/2 full pipe flowing for 12"-pipe or less and 3/4 full pipe flowing for 15" pipe or more

The equation to calculate the tributary sewer discharge follows:

$$Q=ZA$$

Where: Q= Sewer discharge (cfs)

Z = Zoning coefficient (cfs/acre)

A = Area (acres)

V. CONCLUSION

From Sewer Study Table, the maximum peak Calculated flow/Capacity is 55.2% at pipe between M.H.362 and TRUNK is less than 100%. Therefore this development will not adversely impact to the existing sewer capacity.

VI. APPENDIX - SEWER CAPACITY CALCULATIONS

(SEE ATTACHED COLORED ZONING MAP AND SEWER INDEX MAP FOR DETAILS)

M.H. 289-287: AREA A1 + **SITE (Extera Public School-Elementary school)**

AREA A1: ZONE R3 = 2.79+2.75+0.39 = 5.93 AC

ZONE R3, COEFFICIENTS = 0.012, Q = 5.93 x 0.012 = 0.0712 CFS.

PROJECT SITE: Elementary school, 500 students

FLOW = (500x10) x 2.5 / (7.481x24x60x60) = 0.0193 CFS

Q1 = 0.0712 + 0.0193 = 0.0905 CFS.

M.H. 364-363: AREA B1

AREA B1: ZONE R3 = 1.70+1.75 = 3.45 AC

ZONE R3, COEFFICIENTS = 0.012, Q = 3.45 x 0.012 = 0.0414 CFS.

Q2 = 0.0414 CFS.

M.H. 363-362: AREA C1 + AREA C2 + AREA C3

AREA C1: ZONE R3 = 0.62 AC

ZONE R1, COEFFICIENTS = 0.012, Q = 0.62 x 0.012 = 0.0074 CFS.

AREA C2: ZONE C-M = 0.25 AC

ZONE C-M, COEFFICIENTS = 0.015, Q = 0.25 x 0.015 = 0.0038 CFS.

AREA C3: ZONE C-3 = 1.14 AC

ZONE C2, COEFFICIENTS = 0.015, Q = 1.14 x 0.015 = 0.0171 CFS.

Q3 = 0.0074+0.0038+0.0171 = 0.0283 CFS.

M.H. 362-TRUNK: AREA D1 + AREA D2 + LOS ANGELES COMMUNITY HOSPITAL

AREA D1: ZONE R3 = 1.01+2.69+4.97+3.94+1.81+0.48+1.48+0.72+1.19+0.61 = 18.90 AC

ZONE R1, COEFFICIENTS = 0.012, Q = 18.90 x 0.012 = 0.2268 CFS.

AREA D2: ZONE C-M = 0.62+0.11+0.61+0.26 = 1.6 AC

ZONE C-M, COEFFICIENTS = 0.015, Q = 1.6 x 0.015 = 0.0240 CFS.

LOS ANGELES COMMUNITY HOSPITAL: 130 BEDS

FLOW = (500x130) x2.5 / (7.481x24x60x60) = 0.2514 CFS

Q4 = 0.2268+0.0240+0.2514 = 0.5022 CFS.

TOTAL FLOW = 0.6624 CFS.

About Los Angeles Community Hospital

One Mission. One Team. One You.

Los Angeles Community Hospital has been taking care of generations of east Los Angeles families. Having a strong presence in our community has been critical to our success since our inception, along with offering quality, compassionate healthcare accessible to everybody. Most of our doctors, nurses and other employees live in the community, creating a culture of neighbors taking care of neighbors.

We have changed with our community—both in the way we deliver medical care and by reaching beyond the walls of our hospital. We work closely with community members to help meet their most important needs.

Services

Our 130-bed, acute care hospital offers a wide range of medical programs and services, including cardiology, internal medicine and surgical services. For a complete list of services, [click here](#). Other specialty services are available through transfer agreements with affiliated tertiary care centers.

Quality, Accessible Care

Our primary focus is on the complete care of the patient—in a healing environment, with compassionate care and a collaborative team approach to ensure the best outcomes for our patients. You can be confident you are being taken care of by expert medical and support teams.

Los Angeles Community Hospital is nationally recognized by Healthgrades as among the top 5 percent in the nation for Patient Safety Excellence (2023), top 5 percent for Pulmonary Services (2019-2023) and top 5 percent for GI Care (2023). In addition, our hospital is a 5-star recipient for treatment of heart attack, heart failure, hip fracture, COPD, pneumonia, GI bleed and sepsis. This means our patients have access to nationally recognized care close to home.

For analysis, Healthgrades evaluates approximately 45 million Medicare inpatient records for almost 4,500 hospitals nationwide to assess hospital performance in 31 common conditions and procedures to evaluate outcomes and identify 5-star recipients.

Los Angeles Community Hospital also received 4 stars Overall Hospital Quality Rating given by Centers for Medicare and Medicaid Services (CMS) for 2022.

Our hospital also is accredited by The Joint Commission. The Gold Seal of Approval® is a symbol of quality that reflects our commitment to providing safe and effective patient care.

Leadership

Our leadership team includes:

- **Hector Hernandez**, Chief Executive Officer

- **Keith Levy**, Administrator
- **Tony Desai, RN**, Chief Nursing Officer

Locations

Los Angeles Community Hospital is conveniently located just south of the 5 (Santa Ana) freeway and west of the 710 (Long Beach) freeway with free parking for our patients and visitors. Call us at [\(323\) 267-0477](tel:(323)267-0477).

We are affiliated with [Prospect Medical](#), which operates hospitals in four states, including seven hospitals in Southern California.

Mitigation Monitoring and Reporting Program

Project Title: Extera Public Schools

Project No. PRJ2022-004416-(1)

Conditional Use Permit No. RPPL2022013731

Environmental Plan No. RPPL2023005113

Lead agency name and address: Los Angeles County, 320 West Temple Street, Los Angeles, CA 90012

Contact Person and phone number: Christina Nguyen, Planner, Metro Development Services, 213-262-1325, cnguyen@planning.lacounty.gov

Project sponsor's name and address: Extera Public Schools, 3626 E. Fifth Street, Los Angeles, CA 90063

Project location: 1059 S. Gage Avenue, Los Angeles, CA 90023 (APN: 5239-012-028 and 5239-012-009)

1.1 Introduction

This Mitigation Monitoring and Reporting Program (MMRP) has been prepared pursuant to Public Resources Code Section 21081.6, which requires a Lead Agency to adopt a “reporting or monitoring program for changes to the project or conditions of project approval, adopted in order to mitigate or avoid significant effects on the environment.” In addition, Section 15097(a) of the State CEQA Guidelines requires that a public agency adopt a program for monitoring or reporting mitigation measures and project revisions, which it has required to mitigate or avoid significant environmental effects. This MMRP has been prepared in compliance with the requirements of CEQA, Public Resources Code Section 21081.6 and Section 15097 of the State CEQA Guidelines.

The County of Los Angeles is the Lead Agency for the Project and therefore is responsible for administering and implementing the MMRP. A public agency may delegate reporting or monitoring responsibilities to another public agency or to a private entity that accepts the delegation; however, until mitigation measures have been completed, the Lead Agency remains responsible for ensuring that implementation of the mitigation measures occurs in accordance with the program.

An Initial Study and Mitigated Negative Declaration (IS/MND) has been prepared to address the potential environmental impacts of the Project. The evaluation of the Project's impacts in the MND applies mitigation measures (MM) needed to avoid or reduce potentially significant environmental impacts. This MMRP is designed to monitor implementation of the MMs identified for the Project.

1.2 Organization

As shown on the following pages, each identified mitigation measure for the Project is listed and categorized by environmental impact area, with accompanying identification of the following:

- Enforcement Agency: the agency with the power to enforce the MM.
- Monitoring Agency: the agency to which reports involving feasibility, compliance, implementation, and development are made.
- Monitoring Phase: the phase of the Project during which the MM shall be monitored.
- Monitoring Frequency: the frequency at which the MM shall be monitored.
- Action Indicating Compliance: the action by which the Enforcement or Monitoring Agency indicates that compliance with the identified required MM has been implemented.

1.3 Administrative Procedures and Enforcement

This MMRP shall be enforced throughout all phases of the Project. The Applicant shall be responsible for implementing each MM and shall be obligated to provide certification, as identified below, to the appropriate monitoring and enforcement agencies that each MM has been implemented. The Applicant shall maintain records demonstrating compliance with each MM. Such records shall be made available to the County upon request.

During the construction phase and prior to the issuance of permits, the Applicant shall retain an independent Construction Monitor (either via the County or through a third-party consultant), approved by the Department of Planning, who shall be responsible for monitoring implementation of MMs during construction activities consistent with the monitoring phase and frequency set forth in this MMRP.

The Construction Monitor shall also prepare documentation of the Applicant's compliance with the MMs during construction every 90 days in a form satisfactory to the Department of Planning. The documentation must be signed by the Applicant and Construction Monitor and be included as part of the Applicant's Compliance Report. The Construction Monitor shall be obligated to immediately report to the Enforcement Agency any non-compliance with the MMs within two business days if the Applicant does not correct the non-compliance within a reasonable time of notification to the Applicant by the monitor or if the non-compliance is repeated. Such non-compliance shall be appropriately addressed by the Enforcement Agency.

1.4 Program Modifications

After review and approval of the final MMRP by the Lead Agency, minor changes and modifications to the MMRP are permitted, but can only be made subject to County approval. The Lead Agency, in conjunction with any appropriate agencies or departments, will determine the adequacy of any proposed change or modification. This flexibility is necessary in light of the nature of the MMRP and the need to protect the environment. No changes will be permitted unless the MMRP continues to satisfy the requirements of CEQA, as determined by the Lead Agency.

The Project shall be in substantial conformance with the MMs contained in this MMRP. The enforcing departments or agencies may determine substantial conformance with MMs in the MMRP in their reasonable discretion. If the department or agency cannot find substantial conformance, a MM may be modified or deleted as follows: the enforcing department or agency, or the decision maker for a subsequent discretionary project related approval, finds that the modification or deletion complies with CEQA, including CEQA Guidelines Sections 15162 and 15164, which could include the preparation of an addendum or subsequent environmental clearance, if necessary, to analyze the impacts from the modifications to or deletion of the MMs. Any addendum or subsequent CEQA clearance shall explain why the MM is no longer needed, not feasible, or the other basis for modifying or deleting the MM, and that the modification will not result in a new significant impact consistent with the requirements of CEQA. Under this process, the modification or deletion of a MM shall not in and of itself require a modification to any Project discretionary approval unless the Director of Planning also finds that the change to the MM results in a substantial change to the Project or the non-environmental conditions of approval.

1.5 Mitigation Monitoring Program

1.5.1 Cultural Resources

MM-CUL-1 Archaeological Resources Monitor

- If archaeological resources are encountered during construction and the Tribal Monitor (required in MM-TCR-1) has determined that the find is not Native American in origin, all ground disturbance activities within 25 feet of the find shall stop until a qualified archaeologist can evaluate the significance of the find.
- Upon receiving notification of the find, the Applicant shall retain a qualified archaeologist to evaluate the significance of the find. Thereafter, the qualified archaeologist or a trained archeological monitor, under the supervision of the qualified archaeologist, shall monitor all remaining ground disturbance activities along with the Tribal Monitor (required in MM-TCR-1). A qualified archaeologist is defined as an archaeologist who meets the Secretary of the Interior's Professional Qualifications Standards for Archaeology.
- If the find is determined significant, the qualified archaeologist shall recommend appropriate measures, subject to County approval, to mitigate potential impacts to cultural resources to less than significant. Such measures may include, but are not limited to, avoidance, preservation in place and data recovery.
- Where preservation in place is not feasible, treatment may include archaeological data recovery. The qualified archaeologist shall record all recovered archaeological resources on the appropriate California Department of Parks and Recreation Site Forms to be filed with the California Historical Resources Information System–South Central Coastal Information Center (SCCIC). Recovered resources that are determined to be significant shall be

curated at an appropriate facility that will ensure their long-term preservation and will allow access to interested scholars. If no institution accepts the archaeological resource(s), they shall be offered to a local school or historical society in the area for educational purposes. Within 90 days after monitoring has ended, the qualified archaeologist shall prepare and submit a final monitoring report documenting all encountered archaeological resources, the significance of the resources, and the treatment of the resources to the County and SCCIC.

- Personnel of the Project will not collect or move any archaeological materials and associated materials. Construction activity may continue unimpeded on other portions of the Project Site. The found deposits would be treated in accordance with federal, State, and local guidelines, including those set forth in California Public Resources Code Section 21083.2.
- **Enforcement Agency:** Los Angeles County Department of Planning
- **Monitoring Agency:** Los Angeles County Department of Planning
- **Monitoring Phase:** Pre-Construction; Construction
- **Monitoring Frequency:** Once, prior to issuance of grading permit; Ongoing during construction activities as determined through construction with qualified archaeologist and tribal monitor.
- **Action Indicating Compliance:** Letter of Retention submitted to Los Angeles County Department of Planning and issuance of grading permit (Pre-Construction); Field inspection sign-off from qualified archeologist (Construction)

1.5.2 Hazards and Hazardous Materials

MM-HAZ-1 Soil Management Plan

During future development of the Site, a Soil Management Plan (SMP) shall be developed for the proposed construction activities. The SMP shall describe the management of impacted soils which may be encountered during Site development, and outline health and safety procedures to minimize risk to onsite workers and personnel.

In addition, the SMP shall describe the procedures for export of inert soil for offsite reuse.

It is anticipated that data collected during additional confirmation samples collected during construction shall be used to facilitate the export of inert soil for offsite reuse.

The SMP shall be developed by a qualified environmental consultant, consistent with SCAQMD Rule 1166 (Site Specific and Various Locations Soil Mitigation Plan) for the site and implemented during site grading and excavation.

The SMP shall be reviewed by the Los Angeles County Fire Department Site Mitigation Unit of the Health Hazardous Materials Division (LACFD SMU) as follows:

First, a draft version of a complete SMP prepared by a qualified environmental consultant shall be submitted to the LACFD SMU. Additional comments may be provided by the LACFD SMU, and the determination that comments are warranted.

All such comments, to the extent warranted, shall be incorporated into the final draft SMP. The SMP shall then be implemented during the soil disturbance and site grading phases of Project construction.

The objective of the SMP is to establish policy and requirements for the management and disposal of soils generated during excavation and redevelopment, and other activities that may disturb potentially contaminated soil.

- **Enforcement Agency:** Los Angeles County Fire Department Site Mitigation Unit of the Health Hazardous Materials Division
- **Monitoring Agency:** Los Angeles County Fire Department Site Mitigation Unit of the Health Hazardous Materials Division
- **Monitoring Phase:** Pre-Construction; Construction
- **Monitoring Frequency:** Once prior to issuance of grading permit; Ongoing with periodic field inspections during construction for Soil Management Plan implementation.
- **Action Indicating Compliance:** Approval of Soil Management Plan; Issuance of grading permit; Compliance report by a qualified Soil Management Plan consultant.

1.5.3 Noise

MM-NOI-1 A temporary noise barrier shall be installed along the northern perimeter of the Project Site from Eastman Avenue to Gage Avenue. The barrier shall be at least four meters in height, made of at least 1-inch thick plywood or other equivalent material shown by Caltrans to provide a transmission loss of 23 dBA (which would be adequate for a noise reduction of at least 13 dBA), and be capable of reducing construction-related noise levels at the adjacent residences by at least 10.6 dBA and not have any gaps or holes between the panels or at the bottom.

- **Enforcement Agency:** Los Angeles County Department of Planning
- **Monitoring Agency:** Los Angeles County Department of Planning

- **Monitoring Phase:** Pre-Construction; Construction
- **Monitoring Frequency:** Plan check; Field Inspection
- **Action Indicating Compliance:** Issuance of demolition or building permit (Pre-Construction); Field inspection sign-off (Construction)

MM-NOI-2 A temporary noise barrier shall be installed along the southern perimeter of the Project Site that fronts the adjacent residential buildings on 1058 and 1064 Eastman Avenue. The barrier shall be at least three meters in height, made of at least 0.5-inch thick plywood or other equivalent material shown by Caltrans to provide a transmission loss of at least 20 dBA (which would be adequate for a noise reduction of at least 10 dBA), and be capable of reducing construction-related noise levels at the adjacent residences by at least 3.3 dBA and not have any gaps or holes between the panels or at the bottom.

- **Enforcement Agency:** Los Angeles County Department of Planning
- **Monitoring Agency:** Los Angeles County Department of Planning
- **Monitoring Phase:** Pre-Construction; Construction
- **Monitoring Frequency:** Plan check; Field Inspection
- **Action Indicating Compliance:** Issuance of demolition or building permit (Pre-Construction); Field inspection sign-off (Construction)

MM-NOI-3 All construction equipment shall be equipped with the manufacturers' recommended noise suppression devices, such as mufflers and engine covers. These devices shall be kept in good working condition throughout the construction process.

- **Enforcement Agency:** Los Angeles County Department of Planning
- **Monitoring Agency:** Los Angeles County Department of Planning
- **Monitoring Phase:** Construction
- **Monitoring Frequency:** Field Inspection
- **Action Indicating Compliance:** Field inspection sign-off (Construction)

MM-NOI-4 All construction equipment shall be properly maintained and tuned to minimize noise emissions.

- **Enforcement Agency:** Los Angeles County Department of Planning
- **Monitoring Agency:** Los Angeles County Department of Planning
- **Monitoring Phase:** Construction
- **Monitoring Frequency:** Field Inspection
- **Action Indicating Compliance:** Field inspection sign-off (Construction)

MM-NOI-5 Stationary noise sources (e.g., generators and compressors) shall be located as far from residential receptor location as is feasible.

- **Enforcement Agency:** Los Angeles County Department of Planning
- **Monitoring Agency:** Los Angeles County Department of Planning
- **Monitoring Phase:** Construction
- **Monitoring Frequency:** Field Inspection
- **Action Indicating Compliance:** Field inspection sign-off (Construction)

1.5.4 Tribal Cultural Resources

MM-TCR-1 Tribal Cultural Resources Monitoring

- **Tribal Monitor.** Prior to the commencement of any ground disturbance activities, the Applicant shall retain a qualified Tribal monitor (Tribal Monitor) or 3rd Party Monitor who is approved by the Gabrieleño Band of Mission Indians-Kizh Nation Tribal Government to provide tribal monitoring/consulting services. The term “ground disturbance activities”, as found in these project mitigation measures, refer to activities that may include clearing vegetation, pavement removal, grading, excavation, trenching, drilling, and potholing/auguring within the project site. The Applicant shall submit a letter to the County of Los Angeles (County) to confirm the name and contact information of the Tribal Monitor or 3rd Party Monitor who is retained for the project.
- **Tribal Cultural Resources Monitoring Plan.** Prior to the commencement of any ground disturbance activities, the Tribal Monitor or 3rd Party Monitor shall

prepare and submit a Tribal Cultural Resources Monitoring Plan (Monitoring Plan) to the County for review and approval at least 30 days before those activities commence. The Monitoring Plan shall include methods for monitoring ground disturbance activities; procedures to follow when resources are discovered; protocol for identifying and evaluating tribal cultural resources; and proposed measures to mitigate potential impacts to tribal cultural resources to less than significant levels.

- **Worker Environmental Awareness Program (WEAP).** Prior to the commencement of any ground disturbance activities, the Tribal Monitor or 3rd Party Monitor, will provide a WEAP training to construction crews that provides information on regulatory requirements for the protection of tribal cultural resources. As part of the WEAP training, construction crews shall be briefed on proper procedures to follow should unanticipated tribal cultural resources discoveries be made during construction. In addition, workers will be shown examples of the types of resources that would require notification of the Tribal Monitor or 3rd Party Monitor.
 - **Discovery of Tribal Cultural Resources.** If tribal cultural resources are encountered during construction, all ground disturbance activities within 25 feet of the find shall stop until the Tribal Monitor can evaluate the significance of the find. Construction activities may continue in other areas of the project site. If the discovery proves significant, the Tribal Monitor or 3rd Party Monitor shall recommend appropriate measures, subject to County approval, to mitigate potential impacts to tribal cultural resources to less than significant. Such measures may include but are not limited to resource avoidance, reburial, and preservation for educational purposes. The Tribal Monitor shall coordinate with the project Applicant to ensure that all measures approved by the County are implemented.
 - Within 90 days after monitoring has ended, the Tribal Monitor shall prepare and submit a final monitoring report documenting all encountered tribal cultural resources, the significance of the resources, and the treatment of the resources to the County and the California Native American Heritage Commission.
 - If the Applicant does not accept a particular recommendation determined to be reasonable and feasible by the Tribal Monitor, the Applicant may request mediation by a mediator agreed to by the Applicant and the County who has the requisite professional qualifications and experience to mediate such a dispute. The Applicant shall pay any costs associated with the mediation.
 - The Applicant may recommence ground disturbance activities outside of a specified radius of the discovery site, so long as this radius has been reviewed by the Tribal Monitor and determined to be reasonable and appropriate.
- **Enforcement Agency:** Los Angeles County Department of Planning

- **Monitoring Agency:** Los Angeles County Department of Planning
- **Monitoring Phase:** Pre-Construction; Construction
- **Monitoring Frequency:** Once, prior to issuance of grading permit; Ongoing during construction activities as determined through construction with qualified archaeologist and tribal monitor.
- **Action Indicating Compliance:** Letter of Retention submitted to Los Angeles County Department of Planning and issuance of grading permit (Pre-Construction); Field inspection sign-off from qualified archeologist (Construction)

CONDITIONAL USE PERMIT (RPPL2022013731)
1059 SOUTH GAGE AVENUE
ASSESSOR'S MAP BOOK 5239, PAGE 12, PARCEL 28
UNINCORPORATED EAST LOS ANGELES

As requested, Public Works reviewed the zoning permit application and site plan for the proposed project. The project proposes to demolish the existing classroom building and construct a new 23,400-square-foot, two-story, classroom building with deck.

- Public Works recommends that the conditions shown below be applied to the project if ultimately approved by the advisory agency.
- Public Works has comments on the submitted documents; therefore, a Public Hearing shall **NOT** be scheduled until the comments have been addressed.

1. Street

- 1.1. Prior to issuance of a grading or building permit, submit street improvement plans to Public Works, through the EPIC-LA portal under "Public Improvement Plans: Street Plans," that reflects the following for review and approval:

Be advised that we currently have no known County construction project within the limits of your project. Should a County project be scheduled and constructed ahead of the applicant's development, a pavement moratorium may be imposed that would restrict any pavement work for two

years. Exceptions could be made if acceptable rehabilitation measures are provided. The applicant is encouraged to monitor <https://pw.lacounty.gov/gmed/lacroads/Find.aspx> periodically to determine if any future County projects have been scheduled or to determine whether a pavement moratorium currently exist along streets fronting the project location.

- 1.1.1. Rehabilitate the pavement on Gage Avenue and Eastman Avenue, along the property frontage, to the street centerline.
- 1.1.2. Construct driveway approaches on Gage Avenue and Eastman Avenue to meet current Americans with Disabilities Act guidelines.
- 1.1.3. Close all unused driveways on Gage Avenue and Eastman Avenue with standard curb, gutter, and sidewalk.
- 1.1.4. Provide and maintain 10' x 10' pedestrian sight triangles from all driveways to the back of the sidewalk. This means there shall be no solid structures such as fences, walls, or landscaping more than 3.5 feet high within the pedestrian sight triangles.
- 1.1.5. All vehicular gates shall open inward or slide to the side and remain open during business hours.
- 1.1.6. Underground all new utility lines < 50kV.
- 1.1.7. Execute a drainage covenant for the private maintenance and liability of the private storm water drainpipe within the public alley way.
- 1.1.8. Plant street trees along the property frontage on Gage Avenue and Eastman Avenue. Contact Public Works, Road Maintenance Division (Maintenance District 142), at (562) 862-0517 to obtain the desirable tree species.
- 1.1.9. Execute an Agreement to Improve for the street improvements.
- 1.2. Prior to issuance of a Certificate of Occupancy, construct all required street improvements.

For questions regarding the street conditions, please contact Kevin Godoy of Public Works, Land Development Division, at (626) 458-5932 or kgodoy@pw.lacounty.gov.

2. Traffic

2.1. Prior to issuance of a Certificate of Occupancy:

- 2.1.1. Comply with all the mitigations identified in the approved Traffic Queueing Analysis.
- 2.1.2. Comply with all the mitigations identified in the approved Turning Movement Analysis.
- 2.1.3. Submit a Conceptual Signing and Striping Plan, through EPIC-LA under "Engineering Studies: Traffic Conceptual Plan," directly to Public Works for review and approval.

For questions regarding the traffic conditions, please contact Isuda Esmailpour of Public Works, Traffic Safety and Mobility Division, at (626) 300-4720 or iesmaeilpour@pw.lacounty.gov.

3. Drainage

3.1. Prior to issuance of a grading/building permit:

- 3.1.1. Comply with the approved hydrology study and Low-Impact Development Plan.

For questions regarding the drainage conditions, please contact Lonnie Chung of Public Works, Land Development Division, at (626) 458-7102 or lchung@pw.lacounty.gov.

4. Sewer

4.1. Prior to issuance of a Certificate of Occupancy:

- 4.1.1. Comply with the approved Sewer Area Study.
- 4.1.2. Comply with all the requirements stipulated by the County Sanitation District's Will Serve letter.

For questions regarding the sewer conditions, please contact Pedro Romero of Public Works, Land Development Division, at (626) 458-4957 or promero@pw.lacounty.gov.

Carmen Sainz
February 21, 2024
Page 4

5. Water

5.1. Prior to issuance of a Certificate of Occupancy, comply with all the requirements stipulated by the Will Serve letter issued by the water purveyor.

For questions regarding the water condition, please contact Mr. Godoy of Public Works, Land Development Division, at (626) 458-5932 or kgodoy@pw.lacounty.gov.

If you have any questions or require additional information, please contact Ed Gerlits of Public Works, Land Development Division, at (626) 458-4953 or egerlits@pw.lacounty.gov.

EPIC-LA NUMBER: RPPL2022013731 PROJECT NUMBER: Charter School @
1059 S Gage Avenue
CITY/COMMUNITY: East Los Angeles STATUS: Cleared
PROJECT ADDRESS: 1048 S Eastman Avenue DATE: 01/18/2024
Los Angeles, CA 90023

CONDITIONS

1. Every building constructed shall be accessible to Fire Department apparatus by way of access roadways, with an all-weather surface of not less than 28 width. The roadway shall be extended to within 150 feet of all portions of the exterior walls when measured by an unobstructed route around the exterior of the building. The roadway shall provide approved signs and/or stripping stating "NO PARKING - FIRE LANE" and shall be maintained in accordance with the County of Los Angeles Fire Code.

Access is not accepted as it is proposed to traverse beneath the parking structure. Revise the on-site access to afford fire trucks the capabilities to turn-around or utilize the access as a circulation for egress.

2. Review and approval by the Fire Department's Fire Prevention Engineering Section Building Plan Check Unit is required for this project prior to building permit issuance. Plans should be submitted through EPIC-LA, contact the Commerce office for details on their submittal requirements.
3. Install One (1) PUBLIC fire hydrant in the location provided on the site plan.
4. All fire hydrants shall measure 6"x 4"x 2-1/2" brass or bronze, conforming to current AWWA standard C503 or approved equal, and shall be installed in accordance with the County of Los Angeles Fire Code. Fire Code 501.4
5. This plan is cleared to proceed to public hearing.

For any questions regarding the report, please contact Joseph Youman at (323) 890-4243 or joseph.youman@fire.lacounty.gov.

CASE: RPPL2022013731
APN: 5239-012-028
1059 S GAGE AVE, LOS ANGELES, CA 90023**

Thank you for the opportunity to review the subject project for a Conditional Use Permit. This project proposes to permit a school use on the site.

Public Health recommends the approval of the aforementioned project. This is conditioned by the current use of public water and wastewater systems. The applicant provided a water bill from California Water Service with a date of April 04, 2023. Also, provided a copy of the 2023 Annual Secured Property Tax Bill for fiscal year July 01, 2023, to June 30, 2024, indicating the consolidated sewer service as one of the property direct assessments. Any change of methods for the provisions of potable water and sewage disposal shall invalidate this approval.

- Public Health conditions for this project have been met as of the date of this letter. Public Health recommends the approval of the subject project.
- Public Health requires that the conditions or information requested below are addressed prior to agency approval; therefore, the Department **DOES NOT** recommend clearance of this project until the following conditions are met:

1. Community Protection: Environmental Hygiene

Please Note: The following are general requirements for Noise and Air Quality recommendations for the proposed project.

1.1 Noise

- 1.1.1 The applicant shall abide by the requirements contained in Title 12, Section 12.08, Noise Control Ordinance for the County of Los Angeles (reference available at municode.com). The sections in Title 12 that apply to this project include but are not limited to: 12.08.390 Exterior Noise Standards, 12.08.440 Construction Noise, 12.08.520 Refuse Collection Vehicles, and 12.08.530 Residential Air-Conditioning.

For questions regarding above comments, please contact Makkaphoeum Em of Public Health, Environmental Hygiene Program at (626) 430-5201 or mem@ph.lacounty.gov.

If you have any other questions or require additional information, please contact Veronica Aranda of Public Health, Planning & Land Use Liaison at (626) 430-5201 or varanda@ph.lacounty.gov.

Department of Regional Planning
320 West Temple Street
Los Angeles, California 90012

Dear Ms. Nguyen:

**EXTERA PUBLIC SCHOOLS PROJECT
NOTICE OF INTENT TO ADOPT AN INITIAL STUDY
NEGATIVE DECLARATION
REVIEW COMMENTS**

Thank you for inviting the Los Angeles County Sheriff's Department (Department) to review and comment on the September 2023 Notice of Intent to Adopt an Initial Study/Negative Declaration (IS/ND), for the Extera Public Schools Project (Project). The Project involves consolidating three schools currently serviced by another law enforcement agency and relocating to the Project site, operating as a transitional kindergarten to 8th-grade charter school, within our Department's service area.

Additional resources to address the needs of the development will be reviewed by the County and our Contract Law Enforcement Bureau in coordination with our Station. The Project Applicant should be required to pay development fees associated with the project to address cumulative impacts to our facilities.

Accordingly, the Station reviewed the plan and authored the attached plan review comments (see correspondence dated December 5, 2023, from Captain Brandon R. Dean).

Also, for future reference, the Department provides the following updated address and contact information for all requests for reviews comments, law documents, and other related correspondence:

OFFICE CORRESPONDENCE

DATE: December 4, 2023

FILE:

FROM: BRANDON R. DEAN, CAPTAIN
CHRIS M. KUSAYANAGI, CAPTAIN
EAST LOS ANGELES STATION

TO: TRACEY JUE, DIRECTOR
FACILITIES PLANNING BUREAU

SUBJECT: **REVIEW COMMENTS ON THE INITIAL STUDY/NEGATIVE DECLARATION
FOR EXTERA PUBLIC SCHOOLS PROJECT**

East Los Angeles Sheriff's Station (Station) reviewed the Initial Study/Negative Declaration (IS/ND), dated September 2023, for the Extera Public Schools Project (Project). The proposed project plans to consolidate three existing school and relocate to the proposed Project site; a new charter school servicing 525 students, which would include 22 classrooms, offices, outdoor eating areas and play areas, and a multi-purpose room. The Project proposes to renovate an existing church which includes Building 1, the removal of an existing 509 square-foot covered courtyard and add a new 2,265 square-foot outdoor lunch patio canopy, demolish and rebuild Building 2 in a different location of the Site, and provide 38 vehicular surface parking spaces and 90 bicycle spaces. The renovated Building 1 will provide a total of 8,749 square feet in floor area. The new two-story Building 2 will provide 29,676 square feet of floor area, inclusive of a new 6,276 concrete deck covering the onsite parking spaces. The Site is approximately 50,994 square feet and the Project will provide 38,425 square feet of building floor area which increases the existing floor area by 13,123 square feet.

According to Section 4.14 Population and Housing of the IS/ND page 121, it is noted that the proposed project is anticipated not to induce substantial unplanned population growth in the area, on page 125, the Project would not require any additional officers and also as stated on page 127, cumulative impacts related to police protection services would be less than significant. However, the proposed Project will increase the Station's Services required due to the increase in employees and visitors, daytime and nighttime population, since this type of use is new within the service area and will generate an increased demand for law enforcement services for the Sheriff's Department.

To date, the Station is currently understaffed. However, assigning additional law enforcement personnel to the Station to meet an acceptable service ratio will require modification of the law enforcement services contract, additional support personnel, equipment assets, and due to cumulative impacts in the City may require expansion of the facilities. The potential lack of facility space for additional

law enforcement personnel and/or support staff will need to be addressed to resolve the cumulative impacts. The Project Applicant should be required to pay a development fee for facilities and/or future expansion of the servicing Station, since the project will contribute to cumulative impacts. The environmental impact analysis states that ". the increased demands for additional LASD staffing, equipment, and facilities would be funded via existing mechanisms (e.g. property taxes and government funding) to which the project and related projects would contribute. Therefore, cumulative impacts related to police protection services would be less than significant." However, property taxes and government funding are not a guarantee and would be evaluated annually by the Board of Supervisors and County Chief Executive Officer to determine funding availability. Without the developer fee and the County contributions, the impact remains to be potentially significant.

The Station remains concerned that continued growth and intensification of land use within the service area will ultimately contribute to significant cumulative impacts on our department resources and operations. It is reasonable to expect that continued development will lead to a significant increase in the demand for law enforcement services. Meeting such demands requires additional resources, including patrol deputies, other sworn deputies, support personnel, and attendant assets, such as patrol vehicles, support vehicles, communications equipment, weaponry, office furnishings/equipment, etc.

Due to the cumulative impacts of development projects within East Los Angeles, the calls for service increase in its volume and types. Therefore, the project location may affect the police protection services provided by the Station. Also, the Station reviewed the Plan Set page 20-21 to provide the following comments:

1. *Special Protection Requirements or Recommendations:*

- a. The Department recommends that the principles of Crime Prevention through Environmental Design (CPTED) are incorporated in the design plans. The goal of CPTED is to reduce opportunities for criminal activities by employing physical design features that discourage anti-social behavior, while encouraging the legitimate use of the site. The overall tenets of CPTED include defensible space, territoriality, surveillance, lighting, landscaping, and physical security. The Station recommends installation of security cameras to reduce opportunities for criminal activities, where feasible.
- b. The proposed Project will benefit from a landscaping maintenance program that would minimize opportunities for individuals to hide. The Station also recommends limiting the height of hedge-type plants around security gates to allow visibility from the street and trees should not block line of sight of building addresses from street patrol car height.

- c. The installation of security cameras for a video monitoring system and building lights with motion sensors is beneficial, where feasible. Appropriate gate hardware such as keypad/keycard access, and automatic gate closers can be implemented where feasible to limit unauthorized access and for easy monitoring. In addition, the proposed locations of exterior building security cameras shall be considered in areas where law enforcement can adequately identify vehicle license plates upon entry/exit into the proposed Project with adequate lighting to enhance visibility. Installation of security cameras inside the building at each level's entry/exit points, at the elevators, and at the stairwells can be considered, if applicable and where feasible.
- d. Effective traffic and security plans be developed to address potential issues from vandalism and burglaries at the proposed Project site, in coordination with all jurisdictional approvals.
- e. A Construction Traffic Management Plan should also be established as part of the proposed Project to address construction-related traffic congestion and emergency access issues. If temporary lane closures are necessary for the installation of utilities, emergency access should be maintained at all times. Flag persons and/or detours should be provided as needed to ensure safe traffic operations, and construction signs should be posted to advise motorists of reduced construction zone speed limits.
- f. Provide numerical address on the corner of the building that can be easily viewed from the street.

At this time, the Station has no further comments on the proposed Project. However, the Station reserves the right to amend or supplement our assessment upon subsequent reviews of the proposed Project once additional information becomes available.

Thank you for including the Station in the review process for the proposed Project. Should you have any questions regarding this matter, please contact Kyu Ho Lee, Departmental Facilities Planner I, at (323) 526-5561, of our Facilities Planning Bureau.

Dear Ms. Nguyen:

Second Response Letter to Extera Charter School Project

The Los Angeles County Sanitation Districts (Districts) received a Notice of Intent to adopt a Mitigated Negative Declaration (MND) for the subject project located in the City of Los Angeles on February 26, 2024. The proposed project is located within the jurisdictional boundaries of District No. 2. Previous comments submitted by the Districts in correspondence dated September 29, 2023 (copy enclosed), still apply to the subject project with the following updated information:

- **Section 4.10 Hydrology and Water Quality, page 4-90 and Section 4.19 Utilities and Service Systems, page 4-152:** stated that “Wastewater from the Project Site is conveyed via County sewer infrastructure to the Joint Water Pollution Control Plant which currently provides primary, secondary, and tertiary treatment for a design capacity of 260 million gallons of wastewater per day within a portion of the Los Angeles County Sanitation Districts.” Please note that the A.K. Warren Water Resource Facility (formerly known as the Joint Water Pollution Control Plant) has a design capacity of 400 million gallons per day.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2742, or phorsley@lacsd.org.

Very truly yours,

Patricia Horsley

VIA EMAIL sherrie@ceqa-nepa.com

Ms. Sherrie Cruz
CAJA Environmental Services, LLC
9410 Topanga Canyon Boulevard, Suite 101
Chatsworth, CA 91311

Dear Ms. Cruz:

Will Serve Letter for Extera Public Schools Project

The Los Angeles County Sanitation Districts (Districts) received your will serve letter request for the subject project located in the City of Los Angeles on September 26, 2023. The proposed project is located within the jurisdictional boundaries of District No. 2. We offer the following comments regarding sewerage service:

1. The wastewater flow originating from the proposed project will discharge to a local sewer line, which is not maintained by the Districts, for conveyance to the Districts' Jane Street Branch Trunk Sewer, located in South Hicks Avenue at East Olympic Boulevard. The Districts' 12-inch diameter trunk sewer has a capacity of 2.1 million gallons per day (mgd) and conveyed a peak flow of 0.39 mgd when last measured in 2016.
2. The wastewater generated by the proposed project will be treated at the Joint Water Pollution Control Plant located in the City of Carson, which has a capacity of 400 mgd and currently processes an average flow of 243.1 mgd.
3. The expected increase in average wastewater flow from the project, described in the request letter as 38,425 square feet private school, is 2,625 gallons per day, after a 25,302 square feet private school building on the project site is demolished. For a copy of the Districts' average wastewater generation factors, go to www.lacsd.org, under Services, then Wastewater Program and Permits and select Will Serve Program, and click on the [Table 1, Loadings for Each Class of Land Use](#) link.
4. The Districts are empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the Districts' Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. This connection fee is used by the Districts for its capital facilities. Payment of a connection fee may be required before this project is permitted to discharge to the Districts' Sewerage System. For more information and a copy of the Connection Fee Information Sheet, go to www.lacsd.org, under Services, then Wastewater (Sewage) and select Rates & Fees. In determining the impact to the Sewerage System and applicable connection fees, the Districts will determine the user category (e.g. Condominium, Single Family Home, etc.) that best represents the actual or anticipated use of the parcel(s) or facilities on the parcel(s) in the development. For more specific information regarding the connection fee application procedure and fees, please contact the Districts' Wastewater Fee Public Counter at (562) 908-4288, extension 2727.

5. In order for the Districts to conform to the requirements of the Federal Clean Air Act (CAA), the capacities of the Districts' wastewater treatment facilities are based on the regional growth forecast adopted by the Southern California Association of Governments (SCAG). Specific policies included in the development of the SCAG regional growth forecast are incorporated into clean air plans, which are prepared by the South Coast and Antelope Valley Air Quality Management Districts in order to improve air quality in the South Coast and Mojave Desert Air Basins as mandated by the CAA. All expansions of Districts' facilities must be sized and service phased in a manner that will be consistent with the SCAG regional growth forecast for the counties of Los Angeles, Orange, San Bernardino, Riverside, Ventura, and Imperial. The available capacity of the Districts' treatment facilities will, therefore, be limited to levels associated with the approved growth identified by SCAG. As such, this letter does not constitute a guarantee of wastewater service but is to advise the developer that the Districts intend to provide this service up to the levels that are legally permitted and to inform the developer of the currently existing capacity and any proposed expansion of the Districts' facilities.

If you have any questions, please contact the undersigned at (562) 908-4288, extension 2742, or phorsley@lacsdsd.org.

Very truly yours,

Patricia Horsley

OFFICE OF THE SHERIFF

COUNTY OF LOS ANGELES

HALL OF JUSTICE

ROBERT G. LUNA, SHERIFF

April 3, 2024

Ms. Christina Nguyen, Planner
County of Los Angeles
Department of Regional Planning
320 West Temple Street
Los Angeles, California 90012

Dear Ms. Nguyen:

**EXTERA CHARTER SCHOOL PROJECT
NOTICE OF INTENT TO ADOPT A
MITIGATED NEGATIVE DECLARATION
REVIEW COMMENTS**

Thank you for inviting the Los Angeles County Sheriff's Department (Department) to review and comment on the March 2024 Notice of Intent to Adopt an Initial Study/Mitigated Negative Declaration (IS/MND), for the Extera Charter School Project (Project). The Project involves consolidating four schools relocating to the Project site, operating as transitional kindergarten to 8th grade charter school within our Department's service area.

As noted, Section 3.4.1 Project Overview, page 3-7, the proposed school location would accommodate students from Breed Street campus, Lorena Street campus and 2nd Street campus, which currently receive the police protection service from LAPD Hollenbeck Division, and Eastman campus, would transfer school population to the project site therefore the Project would require additional police protection services from the Station.

Also noted on page 4-133, cumulative impacts related to police protection services would be less than significant. However, due to the change in land use, the proposed Project will increase the employees and visitors, daytime and nighttime population of the Station's service area, likewise due to the proximity to the residential area, traffic mitigation should be required for the start and end of the school, drop off and pickup, security and protection during school hours, as well as special events. Additionally, as a result of the increase of school events/activities, it will also generate an increase in demand

211 WEST TEMPLE STREET, LOS ANGELES, CALIFORNIA 90012

A Tradition of Service
— Since 1850 —

for law enforcement services. Applicant shall contact the Station for any permits required to hold large events at the Project site and discuss any modifications to the Law Enforcement Services Agreement with our Contract Law Enforcement Bureau.

To date, the East Los Angeles Sheriff's Station is currently understaffed. However, assigning additional law enforcement personnel to the East Los Angeles Sheriff's Station to meet an acceptable service ratio will require modification of the law enforcement services contract, Additional resources to address the needs of the development will need to be reviewed by the County and our Contract Law Enforcement Bureau in coordination with our Station. The Project Applicant will be required to pay all applicable development fees, and law enforcement facilities mitigation fees, associated with the project as applicable.

Also, for future reference, the Department provides the following updated address and contact information for all requests for reviews comments, law documents, and other related correspondence:

RE: Extera Charter School Project–
Mitigated Negative Declaration (MND)
SCH #2024021233
GTS #07-LA-2024-04469
LA-5/PM 14.57

Dear Christina Nguyen,

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced project. The County of Los Angeles proposes a Charter School, consisting of a transitional kindergarten (TK) to 8th grade charter school serving a maximum enrollment of 525 students. The project would include 22 classrooms, offices, outdoor eating areas and play areas, a multi-purpose room, and 38 vehicular surface parking spaces with 90 bicycle spaces. Staff would occupy the majority of vehicular parking spaces. The Initial Study reports that the Santa Ana Freeway (I-5) is 150 feet south of the Site.

After reviewing the MND, Caltrans has the following comments:

The MND finds that the project will have a less than significant impact with a program, plan, ordinance, or policy addressing the circulation system which includes bicycle and pedestrian facilities. Caltrans recommends the proposed project follow the local and regional guidance on bike and pedestrian infrastructure. However, Caltrans does suggest extending the existing bike boulevard on Rowan Ave to reach south of Whittier Blvd, creating a bike facility on Whittier Blvd, and upgrading the nearest crosswalks to continental ladder. Although it is not in the project area, additional design elements like Leading Pedestrian Interval (LPI) signals at the nearest intersections would improve

Christina Nguyen

April 2, 2024

Page 2

safety conditions for all road users. Enhancing the safety elements of the nearby roadways will greatly benefit prospective students who walk or bike to school.

If surface parking must be built, it is recommended that it not face the street directly. By shifting the parking to the rear or interior of the project site, a more inviting streetscape can be created. A more active frontage against the sidewalk, can encourage both recreational and transportation walking. These urban design principles can affect mode choice and help the State of California achieve its goals to improve health and reduce Greenhouse Gases (GHG).

As a reminder, Senate Bill 743 (2013) has codified into California Environmental Quality Act (CEQA) law and mandated that CEQA review of transportation impacts of proposed development be modified by using Vehicle Miles Traveled (VMT) as the primary metric in identifying transportation impacts for all future development projects. Caltrans' targets of tripling trips made by bicycle, doubling trips made by walking and public transit, and a 15% reduction in statewide VMT can be achieved through collaborative improvements to the state-wide transportation network.

Any transportation of heavy construction equipment and/or materials which requires use of oversized-transport vehicles on State highways will need a Caltrans transportation permit. Caltrans engineers are available for consultation of a designated truck route for construction trucks to transport construction equipment to and from the project sites. It is recommended that large size truck trips be limited to off-peak commute periods, and that construction trucks are covered with tarpaulin to avoid debris spillage onto State Highways.

If you have any questions, please contact project coordinator Frances Duong, at frances.duong@dot.ca.gov and refer to GTS #07-LA-2024-04469.

Sincerely,

Miya Edmonson
LDR/CEQA Branch Chief

Cc: State Clearinghouse

Extera Public Schools – 1059 S. Gage

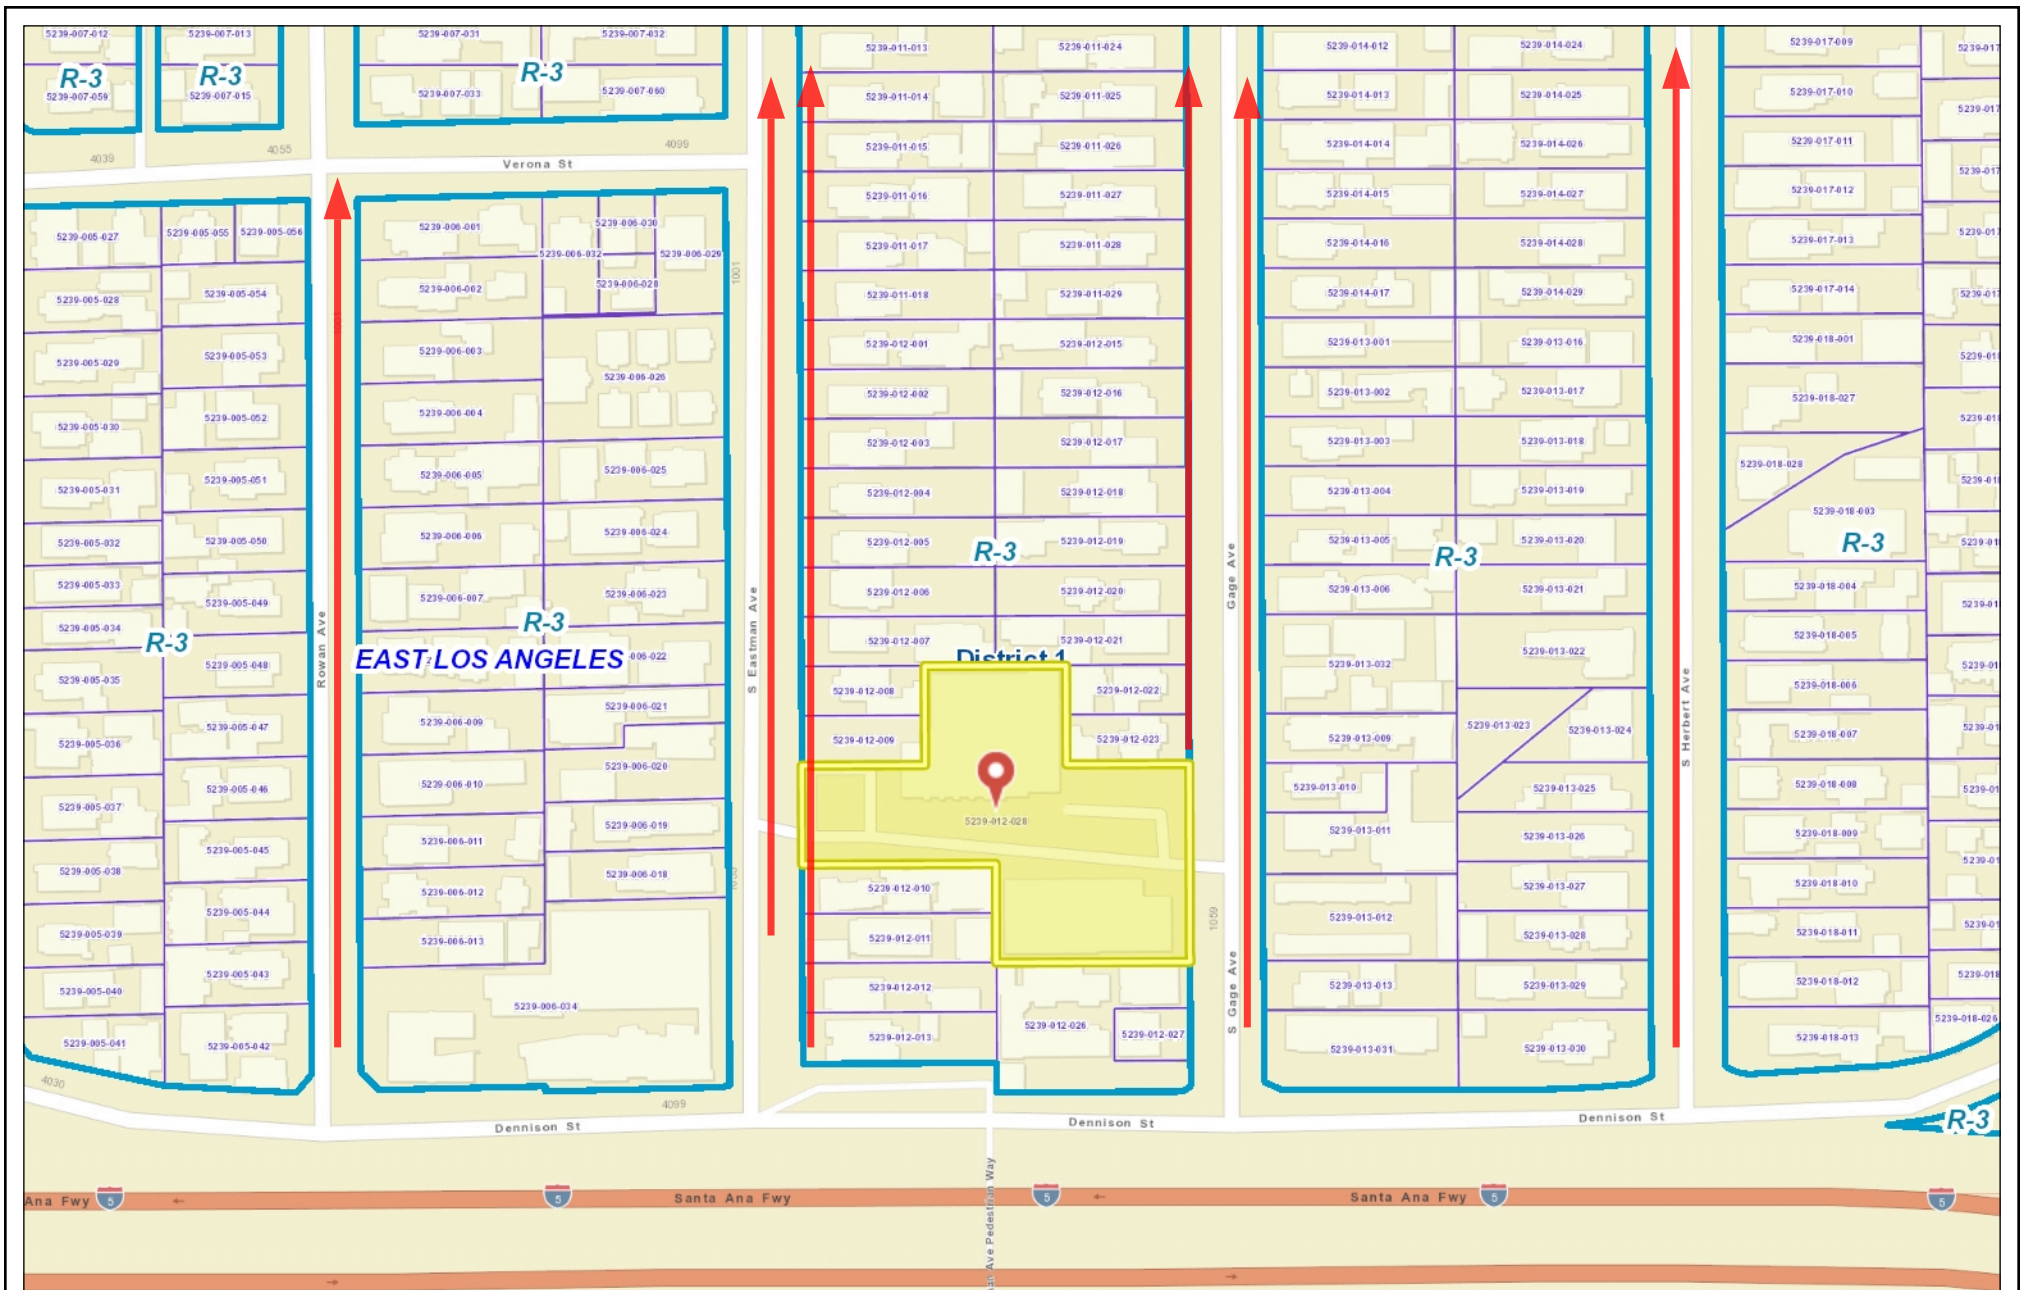

Community Outreach Summary

Extera held a community art show on June 22, 2022, emphasizing the importance of cultural events in underserved areas. The event showcased student artwork celebrating Boyle Heights and East LA's history, with music, dance performances, and interactive art by Extera students. Invitations were sent to neighbors and Supervisor Hilda Solis's office, drawing a significant community presence. Additionally, a meeting for Extera families was held on January 19, 2023, providing project overview and updates regarding the County permitting process.

On January 22 and February 4, 2023, Extera conducted community canvassing events, resulting in 145 signatures supporting the project. At each event, 10 to 15 volunteers actively engaged with the community by walking and knocking door-to-door, fostering meaningful connections and showcasing the enthusiasm surrounding the project. Volunteers engaged in meaningful conversations, distributing flyers containing project renderings and comprehensive information about the project and Extera's mission. The positive feedback received underscored the community's interest and endorsement, with many expressing enthusiasm for the prospect of having this unique educational opportunity in their neighborhood.

Extera held a third canvassing event on February 24, 2024, receiving 31 signed support letters from residents and 12 signed support letters from local businesses in key neighborhoods surrounding the Gage site. During the event Extera engaged with past petition signers as well as new residents and local businesses. Streets canvassed include businesses along Whittier Blvd and residents along Gage Ave., Herbert Ave., Record Ave., Eastman Ave., Rowan Ave., Townsend Ave., Dennison St., and Dittman Ave.

On March 5th, Extera engaged with the Maravilla Community Advisory Committee (MCAC) in a productive session marked by constructive and open dialogue. Extera carefully listened to the community's concerns. On Saturday, March 16th at 10:00 am, Extera hosted a community event at the project site, Oasis of Mercy church to hear from its neighbors and discuss Extera's academic program and project design. 12 neighbors came together to engage in meaningful conversations focused on partnership and community benefits. On April 2nd, Extera reengaged with Maravilla Community Advisory Committee to continue the dialogue and address concerns raised during the March 5th Board presentation.

Dear Members of the Regional Planning Commission,

I am writing to convey my endorsement for the issuance of a Conditional Use Permit for the proposed new Extera facility. As a dedicated member of the Board of Directors for Extera Public Schools, I have had the privilege of witnessing the transformative impact our school has had on the community, and I firmly believe that the approval of the permit is paramount for the continued growth and success of our institution.

From a professional standpoint, the strategic location of the proposed facility in close proximity to transit hubs reflects Extera's commitment to accessibility and convenience for our students and their families. The ease of access not only enhances the overall educational experience but also underscores our commitment to serving the needs of the community efficiently and effectively.

Our focus on academic excellence, coupled with our dedication to community engagement and cultural sensitivity, has elevated our school as a beacon of hope and opportunity for residents in historically underserved communities.

The proposed new facility is not merely an expansion but a strategic investment in the future of Boyle Heights. It represents an opportunity to extend our reach, broaden our impact, and further solidify our role as a catalyst for positive change in the community.

In closing, I implore you to support the issuance of the Conditional Use Permit for Extera's new facility. Your support in this matter is not just an investment in a building; it is an investment in the future of Boyle Heights and the countless lives our school will continue to impact positively.

Thank you for your time, consideration, and dedication to fostering educational excellence in our community.

Sincerely,

Diane Alvarado

Dear Members of the Regional Planning Commission,

I am writing to convey my endorsement for the issuance of a Conditional Use Permit for the proposed new Extera facility. As the president of the Board of Directors for Extera Public Schools, I have had the privilege of witnessing the transformative impact our school has had on the community, and I firmly believe that the approval of the permit is paramount for the continued growth and success of our institution.

From a professional standpoint, the strategic location of the proposed facility in close proximity to transit hubs reflects Extera's commitment to accessibility and convenience for our students and their families. Dear Members of the Regional Planning Commission,

I am writing to express my sincere support for the issuance of a Conditional Use Permit for the proposed new Extera Public School facility. As both a dedicated staff member of Extera and a member of the local community, I know the invaluable impact our school has had and continues to have on the lives of our students.

Extera has been an integral part of Boyle Heights for many years, and our commitment to providing quality education services is deeply rooted in both professional dedication and personal investment. As a staff member, I have witnessed firsthand the positive impact that easy accessibility has on our students and their families and the site's location offers that. The ability to reach the school conveniently enhances the overall educational experience and ensures that more community members can benefit from the education we provide.

Extera has consistently demonstrated its commitment to bridging educational gaps and empowering our youth with the knowledge and skills they need to succeed. Granting the Conditional Use Permit for the new facility will not only expand our capacity to serve the community but will also amplify the positive impact we have on the lives of our students.

The school's presence in Boyle Heights is not just an investment in education; it is an investment in the future of our community.

Thank you for your time and consideration.

Sincerely,

A handwritten signature in black ink, appearing to be a stylized name with a long horizontal stroke at the end.

Dear Members of the Regional Planning Commission,

I am writing to express my sincere support for the issuance of a Conditional Use Permit for the proposed new Extera Public School facility. As both a dedicated staff member of Extera and a member of the local community, I know the invaluable impact our school has had and continues to have on the lives of our students.

Extera has been an integral part of Boyle Heights for many years, and our commitment to providing quality education services is deeply rooted in both professional dedication and personal investment. As a staff member, I have witnessed firsthand the positive impact that easy accessibility has on our students and their families and the site's location offers that. The ability to reach the school conveniently enhances the overall educational experience and ensures that more community members can benefit from the education we provide.

Extera has consistently demonstrated its commitment to bridging educational gaps and empowering our youth with the knowledge and skills they need to succeed. Granting the Conditional Use Permit for the new facility will not only expand our capacity to serve the community but will also amplify the positive impact we have on the lives of our students.

The school's presence in Boyle Heights is not just an investment in education; it is an investment in the future of our community.

Thank you for your time and consideration.

Sincerely,

Genesis Cortes

Dear Members of the Regional Planning Commission,

I am writing to you as the proud owner of a local business, closely adjacent to the 1059 S Gage Avenue proposed Extera site. I consider my business a local establishment deeply rooted in the Boyle Heights community. I want to express my excitement and support for the approval of the Conditional Use Permit for the construction of the Extera Public Schools new facility. As a business owner who cares deeply about the community, I believe that the presence of Extera Public Schools in Boyle Heights brings immense hope and positive prospects for our neighborhood.

Extera coming to our neighborhood represents an investment in the educational well-being of our youth. The presence of a neighbor like Extera not only enriches the academic landscape but also fosters a sense of pride and optimism among us that serves everyone. For example, this optimism translates into increased community engagement and support for local businesses like mine.

This is not just about a school building; it's about investing in the future of Boyle Heights and creating an environment where local businesses, residents, and educational institutions collaborate for the greater good. I sincerely hope you will support this project.

Thank you for your time and consideration.

Sincerely,

Rosa Castaneda

Dear Members of the Regional Planning Commission,

I am writing to express my support for the issuance of a Conditional Use Permit for the proposed Extera Public Schools new facility on South Gage Avenue in Boyle Heights. As a proud resident of East Los Angeles, I have witnessed the positive impact Extera has had on our community over the years, and I believe that granting the permit for their new facility will contribute very much to our neighborhood.

Extera has a long-standing presence in Boyle Heights, providing a nurturing learning environment.

Granting the Conditional Use Permit for their new facility will not only enhance educational options in Boyle Heights but also contribute to the well-being of our community. I am confident that with your support, Extera will continue to be an invaluable asset to our beloved Boyle Heights.

Thank you for your time and consideration.

Estimados Miembros de la Comisión del Departamento de Planeo Regional,

Escribo para expresar mi apoyo para la emisión de un Permiso de Uso Condicional para la propuesta nueva instalación de la escuela charter pública Extera. Como orgulloso residente de East Los Angeles, creo firmemente que otorgar el permiso para su nueva instalación contribuirá significativamente al enriquecimiento de nuestro vecindario.

Extera tiene una presencia de larga data en Boyle Heights, proporcionando servicios educativos de calidad que van más allá de los estándares convencionales.

Además, Extera es más que una institución educativa; es una colaboradora con la comunidad. Su compromiso con el servicio y la participación comunitaria garantiza que Extera será un excelente vecino para los residentes de Boyle Heights.

Su apoyo en la emisión del Permiso de Uso Condicional, sin duda, fortalecerá nuestra comunidad.

Gracias por su tiempo y consideración.

Estimados Miembros de la Comisión del Departamento de Planeo Regional,

Escribo para expresar mi apoyo para la emisión de un Permiso de Uso Condicional para la propuesta nueva instalación de la escuela charter pública Extera. Como orgulloso residente de East Los Angeles, creo firmemente que otorgar el permiso para su nueva instalación contribuirá significativamente al enriquecimiento de nuestro vecindario.

Extera tiene una presencia de larga data en Boyle Heights, proporcionando servicios educativos de calidad que van más allá de los estándares convencionales.

Además, Extera es más que una institución educativa; es una colaboradora con la comunidad. Su compromiso con el servicio y la participación comunitaria garantiza que Extera será un excelente vecino para los residentes de Boyle Heights.

Su apoyo en la emisión del Permiso de Uso Condicional, sin duda, fortalecerá nuestra comunidad.

Gracias por su tiempo y consideración.

Date: Wednesday, April 3, 2024 10:07:36 AM

CAUTION: External Email. Proceed Responsibly.

We oppose this project for several reasons:

This project will bring a big increase in daily traffic to a residential community. The daily dropping off and picking up of students will have hundreds of cars idling emitting exhaust, oil and rubber to our community. Also a large increase in noise to a quiet community. The Extera students are not from families in this community, they are driven daily and this will cause daily traffic congestion to our residential street.

Also has this old church and area been tested for the lead contamination from the over 40 years of operation of the Exide battery recycling plant that was finally closed?

CAUTION: External Email. Proceed Responsibly.

Good evening,

We're a group of residents, mostly parents from the Boyle Heights and East Los Angeles area. We would like to express our opposition to the proposed project. The project does not consider the existing educational landscape, this specific zone is over saturated with schools, with current declining student enrollment, there is no demand for a new school. Opening a new school that in a few years may close as a result of declining enrollment undermines the needs of our community. The proponents are seeking a project that does not reflect the needs of our community. Opening a new school in a community that is over saturated with schools is irresponsible. Adding a new school, will add more traffic, more noise and foot traffic to a dense residential community.

In addition to residential, community concerns, we would like to raise student concerns; charter schools do not abide by environmental safeguards that protect students. We're concerned that this area is not safe or suitable for children.

Thank you for your time and consideration.

Eastside Padres Contra La Privatizacion.

**SUPPLEMENTAL
REPORT TO THE REGIONAL PLANNING COMMISSION**

DATE ISSUED: April 11, 2024

HEARING DATE: April 17, 2024 AGENDA ITEM: 8

PROJECT NUMBER: PRJ2022-004416-(1)

PERMIT NUMBER(S): Conditional Use Permit (“CUP”) No. RPPL2022013731
Environmental Assessment No. RPPL2022005113

SUPERVISORIAL DISTRICT: 1

PROJECT LOCATION: 1059 South Gage Avenue

OWNER: Oasis of Mercy

APPLICANT: Extera Public Schools

CASE PLANNER: Christina Nguyen, Planner
Cnguyen@planning.lacounty.gov

RECOMMENDATION

LA County Planning staff (“Staff”) recommends:

- **ADOPTION** of the Mitigated Negative Declaration along and the Mitigation Monitoring Reporting Program; and
- **APPROVAL** of Project Number PRJ2022-004416-(1), CUP Number RPPL2022013731, based on the Findings attached to the Report to the Regional Planning Commission dated April 4, 2024 (Exhibit C – Findings), and subject to the Draft Conditions of Approval attached to the Report to the Regional Planning Commission dated April 4, 2024 (Exhibit D – Conditions of Approval).

Staff recommends the following motions:

CEQA:

I MOVE THAT THE REGIONAL PLANNING COMMISSION CLOSE THE PUBLIC HEARING AND ADOPT THE MITIGATED NEGATIVE DECLARATION ALONG WITH THE REQUIRED FINDINGS OF FACT AND ADOPT THE MITIGATION MONITORING AND REPORTING PROGRAM FOR THE PROJECT PURSUANT TO STATE AND LOCAL CEQA GUIDELINES.

ENTITLEMENT:

I MOVE THAT THE REGIONAL PLANNING COMMISSION APPROVE CONDITIONAL USE PERMIT NO. RPPL2022013731, SUBJECT TO THE ATTACHED FINDINGS AND CONDITIONS.

PROJECT DESCRIPTION

A request by Extera Public Schools (“Permittee”) for a CUP to establish and operate a charter school (“Project”) in the R-3 (Limited Density Multiple Residence) Zone pursuant to County Code Section 22.18.030 (Land Use Regulations for Zones R-A, R-1, R-2, R-3, R-4, and R-5).

CLARIFICATIONS

Staff would like to clarify the following:

1. The third paragraph on page seven of the Report to the Regional Planning Commission dated April 4, 2024, states “On March 6, 2024, the Permittee presented the Project to the Maravilla Community Advisory Committee...,” instead of March 6, 2024, the date of this event was March 5, 2024.
2. Finding No. 11 – Community Outreach, on page four of the Findings attached to the Report to the Regional Planning Commission dated April 4, 2024 (Exhibit C – Findings), summarizes the Permittee’s canvassing activities in the neighborhoods surrounding the Project Site and identifies the streets that were canvassed by the Permittee from January 22, 2023, to February 24, 2024. In addition to the streets mentioned in Finding No. 11, there were several others that were also canvassed, which are listed below:
 - Businesses along Whittier Boulevard
 - Record Avenue
 - Townsend Avenue
 - Dennison Avenue
 - Dittman Avenue

RESPONSES TO COMMENTS RECEIVED

The Permittee provided responses to comments submitted by the Los Angeles County Sanitation District, the California Department of Transportation, the Los Angeles Sheriff’s Department, the Eastside Padres Contra La Privatization, and Carlos Montes. The Permittee’s response letter is attached.

ADDITIONAL COMMENTS RECEIVED

Staff received one additional email in opposition to the Project. The email is attached.

Extera Public Schools Project

Project No. PRJ2022-004416-(1)
Conditional Use Permit No. RPPL2022013731
Environmental Plan No. RPPL2023005113

Introduction

The County of Los Angeles (County) prepared a Mitigated Negative Declaration (MND) for the **Extera Public Schools Project** pursuant to the California Environmental Quality Act of 1970 (Pub. Res. Code § 21000 *et seq.*) (CEQA), CEQA Guidelines¹ and the County’s environmental review procedures.

The Project is located at 1059 S. Gage Avenue, Los Angeles, CA 90023 (Project Site).

The Project consists of a transitional kindergarten (TK) to 8th grade charter school serving 525 students, which will include 22 classrooms, offices, outdoor eating areas and play areas, and a multi-purpose room. The Project proposes to: (i) renovate Building 1, including the removal of an existing 509 square-foot covered courtyard and add a new 2,265 square-foot outdoor lunch patio; (ii) demolish and rebuild a new Building 2 in a different location of the Site; and (iii) provide 33 vehicular surface parking spaces and 90 bicycle spaces (88 short-term and two long-term). The renovated Building 1 will provide a total of 8,749 square feet in floor area. The new two-story Building 2 will provide 29,676 square feet of floor area, inclusive of a new 6,276 square-foot concrete deck covering the onsite parking spaces. In total, the Project will provide 38,425 square feet of building floor area or an Floor Area Ratio (“FAR”) of 0.754:1, which increases the existing floor area by 13,123 square feet. (the Project).

The MND was released by the County for public review on March 4, 2024 for a 30-day review period ending on April 3, 2024.

List of Comments

The County received the following written Comment Letters related to the Project:

- Los Angeles County Sanitation Districts, March 28, 2024

¹ Reference to CEQA Guidelines in the Response to Comments shall mean 14 C.C.R. § 15000 *et seq.*

- California Department of Transportation (Caltrans), April 2, 2024
- Los Angeles County Sheriff's Department, April 3, 2024
- Eastside Padres Contra La Privatizacion, April 3, 2024
- Carlos Montes, April 3, 2024

Responses to the comments are provided below.

The individual comments within the Comment Letters will be provided and identified as **Comment "X"**.

The individual responses within the Comment Letters will be identified as **Response to Comment "X"**.

Conclusion

In summary, based on our technical review, the Comment Letters do not raise any new CEQA issues and do not require any change to any conclusion identified in the MND. The Comment Letters do not provide substantial evidence or a fair argument that further review under CEQA is required, or that the Project may have a significant environmental impact. As analyzed in the MND, the whole of the record supports the conclusion that the Project would result in impacts below a level of significance.

Seth Wulkan

Project Manager

CAJA Environmental Services, LLC

9410 Topanga Canyon Blvd., Suite 101, Chatsworth, California 91311

Seth@ceqa-nepa.com

310-469-6704 (direct)

310-469-6700 (office)

CAJA is an environmental consulting firm that specializes in environmental planning, research, and documentation for public and private sector clients. For over 36 years, CAJA and its predecessor company Christopher A. Joseph & Associates have offered a broad range of environmental consulting services with a particular emphasis on CEQA and NEPA documentation.

Seth Wulkan has over 17 years of experience and is responsible for all aspects of preparation of environmental review documents. He began his career with CAJA in 2007. Mr. Wulkan is proficient in drafting all sections of environmental review documents; incorporating technical reports into documents; and personally corresponding with public and private sector clients. Mr. Wulkan regularly participates in team strategy meetings from the beginning of the environmental review process through the final project hearings. Mr. Wulkan graduated with college honors from UCLA and completed a Certificate Program in Sustainability at UCLA Extension.

Comment Letter Districts

Los Angeles County Sanitation Districts

March 28, 2024

Comment Districts-1

The Los Angeles County Sanitation Districts (Districts) received a Notice of Intent to adopt a Mitigated Negative Declaration (MND) for the subject project located in the City of Los Angeles on February 26, 2024. The proposed project is located within the jurisdictional boundaries of District No. 2. Previous comments submitted by the Districts in correspondence dated September 29, 2023 (copy enclosed), still apply to the subject project with the following updated information:

Response to Comment Districts-1

The comment provides an introduction and states that the Project Site is within the jurisdictional boundaries of District No. 2. The comment also refers to a previous Districts correspondence dated September 29, 2023, which was included as Appendix L-1 to the MND (Wastewater Response, Los Angeles Sanitation Districts, September 29, 2023).

As noted in the correspondence, the Districts are empowered by the California Health and Safety Code to charge a fee to connect facilities (directly or indirectly) to the Districts' Sewerage System or to increase the strength or quantity of wastewater discharged from connected facilities. The Project would comply with all Districts requirements for connecting to the Districts' infrastructure.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Districts-2

Section 4.10 Hydrology and Water Quality, page 4-90 and Section 4.19 Utilities and Service Systems, page 4-152: stated that "Wastewater from the Project Site is conveyed via County sewer infrastructure to the Joint Water Pollution Control Plant which currently provides primary, secondary, and tertiary treatment for a design capacity of 260 million gallons of wastewater per day within a portion of the Los Angeles County Sanitation Districts." Please note that the A.K. Warren Water Resource Facility (formerly known as the Joint Water Pollution Control Plant) has a design capacity of 400 million gallons per day.

Response to Comment Districts-2

The Districts' comment clarifies that the A.K. Warren Water Resource Facility (formerly known as the Joint Water Pollution Control Plant) has a design capacity of 400 million gallons per day (mgd), whereas the MND listed the capacity as 260 mgd. This provides an increase in the capacity of the facility by 140 mgd.

As identified on Table 4.19-1 of the MND, the Project would generate approximately 9,235 gallons of wastewater per day (or 0.009 mgd), net amount considering the removal of the existing church. With a remaining daily capacity of 400 mgd, the A.K. Warren Water Resource Facility would have

adequate capacity to serve the Project. Therefore, Project impacts related to wastewater treatment would be less than significant.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Letter Caltrans

California Department of Transportation

April 2, 2024

Comment Caltrans-1

Thank you for including the California Department of Transportation (Caltrans) in the environmental review process for the above referenced project. The County of Los Angeles proposes a Charter School, consisting of a transitional kindergarten (TK) to 8th grade charter school serving a maximum enrollment of 525 students. The project would include 22 classrooms, offices, outdoor eating areas and play areas, a multi-purpose room, and 38 vehicular surface parking spaces with 90 bicycle spaces. Staff would occupy the majority of vehicular parking spaces. The Initial Study reports that the Santa Ana Freeway (I-5) is 150 feet south of the Site.

After reviewing the MND, Caltrans has the following comments:

Response to Comment Caltrans-1

The comment provides an introduction and summarizes the Project's characteristics.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Caltrans-2

The MND finds that the project will have a less than significant impact with a program, plan, ordinance, or policy addressing the circulation system which includes bicycle and pedestrian facilities. Caltrans recommends the proposed project follow the local and regional guidance on bike and pedestrian infrastructure. However, Caltrans does suggest extending the existing bike boulevard on Rowan Ave to reach south of Whittier Blvd, creating a bike facility on Whittier Blvd, and upgrading the nearest crosswalks to continental ladder.

Response to Comment Caltrans-2

The comment recommends that the Project follow local and regional guidance on bike and pedestrian infrastructure. The Project proposes the following infrastructure improvements as part of its Conceptual Signing and Striping Plan, which is being reviewed by the County Of Los Angeles, Department Of Public Works:

- The Project proposed to install yellow continental crosswalk and re-stripe limit line on Eastman Avenue and Gage Avenue, where each street intersects with Dennison Street.
- The Project proposed to install yellow continental crosswalk on Verona Street at Eastman Avenue.
- The Project proposes to install red curbs at the inbound driveway on Gage Avenue and outbound driveway on Eastman Avenue, to increase visibility.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Caltrans-3

Although it is not in the project area, additional design elements like Leading Pedestrian Interval (LPI) signals at the nearest intersections would improve safety conditions for all road users. Enhancing the safety elements of the nearby roadways will greatly benefit prospective students who walk or bike to school.

Response to Comment Caltrans-3

The Project proposes infrastructure improvements as part of its Conceptual Signing and Striping Plan, which is being reviewed by the County Of Los Angeles, Department Of Public Works, as discussed above.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Caltrans-4

If surface parking must be built, it is recommended that it not face the street directly. By shifting the parking to the rear or interior of the project site, a more inviting streetscape can be created. A more active frontage against the sidewalk, can encourage both recreational and transportation walking. These urban design principles can affect mode choice and help the State of California achieve its goals to improve health and reduce Greenhouse Gases (GHG).

Response to Comment Caltrans-4

All proposed parking would be located internally onsite and not on the street. The parking spaces would be setback from Gage Avenue property line by a 20 foot (south parking row) and 26 foot (north parking row) landscape buffer and transformer vault. The additional parking would be in the north central portion of the Site underneath the play area structure. Therefore parking would not face the street directly. The landscaping would provide an inviting streetscape.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Caltrans-5

As a reminder, Senate Bill 743 (2013) has codified into California Environmental Quality Act (CEQA) law and mandated that CEQA review of transportation impacts of proposed development be modified by using Vehicle Miles Traveled (VMT) as the primary metric in identifying transportation impacts for all future development projects. Caltrans' targets of tripling trips made by

bicycle, doubling trips made by walking and public transit, and a 15% reduction in statewide VMT can be achieved through collaborative improvements to the state-wide transportation network.

Response to Comment Caltrans-5

As noted on page 4-138 of the MND and analyzed in Appendix J-1 to the MND (Transportation Impact Analysis Screen-Out, Linscott, Law & Greenspan, January 3, 2024), the County's Transportation Impact Analysis (TIA) Guidelines provide screening criteria for purposes of assessing whether a vehicles miles traveled (VMT) analysis is required to evaluate potential transportation impacts related to development projects. Based on the Project's proximity to public transit and satisfying the related screening criteria provided in the County's TIA Guidelines, it is determined that the Project is presumed to have a less than significant transportation impact.

The Project is the type of land use development that is encouraged by the SCAG Regional Transportation Plan/Sustainable Communities Strategy (RTP/SCS) to reduce VMT and expand multi-modal transportation options in order for the region to achieve the GHG reductions from the land use and transportation sectors required by SB 375, which, in turn, advances the state's long-term climate policies.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Caltrans-6

Any transportation of heavy construction equipment and/or materials which requires use of oversized-transport vehicles on State highways will need a Caltrans transportation permit. Caltrans engineers are available for consultation of a designated truck route for construction trucks to transport construction equipment to and from the project sites. It is recommended that large size truck trips be limited to off-peak commute periods, and that construction trucks are covered with tarpaulin to avoid debris spillage onto State Highways.

Response to Comment Caltrans-6

The Project would request any required permits during construction for any oversized-transport vehicles. Materials deliveries and other large truck movements will occur at off-peak commute periods to the extent feasible.

The Project will coordinate with LADPW on construction and best management practices, including but not limited to: install appropriate construction related traffic signs around the site to ensure pedestrian and vehicle safety.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Letter Sheriff

Los Angeles County Sheriff's Department

April 3, 2024

Comment Sheriff-1

Thank you for inviting the Los Angeles County Sheriff's Department (Department) to review and comment on the March 2024 Notice of Intent to Adopt an Initial Study/Mitigated Negative Declaration (IS/MND), for the Extera Charter School Project (Project). The Project involves consolidating four schools relocating to the Project site, operating as transitional kindergarten to 8th grade charter school within our Department's service area.

Response to Comment Sheriff-1

The comment provides an introduction and summary of consolidated school operations.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Sheriff-2

As noted, Section 3.4.1 Project Overview, page 3-7, the proposed school location would accommodate students from Breed Street campus, Lorena Street campus and 2nd Street campus, which currently receive the police protection service from LAPD Hollenbeck Division, and Eastman campus, would transfer school population to the project site therefore the Project would require additional police protection services from the Station.

Response to Comment Sheriff-2

The Project will have students, teachers, and staff during the day. As such, the Project could potentially increase the number of police service calls due to an increase in onsite persons as compared to the existing church use. However, the Project would not result in the need for, new or expansion of police protection facilities. The Project would also contribute to the General Fund, a portion of which is allocated to the Sheriff's Department and other public services.

Additional police protection services is not an environmental issue, but rather an economic and public policy issue. Under PRC Section 21082.2(c), "[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts."

Comment Sheriff-3

Also noted on page 4-133, cumulative impacts related to police protection services would be less than significant. However, due to the change in land use, the proposed Project will increase the employees and visitors, daytime and nighttime population of the Station's service area, likewise due to the proximity to the residential area, traffic mitigation should be required for the start and

end of the school, drop off and pickup, security and protection during school hours, as well as special events.

Response to Comment Sheriff-3

The student dropoff/pickup procedure is discussed page 4-145 of the MND and analyzed in Appendix J-2 to the MND (Vehicle Queuing Analysis, Linscott, Law & Greenspan, January 3, 2024).

For student drop-off and pick-up operations, motorists will be directed to enter the site's dropoff/pick-up area by making a right-turn from Gage Avenue, travel through the onsite drop-off/pickup lane, complete the student drop-off or pick-up, and then exit onto Eastman Avenue via a right-turn movement. Signs will be posted at the ingress and egress driveways indicating turning restrictions. Traffic monitors will also assist in directing vehicles through the drop-off/pick-up area.

The school will also have campus and bridge (Dennison/I-5 Bridge) monitors. The campus monitors will be present during school hours and after school. The bridge monitors will ensure the safety of students during arrival and departure from school.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Sheriff-4

Additionally, as a result of the increase of school events/activities, it will also generate an increase in demand for law enforcement services. Applicant shall contact the Station for any permits required to hold large events at the Project site and discuss any modifications to the Law Enforcement Services Agreement with our Contract Law Enforcement Bureau.

Response to Comment Sheriff-4

The school will comply with any permit requirements for large events. Special events include typical-school related events, such as:

- Community and PTA meetings and events (monthly, during the day)
- Teacher professional development meetings (monthly, during the day)
- Welcome Back Families and Students in August (once per year, during the day)
- Back to School Night in September/October (once per year, during the evening)
- Heritage Month celebrations (monthly, during the day)
- Academic competition/Spelling Bee in October (during the evening)
- Winter Showcase in December (once per year, during the evening)
- Open House/Science Fair in April (once per year, during the day)
- Talent Show in June (once per year, during the day)
- 5th grade and 8th grade promotions in June (once per year, during the day)

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Sheriff-5

To date, the East Los Angeles Sheriff's Station is currently understaffed. However, assigning additional law enforcement personnel to the East Los Angeles Sheriff's Station to meet an acceptable service ratio will require modification of the law enforcement services contract. Additional resources to address the needs of the development will need to be reviewed by the County and our Contract Law Enforcement Bureau in coordination with our Station.

Response to Comment Sheriff-5

Additional police protection services is not an environmental issue, but rather an economic and public policy issue. Under PRC Section 21082.2(c), "[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts."

Comment Sheriff-6

The Project Applicant will be required to pay all applicable development fees, and law enforcement facilities mitigation fees, associated with the project as applicable.

Response to Comment Sheriff-6

The Applicant will pay all applicable required development fees.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Sheriff-7

Also, for future reference, the Department provides the following updated address and contact information for all requests for reviews comments, law documents, and other related correspondence:

Tracey Jue, Director
Facilities Planning Bureau
Los Angeles County Sheriff's Department
211 West Temple Street
Los Angeles, California 90012

Attention: Planning Section

Response to Comment Sheriff-7

The comment provides contact information for future requests for information.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify

any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Letter EPCLA

Eastside Padres Contra La Privatizacion (EPCLA)

April 3, 2024

Comment EPCLA-1

We're a group of residents, mostly parents from the Boyle Heights and East Los Angeles area. We would like to express our opposition to the proposed project.

Response to Comment EPCLA-1

The comment provides an introduction and opposition to the Project.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment EPCLA-2

The project does not consider the existing educational landscape, this specific zone is over saturated with schools, with current declining student enrollment, there is no demand for a new school. Opening a new school that in a few years may close as a result of declining enrollment undermines the needs of our community. The proponents are seeking a project that does not reflect the needs of our community. Opening a new school in a community that is over saturated with schools is irresponsible.

Response to Comment EPCLA-2

There are nine charter schools within a two-mile radius from Project Site. The Project is consolidating two campuses in this two-mile radius resulting in one fewer charter school in 2026; no net new charter schools would result from the Project. The Project would be the only Kindergarten through 8th grade charter school in a two-mile radius.

The Applicant's planned enrollment is 502 students at the start of operations in 2026 and an increase to 525 students by 2029. This signifies the anticipated demand in student enrollment.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment EPCLA-3

Adding a new school, will add more traffic, more noise and foot traffic to a dense residential community.

Response to Comment EPCLA-3

As analyzed in the MND, the Project would have a less than significant impact on traffic and noise. The comment does not provide any specific substantial evidence or that more traffic, more noise, and foot traffic will result in a significant impact.

Under PRC Section 21082.2(c), “[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.”

Comment EPCLA-4

In addition to residential, community concerns, we would like to raise student concerns; charter schools do not abide by environmental safeguards that protect students. We’re concerned that this area is not safe or suitable for children.

Response to Comment EPCLA-4

The Project is required to abide by all local (County) and State requirements for safety, including requirements from California Occupational Health and Safety (Cal/OSHA) and California Environmental Protection Agency (CalEPA). The comment does not provide any specific substantial evidence that the Project would not abide by environmental safeguards. Under PRC Section 21082.2(c), “[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.”

The potential hazards found in the surrounding land uses is discussed page 4-76 of the MND and analyzed in Appendix F to the MND (Phase I Environmental Site Assessment, Hazard Management Consulting, October 4, 2022). The analysis found the elevated concentrations of lead found in surface soils at the Site as a result of the release of lead into the air from the former Exide Technologies Facility. The soil impacts can be effectively managed with a Soil Management Plan (SMP) to guide the overall grading activities. (See Mitigation Measure MM-HAZ-1 of the MND.).

Comment Letter Montes

Carlos Montes

April 3, 2024

Comment Montes-1

We oppose this project for several reasons:

Response to Comment Montes-1

The comment provides an introduction and opposition to the Project.

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

Comment Montes-2

This project will bring a big increase in daily traffic to a residential community. The daily dropping off and picking up of students will have hundreds of cars idling emitting exhaust, oil and rubber to our community.

Response to Comment Montes-2

As analyzed in the MND, the Project would have a less than significant impact on traffic and air quality. The comment does not provide any specific substantial evidence that traffic air emissions will result in a significant impact. Under PRC Section 21082.2(c), “[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.”

The student dropoff/pickup procedure is discussed page 4-145 of the MND and analyzed in Appendix J-2 to the MND (Vehicle Queuing Analysis, Linscott, Law & Greenspan, January 3, 2024).

Using trip generation rates published by ITE and based on the M/M/s queuing model, it is forecast that during the morning student drop-off period, the Project will generate an average queue of 5.02 vehicles and a peak queue of eleven vehicles. This peak queue can be accommodated by the Project’s drop-off/pick-up area which can accommodate 20 queued vehicles onsite. The Project will not cause vehicles to queue onto Gage Avenue.

Comment Montes-3

Also a large increase in noise to a quiet community.

Response to Comment Montes-3

As analyzed in the MND, the Project would have a less than significant impact on noise. The comment does not provide any specific substantial evidence or that the Project will result in a significant impact. Under PRC Section 21082.2(c), “[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.”

Regardless, noise from socializing and recreation at the outdoor lunch patio and play area, respectively, would not result in significant noise impacts, as noise standards for the operation of the school are based on 24-hour CNEL levels. Any noise at these outdoor spaces would be intermittent and would not elevate noise levels at the adjacent residences over a 24-hour period by 5 dBA CNEL or more.

The Project would include a cement block wall along the property lines adjacent to residential uses and the buildings themselves would physically attenuate noise toward adjacent properties. There would be no outdoor public address (PA) system.

Moreover, operational noise impacts would not violate exterior noise standards outlined in County ordinance 12.08.390. Specifically, the ordinance sets a standard that the exterior noise level of 70 dBA at residential receptors from 7:00 A.M. to 10:00 P.M.

Comment Montes-4

The Extera students are not from families in this community, they are driven daily and this will cause daily traffic congestion to our residential street.

Response to Comment Montes-4

The comment does not provide any specific substantial evidence.

Under PRC Section 21082.2(c), “[a]rgument, speculation, unsubstantiated opinion or narrative, evidence which is clearly inaccurate or erroneous, or evidence of social or economic impacts which do not contribute to, or are not caused by, physical impacts on the environment, is not substantial evidence. Substantial evidence shall include facts, reasonable assumptions predicated upon facts, and expert opinion supported by facts.”

Comment Montes-5

Also has this old church and area been tested for the lead contamination from the over 40 years of operation of the Exide battery recycling plant that was finally closed?

Response to Comment Montes-5

The potential hazards found in the surrounding land uses is discussed page 4-76 of the MND and analyzed in Appendix F to the MND (Phase I Environmental Site Assessment, Hazard Management Consulting, October 4, 2022). The analysis found the elevated concentrations of lead found in surface soils at the Site as a result of the release of lead into the air from the former Exide Technologies Facility. The soil impacts can be effectively managed with a Soil Management Plan (SMP) to guide the overall grading activities. (See Mitigation Measure MM-HAZ-1 of the MND.).

The comment does not state a specific concern or question regarding the adequacy of the MND in identifying and analyzing the environmental impacts of the Project, nor does the comment identify any physical environmental impacts caused by the Project. This comment is noted for the administrative record and will be forwarded to the decision-makers for review and consideration.

From: [Karina Lopez](#)
To: [Christina Nguyen](#); [DRP Public Comment](#)
Subject: Regional Planning Commission, April 17 Agenda Item 8 - Extera Charter School
Date: Thursday, April 11, 2024 10:48:51 AM

CAUTION: External Email. Proceed Responsibly.

Dear Los Angeles County Department of Regional Planning,

I, Karina Lopez, am sending you this email to express my opposition to Project PRJ 2022-004416-(1) agenda item 8, the project to build a new Extera charter school at 1059 S. Gage Avenue in East Los Angeles.

I strongly oppose the expansion of charter schools into my community for several reasons. The construction of this Extera charter school will lead to more traffic in a residential neighborhood which would increase air and noise pollution. Charter schools are extremely selective with student applications and this leads to student enrollment not being reflective of the local community causing daily traffic congestion to our residential streets. Additionally and importantly, the site being renovated is an old church in a danger zone that has been tested for lead contamination from the over 40 years of operation of the Exide battery recycling plant.

I urge you to oppose this project.

In Solidarity,
Member of Centro CSO
Karina Lopez
(281-912-5475)

**SUPPLEMENTAL
REPORT TO THE REGIONAL PLANNING COMMISSION**

DATE ISSUED: April 16, 2024

HEARING DATE: April 17, 2024 AGENDA ITEM: 8

PROJECT NUMBER: PRJ2022-004416-(1)

PERMIT NUMBER(S): Conditional Use Permit (“CUP”) No. RPPL2022013731
Environmental Assessment No. RPPL2022005113

SUPERVISORIAL DISTRICT: 1

PROJECT LOCATION: 1059 South Gage Avenue

OWNER: Oasis of Mercy

APPLICANT: Extera Public Schools

CASE PLANNER: Christina Nguyen, Planner
Cnguyen@planning.lacounty.gov

RECOMMENDATION

LA County Planning staff (“Staff”) recommends:

- **ADOPTION** of the Mitigated Negative Declaration along and the Mitigation Monitoring Reporting Program; and
- **APPROVAL** of Project Number PRJ2022-004416-(1), CUP Number RPPL2022013731, based on the Findings attached to the Report to the Regional Planning Commission dated April 4, 2024 (Exhibit C – Findings), and subject to the Draft Conditions of Approval attached to the Report to the Regional Planning Commission dated April 4, 2024 (Exhibit D – Conditions of Approval).

Staff recommends the following motions:

CEQA:

I MOVE THAT THE REGIONAL PLANNING COMMISSION CLOSE THE PUBLIC HEARING AND ADOPT THE MITIGATED NEGATIVE DECLARATION ALONG WITH THE REQUIRED FINDINGS OF FACT AND ADOPT THE MITIGATION MONITORING AND REPORTING PROGRAM FOR THE PROJECT PURSUANT TO STATE AND LOCAL CEQA GUIDELINES.

ENTITLEMENT:

I MOVE THAT THE REGIONAL PLANNING COMMISSION APPROVE CONDITIONAL USE PERMIT NO. RPPL2022013731, SUBJECT TO THE ATTACHED FINDINGS AND CONDITIONS.

PROJECT DESCRIPTION

A request by Extera Public Schools (“Permittee”) for a CUP to establish and operate a charter school (“Project”) in the R-3 (Limited Density Multiple Residence) Zone pursuant to County Code Section 22.18.030 (Land Use Regulations for Zones R-A, R-1, R-2, R-3, R-4, and R-5).

ADDITIONAL COMMENTS RECEIVED AFTER THE FIRST SUPPLEMENTAL REPORT DATED APRIL 11, 2024

Staff received a total of 47 public comments, including 34 emails, 7 petition letters, and six voice messages. Of these comments, 22 opposed to the project, and 25 supported the project. Those opposing the proposed Project convey there is an overconcentration of charter schools in the East Los Angeles, an overall reduction in student enrollment, increased vehicular traffic, air pollution, noise, and lead contamination from the Exide battery recycling plant. Those supporting the Project expressed the Project will benefit students in East Los Angeles and the school would be a community asset.

The public comments are attached.

RESPONSES TO COMMENTS RECEIVED

The Permittee provided responses to public comment opposing the Project received on April 11, 2024. This comment was published in a supplemental report to the Regional Planning Commission dated on April 11, 2024.

The Permittee’s response letter is attached.

Subject: Extera Charter School (Agenda Item #8) Project No. PRJ2022-004416-(1)

CAUTION: External Email. Proceed Responsibly.

Public Hearing: Not the Applicant
Extera Charter School (Item #8)
Project No. PRJ2022-004416-(1)
Applicant: Extera Public Schools

Position: Opposed to Project

Greetings, I am a resident of East Los Angeles, born and raised and still reside in ELA.

I am writing a public comment in relation to Item # 8 Extera charter school. I am opposed to further development of charter schools in East Los Angeles.

We have been disproportionately represented by over 25 charter schools in ELA unincorporated alone. The community has been densely impacted by the construction of charters on major business corridors and in neighborhoods. Many of the charter schools that have been constructed have not taken into account the surplus of LAUSD and other charters that are already in close proximity. ELA lacks political representation and a regional planning community plan that takes into consideration the needs of the local community. Additional construction of schools where there are already school structures in place will only continue to lower the property value of homes and densify traffic in neighborhoods and major thorough ways that residents utilize to move from home to work and in their daily errands.

I am adamantly opposed to this and any further charter school entering our community until a major community assessment is completed and the needs of the

ELA residents is taken into consideration for future economic growth and viability.

PS. South Gate is the same size as ELA unincorporated and they have only allowed three charters to enter their city. They also are opposed to bringing schools to their business corridors. They understand the value that bringing commercial business corridors means from the vitality of their city. Representation matters!

Thank you for your attention to this matter.

Laura Barrera

Dear Supervisor Solis and Planning Commission,

I am emailing you to share my support for the Extera Public Schools project. I am an employee at Extera Public Schools and I would like to share that Extera has made efforts to reach out to myself and my fellow neighbors to ensure we are updated on the project. I support the Extera Public Schools project because of how the queuing system was designed to alleviate traffic on the streets. I would like the Oasis of Mercy Church property to remain a community asset, like a school, that takes into consideration what people in East Los Angeles want for their community.

Thank you,

Ashley Oles

Estimado supervisor Solís y Comisión de Planificación Regional,

Le envío un correo electrónico para compartir mi apoyo al proyecto de las Escuelas Públicas de Extera.

Soy un padre de Extera y me gustaría compartir que Extera ha hecho esfuerzos para comunicarse conmigo y con mis compañeros vecinos para garantizar que estemos actualizados sobre el proyecto.

Apoyo el proyecto de las Escuelas Públicas de Extera por cómo se diseñó el sistema de colas para aliviar el tráfico en las calles. Me gustaría que la propiedad de la Iglesia Oasis of Mercy siga siendo un activo comunitario, como una escuela, que tenga en cuenta lo que la gente del Este de Los Ángeles quiere para su comunidad.

Sinceramente,
Alicia Gonzalez

Estimado Supervisor Solís y Comisión de Planificación Regional,

Le envío un correo electrónico en apoyo del nuevo campus de las Escuelas Públicas de Extera que se presentará ante la audiencia del Departamento de Planificación Regional el miércoles 17 de Abril de 2024 a las 9 am. Soy residente desde hace mucho tiempo del este de Los Angeles, vivo en 122 S Lorena St y apoyo el proyecto de las Escuelas Públicas de Extera en 1059 S Gage. El sitio del proyecto De la Iglesia Oasis of Mercy ha sido una instalación de servicio comunitario durante años, y Extera continuará siendo un activo comunitario. Me gustaría que la propiedad siga siendo un activo comunitario, como una escuela, lo que tendrá un impacto positivo en nuestros estudiantes en el este de Los Angeles en comparación con un desarrollo de viviendas con fines de lucro que no tendría que proporcionar estacionamiento.

Atentamente,
Adalberta Morales

Subject: Item #24-026 Extera Public Schools

CAUTION: External Email. Proceed Responsibly.

Dear Regional Planning Commission,

My name is Genesis Coronado. I am a concerned resident of Unincorporated East Los Angeles that is writing to oppose Extera Public School's CUP application for the following reasons:

- 1) East Los Angeles is a highly dense community that is burdened with traffic congestion and lack of parking. We have seen how charter schools have come in to our community and have caused major traffic congestion during drop off and pick up. This CUP would cause major safety concerns in our community.
- 2) East Los Angeles is already burdened with a high concentration of charter schools. As we plan for the future, we need to consider the overall low birth rates decreased school enrollment overall. We don't need more schools. We need more grocery stores, green spaces and small business. The County needs to consider the true needs of our community and prioritize planning and zoning changes to meet those needs.
- 3) Extera Public Schools are currently co-located across LAUSD schools mostly in Boyle Heights. Only one school is located on an LAUSD campus in Unincorporated East LA- Lorena Campus. The claim that this new building would consolidate 3 campuses and result in a net negative only rings true if this new building would be in Boyle Heights, not East LA. A new school in East LA would cause an a net positive impact in our community.
- 4) As stated in their Petition Renewal 2012-2026 to LAUSD, "the target population... the primary zip code of 90033". The zip code 90033 is in the a City of Los Angeles, Boyle Heights community. Again, this school/new campus should be explored in the community that it's stated to serve and not in Unincorporated East Los Angeles.
- 5) This proposed location is also only about a block away from the 5 freeway. This is not an adequate location for children and youth. We need to do better for our children and consider their health. A lot of the students attending these schools have already been impacted by environmental injustice in their own neighborhoods,

i.e. Exide. We cannot continue to build schools next to or in the vicinity of a freeway.

Once again, I ask you to consider and prioritize the needs of the unincorporated community of East Los Angeles and deny Extera Public Schools' CUP request.

Thank you,
Genesis Coronado

Dear Los Angeles County of regional planning,

I, Irene Viramontes, am sending you this email to express opposition to project PRJ 2022-00416-(1) agenda item 8, the project to build a new Extera charter school at 1059 S. Gage Ave. in East Los Angeles.

I strongly oppose the expansion of charter schools into my community for several reasons. The construction of this Extera charter school will lead to more traffic in a residential neighborhood which would increase noise and air pollution. Charter schools are extremely selective with student applications and this leads to student enrollment not being reflective of the local community causing daily traffic congestion to our residential streets.

Additionally and importantly, the site being renovated is an old church in a danger zone that has been tested for lead contamination from the over 40 years of operation of the Exide battery recycling plant.

I urge you to oppose this project.

In solidarity,

Eastside Padres contra la privatizacion

Subject: Oppose Extera Charter school project PRJ2022-004416-(1)
Date: Tuesday, April 16, 2024 9:54:56 AM

CAUTION: External Email. Proceed Responsibly.

I write to oppose this Extera Charter school construction project. First of all we cannot trust Extera to abide by the expressed conditions, they have a history of misleading and not meeting their obligations. They owe LAUSD back rent for co-locating at local school, they have misrepresented their enrollment.

But primarily this project will cause pollution from car exhaust, oil and rubber from tires while idling and driving in and out of our quiet residential community.

They will cause daily car trips in the morning and afternoon 5 days a week. This will disrupt our residential community. We already have heavy traffic on Whittier BL and other streets; this will make conditions worse.

I urge you to vote no on this project.

August 15, 2024

Dear Los Angeles County

Department of Regional Planning,

My name is Juan Parrino and I am an activist in East Los Angeles. I am sending this email to express my opposition to Project PRJ 2022-004416-(1) agenda item 8, the project to build a Extera charter school at 1059 So. Gage Avenue in East Los Angeles.

In general, I strongly oppose the expansion of charter schools. The construction of this Extera charter school would lead to more traffic in a residential neighborhood which would increase air and noise pollution. Charter schools are extremely selective with student applications and this leads to student enrollment not being reflective of the local community thereby causing daily traffic congestion to residential streets.

With the overflow traffic, there are concerns of double parking, blocking of private driveways and pedestrian safety concerns thereby impacting greatly the existing residential neighbors.

Additionally, and very importantly, the site being renovated is an old church in a danger zone that has been tested for lead contamination from the over 40 years operation of the Exide battery recycling plant.

I urge you to oppose this project.

Sincerely,

Juan Parrino

Subject	Regional Planning Commission, April 17, Agenda Item 8 - Extera Charter School

Dear Los Angeles County Department of Regional Planning,

I, Gabriel Quiroz Jr , am sending you this email to express my opposition to Project PRJ 2022-004416-(1) agenda item 8, the project to build a new Extera charter school at 1059 S. Gage Avenue in East Los Angeles.

I strongly oppose the expansion of charter schools into my community for several reasons. The construction of this Extera charter school will lead to more traffic in a residential neighborhood which would increase air and noise pollution. Charter schools are extremely selective with student applications and this leads to student enrollment not being reflective of the local community causing daily traffic congestion to our residential streets.

Additionally and importantly, the site being renovated is an old church in a danger zone that has been tested for lead contamination from the over 40 years of operation of the Exide battery recycling plant.

I urge you to oppose this project.

In Solidarity,
Member of Centro CSO

Dear Members of the Regional Planning Commission,

I am writing to you as the proud owner of a local business, closely adjacent to the 1059 S Gage Avenue proposed Extera site. I consider my business a local establishment deeply rooted in the Boyle Heights community. I want to express my excitement and support for the approval of the Conditional Use Permit for the construction of the Extera Public Schools new facility. As a business owner who cares deeply about the community, I believe that the presence of Extera Public Schools in Boyle Heights brings immense hope and positive prospects for our neighborhood.

Extera coming to our neighborhood represents an investment in the educational well-being of our youth. The presence of a neighbor like Extera not only enriches the academic landscape but also fosters a sense of pride and optimism among us that serves everyone. For example, this optimism translates into increased community engagement and support for local businesses like mine.

This is not just about a school building; it's about investing in the future of Boyle Heights and creating an environment where local businesses, residents, and educational institutions collaborate for the greater good. I sincerely hope you will support this project.

Thank you for your time and consideration.

Sincerely,

Margarita Ganay

Dear Members of the Regional Planning Commission,

I am writing to express my support for the issuance of a Conditional Use Permit for the proposed Extera Public Schools new facility on South Gage Avenue in Boyle Heights. As a proud resident of East Los Angeles, I have witnessed the positive impact Extera has had on our community over the years, and I believe that granting the permit for their new facility will contribute very much to our neighborhood.

Extera has a long-standing presence in Boyle Heights, providing a nurturing learning environment.

Granting the Conditional Use Permit for their new facility will not only enhance educational options in Boyle Heights but also contribute to the well-being of our community. I am confident that with your support, Extera will continue to be an invaluable asset to our beloved Boyle Heights.

Thank you for your time and consideration.

CAUTION: External Email. Proceed Responsibly.

We oppose this project for several reasons:

This project will bring a big increase in daily traffic to a residential community. The daily dropping off and picking up of students will have hundreds of cars idling emitting exhaust, oil and rubber to our community. Also a large increase in noise to a quiet community. The Extera students are not from families in this community, they are driven daily and this will cause daily traffic congestion to our residential street.

Also has this old church and area been tested for the lead contamination from the over 40 years of operation of the Exide battery recycling plant that was finally closed?

Good evening,

We're a group of residents, mostly parents from the Boyle Heights and East Los Angeles area. We would like to express our opposition to the proposed project. The project does not consider the existing educational landscape, this specific zone is over saturated with schools, with current declining student enrollment, there is no demand for a new school. Opening a new school that in a few years may close as a result of declining enrollment undermines the needs of our community. The proponents are seeking a project that does not reflect the needs of our community. Opening a new school in a community that is over saturated with schools is irresponsible. Adding a new school, will add more traffic, more noise and foot traffic to a dense residential community.

In addition to residential, community concerns, we would like to raise student concerns; charter schools do not abide by environmental safeguards that protect students. We're concerned that this area is not safe or suitable for children.

Thank you for your time and consideration.

SITE NOTES

- THE CONSTRUCTION SHALL NOT RESTRICT A FIVE-FOOT CLEAR AND UNOBSTRUCTED ACCESS TO ANY WATER OR POWER DISTRIBUTION FACILITIES (POWER POLES, PULL-BOXES, TRANSFORMERS, VAULTS, PUMPS, VALVES, METERS, APPURTENANCES, ETC.) OR TO THE LOCATION OF THE HOOR-UP. THE CONSTRUCTION SHALL NOT BE WITHIN TEN FEET OF ANY POWER LINES-WHETHER OR NOT THE LINES ARE LOCATED ON THE PROPERTY. FAILURE TO COMPLY MAY CAUSE CONSTRUCTION DELAYS AND/OR ADDITIONAL EXPENSES.
 - AN APPROVED SEISMIC GAS SHUTOFF VALVE WILL BE INSTALLED ON THE FUEL GAS LINE ON THE DOWN STREAM SIDE OF THE UTILITY METER AND BE RIGIDLY CONNECTED TO THE EXTERIOR OF THE BUILDING OR STRUCTURE CONTAINING THE FUEL GAS PIPING. (PER ORDINANCE 170.158) (INCLUDES COMMERCIAL ADDITIONS AND TI WORK OVER \$10,000.) SEPARATE PLUMBING PERMIT IS REQUIRED.
 - PROVIDE ULTRA FLUSH WATER CLOSETS FOR ALL NEW CONSTRUCTION. EXISTING SHOWER HEADS AND TOILETS MUST BE ADAPTED FOR LOW WATER CONSUMPTION.
 - A COPY OF THE EVALUATION REPORT AND/OR CONDITIONS OF LISTING SHALL BE MADE AVAILABLE AT THE JOB SITE.
 - ALL TRASH BINS SHALL BE COVERED
- FIRE DEPT.**
NOTE: THE FIRE ALARM SHALL BE PROVIDED PER SECTION 907.2.3 OF CFC OCCUPANCY. NOTIFICATION SIGNAL SHALL BE VIA EMERGENCY VOICE/ALARM COMMUNICATION SYSTEM, MEETING THE REQUIREMENT OF SECTION 907.5.2.2 CARBON MONOXIDE ALARM REQUIRED PER SEC. 915 CARBON MONOXIDE ALARM SHALL BE INTERCONNECTED IN SUCH A MANNER THAT THE ACTIVATION OF ONE ALARM WILL ACTIVATE ALL THE ALARM IN THE INDIVIDUAL UNIT. REQUIRED CARBON MONOXIDE ALARM SHALL RECEIVE THEIR PRIMARY POWER FROM THE BLDG WIRING SHALL BE EQUIPPED WITH A BATTERY BACKUP (CBC915.4.2/4)
PROVIDE EMERGENCY RESPONDER RADIO COVERAGE IN ACCORDANCE WITH LAFCS10 (CBC 916.1)

FLOOD NOTE: BY GRAPHIC PLOTTING ONLY, THIS PROPERTY IS IN ZONE "X" OF THE FLOOD INSURANCE RATE MAP, PANEL NO. 06037C1643, PANEL DATED 09/26/2008. THIS PROPERTY IS NOT LOCATED IN AN AREA WHERE FLOOD HAZARDS EXIST AS DETERMINED BY FEMA. BY TELEPHONE CALL TO THE NATIONAL FLOOD INSURANCE PROGRAM (800-438-4622) WE HAVE LEARNED THIS COMMUNITY DOES CURRENTLY PARTICIPATE IN THE PROGRAM. NO FIELD SURVEYING WAS PERFORMED TO DETERMINE THIS ZONE AND AN ELEVATION CERTIFICATE MAY BE NEEDED TO VERIFY THIS DETERMINATION OR APPLY FOR A VARIANCE FROM THE FEDERAL EMERGENCY MANAGEMENT AGENCY.

VICINITY MAP

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCEL 1: THE EAST 10 FEET OF THE SOUTH 20 FEET OF LOT 54, AND THE EAST 100 FEET OF THE NORTH 20 FEET OF LOT 55, TRACT NO. 3552, IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 28, PAGES 83 AND 84 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, MORE PARTICULARLY DESCRIBED AS FOLLOWS:

PARCEL 2: COMMENCING AT A POINT IN THE EAST LINE OF SAID LOT 54, 20 FEET NORTH FROM THE SOUTHWEST CORNER OF SAID LOT 26; THENCE WEST PARALLEL WITH THE SOUTH LINE OF SAID LOT 1, 100 FEET; THENCE SOUTH PARALLEL WITH THE EAST LINE OF SAID LOTS 54 AND 55, 40 FEET; THENCE EAST PARALLEL WITH THE NORTH LINE OF SAID LOTS 54 AND 55, 100 FEET TO THE EAST LINE OF SAID LOT 55; THENCE ALONG THE EASTERN LINE OF SAID LOTS 55 AND 54, 40 FEET TO THE POINT OF BEGINNING.

PARCEL 3: THE SOUTH 80 FEET OF THE NORTH 80 FEET OF THE WEST 100 FEET OF LOT 26 OF TRACT NO. 3552, IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 348, PAGE 83 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

SCHEDULE B ITEMS

BASIS OF BEARINGS

THE BEARINGS SHOWN HEREON ARE BASED UPON THE CALIFORNIA COORDINATE SYSTEM OF 1983, CDS83, ZONE 8 (2017.50) IN ACCORDANCE TO THE CALIFORNIA PUBLIC RESOURCES CODE SECTIONS 8801-8819. SAID BEARINGS ARE DETERMINED LOCALLY UPON FIELD-OBSERVED TIES TO THE FOLLOWING CALIFORNIA SPATIAL REFERENCE CENTER (C.S.R.C.) CONTINUOUSLY OPERATING REFERENCE STATIONS (C.O.R.S.):

S.A.N.A. TRAK:
NORTHING = 11883386.23 EASTING = 6621521.03

S.A.N.A. CNP:
NORTHING = 1170801.70 EASTING = 6680408.46

THE COMBINATION FACTOR FOR THIS PROJECT WAS APPLIED AT THE FOLLOWING POINT:
NORTHING = 6505437.85 EASTING = 1830493.87

MAPPING ANGLE = -0078°21' SCALE FACTOR = 1.00000223

BENCHMARK

ELEVATIONS SHOWN HEREON ARE BASED UPON COUNTY OF LOS ANGELES BENCHMARK 178659, ELEVATION 191.90 FEET (NAVD 88).

LEGENDS

- DROP-OFF/PICK-UP CIRCULATION
20 CARS QUEUING, 10 CARS PER LANE
- FIRE HYDRANT
- FLOOR LEVEL EXIT SIGN
- PATH OF TRAVEL, LESS THAN 5% SLOPE UNLESS PROVIDE A RAMP AND CANNOT BE MORE THAN 2% CROSS SLOPE
- PATH OF EGRESS
- FIRE DEPARTMENT ACCESS BOX
BOX SHALL BE KNOX CO. MODEL 3502
COLOR: RED
- LANDSCAPED AREA
- PLANTER BOX, SEE CIVIL PLAN

- ### SITE KEY NOTES
- 1 LANDSCAPE AREA WITH 6" CURB, SEE LANDSCAPE PLAN
 - 1A 24" RAISED PLANTER WITH BENCH
 - 2 NEW CONC. DRIVEWAY CURB-CUT, SEE CIVIL PLAN
 - 3 BICYCLE PARKING: EACH BICYCLE PARKING SPACE SHOULD BE MIN. 6" IN LENGTH
SEE BIKE RACK SPEC. ON SHEET 3/A1.0
SHORT-TERM BICYCLE PARKING: ANCHORED BICYCLE RACK W/MINIMUM 2-BIKE CAPACITY NO MORE THAN A WALKING DISTANCE OF 200 FEET FROM THE MAIN/VISITOR'S ENTRANCE SPECS:
PROVIDED 88- SHORT-TERM BICYCLE PARKING SPACES SPECS:
FLOOR MOUNTED: CREATIVE PIPE INC. OR EQUAL
MADRAK U-TWO OR EQUAL
FINISH: GALVANIZED
4 PROVIDED 2- LONG-TERM BICYCLE PARKING PERMANENTLY ANCHORED BIKE RACKS
SEE SPECS SEE 3/A1.0
 - 5 NEW TRANSFORMER WITH BOLLARDS AROUND, SEE ELECTRICAL PLANS
 - 6 FULLY ENCLOSED TRASH ENCLOSURE WITH PERFORATED METAL PANEL ON TOP OF 6" HT. CMU WALL AND CORRUGATED METAL ROOF, SEE 1/A15.0
 - 7 6" HIGH CONCRETE CURB
 - 8 0 CURB WITH 3"-0" MIN. WIDE CAST-IN-PLACE TRUNCATED DOME DETECTABLE WARNING STRIPE
 - 9 6'-0" HT. WROUGHT IRON FENCE, W/PERFORATED PANEL
 - 9A 6'-0" HT. WROUGHT IRON FENCE
 - 10 NEW 6'-0" DOUBLE-SIDES SPLIT FACE PROTO WALL, SEPARATE PERMIT
 - 10A 6'-0" CMU WALL, SEE TRASH ENCLOSURE DETAIL
 - 11 6' HT. METAL FENCE, SEE STRUCTURAL
 - 12 FDC LOCATION
 - 13 NEW W.I. ACCESSIBLE PEDESTRIAN GATE WITH PERFORATED PANEL & PANIC HARDWARE
 - 14 NEW MOTORIZED SLIDING VEHICULAR GATE-SEE DOOR SCHEDULE GATE OPENER ON 6" CONCRETE PAD
GATE REMAIN OPEN DURING DROP-OFF/PICK-UP, CLOSED WHEN NOT IN USE
 - 15 NEW MOTORIZED 16" SWING VEHICULAR GATE, SEE DOOR SCHEDULE GATE REMAIN OPEN DURING DROP-OFF/PICK-UP, CLOSED WHEN NOT IN USE
 - 16 ATTACH SIGN TO FENCE: "WRONG WAY. DO NOT ENTER,"
 - 17 PROVIDE CONDUIT AND JUNCTION BOX FOR VOICE/INTERCOM/VIDEO SYSTEM - HFX-700M AT EXTERIOR ENTRY GATE.
 - 18 STANDARD 31" H STEEL BOLLARD INSTALLED 60" O.C.
MFG: RELIANCE FOUNDRY CO. LTD.
MODEL: R7835, INSTALLED BY ANCHOR CASTING
 - 19 FIRE ALARM ANNUCIATOR PANEL
 - 20 HOSE BIB
 - 21 ASPHALT
 - 22 DAVIS COLORS (OR EQUAL) COLORED CONCRETE, SEE CIVIL PLAN FOR DRAINAGE. USE COLORED CONCRETE WITH SOLAR REFLECTANCE 0.3 OR ABOVE PER GREEN CODE. GC TO SUBMIT COLOR SAMPLE FOR ARCHITECT'S APPROVAL
10'x10' PEDESTRIAN SIGHT TRIANGLE. NOTHING HIGHER THAN 3'-6"
 - 23 REMOVE THE EXISTING PLANT, SEE LANDSCAPE
 - 24 OUTDOOR DRINKING FOUNTAIN
ELKAY WRTLBSWK, BOTTLE FILLING STATION, REFRIGERATED, FILTERED OPTION, SEE PLUMBING PLAN
 - 26 WATERPROOFING DECK COATING OVER SCORED CONCRETE SLAB/PAVING
 - 27 RUBBERIZED SURFACE MATERIAL AT PLAY GROUND
 - 28 PAINTED CROSSWALK
 - 29 PROVIDE SIGN - RIGHT TURN EGRESS ONLY
 - 30 PROVIDE SIGN - RIGHT TURN INGRESS ONLY DURING DROP-OFF/PICK-UP HOURS
 - 31 EXISTING WATER METER CONNECTION TO BE UTILIZED FOR NEW DOMESTIC WATER LINE
 - 32 PROVIDE ELEC. CAR PARKING STALLS WITH ELECTRICAL CHARGING STATIONS. DEDICATED OUTLETS SHALL BE PROVIDED, ONE FOR EACH PARKING SPACE. SEE ELECTRICAL PLAN.
A SEPARATED ELECTRICAL PLAN CHECK IS REQUIRED TO VERIFY THE RACEWAY METHOD(S), WIRING SCHEMATICS AND ELECTRICAL CALCULATIONS FOR THE ELECTRICAL CHARGING SYSTEM. THE ELECTRICAL SYSTEM SHALL HAVE SUFFICIENT CAPACITY TO SIMULTANEOUSLY CHARGE ALL ELECTRIC VEHICLES AT THEIR FULL RATED AMPERAGE.
 - 33 PROVIDE POWER FOR EV READY FUTURE ELECTRICAL CHARGING STATIONS DEDICATED OUTLETS SHALL BE PROVIDED, ONE FOR EACH PARKING SPACE. SEE ELECTRICAL PLAN.
THE SERVICE PANEL OR SUBPANEL(S) SHALL HAVE SUFFICIENT CAPACITY TO ACCOMMODATE THE REQUIRED NUMBER OF THE DEDICATED 40 AM MIN. BRANCH CIRCUIT(S) FOR THE FUTURE INSTALLATION OF THE EVSE
 - 34 CONCRETE WHEEL STOP, SEE DETAIL ON 1/D1.0
 - 35 STANDARD 31" H STEEL BOLLARD INSTALLED 60" O.C.
MFG: RELIANCE FOUNDRY CO. LTD.
MODEL: R7835, INSTALLED BY ANCHOR CASTING
 - 36 PAINT 48" LETTER ON GROUND: "SLOW"
 - 37 PAINT 48" LETTER ON GROUND: "STOP"
 - 38 SIGN - NO PARKING ANYTIME. UNAUTHORIZED VEHICLES TOWED AT VEHICLE OWNER'S EXPENSE

1 SITE PLAN

SCALE: 1/12" = 1'-0"

1. FIRE DEPARTMENT VEHICULAR ACCESS ROADS MUST BE INSTALLED AND MAINTAINED IN A SERVICEABLE MANNER PRIOR TO AND DURING THE TIME OF CONSTRUCTION. FIRE CODE 501.4
2. THE FIRE ALARM SHALL BE PROVIDED PER SECTION 907.2.3 OF CFC OCCUPANCY. NOTIFICATION SIGNAL SHALL BE VIA EMERGENCY VOICE/ALARM COMMUNICATION SYSTEM, MEETING THE REQUIREMENT OF SECTION 907.5.2.2. CARBON MONOXIDE ALARM REQUIRED PER SEC. 915. CARBON MONOXIDE ALARM SHALL BE INTERCONNECTED IN SUCH A MANNER THAT THE ACTIVATION OF ONE ALARM WILL ACTIVATE ALL THE ALARM IN THE INDIVIDUAL UNIT. REQUIRED CARBON MONOXIDE ALARM SHALL RECEIVE THEIR PRIMARY POWER FROM THE BLDG. WIRING SHALL BE EQUIPPED WITH A BATTERY BACKUP (CBC915.4.2/4). PROVIDE EMERGENCY RESPONDER RADIO COVERAGE IN ACCORDANCE WITH LAFC910 (CBC 916.1)
3. PROVIDE APPROVED SIGNS OR OTHER APPROVED NOTICES OR MARKINGS THAT INCLUDE THE WORDS NO PARKING - FIRE LANE. SIGNS SHALL HAVE A MINIMUM DIMENSION OF 12 INCHES WIDE BY 18 INCHES HIGH AND HAVE RED LETTERS ON A WHITE REFLECTIVE BACKGROUND. SIGNS SHALL BE PROVIDED FOR FIRE APPARATUS ACCESS ROADS, TO CLEARLY INDICATE THE ENTRANCE TO SUCH ROAD, OR PROHIBIT THE OBSTRUCTION THEREOF AND AT INTERVALS, AS REQUIRED BY THE FIRE INSPECTOR. FIRE CODE 503.3
4. WHEN SECURITY GATES ARE PROVIDED, MAINTAIN A MINIMUM ACCESS WIDTH OF _____ FEET. THE SECURITY GATE SHALL BE PROVIDED WITH AN APPROVED MEANS OF EMERGENCY OPERATION, AND SHALL BE MAINTAINED OPERATIONAL AT ALL TIMES AND REPLACED OR REPAIRED WHEN DEFECTIVE. ELECTRIC GATE OPERATORS, WHERE PROVIDED, SHALL BE LISTED IN ACCORDANCE WITH UL 325. GATES INTENDED FOR AUTOMATIC OPERATION SHALL BE DESIGNED, CONSTRUCTED AND INSTALLED TO COMPLY WITH THE REQUIREMENTS OF ASTM F2200. GATES SHALL BE OF THE SWINGING OR SLIDING TYPE. CONSTRUCTION OF GATES SHALL BE OF MATERIALS THAT ALLOW MANUAL OPERATION BY ONE PERSON. FIRE CODE 503.6
5. APPROVED BUILDING ADDRESS NUMBERS, BUILDING NUMBERS OR APPROVED BUILDING IDENTIFICATION SHALL BE PROVIDED AND MAINTAINED SO AS TO BE PLAINLY VISIBLE AND LEGIBLE FROM THE STREET FRONTING THE PROPERTY. THE NUMBERS SHALL CONTRAST WITH THEIR BACKGROUND, BE ARABIC NUMERALS OR ALPHABET LETTERS, AND BE A MINIMUM OF 4 INCHES HIGH WITH A MINIMUM STROKE WIDTH OF 0.5 INCH. FIRE CODE 505.1
6. FIRE APPARATUS ACCESS ROADS SHALL BE IDENTIFIED WITH APPROVED SIGNS. TEMPORARY SIGNS SHALL BE INSTALLED AT EACH STREET INTERSECTION WHEN CONSTRUCTION OF NEW ROADWAYS ALLOWS PASSAGE BY VEHICLES. SIGNS SHALL BE OF AN APPROVED SIZE, WEATHER RESISTANT AND BE MAINTAINED UNTIL REPLACED BY PERMANENT SIGNS. FIRE CODE 505.2
7. AN APPROVED KEY BOX, LISTED IN ACCORDANCE WITH UL 1037 SHALL BE PROVIDED AS REQUIRED BY FIRE CODE 506. THE LOCATION OF EACH KEY BOX SHALL BE DETERMINED BY THE FIRE INSPECTOR.
8. TYPE OF CONSTRUCTION PER THE BUILDING CODE TYPE VA _____
FIRE-FLOW CALCULATION AREA AREA _____ SQ. FT.
FIRE FLOW BASED ON THE FIRE-FLOW CALCULATION AREA _____ GPM
REDUCTION FOR FIRE SPRINKLERS (MAXIMUM 50%) _____ GPM
TOTAL FIRE FLOW REQUIRED _____ 1,500 _____ GPM
9. ALL FIRE HYDRANTS SHALL MEASURE 6" X 4" X 2-1/2", BRASS OR BRONZE, CONFORMING TO AMERICAN WATER WORKS ASSOCIATION STANDARD C503, OR APPROVED EQUAL.
10. ALL REQUIRED PUBLIC FIRE HYDRANTS SHALL BE INSTALLED, TESTED AND ACCEPTED PRIOR TO BEGINNING CONSTRUCTION. FIRE CODE 501.4
11. PROVIDE AN APPROVED AUTOMATIC FIRE SPRINKLER SYSTEM IN ACCORDANCE WITH PROVISIONS SET FORTH IN BUILDING CODE SECTION 903.3.
REASON: _____ GROUP E OCCUPANCY GREATER THAN 12,000 SQ.FT.
12. FIRE SPRINKLER PLANS SHALL BE SUBMITTED TO THE SPRINKLER PLAN CHECK UNIT FOR REVIEW AND APPROVAL PRIOR TO INSTALLATION IN ACCORDANCE WITH FIRE CODE 901.2
13. PORTABLE FIRE EXTINGUISHERS SHALL BE INSTALLED AND MAINTAINED ALL OCCUPANCY GROUPS AND AT SUCH LOCATIONS AS REQUIRED BY FIRE CODE 906 AND CALIFORNIA CODE OF REGULATIONS, TITLE 19, DIVISION 1, CHAPTER 3. THE FINAL NUMBER AND LOCATION OF ALL EXTINGUISHERS SHALL BE DETERMINED BY THE LOCAL AREA FIRE INSPECTOR.

13. PROVIDE AN APPROVED MANUAL FIRE OR AUTOMATIC SMOKE DETECTION SYSTEM IN ACCORDANCE WITH THE PROVISIONS SET FORTH IN FIRE CODE 907.
14. DUMPSTERS AND CONTAINERS WITH AN INDIVIDUAL CAPACITY OF 1.5 CUBIC YARDS OR MORE SHALL NOT BE STORED IN BUILDINGS OR PLACED WITHIN 5 FEET OF COMBUSTIBLE WALLS, OPENINGS OR COMBUSTIBLE ROOF EAVES, UNLESS AREAS CONTAIN DUMPSTERS OR CONTAINERS OR CONTAINERS ARE PROTECTED BY AN APPROVED AUTOMATIC FIRE SPRINKLER SYSTEM. FIRE CODE 304.3.3.

DEMOLITION LEGEND

SITE INFORMATION

SITE ADDRESS: 1059 S GAGE AVE, LOS ANGELES, CA 90023
 PROPERTY AREA: 1.171 AC. OR 50,994 SQ. FT.
 TOTAL GROUND FLOOR AREA OF BUILDINGS: 17,680 SQ. FT.
 PARKING COUNT: 79 REGULAR PARKING STALLS, 4 HANDICAP PARKING STALLS, 83 TOTAL PARKING STALLS
 ASSESSOR'S PARCEL NOS.: 5239-012-009 & 5239-012-028

DEMOLITION PLAN NOTES

- 1 DEMOLISH EXISTING 2-STORY BUILDING
- 2 PRESERVE EXISTING 1-STORY BUILDING
- 3 DEMOLISH EXISTING CONCRETE HARDSCAPE, ASPHALT
- 4 DEMOLISH EXISTING ROCK AND MONUMENTS
- 5 DEMOLISH EXISTING CHAIN LINK FENCE, WOOD FENCE, GATE, AND CAGE. (MAY KEEP AS TEMP FENCING AS NEEDED)
- 6 DEMOLISH EXISTING PLANTERS, LANDSCAPING AND IRRIGATION LINES.
- 7 REMOVE EXISTING EXISTING SHED
- 8 REMOVE EXISTING PARKING STRIPPING
- 9 REMOVE EXISTING WHEEL STOPS AND SPEED BUMPS
- 10 CAP SEWER LINE, CONTRACTOR TO VERIFY LOCATION IN FIELD.
- 11 CAP ALL UTILITY LINES, CONTRACTOR TO VERIFY LOCATION IN FIELD.
- 12 REMOVE EXISTING KING PALM TREE

GENERAL NOTES

1. CONTRACTOR IS RESPONSIBLE FOR VERIFYING ALL EXISTING CONDITIONS AND DIMENSIONS, AND IS TO REPORT ANY DISCREPANCY TO THE ARCHITECT PRIOR TO COMMENCING ANY WORK.
2. THE PROCEDURES TO BE USED FOR DEMOLITION SHALL PROVIDE FOR SAFE CONDUCT OF THE WORK, CAREFUL REMOVAL AND DISPOSAL OF MATERIALS, PROTECTION OF PROPERTY WHICH IS TO REMAIN UNDISTURBED.
3. CONTRACTOR SHALL BE RESPONSIBLE FOR REPAIRING ANY DAMAGE TO THE EXISTING ADJACENT BUILDING DUE TO DEMOLITION WORK.
4. CONTRACTOR SHALL INSURE THAT THERE IS NO INTERFERENCE WITH ROADS, STREETS, DRIVEWAYS, LOADING DOCKS AND ADJACENT FACILITIES. CONTRACTOR SHALL OBTAIN PERMISSION FROM THE LANDLORD'S REPRESENTATIVE AND CITY BUILDING DEPARTMENT BEFORE OBSTRUCTING ANY STREETS, DRIVEWAYS, LOADING DOCKS, AND ADJACENT FACILITIES.
5. DURING REMOVAL OPERATIONS, ALL PERSONS AND PROPERTY SHALL BE PROTECTED. THE WORK SHALL PROCEED IN SUCH A MANNER AS TO MINIMIZE ANY SPREAD OF DUST, DEBRIS AND FLYING PARTICLES AND SO THAT ANY RELATED EFFECTS OF DEMOLITION DO NOT INTERFERE WITH SURROUNDING EQUIPMENT, PERSONNEL, OR BUILDING.
6. CONTRACTOR SHALL REMOVE ALL DEMOLISHED ITEMS FROM THE SITE UNLESS LANDLORD'S REPRESENTATIVE HAS DIRECTED THE CONTRACTOR TO PROVIDE DEMOLISHED ITEMS. CONTRACTOR SHALL KEEP ALL PUBLIC AREAS CLEAN OF DEBRIS. COORDINATE WITH LANDLORD FOR LOCATION OF TRASH DUMPSTER. CONTRACTOR SHALL PROVIDE BARRICADING, AS REQUIRED TO PROTECT THE PUBLIC FROM DEMOLITION WORK.
7. CONTRACTOR SHALL RECYCLE AND/OR SALVAGE AT LEAST 50% OF NON-HAZARDOUS CONSTRUCTION/DEMOLITION DEBRIS. PRIOR TO DEMOLITION, MATERIALS TO BE DIVERTED FROM DISPOSAL WILL BE IDENTIFIED. DURING DEMOLITION THESE MATERIALS WILL BE SORTED ON SITE. ALL OTHER MATERIALS NOT EXPLICITLY DEMOLISHED TO BE RETURNED TO THE LANDLORD SHALL BE CONSIDERED AS SCRAP & SHALL BE DISPOSED OFF OF THE PREMISES COMPLETELY BY THIS CONTRACTOR.
8. CONTRACTOR SHALL CONTACT ALL UTILITY COMPANIES AND CAP UTILITIES AS NECESSARY PRIOR TO START OF DEMOLITION WORK.
9. CONTRACTOR SHALL OBTAIN REQUIRED NOTICES AND PERMITS FROM THE CITY OF LOS ANGELES BUILDING & SAFETY PRIOR TO COMMENCING DEMOLITION WORK.
10. CONTRACTOR SHALL INSURE PROPER ENVIRONMENTAL ABATEMENT & REMOVAL HAS BEEN CONDUCTED PRIOR TO COMMENCING DEMOLITION WORK.
11. ALL DEBRIS SHALL BE NET AT TIME OF HANDLING TO PREVENT DUST.
12. AN 8' H. CHAIN LINK FENCE MUST BE PROVIDED TO PREVENT UNAUTHORIZED ENTRY TO THE VACANT LOT AFTER DEMOLITION.

LEGAL DESCRIPTION

LEGAL DESCRIPTION

THE LAND REFERRED TO HEREIN BELOW IS SITUATED IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AND IS DESCRIBED AS FOLLOWS:

PARCEL 1:
 THE EAST 10 FEET OF THE SOUTH 20 FEET OF LOT 54, AND THE EAST 100 FEET OF THE NORTH 20 FEET OF LOT 55, TRACT NO. 3552, IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 38, PAGES 83 AND 84 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY, MORE PARTICULARLY DESCRIBED AS FOLLOWS:
 COMMENCING AT A POINT IN THE EAST LINE OF SAID LOT 54, 20 FEET NORTH FROM THE SOUTHWEST CORNER OF SAID LOT, THENCE WEST PARALLEL WITH THE SOUTH LINE OF SAID LOT, 100 FEET; THENCE SOUTH PARALLEL WITH THE EAST LINE OF SAID LOTS 54 AND 55, 40 FEET; THENCE EAST PARALLEL WITH THE NORTH LINE OF SAID 55, 100 FEET TO THE EAST LINE OF SAID LOT 55; THENCE ALONG THE EASTERLY LINE OF SAID LOTS 55 AND 54, 40 FEET TO THE POINT OF BEGINNING.

PARCEL 2:
 THE NORTH 60 FEET OF LOT 27, THE SOUTH 20 FEET OF LOT 26, THE EAST 57 1/2 FEET OF THE NORTH 80 FEET OF SAID LOT 26, THE WEST 57 1/2 FEET OF LOT 54 AND LOTS 55 AND 56, EXCEPT THE EAST 100 FEET OF THE NORTH 20 FEET OF SAID LOTS 55 OF TRACT NO. 3552, IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 38, PAGE 83 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

PARCEL 3:
 THE SOUTH 40 FEET OF THE NORTH 80 FEET OF THE WEST 100 FEET OF LOT 26 OF TRACT NO. 3552, IN THE COUNTY OF LOS ANGELES, STATE OF CALIFORNIA, AS PER MAP RECORDED IN BOOK 348, PAGE 83 OF MAPS, IN THE OFFICE OF THE COUNTY RECORDER OF SAID COUNTY.

- 5 CANOPY WITH PAINTED METAL GUTTER FASCIA, SEE SECTIONS AND STRUCTURAL
- 6 PROVIDE ANTI-GRAFFITI FINISH AT THE FIRST 9 FEET, MEASURED FROM GRADE, AT EXTERIOR WALLS AND DOORS. (6306)
(PAINTED SURFACE - LARR #25601T, UNFINISHED SURFACE - LARR #25286T)
- 7 6'-0" W X 7'-0" HT. PAIR OF STOREFRONT TEMPERED GLASS DOORS
DARK BRONZE ALUMINUM FRAME.
- 8 3'-0" W X 7'-0" HT. STOREFRONT TEMPERED GLASS HM DOOR
DARK BRONZE ALUMINUM FRAME
- 9 VERTICAL OVERHEAD DOOR - RENLITA BI-FOLDING SYSTEM OR EQUAL
- 10 STOREFRONT GLASS WINDOW:
1" LOW-E INSULATED TEMPERED DUAL GLAZED GLASS,
2" X 4 1/2" DARK BRONZE ALUMINUM STOREFRONT FRAME
GLASS SPEC. - PPG VISTA COOL(2) AZURIA SOLORBAN 60
USE 2" X 6" DARK BRONZE ALUMINUM FRAME FOR >10' LONG SPAN
- (X) WINDOW TYPE SYMBOL - SEE A13.2 FOR WINDOW SCHEDULE
- (X) DOOR TYPE SYMBOL - SEE A13.0 FOR DOOR SCHEDULE
- ALL GLAZING ARE TEMPERED GLASS, SEE WINDOW SCHEDULE A11.2
- 11 GLAZING SPECS SIMILAR AS KEY NOTE 10, SPANDREL GLASS WINDOW. SUBMIT SAMPLES FOR APPROVAL
- 12 BUILDING ADDRESS - 12" TALL 1/4" - ALUMINUM LETTERS
FONT & COLOR SPEC TO FOLLOW
- 13 SCHOOL SIGN/LOGO - FONT & COLOR SPEC TO FOLLOW
- 14 SCHOOL FREESTANDING SIGN - 30" TALL STAINLESS STEEL LETTERS
FONT & COLOR SPEC TO FOLLOW
- 15 OUTDOOR DRINKING FOUNTAIN: HYDRO-STATION
- 16 SPANISH/MEXICAN TERRA COTTA TILE, STYLE AND COLOR: TBD
- 17 8'-0" HIGH PAINTED WROUGHT IRON FENCE WITH PERFORATED PANEL, OVER 3'-6" STUCCO WALL
COLOR AS SHOWN
- 18 GYP BD. ENCLOSED STEEL COLUMN, PAINTED
- 19 CONCRETE DECK, WITH WATERPROOFING DECK COATING/SEALER
- 20 METAL STAIR W/ CONCRETE TREADS
- 21 FIXED EXTRUDED ALUMINUM LOUVER, SEE MECH. PLAN, LOCATION V.I.F.
MANUFACTURER: (TO BE ADDED TO ELEVATIONS) "L & L LOUVERS INC." OR EQUAL
MODEL: FX-4003
