The following individuals submitted comments on agenda item:				
Agenda #	Relate To	Position	Name	Comments
42.	105	Other	Andria McFerson	As a child with Agent Orange poisoning I have a lot of birth defects including a kidney malfunction that causes many different things like muscle spasms and the doctor's and nurses misdiagnosed me and told me I was having fake seizures while having kidney problems and the muscle spasms relatable to that bodily malfunction. It was scary to stay at a hospital that under and missed diagnosed me as if I was a liar. When I had muscle spasms and could not hold my urine I was treated like a homeless alcoholic or a drug attic when no one should be shown the treatment shown to me no matter who they are. They openly stated I was faking and I belonged in a pysch ward.The nurses look me eye to eye and spoke to me as if I was putting on a show at times when my body would not move due to a kidney malfunction. So I would repetitively urine on myself and got blamed for that embarrassing moment. This was all at Cedar Sinai and at St. John's where I received this treatment on the first day of Oct. 2024 as a disabled child of a disabled Agent Orange veteran I have received many misdiagnosis and underdiagnosed finishings from unprofessional doctors, is it because of my income, having low-income health insurance and my disability or my race being a Black woman or this homeless epidemic we are now faced with although I am not apart of the unhoused population no one should have to go through that scary situation. Madam chair my name is Andria and please email me at aintnolimit01@yahoo.com if you want any information about that scary night.
