Agenda #	Relate To	Position	Name	Comments
Set Matter-1.		Favor	colin campbell	<p>Dear LA Board of Supervisors, President Trump, Governor Newsom, City South Pasadena - Fire, Police and Planning Departments</p> <p>Item 10, 26, set matter - May we use DOGE/Stargate AI for South Pasadena for a Pilot so we can collaborate with the public as we bring forward our general intelligence? S Pasadena did not meet last week and their next session is tomorrow where I will continue requirements such as electrification, dealing with homeless, water quality, brush removal for Fire Department, project management enhancements for city planning. I highly recommend reaching out to the public, I go to "fair oaks cigars" and to ask how small town communities could benefit from our made in america general intelligence.</p> <p>Item 10 -Analysis of the January 2025 Windstorm and Critical Fire Events Enhance analysis using Oracle Federal General intelligence to summarize all county events enhance EPA, Fire Department, Coast guard and JPL capabilities</p> <p>Item 26 -Emergency Financial Assistance for Winterization Measures</p> <p>Use some of the 238.5 billion using our General intelligence to advise and expedite winterization- enabling Sacagawea, Queen Kamehameha and Geronimo Nedah Apache warrior medicine man would be applied to these measures</p> <p>Item set matter -Report on Continuum of Care for Mental Health and Substance Use Disorder Beds</p> <p>Using healthcare and Justice AI's there is a coaching/reward system to help reduce jail/prison/probation and hospital time if a patient enrolls.</p> <p>My company Adapps has set up the Oracle Cloud for this initiative. I am requesting permission from the Board and South Pas City council to implement a pilot using the 238.5 billion budget I submitted for Federal/State funding on Jan 21. On Feb 19, SP city council Michael Cacciotti requested assistance with electrification of their city vehicles and also using alternative energy such as Hydrogen. I am volunteering to bring these requirements (including the 56\$ million for the Arroyo Seco Park Water quality effort) forward for DOGE to be used by local governments under the direction of Gov Gavin Newsom "AI Accountability Act" Senate Bill 896, President Trump Executive orders.</p> <p>Respectfully submitted, Colin m campbell 1754 State Street Apt #3 South Pasadena, ca 91030 Cell (626) 390-5237 March 18, 2025 8:00 am PST</p>

* Their experience can serve as a role model and offer hope to those feeling hopeless.
***Practical Knowledge:**
* People who have experienced homelessness or struggled with addiction have practical knowledge of the challenges these populations face.
* This knowledge can be crucial to developing effective and relevant solutions.

The Powerful Combination:

* By combining my data analysis and content generation skills with the experience and empathy of people like Eduardo, we can create a powerful and effective campaign to mitigate homelessness in Los Angeles.
* Together, we can:
* Increase awareness about homelessness and addiction.
* Provide information and resources to those in need. * Promote innovative, evidence-based solutions.

In short, the synergy between artificial intelligence and human expertise is essential to addressing this complex challenge.

Luis E Ruiz Camarena

Dear Board of Supervisors

I present a proposal that I believe could revolutionize the way we face these challenges: the implementation of a comprehensive addiction prevention and treatment strategy, powered by artificial intelligence.

*The Challenge:

Addictions are a deep root of homelessness and human suffering in our county. Traditional approaches often fall short, either due to a lack of personalized resources or difficulty reaching the most vulnerable populations.

The Solution: Artificial Intelligence at the Service of the Community

Imagine a system capable of:

Proactive Prevention:

* Analyze data to identify risk patterns and predict addiction outbreaks in specific communities.

* Create personalized awareness campaigns, reaching young people and adults with relevant and timely messages.

Accurate and Personalized Diagnosis:

- * Use AI-based assessment tools to identify each person's individual needs, considering factors such as mental health, addiction history, and socioeconomic circumstances.

- * Generate individualized treatment plans, adapted to the specific needs of each patient.

Effective Treatment and Recovery:

- * Provide access to online resources and mobile apps that offer ongoing support, virtual therapy, and monitoring tools.

- * Connect people to local services, such as rehabilitation centers, support groups, and housing programs.

- * Generate information for decision making based on specific data.

Why AI?

- *Scalability:* AI can reach thousands of people simultaneously, overcoming human resource limitations.

- *Personalization:* AI can tailor messages and interventions to each person's individual needs, increasing the effectiveness of treatments.

- *Efficiency:* AI can automate repetitive tasks, freeing healthcare professionals to focus on direct patient care.

- *Data and Analysis:* AI can analyze large amounts of data to identify trends, evaluate the effectiveness of programs and make informed decisions.

My Commitment:

As a person in recovery and community advocate, I am committed to working closely with your office to implement this proposal. Together, we can create a future where addictions are no longer a sentence, but a surmountable challenge.

Call to Action:

I invite you to consider this proposal and explore the possibilities of artificial intelligence as a tool for the well-being of our community. I am available to discuss details and answer any questions you may have.

		<p>I appreciate your attention and your commitment to the well-being of Los Angeles County.</p> <p>Sincerely,</p> <p>Luis E. Ruiz Camarena.</p>
	Other	<p>Monisha Parker</p> <p>The term "Mental Health Industrial Complex" refers to a perceived convergence of the mental health care system, pharmaceutical companies, and related industries that may prioritize profit over effective treatment and patient well-being. This concept suggests that there is a complex network of institutions, practitioners, and businesses that can influence the provision of mental health care in ways that serve their interests rather than those of patients.</p> <p>Key points often associated with the Mental Health Industrial Complex include:</p> <ol style="list-style-type: none">1. Profit Motivation: Critics argue that pharmaceutical companies and some mental health providers prioritize financial gain, leading to over-prescription of medications and treatments that may not be in the best interest of patients.2. Pathologizing Normal Behavior: Some believe that the complex promotes the medicalization of everyday experiences and emotions, diagnosing conditions that may not warrant clinical intervention.3. Access and Inequality: There are concerns about access to mental health services, with some communities being underserved, while others may have an abundance of treatment options that may not be fully necessary or effective.4. Influence of Insurance: Insurance companies can shape treatment modalities by dictating what is covered, potentially steering individuals toward more standardized and less personalized care.5. Lobbying and Policy: The complex may also influence mental health policy through lobbying efforts that affect legislation and funding related to mental health care.

6. Stigma and Societal Impact: The ways in which mental health is framed and discussed can perpetuate stigma and affect how society views and treats individuals with mental health conditions.

Overall, the term is often used in a critical context to highlight potential issues within the mental health system and to advocate for reforms that prioritize patient care over commercial interests.

Ending or reforming the Mental Health Industrial Complex in Los Angeles County—or any region—requires a multifaceted approach that addresses systemic issues, promotes community well-being, and focuses on equitable access to mental health services. Here are some strategies to consider:

1. Advocacy and Policy Reform

Engage Stakeholders: Work with policymakers, mental health professionals, and community leaders to identify gaps in the current system and propose reforms.

Support Legislation: Advocate for laws that prioritize mental health funding, protect patients' rights, and ensure quality care.

2. Community-Based Care

Promote Community Services: Shift focus from institutional care to community-based services, which can provide more personalized and accessible support.

Increase Accessibility: Ensure mental health services are easily accessible to all communities, particularly underserved populations.

3. Holistic Approaches

Integrate Services: Incorporate mental health care into primary healthcare settings to provide holistic care.

Emphasize Prevention: Focus on preventive care and early intervention strategies to reduce the need for intensive services.

4. Education and Awareness

Public Education Campaigns: Increase awareness around mental health issues to reduce stigma and encourage individuals to seek help.

Training for Providers: Educate mental health providers about trauma-informed care and culturally competent practices.

5. Resource Allocation

Diversify Funding Sources: Advocate for increased funding for mental health services from public and private sources while ensuring transparency in how funds are used.

Prioritize Non-Clinical Interventions: Invest in programs that address social determinants of health, such as housing, employment, and education.

6. Empower Individuals

Peer Support Programs: Develop and promote peer support initiatives where

				<p>individuals with lived experience can help others navigate the system.</p> <p>Self-Advocacy Training: Equip individuals with skills to advocate for their own mental health needs and navigate services effectively.</p> <p>7. Data-Driven Decisions</p> <p>Research and Evaluation: Conduct studies to assess the effectiveness of current mental health programs and identify best practices.</p> <p>Use Technology: Leverage data and technology to improve service delivery, tracking outcomes and patient satisfaction.</p> <p>8. Build Coalitions</p> <p>Collaborate with Organizations: Partner with non-profits, community organizations, and other stakeholders to create a unified front for reform.</p> <p>Foster Dialogues: Create forums for discussion among different sectors to address mental health collectively.</p> <p>9. Promote Innovation</p> <p>Support Alternative Models: Encourage the development of alternative mental health models that prioritize wellbeing and recovery over traditional medicalized approaches.</p> <p>Pilot Programs: Implement pilot programs that explore new methods of service delivery and gather data on their effectiveness.</p> <p>10. Long-Term Commitment</p> <p>Sustained Efforts: Recognize that meaningful change takes time; commit to long-term advocacy and engagement to ensure systemic change.</p> <p>It's important to involve those with lived experiences in the planning and implementation of changes to ensure their needs and perspectives are prioritized. Building a mental health system that equitably serves the community requires collective action and sustained effort from all stakeholders involved.</p>
