Transcript

March 26, 2025, 6:47PM

KN

Kristin Norman 0:03

Becomes effective and then we would be ready to serve notices to the affected buildings.

There, there is a portion of our ordinance that does require owners to notify tenants, but I I don't recall.

R1

Room 140 0:11

Very.

Thank you.

KN

Kristin Norman 0:18

I apologize off the top of my head at what stage, but it does.

It does direct owners that they must notify tenants.

R1

Room 140 0:26

And we did see that.

Put a timetable.

Especially after it's determined that it is not in compliance, right?

And there's an evaluation report at the very least, you know.

And then moving up those schedules, I think you know again to allow the tenants and also notifying the landlords that they are subject to this, you know, so that they if they need to appeal whatever you know you know that they run away.

Aware of this ordinance and that, you know, they've been identified, right?

I would say you know, after you know those 30 days are up for the building official to notify each of the owners right away, right?

Also, there's times for extensions, right?

That are given and wondering.

●

+13***67** 1:14

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

Comment.

Are you taking public comment here?

R1 Room 140 1:22

Not at this time.

Yes. And so in regards to extensions, which extension is for how long does it say? I know it sites a code section, but is there a timetable for each extension?

No. In one part of the ordinance, it says it allows 2 extensions.

But for how much time?

Each of them.

KN Kristin Norman 1:48

So that that provision is already in the building code, it's for plan check. It allows for a six month extension. That's what that section in I believe 106.5.4.

That's the reference you're referring to. Any other extensions that are unique to the high rise, non ductile concrete building ordinance?

We did leave it open-ended and again this is also based on our discussions with CEO and county departments.

For them to provide us a reasonable time frame, along with justification, and it allows the building official to either approve, approve with modification or deny such request. And if I may touch on the item you mentioned regarding notice to tenants.

I will go back and I will look at that section. We are actually going to be doing our triennial code adoption later this year. What we can do, if it does not specifically.

State as soon as a building has been identified or confirmed through the the three-year checklist process that an owner must notify tenants, we can look at adding that amendment when we do our we.

I'm sorry we do our triennial code adoption later this year to that provision.

R1 Room 140 3:05

Yeah.

I think that that that would help.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

KN **Kristin Norman** 3:10

It makes sense.

R1 **Room 140** 3:11

The appeal periods are over, right that the reclaim, I think actually it's known, right, that they're subject to it.

Want to make sure.

And.

My colleague has.

AG **Angela George-Moody** 3:30

I think there's another question.

KN **Kristin Norman** 3:33

Will cost.

AG **Angela George-Moody** 3:34

What cost?

RW **Rehman, Waqas** 3:36

Hi, thank you.

Good morning, everyone, and appreciate all of the work put in. I know we have come a long way with this ordinance. Even the journey may have started with first and 2nd district motion, I know.

R1 **Room 140** 3:42

Thank you.

No.

RW **Rehman, Waqas** 3:50

Even after the Florida events, I forgot what year it was.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

The Supervisor Han rightfully highlighted the need for us to maybe take a comprehensive look at all of the high rises under county's jurisdiction. So.

R1 Room 140 3:55

On.
I.

RW Rehman, Waqas 4:05

I appreciate all of the work being done here and I know a lot of questions I had. My colleague Guad Lupe already brought it up, but just from a sense of what it buildings, it would apply for. Could you give us a sense how many buildings are there?

R1 Room 140 4:20

Yeah.

RW Rehman, Waqas 4:25

That falls under directly counties its own purview versus privately owned.

If you could share with us.

Yes, and I understand most of those county owned do fall in First District.

So that's why I wanted to raise that and the need to address some of those buildings and.

KN Kristin Norman 4:41

Yes.

RW Rehman, Waqas 4:50

Again, back to the point around like after the ordinance adoption, what we the plan to immediately?

Send those letters so in case of the county's own buildings with those.

Letters then be going to the appropriate departments who have the proprietorship over the buildings. Or is it more generally to the county see or real estate or so forth to say the clock starts on the ordinance.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

R1 Room 140 5:14

Your real.
OK.

KN Kristin Norman 5:22

I would probably defer to our Council to see if they could assist with that, but we have been discussing this with both the CEO and with these appropriate county departments, so all parties are aware of the ordinance.

R1 Room 140 5:26

OK.

KN Kristin Norman 5:39

They're aware of our board dates.
They know exactly which buildings will be affected and we we let them know.

R1 Room 140 5:42

No.

KN Kristin Norman 5:47

You're kind of even working on borrowed time, since you're aware of this.

R1 Room 140 5:51

Yeah.

KN Kristin Norman 5:51

So you can start thinking about what your plan would be, but to your specific question Lakas I would. I would see if our Council might be able to assist me.

RW Rehman, Waqas 5:55

OK.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

KN **Kristin Norman** 6:01

Maybe everyone, maybe we would notice everyone.

AG **Angela George-Moody** 6:02

Yeah. Mike, Mike, Simon is in the room.

R1 **Room 140** 6:05

Yes.

And the notification would go to CEO Real estate division. We of course will make sure that all interested parties, all departments who use that building are immediately notified as well.

RW **Rehman, Waqas** 6:25

And the last column on the. Thank you, Michael.

The last column does.

It relates to the number of occupants in the building. If you could clarify what that. Number.

KN **Kristin Norman** 6:42

I believe that's actually what CEO Real Estate division uses to identify their building.

R1 **Room 140** 6:45

Use.

KN **Kristin Norman** 6:47

This. That's why you only see that on the county owned buildings and you don't see any sort of.

RW **Rehman, Waqas** 6:48

OK.

KN **Kristin Norman** 6:51

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

So it's just part of the information that as we worked with them and we just kind of kept it all together.

RW **Rehman, Waqas** 6:59

OK. And do we have any sense in terms of like the number of tenants or occupants in the private owned buildings like would love to get the data on that?

Appreciate it, especially one.

Apartment building in I believe that's the Easter lay address there. So I would like to see how how many occupants are there for that particular building?

But thank you very much for all your work on.

AG **Angela George-Moody** 7:25

Yeah, we'll follow up with you a couple on on actually with this entire team on those, those numbers to make sure that you guys are aware.

RW **Rehman, Waqas** 7:35

Thank you, Angela.

AG **Angela George-Moody** 7:37

Alright, seeing no additional questions.

Thank you, Kristen.

Thank you, Juan.

In the background I see you.

All right.

R1 **Room 140** 7:52

OK, have no other questions.

+13***67** 7:52

Are you taking public? Are you?

Are you taking public questions now?

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

R1 Room 140 7:57

Now we'll be taking public comment at the end of this meeting.

+13***67** 8:01

Oh well, we've got 4 minutes left, I guess, OK.

R1 Room 140 8:05

The meeting ends at 12:30.

+13***67** 8:08

OK.

R1 Room 140 8:11

OK, moving on to board, motions start with the 1st from SD1.

Sorry, proclaiming April 11th National Pet Day and therapy Dog Appreciation Day in Los Angeles County.

All right.

OK.

1%.

So essentially, April 11th is the National pet day.

It's known nationally as day as well as therapy Dog Awareness Day.

+13***67** 8:40

OK.

R1 Room 140 8:45

Most folks are not aware that therapy dogs are actually different than service dogs.

They're actually the dogs that are trained thoroughly and developed.

Selected based on their behavior to be able to work with more sensitive populations.

So they're actually taken to nursing homes as well as even cancer treatment

hospitals. And there's many medical facilities that have made specific protocols to

allow these pets in there to help improve and elevate the general Wellness of the

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

patients as.

They work towards long term recovery.

So essentially we're just looking to recognize the place that pets play in our lives as well as in the mental health of society as well as folks that are living in these facilities recovering in these facilities and receive care from from therapy dogs and essentially ensure that we.

Create an access to elevate.

Pet adoption instead.

Of so, essentially adopt, don't shop and help improve again elevating department animal care and controls animals that are in their care and create these opportunities to elevate and increase adoptions.

Questions.

Do we have any members of the public that would like to speak on that motion?

Here.

And then we'll move on to our second motion.

Amendment to exclusive negotiating.

There's a hand, sorry.

And Leslie?

LA **Leslie Amaya-Yanez** 10:47

Hi everyone.

Good morning, Miss Leslie and May.

R1 **Room 140** 10:49

Good morning.

LA **Leslie Amaya-Yanez** 10:50

I'm the public affairs manager at the Michelson found Animals Foundation.

We believe that pets and people bond together.

Pets bring joy to homes, improve well-being, and strengthen communities.

So we would like to extend our gratitude to Supervisor Solis and her team for their leadership in recognizing the vital role that pets play in people's lives. With nearly 60% of Los Angeles County residents having pets.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

R1 Room 140 11:13

And.

LA Leslie Amaya-Yanez 11:15

These companions provide a lot of comfort and love to people, and this proclamation of national pet day and dog Therapy day highlights the deep and meaningful bond between people and their pets.

R1 Room 140 11:15

OK.

LA Leslie Amaya-Yanez 11:25

So we support this proclamation and the motion to move it forward. Thank you.

R1 Room 140 11:34

Yeah.

Other comments.

And moving on to.

Make a motion amendment to exclusive negotiating agreement and planning document for the Expo Crenshaw Station site for I'll brief presenting on that one. I have some slides.

Should I join the meeting and screen?

Is that the best way?

I my mic off.

Yeah, yeah. OK. Commuted. And then just.

I also have copies of like the map of the site, if that's helpful for anyone.

I'm interested all the way over here.

GW Gomez, Wendy 13:05

A little stretching exit from.

R1 Room 140 13:05

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

A little stretching, I guess. Stretching exercise.

What's the name? Echo.

I think you're muted now.

GW Gomez, Wendy 13:14
OK.

R1 Room 140 13:20
All right, so.

As mentioned, this is the an amendment for extending an exclusive negotiating agreement planning document for the Expo Crenshaw Station site, which is located on Expo in Crenshaw.

Between Lacda Metro and other development partners.

GW Gomez, Wendy 13:44
Context.

R1 Room 140 13:44
The contact.

And automatically.

An eye on it, but for context, this is the site and so it's two parcels. So as you can see there is the county side of the site. It used to be an old probation site.

Location and is currently being utilized for interim 24/7 RV safe parking. The other side of the street is the metro side of the development, but the Ena was established in 2018.

For the development of both of these sites.

For a 401 affordable housing units with commercial and open space.

So that's 176 units on the metro property and 225 on the county.

And in October of 2018.

The board gave LACDA to the powers to execute the Ena with Watt partners, who's the developer, along with Metro additional partners that have been involved or hakla in the Richmond Group.

Through sort of comprehensive assessment and community engagement, the project

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

shifted to 100% affordable housing.

And through that process.

They decided Metro and Lacda decided to sort of keep the same entitlement, but have sort of two separate processes for development to increase competitiveness in securing funding for the sites.

So they're entitled together, but they're proceeding independently and being done in two phases.

So the metro property is the first phase and the county property is the second phase.

And so really what this motion does is to extend the Ena.

For 12 months to allow Lacda additional time for negotiation of a ground lease and facilitating the development on the county side.

And there's really only two directives, and, so finding the first one, finding that is not a project under SQA. And then the second, which is that twelvemonth extension with an additional.

An optional 12 months if necessary, and then in the motion.

You'll see.

It's four, but it really is the same two directives, one directed at the Board of Supervisors and then the same set directed at the board in their role as commissioners over the Lac.

Any questions?

I believe we also have lacda on the line and bot developers. If there's any questions.

No questions.

Just thank you for the presentation. In regards to the Metro, I know it looks like that's further along and you're gonna go into.

Very soon, right further along is the affordability mix known already, given that you have that you know more along.

With the affordability.

We do.

And I'm gonna call on our development development partners on this one.

On the line, if you could unmute.

AS **Amelia Soto** 17:16

I.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

I'm not sure if the development team is on isela, but this is Amelia with the lacda.
Can you guys hear me?

R1 Room 140 17:23
Yes, yes.

AS Amelia Soto 17:24
OK.
So for the and, you're talking about the affordability mix for the metro site.

R1 Room 140 17:30
Yes, yes.

AS Amelia Soto 17:31
OK.
Yes, we we do have that information. They they did go to the board earlier this month, I believe to their board, to the Metro Board on on the 12th.
So let me pull that information out.
It's not exactly.
It's not on their board letter, but it is 100% affordable.
I can get to the affordability mix.
I thought they listed it on their board letter.
OK.

R1 Room 140 18:16
Go ahead.

AS Amelia Soto 18:16
So there's a there.
There's 176 units.
Two will be unrestricted to managers.
To property managers and it ranges from 30% AMI to 80% AMI.
But if you want exact numbers of how many are 30%?

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

How many are 50?

How many are 60 and how many are 80%?

I can get that to you, but it does range from 30 to 80% of AMI.

R1 Room 140 18:38

No.

Does it have?

Does it include for persons experiencing homelessness?

I know we had a big discussion yesterday at the board.

With that, development also include parking that population.

AS Amelia Soto 18:58

So it's not restricted to special needs.

So that the lowest affordability is 30% AMI.

So it's, but it's not restricted to.

Special needs population.

R1 Room 140 19:14

Yes, that's not restricted to special needs, however the.

AS Amelia Soto 19:15

Yeah.

R1 Room 140 19:20

Ekla is when.

This is when a hack of the Housing Authority of City of Los Angeles.

Projects where they done different kind of financing.

So there is.

They've underwritten it with Section 8 vouchers as well.

Is it The Reg?

No. Remember what they're calling the program? Not red, not red.

And in regards to the like the the county side, I know are, do you have I know both of them have been entitled together, right?

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

You said, do you know what the affordability mix will be for that?

I know you're only asking like for a year extension.

I would imagine that you probably already have some of the funding right for the county side, but you have an idea of the affordability mix for that one.

The specific numbers I don't we don't have off the I don't have in front of me.

That's part of what we continue to work out 'cause on the county side for the metro.

They're at the joint development agreement stage, so there's more details to that and at the county we were, this motion would extend that to continue to have those conversations.

Right now they haven't applied for any funding for the county slate because first is the the metro.

So the reason why it's going two phases is because of the competitive nature of the different funding applications.

So they're gonna.

Complete the financing for the metro site and then for the county site.

Mm hmm, but is a year enough?

For a year.

A year with an additional option of 12.

I was wondering 'cause it seemed like a short period, almost a year to do all their funding.

Yeah, getting it all together and in regards to, you know, the community benefits of overall the whole project.

Both components. What are some of the key benefits? Do you have included local hire apla? Just curious.

Yeah, that's a me. The city of La Amelia. It will defer to you more restrictive, right?

AS **Amelia Soto** 21:32

Yeah. Yes, we do have.

We do have local hire requirements as part of the RFP.

That was something we noted to the developers that they would be subject to the county's local hire requirements.

Not apla, but local hire is definitely a requirement.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

R1 Room 140 21:51

And then there was part of the conversation with the residents was around green trees and those. So I can't remember where they landed on that negotiation in public art as some of those components.

I don't know if you.

I was just wondering, so on the metro end, I know that there is going to be like a grocery store in there. Even mention like a dog park and some pretty cool things that are the area tends to be like a food desert.

So I'm just wondering on the other side, on the county side, what like has there been any discussion on like what type of mixed-use like?

Sites to have like.

Kind of like.

Like to balance or since on the other side of the street they'll be like a grocery store.

Is there anything like what other things would be included aside from being, since they're in early stages there, there isn't defined on it, but it would carry across and complementary to.

What's on the Metro's metro side?

AS Amelia Soto 23:02

And this this is Amelia with Alex V again.

And I'd like to note that the commercial component on the county side is much smaller. The metro site can house a grocery store because they have about 45,000 square feet for commercial space.

But on the county side, it's only about 7000 plus square feet for commercial ground floor space.

R1 Room 140 23:20

Bye.

AS Amelia Soto 23:25

And it it will be community serving type of retail.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

R1 Room 140 23:33

Any other questions?

It's overall like you separated them out and you know you foresee in terms of the county side, it was better like to approach them I guess way separately I guess.

Is that because of the the competitiveness for the financing and what they were applying to it made more sense for the developer to be able to do it in in two phases.

That way, they're not competing for the same financing.

AS Amelia Soto 24:06

The the reason the metro site went first is because they have a larger commercial for the grocery store and just to secure a grocery tenant. The strategy was that the metro site would go first.

R1 Room 140 24:23

I mean, you're still looking at including?

Serving from homelessness also at the county site.

Is that still?

Again, a little discussion.

So it's not restricted to PSH in the sense of folks that would come through.

In utilizing that partnership with Hacklow, that's where it would be captured. Or that population potentially would be captured, but it's not restricted to PSH.

But that's OK, got it.

So how close participating in both employments or only the?

Oh, I believe.

AS Amelia Soto 25:06

That's that's correct both.

R1 Room 140 25:07

Yeah.

Got it.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

OK.

Have any members of the public that would like to speak on this item.

Raise your hand.

I see none.

Now we can move on to our presentation from library.

Morning or good afternoon.

My name is Ben Lee.

I am the CIO for LA County Library and I'm here with my colleague, the Walker Lance. He's our assistant director over public services here today to present on our security infrastructure.

So the the security Infrastructure project aims to enhance safety measures by deploying cameras.

Access control alarms public address systems.

And all of our community libraries across six of them, including our library headquarters.

Project addresses significant safety risks to patrons and staff across all of our locations.

The implementation of this project will significantly benefit the public as well as our staff by deterring crime, enhancing public and library staff safety.

Improving response time during emergency.

Situations increasing confidence in our patrons using the library and the services that we provide at our locations.

I was protecting our library facets and it provides consistent reporting of security incidents across our locations.

The state California Act of 2021.

Allocated 439 million.

To the it's like a one time fund to the California State Library to address lifetime. Life safety and critical maintenance needs for library facilities.

With a dollar for dollar match, LA County was awarded \$3.1 million of bringing the total.

Project it's point \$2,000,000 total.

In cost, we implemented the project early 2023 and it's ongoing at the moment.

It's a phase installation approach to ensure adequate oversight and minimum

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

disruption to our library facilities.

The project completion date is expected early 2026.

However, we're making incredible progress so far. He completed 68 locations at the moment, so that's like around 80% completion.

And.

At our libraries, the project includes installation of a number of systems and solutions. We're installing Fler system security cameras.

Access controls integrated PA systems and alarms cameras were putting in 4K resolution camera ultra high definition for critical.

Recognition task we are adding Dome cameras for verbal and discrete indoor and outdoor use.

Also including.

360 degree cameras.

For a wide range of coverage within our library space.

With minimum blind spots.

And the data management policy for these, for the Lear system is 15 days archival period, balancing the need for.

Historical.

Footage with efficient storage management.

Enhances security integrity and operational effect.

Camera placements will be strategically located to monitor focus areas and interactions such as our parking lots, our customer service desk, library entrances, bathroom entrances so that we can buzz them in.

Department is silox card access system is critical for managing access within the library. Controls entry to sensitive areas such as staff rooms, archive sessions and administrative offices.

Just bolstering security for staff and patrons.

System monitors access events and ensure that only authorized personnel can access restricted areas.

PA system enhances public announcement capabilities, allowing clear and timely communication directly managed through our Microsoft Teams.

It supports announcements for operational time and targeted messaging areas such as our meeting rooms, our bathroom facilities.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

Recreation improves communication efficiencies and ensures prompt and accurate information.

Delivery throughout.

Our.

We are also upgrading alarms as we go along.

We do have alarms currently at a lot of our locations, but those that don't have systems in place right now.

We are upgrading it or we're installing brand new alarms at our libraries.

The combination of these enterprise systems significantly enhances.

Our capability to capture and recall activities on demand.

We can essentially manage these systems.

And be able to grant access.

As well as remove access.

Double click of the mouse.

It really helps us.

Moving forward, manage access.

At our library locations.

We can standardize our PA system now.

We can automate announcements. We can.

Announce in multiple languages across all of our systems.

We can also automate our alarms.

So that.

If there are alarm activities, we can route them to response teams so that the goal is to have a surveillance system and communication capabilities.

Providing a safer and more effective environment at our locations.

The next several slides I'm just sharing snapshots of some of the camera locations that were focused in areas.

Is that?

We'll try to standardize just capturing the the entrance ways, parking lots.

Service points it within our library and then the the restrooms. As you can see, this one is our entrance and this restroom is there.

So in case you know staff has visibility here. If customers need to enter the restroom, we can buzz them in with these a moment.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

It's just another example of the camera angles that we're trying to install so that we can get good.

High resolution capturing any interactions that are happening here.

This is a camera Dome camera that's inside the library, pointing towards the entrance as well as our service desk customer service desk.

And this is another point of service. I have a lot of interactions and a lot of and you know, so that we can capture if there's any disturbance.

Just another another location focusing on the entrance service desk and then I think the left is the restroom.

So we're having those where we can capture activity.

This is the 360 Dome camera that I spoke about.

Really gives us a wide range to capture the library floor.

Space. It looks distorted on here, but in the back end system it really gives us an opportunity to extract.

Images that have that covers all directions and that's, as you can see on the right side, those are the images from the Dome camera.

It really covers the whole area.

Another focus area is a parking lot and and the parking lot.

We also try to cover the employee entrance and exits.

This is a a safety measure, again for staff to be able visibility outside.

Before they close for the day or they're exiting and walking to the car to their car.

Just another couple of.

Locations where it's.

An example of of cameras, employee entrance ways and then parking lots to really show.

What's happening outside before they they act these cameras, you know, also have night vision.

So they they do see activity that are outside at night where they close before they walk out.

So so far.

Backups in query.

I think staff appreciate the additional security and safety measures that we set in place as we continue to deploy and implement these technologies.

**This document was generated by AI and is not an official meeting record.
It may contain errors.**

Complete our our project hoping to complete by the end of this year or before that of the grant expires in 2026 of March.

So we're way ahead of schedule.

There will be some phase two activity.

Activity that will come back and add.

Cameras that would be life or needed.

But we're almost there. We're almost complete.

That this the end of my presentation and Jesse and I are here to any questions.

I mean this project.

Any questions?

Just one winning locations, did you mention?

Without camera, they may where I think we are at 18 locations remaining. We're close to the end of the project.

But we've been doing this since 2023.

We got the grant and so there is an expiration date March of 2026. But we think we can complete it way ahead of time.

If there are no other questions, thank you library.

Comment.

Any members of the public would like to address any items on the agenda.

Raise your hand now and we'll allow minutes for each person.

 **+13*****67** 37:49

Yes, I'm on the phone and unable to raise my hand.

 **Room 140** 37:50

Unable to raise my hand, OK.

Go ahead.

 **+13*****67** 37:55

OK.

 **Room 140** 37:56

Thank you.

I'm with the Marina City club.

I'm the head of the Land use committee and.

R1 Room 140 38:00

Up there is the land and.

+13***67** 38:03

It's my understanding that we are the only owners of our homes who will be affected by any kind of a earthquake retrofit ordinance to the tune of.

R1 Room 140 38:08

How?

+13***67** 38:19

10s of millions of dollars and we are the only owners who will be affected by this.

R1 Room 140 38:24

Yes.

+13***67** 38:25

Yeah, we didn't even receive information about this meeting, and that includes our board members didn't receive any information about this meeting until yesterday.

R1 Room 140 38:36

OK.

+13***67** 38:37

So of course, we cannot really represent ourselves here today with a list of questions or concerns or comments that would be pertinent.

We, of course have objections and concerns about the retrofit ordinance as it's being presented.

We're a very unique community.

Of 600 condominiums, I would venture to guess, about 12,000 people live here.
Of 1200.

I'm sorry, 1200 people live here.

600 units an average of two per unit.

So, you know, we're very concerned about this ordinance and we've been working on it a long time and we have a lot to say about it.

I'm also concerned that it seems like what April 12th is the time that it's going to be considered by the board and.

I thought it was supposed to be at least a month or a month anyway.

Of giving us a chance to get things together and we have been working on it.

R1 Room 140 39:53

Mm hmm.

+13***67** 39:53

One of one of the persons who commented earlier, a lady, a woman, was commenting on and asking some very interesting questions about the time that we will have to comply to the ordinance and I'd be interested in knowing what department that woman was with. I I didn't hear.

Any any identification at all?

R1 Room 140 40:16

Yeah.

I you know, I had some questions. I don't know if you respond to public comment. I think we no, we just keep going just take calm.

+13***67** 40:31

OK.

Well, I guess I won't know what department that person was with.

R1 Room 140 40:32

Thanks guys.

+13***67** 40:35
She's asked some interesting questions and.

R1 Room 140 40:36
Respond with technical clarification things.

+13***67** 40:40
I'm sorry.

R1 Room 140 40:40
I mean, if you have an oh, just a moment they're comparing.
We can respond as technical notifications, yeah.

+13***67** 40:44
Yeah. Yeah. It's difficult to be on the telephone.
I was only given a telephone number for this meeting. If it's a zoom meeting, I would have liked to have been on zoom so I could raise my hand and do everything properly.

R1 Room 140 40:49
Wasn't sure.
How to put it? She's talking about.
You can answer a question.
She was referring to who spoke earlier, so it was representatives from the office of Supervisor Solis.

+13***67** 41:09
OK.
Great. OK.

R1 Room 140 41:10
1st district.

**This document was generated by AI and is not an official meeting record.

+13***67** 41:11

Well, that's basically what I have to say about it.
I'm sorry if I didn't follow the protocol properly, but being on the telephone and not being able to actually join the meeting the way I would like to make it difficult. Thank you.

R1 Room 140 41:24

Hey.
Yeah.
Do you have any other Members from the public?
Nathan comment.

NS Nathan Sudeep 41:43

Yeah, I was just wondering, are we allowed to make public comment about items not on the agenda? Is there like a protocol for that or?

R1 Room 140 41:50

It has to be any of the items on on this agenda.

NS Nathan Sudeep 41:55

Got it.
OK.
Thank you.

R1 Room 140 42:03

Any others, but we don't have general public comment for cluster.
For cluster meetings, it's just comments on the agenda items.
One more.
I mean, the guy called in and so.
Put in jail conversation, OK.
That brings us to the end of our meeting.
I have one announcement our April 23rd cluster meeting will be cancelled. So Please

**This document was generated by AI and is not an official meeting record.

note that and our next meeting will be held on Wednesday, April 2nd, 30.
Everyone.

KN **Kristin Norman** 42:46
Thank you.

R1 **Room 140** 42:46
Thank you.
