KATHRYN BARGER

**Correspondence Received**

Agenda #	Relate To	Position	Name	Comments
35.		<b>Favor</b>	Allison Borgeson	
			Catherine A Baklarz	The beaches closest to the fires were merely combed over, and there is concern that toxic ash will be uncovered during the summer months when beach goers dig in the sand
			Delaney C Toler	
			Dennis Cregg	
			Jeffrey Chung	
			Jeffrey Peak	My sister-in-law lost her home in the Palisades Fire. They plan to rebuild although I'm wondering how safe it is since FEMA is not testing soil after clean-up. I live in Santa Monica and have an ecological disaster on our beaches with fire debris washed up on Santa Monica State beach after the rainfalls.
			Katherine A Mellinger	
			Kelsey Carson	It is absolutely necessary to continue the declared Local Health Emergency for the January 2025 Critical Fire Events. It would be irresponsible to not continue.
			Kristen Twomey	
			Lara Ludwinski	The city is still suffering, and the closure of PCH is not helping the city or economy. So many people and pets are still displaced. Wildlife is suffering in unimaginable ways.
			Leona Porter	Keep speaking and taking quick action on this matter until every resident in Altadena that was displaced due to the Eaton Canyon fire is made whole again no matter how long it takes or whether or not the resident/families are actual homeowners or long term renters. There should be opportunities for additional monetary grants for everyone who loss their place of residence in. standardized basis. This is regardless of any type of insurance settlement. Every resident who loss their place of residence should be awarded the same amount across the board as a base payment for the purposes of rebuilding their lives on all areas.
			Mary Kennan	
			Sarah Sulentor	Must also focus on cleaning up the beaches and water ways. We need thorough testing to ensure the water is safe for summer ocean programs such as jr. lifeguard.
