41.		Other	Pearl A Marshall	<p>As a taxpayer and lifelong Angelino, I am appalled by the lack of transparency coming from the Board of Supervisors, their staff, and the Chief Executive Office. The lack of Fiscal Responsibility should warrant an Audit by the Attorney General's office. The County of Los Angeles is self-insured and has coverage under California Joint Powers Insurance Authority (CJPIA). You have indemnity insurance for Sexual Misconduct Liability. That should help with what is owed to the victims of the Probation and Foster Care system for the County of Los Angeles part in being Grossly Negligent in the protection of their wards. Where is the money that the county should have set aside, as they knew, this Probation issue would eventually need to be settled financially. The County of Los Angeles has established specific self-insurance programs and procedures to manage their financial responsibility. They have a whole Department dedicated to this job called Risk Management. Maclaren Hall, the location where most of the sexual assaults allegedly occurred, in in the city of El Monte, which would have been required to be covered under CJPIA. This lawsuit didn't just happen, are you telling us that no one foresaw or projected Financial Responsibility? If that is true, then people need to be fired and audit into the taxpayer's money should be performed.</p> <p>All of you on MAPP get annual raised based on performance yet you pay a large group of our county workforce poverty level wages. Stop telling everyone that there is no money to pay livable wages and increase the lower paid employee's decent wages.</p> <p>You allow the county buildings that you oversee to become run down. You are basically slum lords. Go to your county buildings and see the conditions you make the employee's work in. Broken air condition, broken heating system, leaky roofs, broken or leaky pipes creating mold, broken workstations, filthy carpets, broken tiles, broken computer servers, broken chairs, monitors, lack of custodial services, just to name a few. The county infrastructure is truly in poor condition for being one of the largest counties that has the financial backing of the taxpayers. Maybe DOGE needs to come in to get rid of the waste and fraud. If you are not here to serve the people and the employees maybe it is time you leave. We need leaders that are not sheep and who know what is means to be Fiscally responsible, to be able to project the needs of not just the county but it's workforce, the infrastructure, and a proper Risk Management Department. This is why your executives, and the CEO get paid the big bucks.</p> <p>Fix all the buildings the County of Los Angeles Workforce have to work in, not just a select few. Stop buying buildings, stop buying new equipment for your offices or special projects. You need to take a real look at what squalor conditions you are making the county workforce work in.</p>
