The Honorable Board of Commissioners
Los Angeles County
Development Authority
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Commissioners:

ADOPT A UNIT PRICE CATALOG AND SPECIFICATIONS, ADVERTISE AND AWARD 18 JOB ORDER CONTRACTS FOR THE REPAIR, REMODEL, REFURBISHMENT, AND MAINTENANCE OF VARIOUS PROPERTIES (ALL DISTRICTS) (3 VOTES)

SUBJECT

This letter recommends adoption of the Job Order Contract (JOC) Unit Price Book from the Los Angeles County Development Authority's (LACDA) current JOC Consultant, the Gordian Group, Inc., dated May 2025; authority to award to the lowest responsive and responsible bidders for 18 separate Job Order Contracts 126 to 143, and authority to issue JOC work orders for County facilities, public housing, commercial buildings, and private residences.

IT IS RECOMMENDED THAT THE BOARD:

1. Find that the adoption of the JOC unit price book from The Gordian Group, dated May 2025, approval for advertisement for bids, and the proposed award of JOCs and related actions are not a project under the California Environmental Quality Act for the reasons stated in this Board letter and in the records pertaining to the JOCs.

2. Adopt the JOC Construction Task Catalog and Technical Specifications prepared by The Gordian Group, Inc., dated May 2025.

3. Direct the Executive Officer of the Board to advertise for bids to be received and opened on August 20, 2025, using The Gordian Group, Inc.'s JOC System for 18 separate JOCs (126-143) in accordance with the Notice For Bids.

4. Delegate authority to the Executive Director or designee to make the determination that a bid is nonresponsive and to reject a bid on that basis; to award to the next lowest responsive and responsible bidder; to waive inconsequential and nonmaterial deficiencies in bids submitted; and to determine, in accordance with the applicable contract and bid documents, whether the apparent lowest responsive and responsible bidder has satisfied all conditions for contract award. Upon such determination, delegate authority to the Executive Director or designee to award and execute 18 JOCs, each not to exceed $6,210,093.15, in the form previously approved by County Counsel; and to establish the effective date of the contracts upon receipt by the LACDA of acceptable performance and payment bonds and evidence of required contractor insurance.

5. With respect to JOCs 126 to 143, authorize the Executive Director or designee, subject to a finding of exemption under the California Environmental Quality Act (CEQA), to issue work orders for projects that are subject to and not subject to the State Public Contract Code including maintenance work, as applicable, not to exceed $6,210,093.15 per work order; subject to the limitation that the aggregate amount of all work orders issued under a particular JOC does not exceed the $6,210,093.15 maximum contract amount of the JOC.

6. Authorize the Executive Director or designee, upon his determination and as necessary and appropriate under the terms of the JOCs, to amend the JOCs; to terminate any of the 18 JOCs for convenience; to terminate the contractor's right to proceed with the performance of the JOCs; to accept projects and file notices upon completion of the projects; to release retention money withheld pursuant to the applicable provisions of the Public Contract Code; to grant extensions of time on projects, as applicable, and to assess and collect liquidated damages as authorized under Government Code Section 53069.85 and the contract specifications.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

Approval of the recommended actions will make necessary findings under CEQA; adopt the JOC Construction Task Catalog Unit Price Book from The Gordian Group, Inc., dated May 2025; advertise for bids to be received and opened for 18 JOCs; and authorize the LACDA to determine that a bid is nonresponsive to the mandatory requirements of the bid solicitation and to reject a bid on that basis, including the authority to waive inconsequential and nonmaterial deficiencies, award and execute 18 JOC agreements, and issue JOC work orders for County facilities, public housing, commercial buildings, and private residences subject to finding of exemption, if appropriate, findings for the work orders under CEQA at the time of issuance.

JOC is a competitively bid, flexible, and cost-effective unit price contracting method used by the LACDA to efficiently deliver a wide variety of projects, including repair, remodeling, refurbishment, alteration, and maintenance for public facilities, public housing, commercial buildings, and private residences participating in LACDA programs without extensive plans and specifications. The State Public Contract Code (PCC) provides that
JOCs are contracts of a single- year duration and cannot be used for new construction.

Approval of the recommended actions will allow the LACDA to issue work orders for projects that are subject to and not subject to the PCC, including repair, remodeling, and refurbishment work, in an amount not to exceed the monetary limits set forth in PCC Section 20145, and authorized to the LACDA by ordinance in accordance with PCC Sections 20128.5 and 20145, subject to the limitation that the aggregate amount of all work orders issued under a particular JOC does not exceed the $6,210,093.15 maximum contract amount of the JOC. For projects subject to PCC, the LACDA will seek Board approval prior to issuing JOC work orders for any project that exceeds the LACDA’s

delegated monetary limit authorized by ordinance.

Approval of the recommended actions will also delegate authority to the LACDA to issue work orders for projects that are not subject to PCC, including maintenance, demolition, or procurement and installation of equipment, as applicable, not to exceed $6,210,093.15 per work order, subject to the limitation that the aggregate amount of all work orders issued under a particular JOC does not exceed $6,210,093.15 maximum contract amount of the JOC. In accordance with the October 31, 2017, Board Motion, the LACDA will provide notification to the Board a week prior to issuance of work orders in excess of $150,000 for projects not subject to PCC. In the case of emergency or critically needed deferred maintenance projects not subject to PCC, LACDA will provide notification to the Board no later than 24 hours after the issuance of such work orders.

In order to have adequate JOC capacity available on a continuous basis, the aggregate requested amount of JOC authority is $111,781,677 (18 JOCs). Six (6) JOCs will be used for public housing refurbishment projects, six (6) will be used for the Community Care Expansion and Preservation Program, and six (6) will be used for County facilities, Lead Based Paint Hazard Mitigation, and the Renovate Commercial Façade Revitalization program.

This capacity is based on the anticipated need for various projects to be performed under JOC, including repair, remodeling, refurbishment, and maintenance work for LACDA projects. These proposed projects will primarily address sustainability, improve Americans with Disabilities Act accessibility, and provide upgrades that conform to current Building Code requirements. Therefore, the LACDA has made the determination that the use of a JOC is the most appropriate contracting method to deliver these projects.

FISCAL IMPACT/FINANCING

There is no impact on the County general fund. The projects anticipated to be performed under the JOCs, including repair, remodeling, refurbishment, alteration, and maintenance work will be financed with approved budgets of programs for which these services will be provided and are included in the LACDA's approved Fiscal Year 2025-2026 budget. Funds for future years will be included in the LACDA's annual budget approval process. The total not-to-exceed program amount to be expended per Contract is $6,210,093.15 per year. The potential aggregate, not-to-exceed amount across the 18 Contracts is $111,781,677.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The JOCs will be in the form previously reviewed and approved by County Counsel.

Each JOC will contain terms and conditions in compliance with the Board's ordinances, policies, and programs.

Data regarding the bidders' minority participation will be on file with the LACDA. The contractors will be selected upon final analysis and consideration without regard to race, creed, color, or gender.

The JOCs are subject to the Board-adopted Countywide Local and Targeted Worker Hire Policy.

ENVIRONMENTAL DOCUMENTATION

Pursuant to Title 24 of the Code of Federal Regulations, Section 58.34 (a)(3), these actions are

exempt from the National Environmental Policy Act (NEPA) because they involve administrative actions of government. JOC construction activities are generally categorically excluded from NEPA pursuant to 24 CFR 58.35 (a)(3)(i), (ii) and (iii). NEPA review and clearance will be completed for each JOC project prior to approval of specific work orders.

Award of the JOCs, adoption of the JOC unit price and technical specifications books from The Gordian Group, Inc., each dated May 2025, delegation of authority to take actions related to award and execution of JOC agreements do not constitute a project under CEQA because the activity is excluded from the definition of a project under Section 21065 of the Public Resources Code and Section 15378(b)(4) and (5) of the State CEQA Guidelines. These activities are administrative actions of government and involve the creation of government funding mechanisms or other government fiscal activities that do not involve any commitment to any specific project that may result in a potentially significant environmental impact or direct or indirect changes to the environment. JOC projects for which work orders are issued under the recommended contracts include repair, remodeling, refurbishment, and maintenance of existing structures and facilities as requested by the LACDA and are, therefore, likely categorically exempt from CEQA. The Board's award of the JOCs does not include approval of any work under the contracts. The future implementation of each work order proposed under the JOCs will be subject to prior determination and documentation by the Executive Director of the LACDA or his designee that the work is exempt from CEQA, if appropriate. In the event that the proposed work is not determined to be exempt, the LACDA will ensure that any necessary CEQA documentation is prepared and any necessary CEQA findings by the Board are recommended prior to issuance of the work orders.

CONTRACTING PROCESS

Advertising for bids for 18 separate JOCs 126 to 143 will be in accordance with the County's standard Instruction Sheet for Publishing Legal Advertisements (Enclosure A).
As requested by the Board on February 3, 1998, the Invitation for Bids will be listed on the County's "Doing Business with the County" website, and the LACDA’s website. The proposed JOCs will be solicited on an open-competitive basis and in accordance with applicable Federal, State, and County requirements.

Bidders will be required to submit a set of cost adjustment factors that would be applied to the unit prices for work using The Gordian Group, Inc.'s JOC System for the 18 separate JOCs 126 to 143 with the book dated May 2025. The unit price book from The Gordian Group, Inc. will be made available to bidders and be on file with the LACDA’s Construction Management Unit.

Bids will be determined by calculating a composite factor using a predetermined advertised formula. The lowest responsive and responsible bidder for each JOC will be awarded that JOC. The JOC consultant and their corresponding unit price book dated May 2025 and each of the lowest responsive and responsible bidder's adjustment factors will be incorporated in the awarded JOCs. Contracts will be in the form previously reviewed and approved as to form by County Counsel and in compliance with the Board's requirements.

To ensure the JOCs are awarded to responsible contractors with a satisfactory performance history, bidders will be required to report violations of the False Claims Act, their civil litigation history, and information regarding prior criminal convictions. The information reported by the lowest responsive and responsible bidders will be considered before awarding the JOCs.

The LACDA has evaluated and determined that the Living Wage Program (County Code, Chapter

2.201) does not apply as these contracts are for non-Proposition A services.

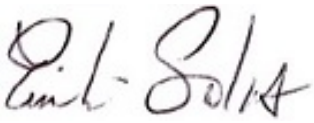
Participation by Community Business Enterprises for these contracts will be encouraged through LACDA's Business Outreach Program and by reporting the good faith efforts of contractors to utilize Community Business Enterprises.

In addition, the contracts require contractors to report Small Business Enterprises/Local Small Business Enterprises and Community Business Enterprises utilization for all subcontractors used.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

The use of these JOCs will expedite the completion of repair, remodeling, refurbishment, alteration, maintenance, and other repetitive-type work for various LACDA projects.

Respectfully submitted,



Emilio Salas
Executive Director

The Unit Prices Include:

Labor Costs:

- ☑ Labor costs include direct labor through the working foreperson level at straight-time prevailing wage rates including fringe benefits and an allowance for Social Security, Medicare taxes, worker's compensation, payroll taxes, unemployment insurance, and employee benefits.
- ☑ Labor costs include unloading equipment, traffic control, materials, and tools, and transporting the same up or down 2 stories and 125' to reach the project site; layout; measuring and cutting to fit; performing the task; disposal of excess material; and time for lunch and breaks.

Equipment Costs:

- ☑ Equipment costs include all equipment required to accomplish the task.
- ☑ Mobilization and Delivery are included for all equipment except large equipment (e.g. cranes, bulldozers, excavators, backhoes, bobcats etc.), which exclude mobilization.
- ☑ Equipment costs include all operating expenses such as fuel, electricity, lubricants, etc.

Material Costs:

- ☑ Material costs include the cost of the material, delivery, traffic control personnel, and all incidentals and accessories integral to the installation.
- ☑ Material costs include manufacturer's and/or fabricator's shop drawings.
- ☑ Material costs for roofing, drywall, VCT, carpet, wall covering, ceiling tile, pipe, conduit, concrete, etc. include an allowance for waste. This list is not intended to be all inclusive, but descriptive of the types of construction materials that are typically sold in standard lengths, sizes and weights.
- ☑ Material costs for imported materials (e.g. aggregate, sand, soil, etc.) include delivery up to 15 miles from the closest approved source.

The Adjustment Factors Include:

The Adjustment Factors include the following costs, unless specifically excluded by the terms of the Contract Documents:

Business Costs:

- ☑ Office overhead, including, but not limited to, office space, office equipment, office and management personnel, office supplies, and employee transportation.

copyright © 2025 The Gordian Group, Inc.

- ☑ Insurance and bonding.
- ☑ Profit.
- ☑ Job Order development services, Owner meetings, and other administrative services required by the Contract Documents.
- ☑ Subcontractor's overhead and profit.
- ☑ Cost of financing the work.
- ☑ Business risks such as the risk of a lower than expected volume of work, smaller than anticipated Job Orders, poor Subcontractor performance, and inflation or material and labor cost fluctuations.
- ☑ Payroll taxes, workers compensation, insurance costs and any other payment mandated by law in connection with labor, and inflation or material cost fluctuations.
- ☑ Buy America Build America (BABA) for such materials as iron and steel.

Project Related Costs:

- ☑ Project trailer, equipment and supplies, portable toilets, and hand wash stations for Contractor's use.
- ☑ Project management and project supervision.
- ☑ Services required to complete project filings and obtain permits.
- ☑ Preparation and modification of sketches, drawings, submittals, as-built drawings, and other project records.
- ☑ Gang boxes and storage containers for Contractor's tools, equipment and materials.
- ☑ Basic safety and warning signage, minor barricades (e.g., construction tape, reflective cones, etc.) and personnel safety equipment (e.g., hard hats, safety harnesses with lifeline or cabling, protective clothing, safety glasses, face shields, etc.).
- ☑ Meeting Owner's security requirements.
- ☑ All taxes for which a waiver is not available including material sales tax and equipment rental.
- ☑ Removing and returning Owner's office furniture and furnishings (e.g. chairs, tables, pictures, etc. but excluding modular furniture, furnishings fastened to the wall or floor, safes and other furniture requiring disassembly).
- ☑ Residential furniture (e.g. dresser drawers, bed frame and mattress, tv stands etc.) are not included and may be charged in a different task by the contractor.
- ☑ Sealing windows doors, and other openings with plastic to contain construction dust and debris within the work area, or to protect existing surfaces.
- ☑ Working in extreme temperatures (below or above normal) or adverse conditions such as rain, wind, sleet or snow.
- ☑ Costs resulting from inadequate supply of building materials, fuel, electricity, or skilled labor.
- ☑ Daily clean-up.
- ☑ Work area that are occupied are to be returned to previous condition at the end of each day.
- ☑ Final professional clean-up.
- ☑ Protection of all immediate surfaces from dust, debris or damage during construction. The contractor may be paid for additional protection outside the immediate construction areas, if requested by the owner in the scope of work. The methods of protection including plastic, paper, Masonite, sealing of doors or windows, etc. are the Contractor's responsibility.
- ☑ Costs resulting from productivity loss.

Price Variations:

- ☑ Contractors may experience direct costs that are different than the unit prices set forth in the Construction Task Catalog. While diligent effort was made to provide accurate, unit prices, it is the Contractor's responsibility to review and analyze the unit prices, and to calculate, prior to bidding, the Adjustment Factors accordingly.
- ☑ Contractors may experience differences in decimal rounding on unit prices that may vary from unit prices set forth in the CTC.

SUMMARY:

- ☑ This list is not exhaustive and is intended to provide general examples of costs to be included in the Contractor's Adjustment Factors.
- ☑ The only compensation to be paid to the Contractor for unit price tasks will be:

Unit Price	X	Quantity	X	Adjustment Factor

- ☑ No additional payments of any kind whatsoever will be made.
- ☑ All costs in excess of the unit prices, must be included in the Adjustment Factors.

General Rules:

- ☑ Unit prices are for complete and in-place construction and include all labor, equipment and material required to complete the task as described in the CTC.
- ☑ If the Contractor uses a crane or other lifting equipment (except a truck mounted boom lift or other equipment as part of the delivery process) to lift material onto a roof, even if that roof is less than 2 stories, the contractor will be paid for such crane or lifting equipment as a separate task.
- ☑ Unit prices include all fasteners such as anchor bolts, lag bolts, screws, adhesive, wedge anchors, expansion bolts, roofing clips (excluding hurricane clips) required. Fasteners listed separately in the CTC are for use with Owner furnished material and equipment or relocating or reinstalling existing material and equipment.
- ☑ Unit prices exclude more substantial mounting material such as threaded rod or angle iron unless the task description states otherwise.
- ☑ Unit prices for doors and windows, duct work, plumbing fixtures, seamless floors, countertops, roof flashing, pitch pockets, skylights, roof curbs, exterior trim, etc. include sealant and caulking.
- ☑ Unit prices include testing, calibrating, balancing, Programming, start-up services and the like required to ensure proper complete new installation, construction and performance of the work (e.g. compaction test for backfill, balancing of heating ventilation and air conditioning, Programming of Controls, pneumatic or hydrostatic testing, soaping of joints, disinfection and flushing of water lines, etc.). Contractor may be paid for testing, calibrating, balancing, start-up services and the like for Owner supplied materials and equipment, or when working on or tying into existing materials and equipment.
- ☑ For the purpose of calculating the quantity of a task, quantities are calculated on a per project basis. The quantity so determined shall be used for the task and all appropriate modifiers, unless the task states otherwise.
- ☑ Whenever there are alternative tasks that may be selected to complete work, the Contractor shall select the most practical and economical tasks available (e.g. rental of equipment by weeks or months rather than days, or painting by roller or spray rather than brush).

DEMOLITION:

- ☑ Unit prices for demolition include all labor, equipment and material required for the complete removal of the items; clean-up of the area; and transporting the demolished items up or down 2 stories into a truck, dumpster, or to an owner designated area, located within 125' of the project site.
- ☑ Unit prices for demolition exclude costs for hauling (See 01741900), dump fees (See 01741900), dumpsters (See 01741900), and trash chutes (See 01741900).
- ☑ If the item being demolished is attached to another item being removed and can be removed as one item, then that item shall not be priced as a separate demolition task, unless the component alone must be demolished to accomplish the task (e.g. demolition of pipe includes pipe fittings unless the fitting must be demolished separately to accomplish the task; demolition of a wood door

copyright © 2025 The Gordian Group, Inc.

includes hinges, hardware, closures, kick plates, etc.).

- ☑ The word "replace" includes removal of the existing item and installation of the new item.
- ☑ The words "remove and relocate" or "remove and reinstall" include removal, cleaning, and installation of the existing item in either the same location or another location.
- ☑ Salvageable materials are the property of the Owner and shall, if directed, be turned over to the Owner.

Working Height:

- ☑ Typical working height for work other than masonry is up to 14' above the finished floor or stationary working surface. The Contractor will not be paid for scaffolding, lifts, or similar equipment for work below 14'.
- ☑ Typical working height for masonry work is up to 4' above the finished floor or stationary working surface. The Contractor will not be paid for scaffolding, lifts, or similar equipment for masonry work below 4'.

Field Engineering:

- ☑ Surveying tasks shall be used only when the Owner requests the Contractor to perform topographic surveys, property line surveys or to establish horizontal and vertical control points. If the Owner provides horizontal and vertical control points within or adjacent to the project site, all other surveying required to complete the work shall be considered construction staking or layout, and the cost thereof is included in the appropriate tasks.

Assemblies:

- ☑ Assembly tasks take precedence over individual component tasks.
- ☑ Assembly tasks may only be used when there are no approved set of plans provided by the agency.

Restricted and Confined Spaces:

- ☑ Restricted Working Space is defined as any area with less than 3' vertical or horizontal clearance and includes areas such as crawl spaces, ceiling plenums where the grid is not removed, narrow piping tunnels, and equipment rooms where the space to install the new work is congested as a result of equipment and piping placement that meet these dimensional restrictions. A Restricted Working Space modifier is available for certain mechanical piping and piping accessories tasks and for certain electrical conduit and conduit accessories tasks. Only those tasks with a modifier for Restricted Working Space are eligible for a price adjustment, and then only if the modifier applies to the contemplated tasks. A non pre-priced task will not be allowed because of Restricted Working Space for any CTC task.
- ☑ Confined Working Space is defined according to the OSHA definition 29 CFR 1926.21(b)(6)(i): "Any space having limited means of egress, which is subject to accumulation of toxic or flammable contaminants or has an oxygen deficient atmosphere, including, but not limited to, storage tanks, process vessels, bins, boilers, ventilation and exhaust duct, sewers, underground vaults, tunnels, pipelines and open top spaces more than 4 feet in depth such as pits and tubs." The Contractor shall conform to all OSHA and Owner requirements for working in Confined Working Spaces. Required ventilation and air monitoring equipment tasks shall be priced from the CTC.

Technical Specifications:

- ☑ Technical Specifications for tasks shall be interpreted as follows: All labor, material, equipment, spare parts, services, and work required by a Technical Specification shall be considered included in the unit price, unless the task description states otherwise.

Or Equals:

- ☑ Whenever material, products, or equipment is identified in the CTC, or in the Technical

Specifications, by reference to a manufacturer's name, make or model number, the identification is intended to establish a standard. Any material, product, or equipment of another manufacturer may be considered an or-equal provided that, in the opinion of the Owner, the material, product, or equipment so proposed is of equal quality, substance and function to the named item. The Contractor shall not install any proposed material, product, or equipment without the prior written approval of the Owner. The burden of proof, and all costs related thereto, concerning whether the proposed material, product, or equipment is an or-equal, shall be borne by the Contractor.

STANDARD GEOMETRY:

Circle

- Circumference = 2 π radius = π diameter
- Area = π radius^2 = π (diameter^2 / 4)

Cylinder

- Volume = (π radius^2)height
- Surface Area = 2 π radius^2+(2 π radius)height

Sphere

- Volume = (4 π radius^3) / 3
- Surface Area = 4 π radius^2

π = 3.14159

United Inch

- The industry standard for measuring windows is the United Inch or UI. The UI is determined by adding the width and the height in inches.

01 35 33 00-0002	DAY	COVID-19 RSIP Work Plan for Unit Disinfection and Safe Work Practices Note: The LACHA will establish the number of days required for the implementation of the scope included in this task item, to be determined by the phase, duration, and intensity of construction activity requiring the extent of such practices in any given unit. In addition to the requirements contained in this task, the Contractor and their Subcontractors are to perform all work , throughout the entire project duration, with strict adherence to all local, state, and federal COVID-19 safety guidelines including those set-forth by, but not limited to the Los Angeles County Department of Health and Public Works, California Department of Public Health, Cal/OSHA, and the Centers for Disease Control and Prevention (CDC) at no additional cost to the Owner/LACDA. These non-compensable items include: • Provide all necessary Personal Protective Equipment (PPE) items for all workers, including, but not limited to face masks, gloves, goggles, and hand sanitizer. All items must meet the standards/recommendations set-forth by the CDC. • Daily, manual wipe-down to disinfect hard surfaces touched in the course of work. Compensable items under this task to include: 1) Disinfect all surfaces touched in the course of work at the end of each work day (e.g. windows, doors, hardware, frames, etc.).	255.98

01 45 23 00-0079 EA Pre-Construction Acoustical Testing (30% Artificial Noise Eligility Testing) 1,721.85

Note: Pursuant to LACDA providing a list of residential structures that have been categorically selected pursuant to the qualification requirements established by 1) FAA Order 5100.38D and 2) Acoustical Testing Plan for LAX (ATP 2019). The JOC contractor commissioned acoustical engineer shall: Conduct acoustical engineering to sound test 1 single and or multifamily dwelling per the ATP 2019, ASTM Standard E966 and FAA Order 5100.38D, to include but not limited to: Provide engineering professionals, labor, equipment, and material to utilize artificial noise to accurately measure outdoor to indoor noise level reduction (NLR) of all habitable rooms to determine eligibility of the residential structure. 1. Provide artificial noise source test kit per ATP 2019 (Measurement Procedure, 2nd paragraph page 7). 2. Place equipment and noise source at façade in compliance with ASTM E966 per ATP 2019 (Placement of the Loudspeaker, 3rd paragraph page 7). 3. Generate artificial sound (pink sound) per ATP 2019 (Creating the One-Third Octave Band Measurement, 3rd paragraph page 8). 4. Calculate exterior vs interior noise reduction per ATP 2019 (Section D. Calculating Interior Noise Levels, page 8). 5. Calculate noise based on 737-800 to determine NLR per ATP 2019 (Aircraft Noise Spectra for use in NLR Calculation paragraph 6, page 9) 6. Provide pre-construction sound test data in a report format with methodology narrative, test results, NLR per unit and habitable room. Report may include property batching per initial work order or may be limited to one pre-construction test. 1. Categorical Testing Report content requirement detail: Owner Name, Address, Zoning, CNEL, Single or Multifamily description, No of tests per batch (to meet 30% representative sampling requirement) and confirmation on which property was tested from categorical list. 2. Audit Summary Report content detail: Group Designation (to be provided by LACDA), Owner Name, Address, List of habitable room with Exterior and Interior Noise Levels recorded, and cumulative average Noise Level of all rooms. All Test result figures exceeding an interior CNEL greater than 45dB to be indicated in bold red font color. The following notes should be included at the bottom of the Audit Summary Report: Notes: "Rooms with Interior CNEL of 45 dB and greater are in bold red font" 1) Testing conducted per ATP standards/procedures 2) Exterior CNEL data from 2020 Noise Exposure Map – and have been rounded to the next 4 dB CNEL Contour 3) Interior CNEL equals exterior CNEL minus measured room NLR 4) The ASTM E966 test method states "It is estimated that the repeatability standard deviation of these test procedures are of the order of 2 to 3 dB, depending on frequency". 5) Test results between 44.1 and 44.9 have been reported as 45.O dB due to ASTM E966 test method 7. Confirm the residential parcel is located within the 65CNEL though 74 CNEL to include FAA Approved Block Rounding (60 CNEL) as delineated by the 2020 LAX Noise Exposure Map (NEM) link LAWA.ORG 8. Schedule testing with resident(s) providing an arrival and departure time within e hours 8AM and 5PM, Monday through Friday (explanation of procedures, noise impact, resident expectations and supply each occupant with a pair of disposable ear plugs min rating 32dB) 9. Pre-Construction Acoustical Test Report must be completed and submitted to LACDA in final form not later than 20 working days from field noise test survey.

The JOC contractor commissioned acoustical engineer shall: Conduct acoustical engineering to sound test 1 single and or multifamily dwelling per the ATP 2019, ASTM Standard E966 and FAA Order 5100.38D, to include but not limited to: Provide engineering professionals, labor, equipment, and material to utilize artificial noise to accurately measure outdoor to indoor noise level reduction (NLR) of all habitable rooms to include cumulative room average of the dwelling to determine post treatment interior noise reduction/improvement. Goal: The goal of the Airport Improvement Program (AIP) and State of California is to achieve, post-construction, an interior noise of more than 45dB CNEL and a noise reduction goal (not a requirement) of 5 dB compared to pre-construction conditions. 1. Provide post-construction acoustic testing per ATP 2019 (Section G. Post-Construction Acoustic Testing, Page 15). 2. 01 74 19 00-0040		Hauling *(01 74 19)* Note: Includes driver and equipment, ten (10) to fifteen (15) minutes load time, time for travel, dump time and return (roundtrip). The task quantity is the number of miles to the disposal site/transfer station (one way mileage) times the number of cubic yards being transported. For example, to haul 8 CY to a site 14 miles away, the quantity is calculated as follows: 14 miles x 8 CY = 112 CYM. Use both hauling tasks for distances greater than 15 miles. To haul 28 CY to a site 32 miles away, the quantity for the task to haul the first 15 miles is calculated: 15 miles x 28 CY = 420 CYM. The quantity for the additional hauling task over the first 15 miles is calculated: 32 total miles less 15 initial miles equals 17 miles x 28 CY = 476 CYM.

Note: All labor, material, Energy calculations, testing (HERS, AIR BALANCING & TITLE 24) and Drawings (Engineered Design, shop drawings & Final As-Built) and represents a complete, in place and fully functioning title 24 compliant system. Units comply with PCC and are 15 SEER minimum. Includes 7 day programable thermostat with up to 50 LF of wire (model), all duct work (supply, return, fresh air), dampers, Plenums, all supply registers, interior air return register, exterior fresh air intake grilles, refrigerants, air filters, penetrations, seismic bracing, cat walks, vibration isolation, all hangers, all straps, fasteners, caulking, sealants, Refrigerant line sets (up to 30 LF), UV protected condensate drains (Up to 50 LF), 26 Ga painted sheet metal line set covers (up to 10 LF) & 4" thick 2' x 2' concrete condenser pads. This list may not cover all individual items involved in the new system, however it is intended to represent the installation of the complete operational and in place system in its entirety.

01 95 99 99-0335 Electrical Panel Assembly *(01 95 99 99-0334)*

Note: All labor, material and equipment to remove and replace existing panel with new electrical panel. New panel shall include removal and reinstallation, including drilling and anchors. Installation of new panel shall include lockout/tagout, all fittings and connectors, breakers, torque and terminations, and testing. New panel shall include any/all circuit tracing, all required grounding including 2 ground rods and 1 cold water ground and gas ground. Installation of new panel shall also include any/all patch paint of surrounding plaster or drywall surfaces, patch/paint repair shall match existing to 90%.

01 95 99 99-0336	EA	Single Family Electrical Panel: 100 Amp Main Breaker, Indoor, 12 – 20 Amp Breakers, 120/240V, 1 Phase Assembled Panel Board, 1 Pole Breakers, 20 Circuit Capacity	3,366.81
		Note: Remove and replace existing panels including any/all patch of surrounding surfaces, up to 2 sf and paint to match to 90%, paint to be feathered in. Includes installation of 2 grounding rod and 1 cold water grounding and gas grounding. Includes lock out and tag out. Includes drilling and mounting anchors. Includes connection of main service. Includes conduit connectors for flex or emt. Includes terminations and torque. Any/all circuit tracing is included. Symmetrical raceway (expected quality). Wire label and Panel Scheduling Included for all circuits. Includes Vertical riser and weather head. NEC/Code Compliant.

Note: Includes materials, equipment, mobilization, preparation, signage, removal, transportation for up to 25 miles, disposal of waste at transfer facility or final destination, personnel health monitoring, negative air, documentation and other associated costs necessary for the complete abatement and disposal of the ACM in accordance with EPA, OSHA, and local regulations. Where types of ACM are listed by quantity, the quantity of the entire project, not a particular work area, is to be used in determining which task applies. For certain types of work, there is a task with a unit of measure of CF for a quantity of less than 10 CF, followed by a series of tasks for other quantities. For those tasks the contractor will be paid the first task with a unit of measure of EA, plus an additional task to arrive at the appropriate quantity for the project.

Note: Includes materials, equipment, mobilization, preparation, critical barriers (e.g. electrical outlets, registers, windows, etc.), signage, removal, lockdown encapsulant applied to surfaces, bagging, clean-up, vacuuming, transportation for up to 25 miles, disposal of waste at transfer facility or final destination, personnel health monitoring, negative air, documentation and other associated costs necessary for the complete abatement and disposal of the ACM in accordance with EPA, OSHA, and local regulations. Where types of ACM are listed by quantity, the quantity of the entire project, not a particular work area, is to be used in determining which task applies. For certain types of work, there is a task with a unit of measure of SET for a quantity of less than 10 LF or SF (10 LF to 20 LF for ACM pipe insulation), followed by a series of tasks for other quantities. The SET task includes portion for set-up and mobilization. For those tasks the contractor will be paid the first task of SET with a unit of measure of EA, plus an additional task to arrive at the appropriate quantity for the project.

Note: All unit pricing in this section includes: materials, equipment, mobilization, preparation, removal, clean-up, vacuuming, transportation for up to 25 miles, disposal, monitoring (personnel and air), sampling/testing, fees, documentation and other associated costs necessary for the complete removal and disposal of mold in accordance with EPA, OSHA, IICRC standards and local regulations. Where types of Mold are listed by quantity, the quantity of the entire project, not a particular work area of building, is to be used in determining which tasks apply. For certain types of work, there is a task with a unit of measure of SET for a quantity of less than 100 LF or SF (Up to 25 LF for Mold Abatement pipe insulation), followed by a series of tasks for other quantities. For those tasks the contractor will be paid the first task with a unit of measure of EA, plus an additional task to arrive at the appropriate quantity for the project. See CSI section 01 56 16 00-0023 for temporary stud walls, 01 74 19 00-0040 for hauling in excess of 25 miles to transfer or disposal site, 02 89 00 00-0008 for plastic sheeting for containment construction, 02 89 00 00-0020 for decontamination chambers.

03 37 16 00-0001 Concrete Pumping With Boom Truck *(03 37 16)*

Note: Includes truck rental, operator, and local travel delivery. For delivery/set-up of equipment add one hour, for clean-up of equipment add one hour. Use four hours as the minimum cost including set-up and clean-up. Excludes concrete, use "Concrete Pump" concrete tasks from appropriate section to place into pump hopper and place concrete. Sizes are measured at a 30 degree vertical reach. See CSI section 03 31 13 00-0010 for concrete placement.

Note: Sizes are for height and width of bearing bars. Welded grating is open grid grating which has bearing bars and cross bars locked in place by resistance welding, or conventional hand welding. Resistance welded grating is produced on precise automated production equipment by combining hydraulic pressure with a powerful electric current to fuse - electroforge - the cross bar and bearing bar into a single rigid panel.

05 53 13 00-0017 Pressure Locked Grating *(05 53 13)*

Note: Sizes are for height and width of bearing bars. Pressure locked grating is an open grid grating which is an assembly of tight-fitting, slotted bearing bars and cross bars, interlocked together. The permanent locking of the bars is accomplished by slotting the bearing bars with a wider 'dovetail' shape at the bottom of the slot. The bearing bar slot is usually 1/2 the depth of the cross bar. The cross bars are slotted to a depth slightly less than half its depth. When the bars are pressed together under hydraulic pressure, the cross bar material is forced into the 'dovetail' shape of the bearing bar notch, forming a strong, rigid unit.
