13.		Favor	Carlos M Montes	Thank you Supervisor Hilda Solis for this motion. I support. As a young man with the original Brown Berets we organized the first moratorium in Dec. 20, 1969 to protest the higher casualty rated of Chicanos in Vietnam war. This led to the mass protest on Aug. 29 1970, where we got attacked by the LASD and LAPD and LASD killed Ruben Salazar. This key history and event are relevant today due to the racist Trump attacks with ICE agasinst our community. Please vote yes!
			Carlos M Montes	Important history and denounce this Trump ICE attacks. Honor legacy of Ruben Salazar. Join us August 39th at Salazar Park for rally at 4:30 pm corner of Alma and Whittier B.
			Marty Vicent	
			Monsignor John Moretta	
			Xochitl Cobarruvias	Good morning, Board of Supervisors My name is Xochitl Cobarruvias with LCLAA Thank you, Supervisor Solis, for bringing forward this important motion. Commemorating the Chicano Moratorium is not just about remembering the past—it's a call to confront the present. The systemic injustices that sparked the protest in 1970 persist today in new forms. Recently, warrantless ICE raids have forcibly removed people from their jobs and places of worship without due process. And just as before, violence is used to suppress communities of color, reflecting a continued disregard for the rights and dignity of the most vulnerable This mirrors the past, when government priorities ignored marginalized communities and instead invested in control and surveillance. Today, grassroots community-based journalism continues this legacy by documenting ICE raids, amplifying silenced voices, and sharing critical resources. It is essential that we protect journalists so they can safely carry out this work. Thank you again to Supervisor Solis, and I urge the Board to vote yes in support of this motion.
			Yadi -	Support protections of 1st amendment and journalists.
		Oppose	Kimberly H Cabana

CHURCH OF THE RESURRECTION

100 YEAR ANNIVERSARY 1923-2023

August 11, 2025

LA County Board of Supervisors

Re: Support of Item 13

Dear Friends,

My name is Monsignor John Moretta. I am the Pastor of Resurrection Catholic Church in Los Angeles. I want to voice my support for Item 13.

One of the pivotal movements in the political history of East Los Angeles was the Chicano Moratorium.

Unfortunately, we, as a Latino community, are once again experiencing many of the same injustices that made the Moratorium necessary.

The inhumane cuts that will be forth coming are a great set back for our community. We will never forget the sadness brought to our people because of the unconscionable raids.

Let us not forget our past. I support Item 13.

Sincerely,

Fr. John
Monsignor John Moretta

Subject: Public Comment Submission – August 12, 2025 BOS Meeting
Attachments: BCCP_Public_Record_Notice_Mohammad.pdf

Supervisors and Executive Office,

Please find below my prepared public comments for the August 12, 2025 Board of Supervisors meeting, submitted for formal entry into the public record. These remarks are evidence-based, grounded in documented County records, and offered to support both present decision-making and historic accountability.

Set Matter-1: Report on the County's Budget

Supervisors, today's budget narrative attributes large-scale consolidations and cuts solely to federal reductions. That is incomplete. The County's own BureauCare culture, administrative inefficiencies, and billion-dollar settlements are primary harm drivers. Without acknowledging these internal causes, the proposed solutions risk repeating harm cycles the BCCP™ framework was designed to prevent. Fiscal optics cannot replace service redesign rooted in equity and accountability. Submitted for the public record by Dr. Esroruleh Mohammad, originator of the BureauCare-to-Custody-Cemetery Pipeline™ and the B2C3A™ Model, as documented in County records. My remarks today are evidence-based and entered for historic accountability.

Item 13: Honoring the 55th Anniversary of the Chicano Moratorium

The Chicano Moratorium stood against systemic injustice. That struggle continues today—through displacement, gentrification, racialized policing, and the criminalization of poverty. Honoring the anniversary should mean confronting these injustices in present policy, not just commemorating the past. Submitted for the public record by Dr. Esroruleh Mohammad, originator of the BureauCare-to-Custody-Cemetery Pipeline™ and the B2C3A™ Model, as documented in County records. My remarks today are evidence-based and entered for historic accountability.

Item 14: Maintaining Transparency in Board Policymaking through the Cluster Review Process

Clusters have become key decision-making hubs, yet public participation is inconsistently applied and sometimes obstructed, as in the August 6 HMH Cluster meeting where comment was denied on agenda items tied directly to my submitted frameworks. Extending the Cluster Review Process without enforcing equitable public access risks deepening the exclusion of lived-experience voices. Transparency must

mean open access, not procedural gatekeeping. Submitted for the public record by Dr. Esroruleh Mohammad, originator of the BureauCare-to-Custody-Cemetery Pipeline™ and the B2C3A™ Model, as documented in County records. My remarks today are evidence-based and entered for historic accountability.

Item 16: Leveling the Playing Field for Local Elections

Campaign finance reform is only meaningful if the structural systems those campaigns influence are transparent and accountable. Public financing cannot become another closed loop where County insiders replicate harm. Tie reform to enforceable commitments for inclusive policymaking and meaningful public oversight. Submitted for the public record by Dr. Esroruleh Mohammad, originator of the BureauCare-to-Custody-Cemetery Pipeline™ and the B2C3A™ Model, as documented in County records. My remarks today are evidence-based and entered for historic accountability.

Item 22: 2024-25 Civil Grand Jury Interim Report Recommendation Responses

The Civil Grand Jury process is meant to hold the County accountable, yet the pattern of responding without naming root causes or acknowledging systemic harm undermines the utility of the exercise. Evidence from my BCCP™ and B2C3A™ models — already in your public record — shows that without naming structural drivers, responses become performative compliance, not solutions. The Grand Jury's value depends on full, transparent integration of systemic reform evidence. Submitted for the public record by Dr. Esroruleh Mohammad, originator of the BureauCare-to-Custody-Cemetery Pipeline™ and the B2C3A™ Model, as documented in County records. My remarks today are evidence-based and entered for historic accountability.

Item 26: Mental Health Services Act Master Agreement Work Order Contract Amendment

MHSA dollars were intended for transformative mental health care, yet contract amendments continue to feed a fragmented, bureaucratic delivery model that mirrors the harm cycles outlined in BCCP™. Without addressing administrative trauma, barriers to access, and trust erosion — especially among historically marginalized communities — MHSA-funded services will remain functionally inaccessible to those most in need. Submitted for the public record by Dr. Esroruleh Mohammad, originator of the BureauCare-to-Custody-Cemetery Pipeline™ and the B2C3A™ Model, as documented in County records. My remarks today are evidence-based and entered for historic accountability.

General Public Comment

We have ongoing displacement, poverty, fires, hunger, and generational trauma from slavery, colonization, genocide and decades of institutional abuse — including sexual abuse settlements and systemic neglect of Black, Brown, Indigenous, immigrant, White and unhoused communities.

Safety, justice, and access should be free of bias — whether racial, economic, or political — they must be transparent, measurable, and rooted in equity, not optics. Transparency means acknowledging the full truth, not just the parts that fit an agenda.

These crises are not isolated — they are connected through the County's own governance and operational culture. The record we create today will be measured against your decisions tomorrow. This record — and the history it will become — demands structural accountability that prevents the harm cycles already diagnosed in the BureauCare-to-Custody-Cemetery Pipeline™ and B2C3A™ models.
