Fostering Inclusivity Through Closed Captioning in Los Angeles County

Los Angeles County (County) recognizes the importance of inclusive communication and equal access to information for all residents and visitors. The County is home to a significant population of individuals who are D/deaf or hard of hearing, as well as diverse communities of English language learners, and many neurodivergent individuals, including those with Autism, who benefit from captioning.

According to the non-profit organization, HEAR Center, over 800,000 individuals with some level of hearing loss reside in Greater Los Angeles and its surrounding counties¹. Additionally, one-third of all individuals with autism in California live in the County.²

Extensive research shows that closed captioning on screens improves comprehension, attention, and memory for viewers of all ages and abilities.³ Captions are particularly beneficial for people who are D/deaf or hard of hearing, English language learners, children and adults developing literacy skills, and those in noisy public

environments.⁴ These benefits extend beyond the D/deaf and hard of hearing communities to the general public.

Despite federal laws requiring captioning⁵ in many contexts, this essential accessibility feature often remains deactivated on televisions in public spaces, creating unnecessary barriers to information access. Since 1993, all television sets with screens 13 inches or larger sold in the United States have included the capability to activate closed captioning.⁶

Several jurisdictions, including Washington State, San Francisco, Portland, Rochester, Boston, and the City of Los Angeles, have successfully implemented or are in the process of implementing closed captioning requirements for public facilities with an emphasis on education and compliance rather than punishment.

Ensuring accessibility and inclusivity of our D/deaf and hard of hearing communities should be a standard that the County continually strives to uphold. By adopting a phased ordinance requiring public spaces to activate closed captioning, we move closer to meeting this standard.

I THEREFORE MOVE THAT THE BOARD OF SUPERVISORS:

1. Direct the Director of the Department of Aging & Disabilities, in consultation with the Commission on Disabilities and directors of any other relevant agencies or departments, including the Department of Economic Opportunity, and County Counsel, to report back in writing within 90 days with a proposed implementation plan for Los Angeles County (County) to adopt a Closed Captioning ordinance in the unincorporated areas of the County. The report back should discuss, at a minimum:
 - a. Clear definitions of key terms and reasonable exceptions.
