The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration

Los Angeles, California 90012

Dear Supervisors:

**APPROVAL OF AGREEMENT #25-0339-000-SG WITH THE CALIFORNIA DEPARTMENT OF
FOOD AND AGRICULTURE FOR THE
INTEGRATED PEST MANAGEMENT PROGRAM
(ALL DISTRICTS) (3-VOTES)**

SUBJECT

Approval of an Agreement with the California Department of Food and Agriculture (CDFA) which reimburses the County for work conducted by the Department of Agricultural Commissioner/Weights and Measures (ACWM) for the Integrated Pest Management Program.

IT IS RECOMMENDED THAT THE BOARD:

1. Approve and instruct the Agricultural Commissioner/Director of Weights and Measures (Commissioner/Director) to sign the accompanying Agreement with CDFA which reimburses the County up to \$120,000, with funds allocated at \$40,000 per year, for the term beginning July 1, 2025, through June 30, 2028.
2. Delegate authority to the Commissioner/Director, or his designee, to prepare, sign and execute future amendments to the Agreement, including amending the Agreement amount and Scope of Work, provided that: 1) approval of County Counsel as to form is obtained prior to any such amendments; and 2) the Commissioner/Director notifies your Board in writing within 30 days after execution of each amendment.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

Approval of the recommended actions will allow the ACWM, and the Weed Management Area (WMA) collaborating entities to establish, develop, and implement the WMA's integrated weed management plan to control and reduce invasive plant species and noxious weeds, which will include mapping, monitoring, and treatments.

The purpose of the above action is to enable ACWM and the WMA partners to prevent the propagation of invasive plant species and noxious weed populations in areas covering Los Angeles County and Catalina Island. Proactive management will prevent invasive plant species from displacing native plants that are critical to the ecosystem stability and biodiversity. The control and removal of noxious weeds also reduces the risk of hazards, such as wildfires and structural damage caused by overgrown vegetation. This project is crucial to mitigating adverse effects to the wetlands, infrastructure, and water resources.

Implementation of Strategic Plan Goals

This action supports the County Strategic Plan goals through the following strategies:

- North Star 2: Foster Vibrant and Resilient Communities. Focus Area Goal C.: Public Safety – Prevention, Protection and Security – The removal of invasive weeds in threatened areas will decrease the costs of roadside, park, and waterway maintenance, reduce fire hazard and fire control costs in the County, protect the biodiversity of native ecosystems, and maintain the recreational and aesthetic value of open space, recreational, and public areas.
- North Star 3: Realize Tomorrow's Government Today. Focus Area Goal G.: Internal Controls and Processes – Strategy i.: Maximize Revenue – ACWM in collaboration with the WMA will systematically track and map treatment areas, allowing progress to be monitored, which will provide measurable metrics to support ongoing evaluation of treatment effectiveness.

FISCAL IMPACT/FINANCING

There is no net County cost. This Agreement is offset by revenue from CDFA.

Under this Agreement, CDFA will provide up to \$120,000 funding over a three-year term, allocated at \$40,000 annually for the work performed by the ACWM in conjunction with WMAs partners for the period of July 1, 2025, through June 30, 2028.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The Agreement is for the period of July 1, 2025, through June 30, 2028.

Agreement #25-0339-000-SG has been reviewed by County Counsel and is approved as to form.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

The recommended Board action will support the program services for Fiscal Years 2025-26, 2026-27, and 2027-28.

Respectfully submitted,

Notice of termination does not nullify obligations already incurred prior to the date of termination. In the event of Termination for Convenience of this Agreement by CDFA, CDFA must pay all responsible costs and non-cancellable obligations incurred by the Recipient as of the date of termination.

15. Termination for Cause

Either party may terminate this Agreement for cause in the event of a material breach of this Agreement, provided that the non-breaching party provides written notice of the material breach. If the breach is not cured to the satisfaction of the non-breaching party, this Agreement shall automatically terminate and the CDFA shall reimburse the Recipient for all documented costs incurred up to the date of the notice of termination, including all non-cancellable obligations. Timelines associated with notice and curing of material breaches shall be consistent with the timelines outlined in paragraph 17.

2. Allowable Expenses and Fiscal Documentation

- A. The Recipient must maintain adequate documentation for expenditures of this Agreement to permit the determination of the allowability of expenditures reimbursed by CDFA under this Agreement. **2025 WMAGP PROJECT
LOS ANGELES
WEED MANAGEMENT AREA**

I. Project Plan

Weed Species to be Controlled:

The LA WMA has determined priority species (but not limited to) include Arundo (*Arundo Donax*, 4500 Noxious Weed), Yellow star-thistle (*Centaurea solstitialis*, 4500 Noxious Weed), Spanish broom (*Spartium junceum*, 4500 Noxious Weed). Project sites and location may additionally focus on invasive plant species determined by the WMA which are found on CDFA's list of noxious weeds of concern that carry a Q, A, B ratings, or are on CCR 4500 noxious weed list.

Arundo is an introduced plant species that has negative impacts on riparian areas, wetlands, and infrastructure. It affects water availability, water quality (i.e. sediment loads, temperature, pathogens, nutrient loading, flow modification), habitat, and fire behavior.

Yellow star-thistle is an accidentally introduced plant species that is highly competitive and can form dense, impenetrable stands that displace native plants in natural areas, rangelands, recreational areas, and roadsides.

Spanish broom was an introduced species that grows rapidly and forms dense impenetrable stands. Its dense stems make it difficult for other plants to grow, and woody biomass creates a dangerous fire hazard. Broom can fix nitrogen, which increases soil fertility and gives competitive advantage to other non-native weeds that thrive on high nitrogen levels.

Known locations of Arundo include the Upper Santa Clara River watershed, Upper Los Angeles River watershed and the San Gabriel River watershed. Yellow star-thistle is known to be found in the western portion of the San Gabriel Mountains that include Whitney Canyon Park, Walker and Golden Valley Ranch Open Space along roadsides, recreational areas, and open spaces. Spanish broom has been found in the Sierra Pelona Mountains, San Gabriel Mountains, Santa Monica Mountains, and Catalina Island.

WMA Location:

The Los Angeles WMA covers Los Angeles County and Catalina Island.

Methodology:

Projects will be coordinated among the WMA partners towards the control and reduction of invasive weeds, which will include mapping, monitoring, and treatments. Mapping

will be conducted using field surveys with GPS technology, aerial imagery, and GIS mapping software.

In areas that require invasive species treatment and/or removal, field mapping will be conducted before and after to evaluate the success of the work and if retreatment is necessary. In areas that are mapping sites only, surveys will consist of mapping known populations and surrounding suitable habitats near known occurrences.

Mapping will also be conducted for weed species of local importance determined by WMA members provided that they are listed on the Q, A, B, or 4500 noxious weed list. All data will be submitted to Calflora.

Permission to access private land will be attained in advance before any control and mapping is conducted for the target species in this project.

Funding may also be used to transfer historical mapping and survey data to the Calflora database.

Reports will be submitted quarterly to CDFA per grant specifications.

CEQA permitting for Upper Los Angeles River Arundo control is currently in hand. For other projects we will undertake an initial assessment to understand if an EIR or less extensive environmental review will be needed. Any needed CEQA or streambed alteration permitting will be completed before control work begins.

Weed Removal/Control Techniques(s):

Weeds will be removed following integrated pest management (IPM) practices outlined in UC IPM, UC IPM's WeedCUT (Weed Control User Tool), WRIC Weed Control in Natural Areas in the Western United States, and/or relevant Cal-IPC publications.

Depending on the population size, the species encountered and the biology of the species, removal methods can include hand removal, mechanical removal with both powered and hand tools, biocontrol agents, and chemical techniques including individual plant, spot and broadcast treatments.

Potential herbicides to be used include: glyphosate, indaziflam, aminopyralid, imazapyr, triclopyr, isoxaben, and fluazifop. The City of Los Angeles Recreation and Parks department has a current ban on glyphosate, we will check with all individual jurisdictions involved for the same before using the material. Alternatives to glyphosate exist and will be used if needed.

We anticipate minimal challenges. We will work with landowners and WMA partners to secure access and rights of entry in advance. Many regions where the priority species are found are part of on-going projects conducted by individual LA WMA members.

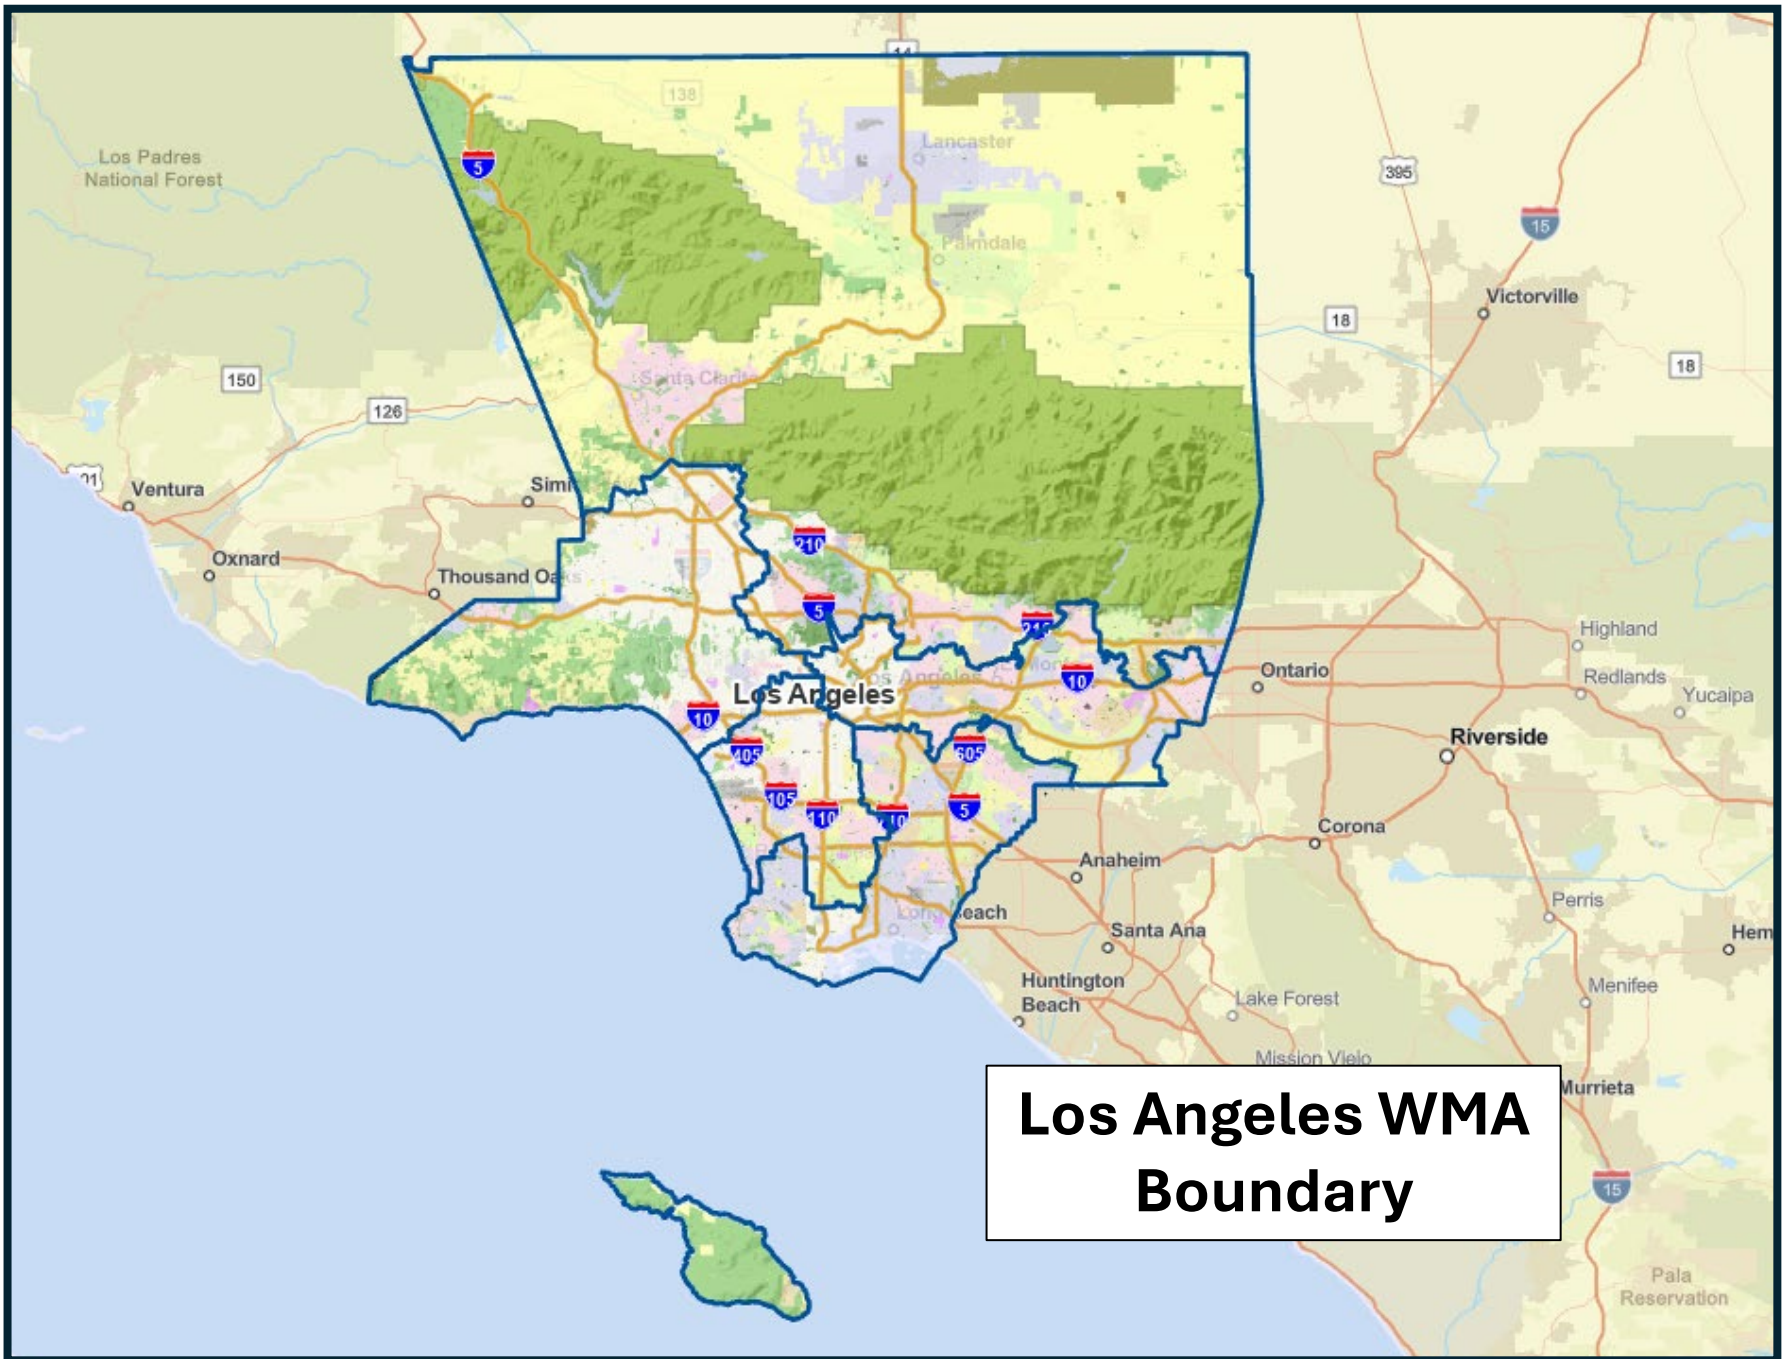

Other potential challenges include unforeseen environmental and weather conditions that affect project sites such as fires or mudslides. Work will be conducted when it is safe to do so, and these incidents and any decided actions will be documented in the quarterly reports.

II. Reporting

Grant recipients will be required to submit quarterly invoices and report to CDFA. Reports will be submitted utilizing the reporting template. Reports are due on the dates below.

| | |
|--|---|
| Quarterly Reports (Due one month after end of each quarter) | October 31, 2025, 2026, 2027 January 31, 2026, 2027, 2028 April 30, 2026, 2027, 2028 July 31, 2027, 2028 |
| Final Date to Complete Field Work | June 30, 2028 |
| Final Report | July 31, 2028 |

Final project reports are required 30 days after project completion, no later than July 31, 2028. Final project reports should include detailed information on project results and include photos of field work showing progress (before/after photos).

5. If your WMA is documenting work in Calflora can be sent to CDFA by providing an email showing receipt of data by Calflora to pdas@cdfa.ca.gov. When choosing this option, you must adhere to the mapping guidelines below.
6. Alternatively, you may send your work files/data/shapefiles directly to CDFA by submitting data in accordance with the guidelines listed in the mapping section below. Contact pdas@cdfa.ca.gov if you have questions or need assistance reporting your data.

Payment of invoices is dependent on the submission of mapping data for the time period covered in this report

Mapping Guidelines

Applicants who are not sending their mapping data directly to PDAS should utilize Calflora per the directions below. If not using Calflora, applicants should still adhere to the data field guidelines when submitting data directly to PDAS.

Calflora

- Calflora is user friendly and free to make an account
- Add photos
- Collect data on a mobile device and edit data at the office
- Field staff make individual observations which can be edited by a group's "data Czar"
- Stacked history for repeat visits to known populations
- Can obscure observations to maintain public confidentiality.
- Batch editing
- Easy to share with CDFA
- CDFA will upload all observations on your behalf, if you don't use Calflora. As such, you will not have direct control over your observations that CDFA uploads.

How to submit your data

If using Calflora:

1. Invite PDAS (PDAS@CDFA.CA.gov) to the group where data is being managed.
2. Email PDAS that your data for the quarter is ready. Include dates from the first observation to the last observation.
3. Send a Calflora link that contains the observations you would like to share with PDAS. Example of 2019 PDAS observations:
<https://www.calflora.org/entry/myobserv.html#srch=t&before=2020&after=2019-01-01&cols=b&mx=1000&inat=f>
4. PDAS will download your records and upload to the CDFFA internal database.
5. If space in your group is limited, feel free to remove PDAS from your group after PDAS has confirmed they downloaded your data.

If not using Calflora:

1. Email PDAS (PDAS@CDFA.CA.gov) with whatever format your data was stored in.
2. PDAS will upload your data to the internal CDFFA database.
3. PDAS will upload your records to Calflora on your behalf. Sensitive records can be obscured or kept private, depending on the “access” field.
