

READ IN: STRENGTHENING LOS ANGELES COUNTY’S OPERATIONAL EARTHQUAKE PREPAREDNESS

Los Angeles County faces one of the highest earthquake risk profiles in the nation, with significant vulnerabilities across infrastructure, community readiness, operational capacity, and interagency coordination. Recent assessments and departmental briefings highlight the need for expanded preparedness investments, stronger community resilience programs, and more frequent operational exercises to ensure countywide readiness for a major seismic event. The County must advance its resilience efforts, strengthen departmental capabilities, and enhance community preparedness.

I, THEREFORE, MOVE that the Board of Supervisors:

- 1. Request the Los Angeles Sheriff’s Department (LASD), in coordination with the Fire Department, and the Office of Emergency Management (OEM) to review and identify sustainable funding streams—local, state, federal, and grant-based—to expand, modernize, and maintain Community Emergency Response Team (CERT) training and deployment capabilities and provide a report back in writing within 90 days outlining potential funding opportunities, staffing needs, resource requirements, and a long-term plan to increase CERT coverage, especially in high-risk or underserved communities.
- 2. Direct OEM to develop and implement an annual full-scale or functional earthquake preparedness exercise, separate from and in addition to the Great ShakeOut. The annual exercise shall:
 - a. Test departmental response capabilities, EOC , communication systems, resource management, logistics, and recovery operations;
 - b. Include multi-agency participation and incorporate realistic scenario modeling informed by current seismic science.
