UPDATED POPULATION STATISTICS

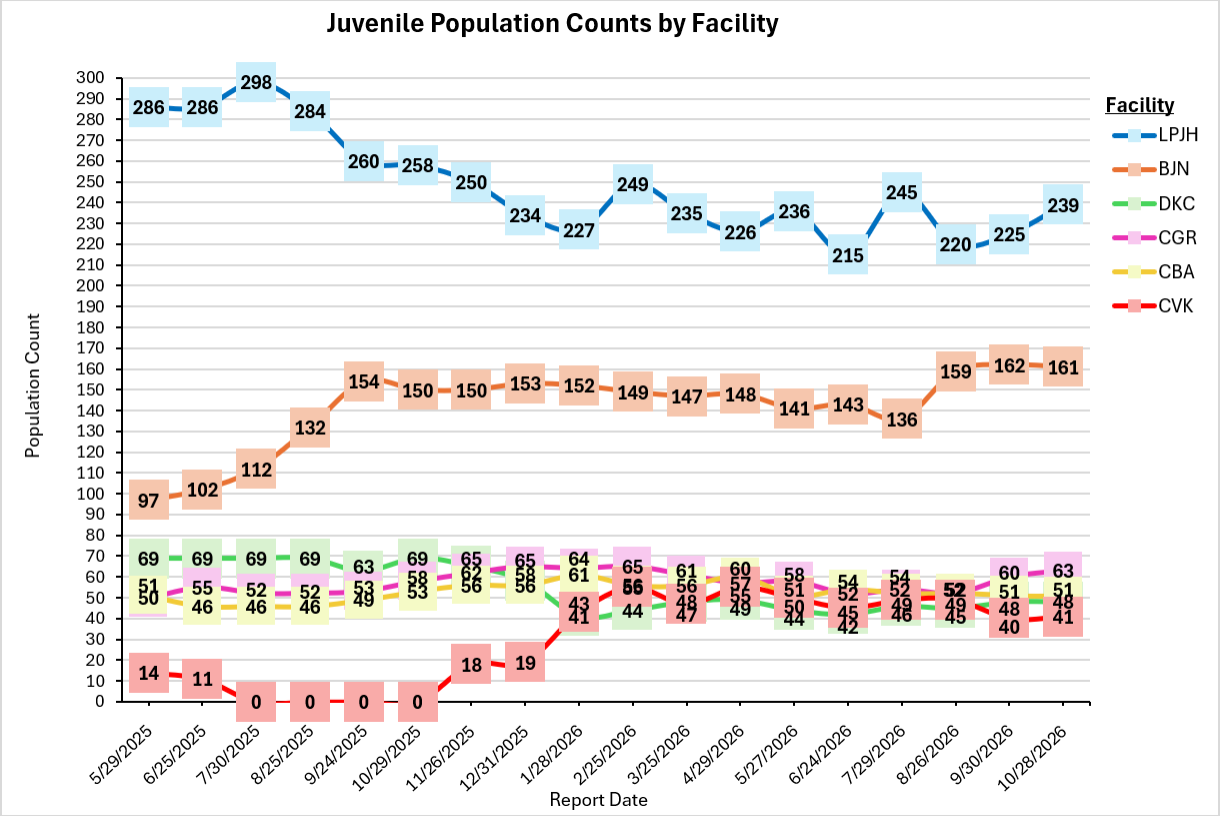

The POC will no longer be able to update this dashboard with Population Statistics due to changes in the way the Probation Department reports their data. Due to significant reformatting of the daily reports, we are unable to further update this iteration of the dashboard with population figures.

To continue providing population information we have added bar graphs showing monthly population counts by facility, beginning in May 2025. These charts will be updated monthly, using the Daily Population Reports provided by the Probation Department.

For Population Statistics and OC Reports, please visit our reports page where the POC will resume uploading the statistics reports in the format Probation provides.

PROBATION JUVENILE INSTITUTIONS POPULATION

(May 2025 – October 2026)

Monthly population totals are based on Daily Population Reports provided by the Probation Department.

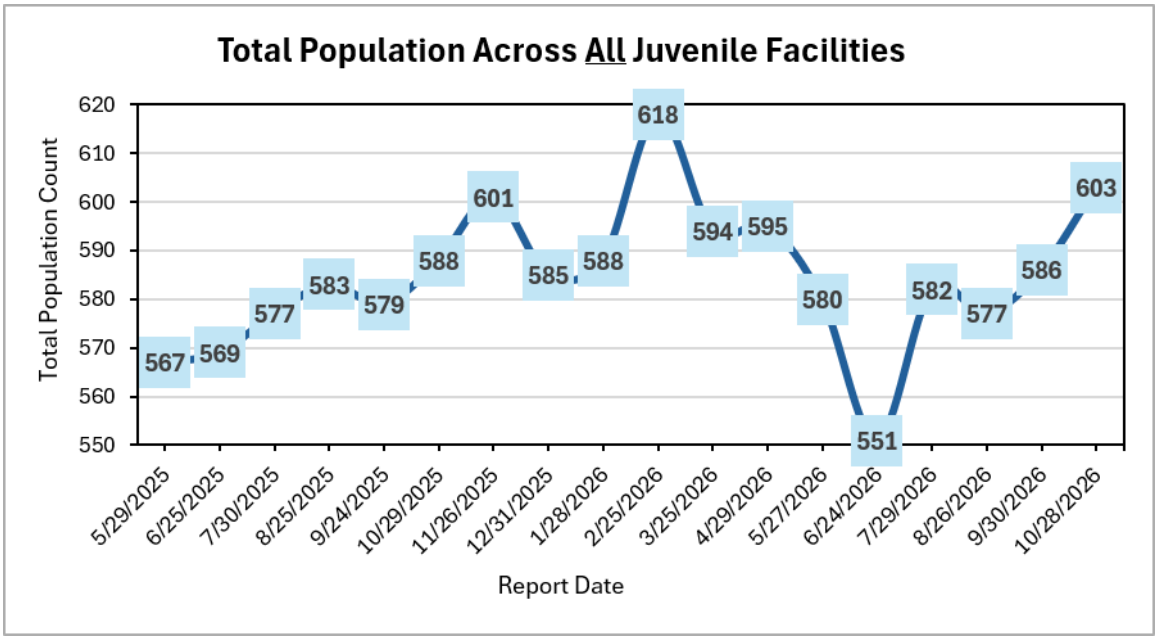

The charts display population data from the last Wednesday of each month, or the closest available reporting date when data for that day are not available.

Updated 10/29/2026

Juvenile Institutions Summary Table

	Facility

Total Population: Count of All youth in LA County Juvenile Facilities

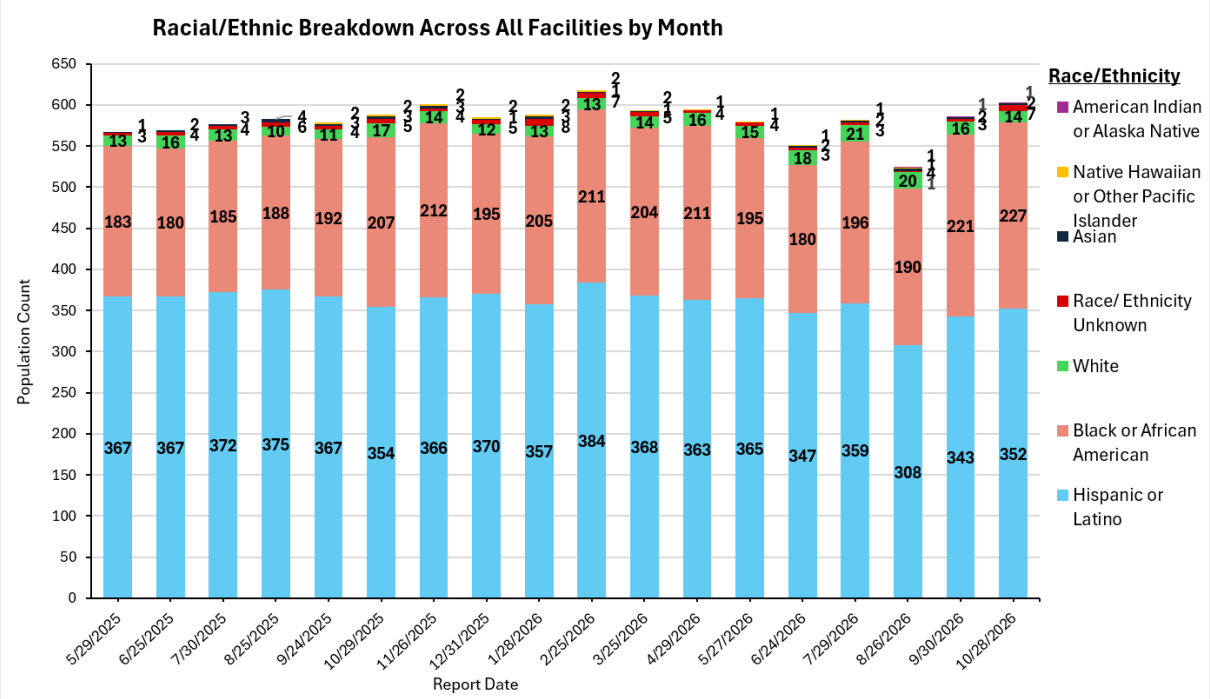

Total Population: Demographic Breakdowns

Gender

Note: Probation's Daily Population Reports indicate that reported classifications may not accurately reflect youth's current gender identity. Gender categories in these reports come from the Department's Performance Case Management System (PCMS) and are based on the information youth provide during their intake. Youth may also express updated gender-identifying information, but this is not consistently updated in PCMS.

Race/Ethnicity

Age
