What agenda item or topic will you comment on?

What is your name?

I, Emily Ordaz, stand with Centro Community Service Organization to demand that discussions regarding true penalty and consequences for deputy gang members be placed at the forefront of upcoming Civilian Oversight Commission meetings.

Although Sheriff Robert Luna has placed a prohibition policy on law enforcement gangs, the policy remains absolutely useless and invaluable to the residents of Los Angeles County as long as the prohibition lacks enforcement. Sheriff Luna's contribution to the sore deficit of accountability leaves countless families and community members in danger.

In order to efficiently monitor LASD's misconduct and ensure regulation, the COC absolutely needs consistent, significant input from community members who have been directly impacted by police violence. The perspective of those who are significantly affected by the Los Angeles Sheriff's Department are crucial to the growth of consequential policies and community control. As well as providing county residents with oversight positions, importance lies in holding commission meetings in areas that have suffered from deeply rooted police corruption such as East Los Angeles, Compton, etc.

I demand a complete eradication of deputy gangs, discharge of deputies involved in excessive force or shooting incidents, and direct consequences for the harassment
