**I. CONVENE**

The September 23, 2021, meeting of the Local Cal-ID RAN Board was called to order by Esther Lim at 2:03 p.m.

**II. REVIEW/APPROVAL OF MINUTES**

The minutes of the May 27, 2021, meeting were adopted (moved by Terry Carter, seconded by Todd Pelkey, and unanimously carried to approve).

**III. REPORT ON THE TECHNICAL SUBCOMMITTEE**

Chair Esther Lim introduced Lt. Derek Sabatini who reported on the tasks assigned to the Technical Subcommittee on May 27, 2021.

1. Report on the Status of the LiveScan Network, Installations, and Enhancements

Countywide Livescan deployment has been completed. DataWorks Plus and LACRIS personnel are working to ensure that the CBS solution is free of major deficiencies for a warranty period of ninety (90) consecutive calendar days. System acceptance will begin after the warranty period, and all statement of work (SOW) deliverables are completed.

2. Report on the Status of LAFIS

From May 1, 2021, through August 31, 2021, various LACRIS systems were inoperable and experienced unscheduled downtime for approximately sixty five (65) hours.

3. LACRIS Statistics

Mobile ID – ID BlueCheck (Fingers)

In the four months making up this RAN Board period, we had 1,815 total inquiries, 868 positive Identifications, for a positive identification ratio of 48%.

4. Steering Committee

The Technical Subcommittee meeting was held on August 11, 2021. During the meeting, fuming cabinets were requested on behalf of the Latent Print Supervisor group. Long Beach Police Department Crime Lab requested the RAN Board fund the purchase of Foster + Freeman DCS 5 calibration kits. These requests will be presented during the next RAN Board meeting.

5. General Updates

Mobile Booking Truck: The initial quote for the Mobile Booking Truck (MBT) came in at \$525,000. The Request for Bid (RFB) has been completed and we expect to present the winning bid to the RAN Board during the November meeting.

PAC-50 Upgrade: The PAC50 project continues to move forward with more locations being upgraded to the 10 mbps connection with Spectrum.

- 32 PAC-50 locations installed (connectivity confirmed)
- 4 PAC-50 locations in construction phase

RPS: The Digital Mugshot System (DMS) name has been changed to the Regional Photo System (RPS). The name change was made to align the naming scheme with the Federal Bureau of Investigations.

IV. **ACTION ITEMS**

The Board did not take up the approval of action items due to the meeting's agenda not being properly noticed for the public.

The Board agreed to have a special meeting to exclusively handle the action items that have been delayed. That meeting is scheduled for September 29, 2021.

V. **PUBLIC COMMENTS**

Members of the public were allowed to speak.

VI. **ADJOURNMENT**

The meeting was adjourned at 3:05 p.m. The Special Meeting is scheduled for September 29, 2021 and the next regular scheduled meeting is scheduled for November 18, 2021.

## **LACRIS MOBILE IDENTIFICATION POLICY**

The Los Angeles County Regional Identification System (LACRIS) provides mobile identification (Mobile ID) devices and applications to authorized County and participating agency personnel. The primary function of the Mobile Identification device is to obtain positive identification of subjects who cannot provide identification in the field. The device can also be used in situations where subjects lack the capacity or ability to identify themselves, are a danger to themselves and others, or for deceased individuals. Law enforcement personnel are required to have a legal reason for detaining a subject, or a lawful consensual encounter prior to conducting a Mobile ID search.

Only users authorized by their agency and trained by LACRIS will be given access to utilize the LACRIS Mobile Identification devices. The LACRIS issued Mobile ID devices have the ability to verify a subject's identity through the County's Multimodal Biometric Identification System (MBIS). Additionally, an identity search of the California Department of Justice's fingerprint repository, as well as the FBI's Repository of Individuals with Special Circumstances (RISC) can be conducted with the LACRIS Mobile ID devices. At no time will the user capture any biometrics for an identification outside of their official law enforcement duties.

Access is provided for official law enforcement use only. Any unauthorized access or misuse may result in disciplinary action ranging from access suspension to criminal prosecution, depending on the severity of the violation. Users may also be subject to additional discipline from their respective agency.

Agencies are encouraged to implement their own Mobile ID Device Policy; any policy, at a minimum, must incorporate the established LACRIS Guidelines listed below.

LACRIS Guidelines for Mobile ID searches:

- Authorized trained County and/or participating agency personnel may utilize the Mobile ID application only on department-authorized and managed mobile devices.
- Users must enter their LACRIS approved login credentials and be authenticated by the Los Angeles Mobile Identification System prior to capturing fingerprints.

- Mobile searches shall only be performed during the course of an officer's lawful duties.
- Mobile searches are recommended for field citation releases and work in conjunction with the user's agency field release protocols.
- Prior to utilizing a Mobile ID device, a user should first attempt to ascertain an individual's identity by means other than a fingerprint search, such as requesting identification, e.g., state issued driver's license or identification card.
- Prior to capturing an individual's fingerprints, users must have a lawful detainment (**right to know, need to know**) or meet the "No Consent" criteria described as:
  - Individuals who lack the capacity or ability to identify themselves and who are a danger to themselves or others.
  - Those individuals who are deceased and not otherwise identified.
- Prior to executing the search, the user is required to enter the reason for the search within the application along with a brief summary of the encounter where applicable.
- Users must enter a valid search reason that references the incident (report or incident number, tag number, etc.).
- If a no match/no hit response is returned to the user, they shall follow their agency's protocols as if a Mobile ID device was not available.

Use of the LACRIS Mobile ID system is audited to ensure compliance to CORI laws and the CJIS security policy. Mobile identification devices automatically record all user actions. Recorded actions include password changes, logon time, date search, and subject(s) viewed. LACRIS personnel conduct audits of user activity for compliance to CORI laws and the CJIS security policy. Audit report data is compiled and stored for a minimum of three years.

Agencies are required to conduct monthly audits of their user's activity to ensure compliance with CORI laws and the CJIS security policy. Copies of agency user audits shall be forwarded quarterly to LACRIS.
