Dear Supervisors:

**APPROVAL OF AMENDMENTS TO EXISTING GROUND LEASE, OPTION TO
AMEND EXISTING GROUND LEASE AGREEMENT, AND APPROVAL OF REVISED
AMENDED AND RESTATED GROUND LEASE AGREEMENT TO FACILITATE
REDEVELOPMENT
PARCEL 113 (MARINERS VILLAGE APARTMENTS) - MARINA DEL REY
(SECOND DISTRICT)
(4 VOTES)**

SUBJECT

Request for approval of the following: (i) Amendment No. 9 to Lease No. 11834, dated February 14, 1967, for Parcel 113, Marina del Rey (Existing Ground Lease); (ii) Amendment to the Option to amend the Ground Lease for Parcel 113, dated October 30, 2018 (Option Agreement); and (iii) revised Amended and Restated Ground Lease.

IT IS RECOMMENDED THAT YOUR BOARD:

1. Find that the proposed project is categorically exempt from the California Environmental Quality Act (CEQA), for the reasons stated in this Board letter and in the record of the project.
2. Approve and authorize the Chair to sign Amendment No. 9 to the Existing Ground Lease for Parcel 113 (Amendment No. 9) in substantially the form of Attachment A hereto, providing a short-term extension of the Existing Ground Lease term from March 31, 2023 to October 29, 2023.
3. Approve and authorize the Chair to sign an amendment to the Option Agreement for Parcel 113 (Amendment to Option) in substantially the form of Attachment B hereto, providing a short-term extension of the Option Agreement term from October 29, 2022 to October 29, 2023, to allow Lessee to satisfy the conditions

required for Lessee to exercise its option to extend the Existing Ground Lease term for 42 years and 10 months, terminating on March 31, 2066.

4. Approve and authorize the Chair to sign: (a) the revised Amended and Restated Lease Agreement for Parcel 113 (A&R Lease), attached as Exhibit B to the Amendment to Option, upon confirmation by the Director of the Department of Beaches and Harbors (Director) that the Lessee has fulfilled and satisfied the conditions to exercise the option which are set forth in the Option Agreement as amended; and (b) a Memorandum of Ground Lease as referenced in the A&R Lease for Parcel 113, and approved by the Los Angeles County Counsel and the County's outside counsel.
5. Authorize the Director to execute and deliver such other ancillary documentation, including without limitation, a lender Estoppel Certificate for Parcel 113, as required by a lender to Lessee in connection with the development of Parcel 113.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

On October 30, 2018, the Board of Supervisors granted Marina Admiralty Company, LP, a California limited partnership ("Lessee") an option to extend the existing lease for an additional 42 years and 10 months with a new expiration date of January 31, 2066. The Existing Ground Lease is set to expire on March 31, 2023, and the option term is set to expire on October 29, 2022.

The recommended actions would amend the Existing Ground Lease and Option Agreement for the Mariners Village Apartments (Parcel 113) in Marina del Rey to provide a one-year extension of the option period so that the Lessee can complete the conditions prerequisite to exercising its option to extend the term of the Existing Ground lease to January 31, 2066. The recommended actions would also result in: (a) the extension of the Existing Ground Lease term so that it expires concurrently with the extended option period, and (b) revisions to the previously approved form of A&R Lease to i) increase the amount required to be spent by Lessee on hard costs in renovation to \$115 million; and ii) make the Lessee responsible for required improvements to the lookout points which will be made part of the leased premises and maintained by the Lessee.

In exchange for the amendments described herein, the Lessee has agreed to pay an extension fee of \$340,000 and restructure the County's participation fee for transactions occurring during the option period so that it matches the County's standard language. The remainder of the transaction terms as approved by your Board on October 30, 2018, remain unchanged.

Approval of the recommended actions will find that the project is exempt from CEQA and allow the County to enter into the referenced agreements and enable Lessee to complete the conditions required so it can exercise the option and commence the redevelopment work.

IMPLEMENTATION OF STRATEGIC PLAN GOALS

The recommended actions are consistent with the County's Strategic Plan Goal I, Make Investments that Transform Lives, by promoting fiscal sustainability that will facilitate proactive redevelopment of Parcel 113. The recommended actions are also consistent with the County's Strategy I.1.5, Increase Affordable Housing Throughout L.A. County, by developing and/or preserving affordable housing units in L.A. County.

FISCAL IMPACT/FINANCING

The proposed A&R Lease for the renovation of Parcel 113 reflects the County's current market rate percentage rents for all relevant categories, subject to adjustment as provided in the proposed A&R Lease. DBH will adjust the rent revenue budget in future fiscal years as necessary. The extension of the term of the Existing Ground Lease and Option Agreement terms will produce a one-time extension fee of \$340,000 to DBH, which revenue will be recognized in Fiscal Year 2022-23 as one-time over-realized revenue.

Costs of consultants and County Counsel involved in the negotiation and development of the Option Agreement and A&R Lease are being reimbursed by the Lessee.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The Mariners Village Apartments, located at 4600 Via Marina, occupy Parcel 113. The current improvements consist of 981 apartments in 28 buildings with a commercial area of approximately 27,000 square feet, with no anchorage. Parcel 113 contains approximately 23.1 acres of land. The parcel has frontage on Via Marina and is located south of Marina Harbor Apartments and Anchorage (Parcels 111 and 112) and overlooks the Main Channel. The Existing Ground Lease for Parcel 113 expires on March 31, 2023.

Among the material terms that the County agreed to in granting Lessee the Option for the extension of the Ground Lease on October 30, 2018 are: (a) renovation of the buildings and common areas including the creation of 196 low income affordable housing units, (b) public access to the Promenade, and (c) reconstruction of the six lookout points on the Promenade to be performed by the County at Lessee's expense.

During its initial Option period, Lessee has finalized an affordable housing program which was approved by the County and has resolved a Coastal Development Permit issue with the Coastal Commission related to past tree trimming. Also, during this period, Lessee determined that it could create more value for the Parcel if it increased the scope of work for the renovation. With that in mind, Lessee has proposed significant upgrades to the original scope of work for the renovation of the parcel that includes among other things, the addition of: i) washer/dryers in many of the units, ii) HVAC in the units, iii) removal or encapsulation of asbestos in the hallways and units, and iv) reconstruction of the lookouts (instead of having the County do the work).

In re-drafting and submitting to the Department of Building and Safety revised Plans and Specifications, Lessee realized that it did not have enough time to satisfy all the conditions to exercise the Option, particularly the condition that all Plans and Specifications be permit-ready prior to exercise of the Option. Lessee therefore requested an extension of the Option and the Ground Lease terms from October 31, 2022 and March 31, 2023, respectively, to a coterminous date of October 31, 2023. Following negotiations, the County agreed to Lessee's request with the following amendments and modifications to the Existing Ground Lease, the Option Agreement, and the A&R Lease:

EXISTING GROUND LEASE

1. Term Extension: From its current expiration date on March 31, 2023 to October 31, 2023.

AMENDMENT TO OPTION

1. Term Extension: From its current expiration date on October 29, 2022 to October 29, 2023.
2. Extension Fee: In consideration for the extension of the Option, Lessee shall pay an extension fee of \$340,000.
3. Look-Out Agreement: The provision relating to the Look-Out Agreement is deleted and revised and inserted in the revised A&R Lease.
4. Participation Fee: The Participation Fee provision in the Option is amended to provide that the Net Proceeds Share payable to the County shall be the greater of \$7.5M or 20% of the Net Transfer Proceeds.

A&R LEASE (ATTACHED AS EXHIBIT B TO THE AMENDMENT TO OPTION)

1. Look-Outs: The Look-Out provision is amended to make the Look-Outs part of the leased premises for which Lessee is responsible and shift responsibility for the reconstruction of the look-outs from the County to Lessee.
2. Renovation Scope: A detailed description of the renovation scope of work is added as an exhibit to the revised A&R Lease as Exhibit B.
3. Required Hard Cost Amount: The Required Hard Cost Amount for the renovation work is increased from \$100M to \$115M.

Other than the requested changes above, the terms of the extension as approved by the Board of Supervisors in the October 30, 2018 Board Letter remain as they were proposed.

Entering into leases of the County's Marina del Rey real property is authorized by Government Code sections 25907 and 25536. The cumulative Lease term is in conformance with the maximum 99-year period authorized by California law. County Counsel has approved all of the subject agreements as to form.

CONTRACTING PROCESS

Lessee acquired the leasehold interest through an assignment on April 14, 1972. In or around 2017, Lessee entered into negotiations with DBH to extend the Ground Lease term for Parcel 113. The County granted Lessee an option on October 30, 2018 that is set to expire on October 29, 2022 but with the Board's approval the expiration date will be extended to October 29, 2023. Upon Lessee's demonstration that it has satisfied the conditions for exercise of the Option, as amended, including the receipt of approvals required to be obtained from governmental authorities for construction and development of the project associated with that Option, DBH will present to your Board's Executive Officer final confirmation that the conditions for exercise contained in the Option Agreement, as amended, have been satisfied and will request the Chair's execution of the revised A&R Lease, attached as Exhibit B to the Amendment to Option.

ENVIRONMENTAL DOCUMENTATION

The proposed project is categorically exempt from CEQA pursuant to sections 15301 (Existing Facilities), 15302 (Replacement or Reconstruction), and 15304 (Minor Alterations to Land) of the state CEQA Guidelines and Classes 1, 2, and 4 of the County's Environmental Document Reporting Procedures and Guidelines. The Project, includes amending agreements related to the lease of Parcel 113 and involves 1) improvements to the common areas of the building, the building exterior and interior, and interior of all 981 units; 2) improvements to the Promenade located adjacent to the buildings along the waterfront; 3) improvements to the waterside areas and the lookout

points on the Promenade; and 4) the establishment of affordable housing units within an existing multi-family residential complex. The rolling renovation of units and associated infrastructure do not expand the size or number of residential units. The proposed project is not subject to the exceptions to CEQA's categorical exemptions as no unusual circumstances exist on-site that would be affected by the implementation of the proposed project, there are no areas of critical concern or environmental resources that are precisely mapped or designated that would be affected by implementation of the proposed project, and the proposed project would not result in any significant cumulative effects.

Upon your Board's approval of the recommended actions, the Department will file a Notice of Exemption with the County clerk in accordance with section 21152 of the California Public Resources Code.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

There will be no impact on other current services or projects.

CONCLUSION

It is requested that the Executive Officer, Board of Supervisors send two (2) original copies of the executed Amendment No. 9 and the Amendment to Option and an adopted Board Letter to DBH. Should you have any questions please contact Don Geisinger at (424) 526-7730 or dgeisinger@bh.lacounty.gov.

Respectfully submitted,

GARY JONES

October 18, 2022

Honorable Board of Commissioners
Los Angeles County Development Authority
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Commissioners:

**APPROVE A CONTRACT FOR CUSTODIAL SERVICES WITH U.S. BANK
(ALL DISTRICTS) (3 VOTE)**

SUBJECT

This letter recommends approval of a contract with U.S. Bank National Association (U.S. Bank) to provide custodial bank services for the Los Angeles County Development Authority (LACDA).

IT IS RECOMMENDED THAT THE BOARD:

1. Authorize the Executive Director or designee to execute a Contract with U.S. Bank, to provide custodial bank services for the LACDA; to be effective following approval as to form by County Counsel and execution by all parties.
2. Authorize the Executive Director or designee to execute amendments to the Contract, following approval as to form by County Counsel, to modify the Statement of Work or to add services, as necessary.
3. Authorize the Executive Director or designee, upon his determination and as necessary and appropriate under the terms of the Contract, to terminate the Contract.
4. Find that approval of a Contract to provide custodial bank services is exempt from the California Environmental Quality Act (CEQA), as described

Administrative Office
700 West Main Street, Alhambra, CA 91801
Tel: (626) 262-4511 TDD: (626) 943-3898

Executive Director: Emilio Salas
Commissioners: Hilda L. Solis, Holly J. Mitchell, Sheila Kuehl, Janice Hahn, Kathryn Barger

herein, for the reasons stated in this Board letter and the record of the project.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of this action is to approve a Contract for custodial bank services necessary for the regular operation of the LACDA. The LACDA is required to establish safekeeping arrangements for the delivery of all brokered investments and purchases from other institutions. This requirement is in accordance with the Prudent Investor standard under California Government Code, Sections 53600 – 53686 and the LACDA's investment policy.

Bank of America is the LACDA's current safekeeping and custody services bank but will cease providing custodial bank services to clients in November 2022. The LACDA has identified U.S. Bank as a qualified institution with clients comparable to the LACDA and whose pricing is market standard. An expeditious execution of the agreement is necessary for regulatory compliance and uninterrupted business continuity.

FISCAL IMPACT/FINANCING

There is no impact on the County General Fund. Costs for the services are minimal, estimated at approximately \$40,000 per year, within acceptable market ranges, and equivalent to the current vendor. Funds for this service are included in the LACDA's approved Fiscal Year 2022-2023 budget and future year budgets as needed.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

This Contract includes provisions for mutual indemnification, which are standard in banking and fiscal contracts. These provisions have been reviewed by County Counsel and LACDA Risk Management. The custodial bank services have a very low risk as the bank is not authorized to move any LACDA funds without proper authorization and only to the investments authorized in the amounts authorized by the LACDA.

ENVIRONMENTAL DOCUMENTATION

The proposed action is exempt from the provisions of the National Environmental Policy Act pursuant to 24 Code of Federal Regulations, Part 58, Section 58.35 (b)(3) because it involves maintenance activities that will not have a physical impact on or result in any physical changes to the environment. The action is exempt from the provisions of CEQA pursuant to State CEQA Guideline 15301 because it involves activities that do not have the potential for causing a significant effect on the environment.

CONTRACTING PROCESS

Financial services are exempt from procurement regulations. The LACDA, upon being informed by Bank of America that they would no longer provide these custodial bank services, conducted an informal procurement to identify a national bank that would provide the LACDA with the best custodial bank services. U.S. Bank was selected based on the excellent services the bank provides, the low cost for the service, and the long-standing arrangement that LACDA already has with the bank for other services such as loan servicing, prepaid cards and credit cards. U.S. Bank has provided excellent services to the LACDA and has a good record of appropriate fiscal responsibility.

IMPACT ON CURRENT PROJECT SERVICES

An expeditious execution of the agreement is necessary for regulatory compliance and uninterrupted business continuity.

Respectfully submitted,

EMILIO SALAS
Executive Director

CUSTODY AGREEMENT

This Custody Agreement (the “Agreement”) is between Los Angeles County Development Authority (legal name of entity), a governmental agency (legal form of entity) organized under the laws of the State of California, United States of America, (“Customer”), and U.S. Bank National Association, a national banking association organized under the laws of the United States with offices in Minneapolis, Minnesota (“Bank”).

The parties hereby agree as follows:

SECTION 1 DEFINITIONS

- 1.1. “**Account**” means (i) the custody account established in the name of Customer and maintained under this Agreement for the Assets (as defined below) and (ii) where the context requires, one or more Sub-accounts (as defined below).
- 1.2. “**Accounting Standards**” means Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 820, *Fair Value Measurement*, or Governmental Accounting Standards Board (GASB) Codification Statement No. 72, *Fair Value Measurement and Application*.
- 1.3. “**Affiliated Investment**” means a security or other property issued, offered, or serviced by Customer or Customer’s affiliate.
- 1.4. “**Assets**” means the securities, cash, and other property Customer contributes, or causes to be contributed, from time to time under this Agreement; investments and reinvestments thereof; and income thereon, as provided herein.
- 1.5. “**Cash-flow Analysis**” means a periodic written analysis of Customer’s cash-flow history, short-term financial needs, long-term financial needs, expected levels and timing of contributions, expected levels and timing of distributions, liquidity needs (including but not limited to the anticipated liquidity required to make distributions), ability to provide future funding, and other significant information which could affect cash-flow or the exercise of discretion to manage the Assets.
- 1.6. “**CFR**” means the Code of Federal Regulations.
- 1.7. “**Client-controlled Asset**” means an asset that is neither registered in the name of Bank or Bank’s nominee nor maintained by Bank at a Depository (as defined below) or with a sub-custodian nor held by Bank in unregistered or bearer form or in such form as will pass title by delivery.
- 1.8. “**Code**” means the Internal Revenue Code of 1986, as amended.
- 1.9. “**Depository**” means any central securities depository (such as the DTC), international central securities depository (such as Euroclear Bank SA/NV), or Federal Reserve Bank.
- 1.10. “**DTC**” means the Depository Trust Company.
- 1.11. “**ERISA**” means the Employee Retirement Income Security Act of 1974, as amended.
- 1.12. “**Guidelines**” means the written investment objectives, policies, strategies, and restrictions for the Account (or for any Sub-accounts therein), including but not limited to proxy-voting guidelines, as amended from time to time.
- 1.13. “**Harm**” means claims, costs, damages, delayed payment or non-payment on Assets sold, diminution of Assets by reason of investment experience, expenses (including attorneys’ and other professional fees), fines, interest, liabilities, losses, penalties, stockholders’ assessments (asserted on account of asset registration), and taxes.

- 1.14. **“Indemnified Person”** means Bank and its affiliates, and their officers, directors, employees, agents, successors, and assigns.
- 1.15. **“Investment Advice”** means a recommendation, or a suggestion to engage in or refrain from taking a particular course of action, as to (i) the advisability of acquiring, holding, disposing of, or exchanging any Asset or any securities or other investment property or (ii) the Guidelines, the Cash-flow Analysis, the composition of the Account’s portfolio, or the selection of persons to provide investment advice or investment management services with respect to the Assets.
- 1.16. **“Investment Company Act”** means the Investment Company Act of 1940, as amended.
- 1.17. **“IRS”** means the Internal Revenue Service.
- 1.18. **“Legal Action”** means any freeze order, garnishment, levy, restraining order, search warrant, subpoena, writ of attachment or execution, bankruptcy-court order, receivership order, or similar order relating to the Account.
- 1.19. **“Messaging System”** means any financial-messaging system, network, or service acceptable to Bank, such as the Society for Worldwide Interbank Financial Telecommunication messaging system.
- 1.20. **“National Securities Exchange”** means a securities exchange that is registered with the SEC (as defined below) under Section 6 of the Securities Exchange Act of 1934.
- 1.21. **“Plan-assets Vehicle”** means an investment contract, product, or entity that holds plan assets (as determined pursuant to ERISA §§3(42) and 401 and 29 CFR §2510.3-101).
- 1.22. **“Private Fund”** means an *“investment company”* that is not subject to registration with the SEC under the Investment Company Act, pursuant to §3(c)(1) or (7) thereof.
- 1.23. **“SEC”** means the United States Securities and Exchange Commission.
- 1.24. **“State”** means the State of California, United States of America.
- 1.25. **“Statement Recipient”** means Customer and anyone else Customer so designates.
- 1.26. **“Sub-account”** means a separate portion of the Account.

SECTION 2

APPOINTMENT AND ACCEPTANCE

- 2.1. **Appointment; Acceptance.** Customer hereby appoints Bank to provide custody services in connection with the Assets. Bank hereby agrees to hold the Assets in the Account with due care in accordance with reasonable commercial standards, upon the terms and conditions set forth below.
- 2.2. **Establishment of Account.**
- 2.2.1. Customer hereby contributes Assets, or causes Assets to be contributed, to the Account.
- 2.2.2. Customer hereby represents, warrants, and covenants as follows, and Bank may resign immediately if Customer breaches any such representation, warranty, or covenant:
- 2.2.2.1. Customer holds good and valid legal title to all Assets.
- 2.2.2.2. None of the Assets is (i) an asset of any “plan” as defined in ERISA §3(3); any “plan” as defined in Code §4975(e)(1); any Plan-assets Vehicle; or any plan or entity not otherwise within the foregoing definitions that is subject to similar restrictions under federal, state, or local law; (ii) subject to the requirements of a special reserve bank account under SEC Rule 15c3-3; a customer segregated account, cleared swaps customer account, or customer secured

account under U.S. Commodity Futures Trading Commission Rules 1.20, 22.5, or 30.7; or any similar rule or regulation; or (iii) subject to a public-deposits, public-funds, or other State law that would require Bank to set aside any direct government obligations, government-guaranteed obligations, surety bonds, letters of credit, or other assets as security, regardless of the type or amount of capital of Bank, the amount of public deposits held by Bank, or the extent to which the Assets are not insured by the Federal Deposit Insurance Corporation or exceed federal deposit insurance limits.

2.2.2.3. Customer is neither (i) a Private Fund, (ii) an investment pool or entity that is an “*investment company*” as defined in Investment Company Act §3(a) or is excluded from such definition (or exempted from regulation) by the Investment Company Act, (iii) an insurer, (iv) a reinsurer, nor (v) a natural person.

2.2.2.4. Customer is not a trustee of, and has no duty to engage a trustee for, the Assets.

2.2.3. As directed by Customer, Bank will establish one (1) or more Sub-accounts and allocate Assets among Sub-accounts. Customer hereby covenants not to direct Bank to establish any Sub-account for the benefit of any entity having a different taxpayer identification number than Customer and acknowledges that each Sub-Account will have the same taxpayer identification number as Customer.

2.2.4. Customer hereby covenants not to cause or permit the Account to acquire any Affiliated Investment the price of which is not quoted on a National Securities Exchange.

2.2.5. Bank will keep the Assets (other than deposits at Bank) separate and apart from the assets of Bank.

SECTION 3 BOOKS, RECORDS, AND ACCOUNTS

3.1. **Accounting.** Bank shall maintain proper books of account and complete records of Assets and transactions in the Account.

SECTION 4 ASSET DELIVERY, TRANSFER, CUSTODY, AND SAFEKEEPING

4.1. Customer will from time to time deliver, or cause to be delivered, Assets to Bank. Bank shall receive and accept such Assets for the Account upon directions from Customer.

4.2. **Account Statements.** Bank will furnish each Statement Recipient with (i) an Account statement with the frequency designated below (or as subsequently agreed upon by Bank and Customer) within thirty (30) calendar days after the end of the reporting period and (ii) a final Account statement within thirty (30) calendar days after Bank has transferred all Assets from the Account as provided under this Agreement. (However, if Customer directs Bank to hold an Account statement, then Bank may delay delivery thereof until thirty (30) calendar days after the hold has expired.) Such Account statements will reflect Asset transactions during the reporting period and ending Asset holdings. To the extent Customer has established an account in Bank’s on-line portal and granted access thereunder to Statement Recipients, Bank will furnish such Account statements by way of such system. If no frequency is so designated or agreed upon, Customer shall be deemed to have designated “Monthly”.

(Check at least one):

- ☐ Monthly
- ☐ Quarterly
- ☐ Semi-annually
- ☐ Annually

4.3. **Confirmations; Notification by Agreement.** Except to the extent that Customer and Bank have entered into a separate written agreement that expressly makes Bank an investment manager of the Assets, the Account statements described above (including their timing and form) serve as the sole written notification of any securities transactions effected by Bank for the Account. Even so, Customer has the right to demand that Bank provide written notification of such transactions pursuant to 12 CFR §12.4(a) or (b) at no additional cost to Customer.

4.4. **Corporate Actions.** Bank shall forward to any person authorized under this Agreement to direct the purchase or sale of an Asset information Bank receives with respect to the Asset concerning voluntary corporate actions (such as proxies, redemptions, or tender offers) and mandatory corporate actions (such as class actions, mergers, stock dividends, or stock splits).

4.4.1. Notwithstanding anything herein to the contrary, Bank will, without providing notice, (i) cause Assets to participate in any mandatory exchange transaction that neither requires nor permits approval by the owner of the Assets and (ii) file any proof of claim received by Bank during the term of this Agreement regarding class-action litigation over a security held in the Account during the class-action period, regardless of any waiver, release, discharge, satisfaction, or other condition that might result from such a filing.

4.5. Upon receipt of directions from Customer, Bank shall return Assets to Customer, or deliver Assets to such location or third party as such directions may indicate, provided that in connection therewith it is the sole responsibility of Customer to provide any transfer documentation as may be required by the applicable Depository or third party recipient. Bank shall have no power or authority to assign, hypothecate, pledge or otherwise dispose of any Assets, except as provided herein or pursuant to such directions.

SECTION 5 POWERS OF BANK

5.1. In the performance of its duties under this Agreement, Bank shall have the power to:

5.1.1. **Sign Documents.** Make, execute, acknowledge, and deliver any and all documents of transfer and conveyance and any or all other instruments that may be necessary or appropriate to the proper discharge of its duties under this Agreement.

5.1.2. **Hire Service Providers.** Hire service providers to assist Bank in exercising Bank's powers under this Agreement, including any service provider that is affiliated with Bank, and provide them with information about the Account as needed to that end.

5.1.3. **Hold Assets Un-invested.** Hold in a noninterest-bearing deposit account of Bank any cash Assets (i) that are subject to pending investment or distribution directions received by Bank with respect to the Account, (ii) that were received by Bank too late in the day to be invested into the Account's designated sweep vehicle, (iii) as directed under this Agreement, or (iv) for other operational reasons.

5.1.4. **Retain Disputed Funds.** Withhold delivery or distribution of Assets that are the subject of a dispute pending final adjudication of the dispute by a court of competent jurisdiction.

5.1.5. **Distribute Assets.** Distribute Assets as set forth herein.

5.1.6. **Safe-keep Assets.** Safe-keep Assets as set forth herein.

5.1.7. **Register Assets.** Register any Asset in the name of Bank or Bank's nominee or to hold any Asset in unregistered or bearer form or in such form as will pass title by delivery, provided that Bank's records at all times show that all such assets are part of the Account.

5.1.8. **Maintain Assets at a Depository or with a Sub-custodian.** Maintain Assets that are (i) book-entry securities at any Depository or with any sub-custodian and to permit such Assets to be registered in the name of Bank, Bank's nominee, the Depository, the Depository's nominee, the sub-custodian, or the sub-custodian's nominee and (ii) physical securities at Bank's office in the United States and in a safe place.

5.1.9. **Maintain Assets at a Mutual Fund.** Maintain Assets that are mutual-fund shares in Bank's omnibus position at the fund.

5.1.10. **Collect Income.** Collect all income, principal, and other distributions due and payable on Assets. If Customer directs Bank to search the DTC's Legal Notice System for notice that a particular Asset is in default or has refused payment after due demand, then Bank will conduct such a search and notify Customer of any such notice Bank finds therein.

5.1.11. **Exchange Foreign Currency.** Exchange foreign currency into and out of United States dollars through customary channels, including Bank's foreign exchange department.

5.1.12. **Advance Funds or Securities.** Advance funds or securities in furtherance of settling securities transactions and other financial-market transactions under this Agreement.

SECTION 6 PERMISSIBLE INVESTMENTS; SWEEP DIRECTION

6.1. Permissible investments for the Account include, but are not limited to, any securities or property administered, advised, custodied, held, issued, offered, sponsored, supported by the credit of, underwritten, or otherwise serviced by Bank or by Bank's affiliate.

6.2. **Sweep Direction.** To the extent Bank has received no investment direction as to cash Assets held in the Account, Bank will use such Assets to purchase a position in the Account's designated sweep vehicle.

SECTION 7 SETTLEMENT

7.1. Upon receipt of directions from Customer, Bank will settle purchases made with Assets and sales of Assets on a contractual basis according to Bank's instruction-deadline schedule and current securities-industry practices, if Bank has all the information and the Account has all the Assets necessary for the purchase or sale.

7.2. Customer hereby covenants not to (i) direct the purchase of an asset, notify a third party that Bank will settle the purchase, or cause or permit anyone else to provide such direction or notice, if the Account has insufficient funds to settle the purchase; (ii) cause or permit proceeds from the sale of an Asset to be used to pay for the earlier purchase of the same Asset; or (iii) cause or permit the sale of an Asset that the Account has not fully paid for.

7.3. With respect to any sale of an Asset on a non-delivery-versus-payment basis, Bank hereby covenants to use commercially reasonable efforts to obtain payment on the same business day that Bank delivered the Asset, and the Account (and not Bank) assumes all risk that payment is delayed or not received.

SECTION 8 PRICE-REPORTING; CLIENT-CONTROLLED ASSETS

8.1. **Price-reporting.** For purposes of reporting the price of an Asset on an Account statement:

8.1.1. **Pricing from Vendor or Exchange.** If Bank receives a price from its third-party pricing vendor, or if a price is quoted on a National Securities Exchange, then Bank will report such price.

8.1.2. **Pricing from Other Sources.** If Bank does not receive a price from its third-party pricing vendor, and a price is not quoted on a National Securities Exchange, then Bank will report (i) the most recent price that Bank received from Customer or Customer's agent (and Customer hereby covenants that Customer and Customer's agents will use a pricing form acceptable to Bank as the means of providing prices to Bank), (ii) the most recent price that Bank received from the Asset's broker, fund accountant, general partner, issuer, investment manager, transfer agent, or other service provider, (iii) the Asset's par value, or (iv) a nominal value for the Asset.

8.1.3. **Limitations.** Customer hereby acknowledges that Bank is performing a routine, ministerial, non-discretionary price-reporting function and that the reported price might be neither fair market value nor fair value (under Accounting Standards or applicable law). Customer hereby covenants not to rely on the reported price as a substitute for (i) investigating the Asset's value in connection with a decision to acquire, hold, dispose of, or exchange any securities or

other investment property; (ii) obtaining and ensuring the reliability of an independent third-party appraisal with respect to such a decision; or (iii) obtaining Investment Advice.

8.1.4. **Pricing Sources; Methodology.** Upon Customer's request, Bank will provide Customer with information about Bank's pricing sources and methodologies.

8.2 **Client-controlled Assets.** Customer may direct Bank from time to time to include in the Account statements specific Client-controlled Assets that are registered in the name of Customer. In such a case, Bank has the right to exclude such assets from the Account statements or to include them with a notation about control. To the extent Bank includes them, Customer hereby acknowledges that:

8.2.1. Customer is responsible for reviewing (i) the Account statements to ensure that they include notations about the control of each such asset and (ii) any third-party reports made accessible by Bank to ensure that they do not inaccurately identify the holder of any such assets.

8.2.2. Bank is not responsible for performing any duties under this Agreement (other than statement-reporting duties, as limited herein) with respect to such assets, and Customer assumes all such duties.

8.2.3. When furnishing Account statements or making third-party reports accessible, Bank may rely on information provided by Customer or by Customer's agents, affiliates, or representatives with respect to such assets (including, but not limited to, information on the units, price, or marketability of such assets) without questioning the information. To that end, Customer will cause each holder of such assets to provide Bank with a copy of such holder's periodic Customer account statements with respect to such assets.

8.2.4. Such assets are subject to **Exhibit A (Fee Schedule)** hereto.

SECTION 9 LIMITATIONS ON DUTIES

9.1. Customer hereby acknowledges that Bank does not provide any services under this Agreement (i) in a "fiduciary capacity" within the meaning of 12 CFR §9.2(e) or (ii) as a "fiduciary" as such term may be defined in State law or otherwise.

9.2. The duties of Bank will be strictly limited to those set forth in this Agreement, and no implied covenants, duties, responsibilities, representations, warranties, or obligations shall be read into this Agreement against Bank. Without limiting the generality of the foregoing, Bank shall have no duty to:

9.2.1. Evaluate or to advise anyone of the prudence, suitability, or propriety of action or proposed action of Customer in any particular transaction involving an Asset or the suitability or propriety of retaining any particular investment as an Asset; review, question, approve, or make inquiries as to any investment directions received under this Agreement; or review the securities or other property held in the Account with respect to prudence or diversification.

9.2.2. Act as trustee of the Assets.

9.2.3. Act as custodian of any assets other than the Assets.

9.2.4. Act as investment manager of the Assets, except to the extent the Assets are subject to Bank's discretion to manage under a separate written investment-management agreement (if any).

9.2.5. Provide Investment Advice.

9.2.6. Determine, monitor, question, or collect any contributions to the Account or monitor compliance with any applicable funding requirements.

9.2.7. Inspect, review, or examine any Client-controlled Asset or governing, offering, subscription, or similar document with respect thereto, to determine or question whether the asset or document is authentic, genuine, enforceable,

properly signed, appropriate for the represented purpose, is what it purports to be on its face, or for any other purpose, or to execute such document, regardless of whether Bank has physical possession of such asset or document.

9.2.8. (i) Collect any income, principal, or other distribution due and payable on an Asset if the Asset is in default or if payment is refused after due demand or (ii) except as expressly provided herein, to notify Customer in the event of such default or refusal.

9.2.9. Provide notice of, or forward, mini-tenders (which are tender offers for less than 5% of an outstanding equity or debt issue) for any equity issue or, if any of the following is true, for any debt issue: The debt is not registered with the SEC. The debt issue has a “first received, first buy” basis with no withdrawal privilege and includes a guarantee of delivery clause. Or, the tender offer includes the statement that “the purchase price includes all accrued interest on the note and has been determined in the sole discretion of the buyer and may be more than or less than the fair market value of the notes” or similar language.

9.2.10. Determine or question whether any direction received under this Agreement is prudent or contrary to applicable law; to solicit or confirm directions; or to take notice of facts not actually known by any Bank employee with direct responsibility for providing services under this Agreement.

9.2.11. Calculate, withhold, prepare, sign, disclose, file, report, remit, or furnish to any taxing authority or any taxpayer any federal, state, or local taxes, tax returns, or information returns that may be required to be calculated, withheld, prepared, signed, disclosed, filed, reported, remitted, or furnished with respect to the Assets or the Account, except to the extent such duties are required by law to be performed only by Bank in its capacity as custodian under this Agreement or are expressly set forth herein.

9.2.12. Monitor service providers hired by Customer or guarantee their performance.

9.2.13. Advance funds or securities or otherwise expend or risk its own funds or incur its own liability in the exercise of its powers or rights or performance of its duties under this Agreement.

SECTION 10

AUTHORIZED PERSONS; DELIVERY OF DIRECTIONS

10.1. **Authorized Persons.** With respect to this Agreement:

10.1.1. Customer will notify Bank of the identity of each (i) employee of Customer who is authorized to act on Customer’s behalf, (ii) third-party agent that is authorized to act on Customer’s behalf, and (iii) employee of each third-party agent who is authorized to act on such agent’s behalf. In no event is any such agent authorized to execute this Agreement or any amendment thereto or to terminate this Agreement.

10.1.2. Bank may assume that any such employee or agent continues to be so authorized, until Bank receives notice to the contrary from Customer (or, with respect to any such employee of any such agent, from such agent).

10.1.3. Customer hereby represents and warrants that any such employee or agent was duly appointed and is appropriately monitored and covenants that Customer will furnish such employee or agent with a copy of this Agreement, as amended from time to time. Customer hereby acknowledges that (i) such employee’s or agent’s actions or omissions are binding upon Customer as if Customer had taken such actions or made such omissions itself and (ii) Bank is indemnified, released, and held harmless accordingly.

10.2. **Delivery of Directions.**

10.2.1. Any direction, notice, or other communication provided for in this Agreement will be given in writing and (i) unless the recipient has timely delivered a superseding address under this Agreement, addressed as provided under this Agreement, (ii) entered into Customer’s account in Bank’s on-line portal, or (iii) sent to Bank by Messaging System.

10.2.2. Any direction received under this Agreement by email or Messaging System, or entered into Customer's account in Bank's on-line portal, is deemed to be given in a writing signed by the sender. Customer hereby represents and warrants that Customer maintains commercially reasonable security measures for preventing unauthorized access to its portal account; to the email accounts of its employees, agents, and agents' employees; and to any Messaging System used by its employees, agents, and agents' employees, and Customer hereby assumes all risk to the Account resulting from Customer's failure to prevent such unauthorized access. Customer hereby acknowledges that Customer is fully informed of the protections and risks associated with the various methods of transmitting directions to Bank and that there may be more secure methods of transmitting directions than the methods selected by Customer and Customer's agents.

SECTION 11 FEES AND EXPENSES

11.1. **Fees; Expenses.** Customer shall pay Bank compensation for providing services under this Agreement. A schedule of that compensation is attached as **Exhibit A (Fee Schedule)** hereto.

11.2. **Outstanding Fees and Expenses.** To the extent of (i) any outstanding compensation, expenses, fees, costs, or other charges incurred by Bank in providing services under this Agreement or (ii) Customer's other indebtedness to Bank, Customer hereby grants Bank a first-priority lien and security interest in, and right of set-off against, the Assets. Bank may execute that lien and security interest, and exercise that right, at any time.

11.3. **Advance of Funds or Securities.** To the extent of any advance of funds or securities under this Agreement, Customer hereby grants Bank a first-priority lien and security interest in, and right of set-off against, the Assets. Bank may execute that lien and security interest, and exercise that right, at any time. Furthermore, nothing in this Agreement constitutes a waiver of any of Bank's rights as a securities intermediary under Uniform Commercial Code §9-206, and Customer hereby acknowledges that the obligation to pay a purchase price to Bank arises at the time of the purchase.

SECTION 12 INDEMNIFICATION

12.1. Indemnification.

12.1.1. Limited Mutual Indemnification Obligations. Except to the extent the Losses (as defined below) result from the gross negligence or recklessness or intentional misconduct of the other party or its agents or employees, each party (the "Indemnifying Party") shall defend the other party (the "Indemnified Party"), its Affiliates, and their employees, Subcontractors, agents, officers, directors and shareholders ("Related Parties") from any Third Party Claim (as defined below) asserted by a third party (other than an Affiliate of the Indemnified Party) against the Indemnified Party, and shall indemnify and hold the Indemnified Party and its Related Parties harmless against any and all assessments, losses, liabilities, damages, costs or expenses, including attorneys' fees, consultant's fees, or court costs incident thereto ("Losses") awarded against the Indemnified Party by a final court judgment or an agreement settling such Third Party Claims in accordance with section 8.2. For purposes of this Agreement, the term "Third Party Claim" means any action, suit, proceeding, demand, litigation, or claim by a third party directly related or attributable to (a) the Indemnifying Party's or its agent's or employee's violation (or act causing the other party to be in violation) of any Applicable Law or Network Rule; (b) the Indemnifying Party's breach of any covenant or warranty made by the Indemnifying Party in this Agreement; (c) any material misrepresentation of Indemnifying Party in this Agreement or any material misrepresentation in or omission from any document, certificate or information furnished or to be furnished by Indemnifying Party under this Agreement; (d) any products or services offered, provided, manufactured, marketed, distributed, advertised, promoted or issued by or on behalf of Indemnifying Party (including the Cards); (e) the use of the licensed marks by or on behalf of Indemnifying Party; (f) the willful misconduct or fraudulent activity on the part of any employee or agent of Indemnifying Party; and (g) the Indemnifying Party's failure to make any payment to a customer, employee or other third party.

12.1.2 Indemnification Procedures. The Indemnified Party will notify the Indemnifying Party in a reasonably prompt manner of any Third-Party Claim that is asserted for which the Indemnified Party is seeking indemnification pursuant to this Article 8. The Indemnifying Party may thereafter assume control of such Third-Party Claim, provided, that the Indemnified Party will have the right to participate in the defense or settlement of such Third-Party Claim. The Indemnified Party will provide the Indemnifying Party with a reasonable amount of assistance in connection with defending or settling any such Third-Party Claim. Neither the Indemnifying Party nor the Indemnified Party may settle such Third-

Party Claim or consent to any judgment with respect thereto without the consent of the other party (which consent may not be unreasonably withheld or delayed).

12.1.3. The foregoing provisions shall survive the termination of this Agreement.

12.2. **Force Majeure.** No party is liable for any delay or failure in performing its obligations under this Agreement caused by wars (whether declared or not and including existing wars and the invocation of war powers), revolutions, insurrections, riots, civil commotion, acts of God, medical emergencies, disease outbreaks, accidents, fires, explosions; stoppages of labor, strikes, or other differences with employees (other than Bank's disputes with its employees); laws, regulations, orders, or other acts of any governmental authority; or any other circumstances beyond its reasonable control, regardless of whether such was already in existence as of the date of this Agreement. Nor will any such failure or delay give any party the right to terminate this Agreement.

12.3. **Damages.** No party is liable for any indirect, incidental, special, punitive, or consequential damages arising out of or in any way related to this Agreement or the performance of its obligations under this Agreement. This limitation applies even if the party has been advised of, or is aware of, the possibility of such damages.

12.4. **Statements.** Bank is not liable with respect to the propriety of Bank's actions or omissions reflected in a statement furnished under this Agreement, except to the extent a Statement Recipient objects to Bank within thirty (30) calendar days after such statement is furnished.

SECTION 13 TERMINATION

13.1. **Termination of Agreement.** This Agreement terminates upon the effective date of Bank's resignation or removal under this Agreement.

13.2. **Resignation; Removal.**

13.2.1. Bank may resign under this Agreement by notice to Customer. Customer may remove Bank under this Agreement by notice to Bank. The resignation or removal shall be effective thirty (30) calendar days after delivery of the notice, except to the extent the parties agree in writing to a different effective date. By such effective date, Customer shall appoint a new custodian and notify Bank of the appointment. If Customer fails to do so, Bank shall have the right to petition a court at Account expense for appointment of a new custodian.

13.2.2. Upon receiving notice of such appointment, Bank will transfer Assets to the new custodian as directed by Customer or the court, as the case may be. However, Bank shall not be required to transfer any Assets until Bank has received payment or reimbursement for all (a) compensation, expenses, fees, costs, or other charges incurred by Bank in providing services under this Agreement and (b) funds or securities advanced under this Agreement.

SECTION 14 DATA PRIVACY, CONFIDENTIALITY, AND SECURITY

14.1. **Definitions.** For purposes of this Section:

14.1.1. **"Applicable Privacy, Confidentiality, and Security Laws"** means, with respect to a party, all applicable federal, state, and local laws, rules, regulations, directives, and other binding requirements issued by any Governmental Authority (as defined below) pertaining to the privacy, confidentiality, or security of Confidential Information (as defined below).

14.1.2. **"Confidential Information"** means (i) all information, data, documents, records, and other materials that one party receives in connection with this Agreement or the Account from another party if already clearly and conspicuously marked as *"Confidential Information"* when received, but excluding Non-Confidential Information (as defined below), and (ii) any *"nonpublic personal information"* as defined in GLBA (as defined below) [15 U.S.C. §6809(4)] of Customer's

employees and the Account's beneficial owners that Bank receives in connection with this Agreement or the Account from another party.

14.1.3. **"GLBA"** means the Gramm-Leach-Bliley Act, 15 U.S.C. §§6801 *et seq.*, and its implementing regulations, as amended.

14.1.4. **"Governmental Authority"** means, with respect to a party, a state or federal governmental entity having jurisdiction over such party with respect to the activities that are the subject matter of this Agreement.

14.1.5. **"Non-Confidential Information"** means information (i) of the disclosing party that was known by the receiving party without any obligation of confidentiality prior to the disclosing party's disclosure thereof; (ii) of a party that was or becomes publicly available other than pursuant to a breach of this Agreement by the other party; (iii) of a party that was received by the receiving party in good faith on a non-confidential basis from a third party that is not actually known to the receiving party to have disclosed such information in violation of a confidentiality agreement in favor of the other party; (iv) that is independently developed by one party without use of the other party's Confidential Information; or (v) of a party that is approved for disclosure by that party.

14.1.6. **"Services"** means the services provided by Bank pursuant to this Agreement.

14.2. **Compliance with Law.** Each party hereby represents and warrants that it complies with all Applicable Privacy, Confidentiality, and Security Laws.

14.3. **Privacy.**

14.3.1. **Program.** Customer hereby represents and warrants that it maintains an enterprise-wide privacy program that is consistent with its industry standards. Bank hereby represents and warrants that it maintains an enterprise-wide privacy program that (i) complies with federal banking law and regulations and (ii) is consistent with industry standards for providers of services similar to the Services.

14.3.2. **Use and Disclosure of Confidential Information.** Each party will use and disclose Confidential Information only as permitted by Applicable Privacy, Confidentiality, and Security Laws and this Agreement. Upon one party's request, the other party will provide a monthly written report to the requesting party regarding how Confidential Information has been used.

14.3.3. **Records Retention.** Each party will maintain commercially-standard records of Confidential Information for the period required by Applicable Privacy, Confidentiality, and Security Laws (or, in Bank's case and if longer, the period required by Bank's record-retention policy). Following the expiration of such period, each party will, to the extent practicable, promptly destroy all Confidential Information.

14.3.4. **Aggregated, Anonymized Data.** Customer hereby authorizes Bank to use Confidential Information in an aggregated, anonymized format (i) for the purpose of providing reports and analytics to other customers of Bank and to develop new products and services and (ii) for internal purposes that do not involve disclosure of such data to third parties.

14.3.5. **Consents.** If Customer is a "*financial institution*" as defined in GLBA [15 U.S.C. §6809(3)], then Customer hereby represents and warrants that Customer has obtained all consents from its customers as needed in order to permit Bank to provide the Services and to use Confidential Information as described in this Agreement.

14.4. **Information Security.**

14.4.1. **Program.** Customer hereby represents and warrants that it maintains an enterprise-wide information-security program that is consistent with its industry standards. Bank hereby represents and warrants that it maintains an enterprise-wide information-security program that (i) complies with federal banking law and regulations and (ii) is consistent with industry standards for providers of services similar to the Services.

14.4.2. **Safeguards.** Each party will maintain physical, electronic, and procedural safeguards that are designed to (i) maintain the security and confidentiality of Confidential Information; (ii) protect Confidential Information against anticipated threats or hazards to the security or integrity of Confidential Information; and (iii) prevent unauthorized access to; unauthorized use, disclosure, or modification of; or misuse or loss of such Confidential Information that could result in substantial harm or inconvenience to the other party.

14.4.3. **Notification of Breach.** Within seven (7) calendar days after a party becomes aware that Confidential Information has been compromised as a result of a breach of security at the party, the breached party will, to the extent permitted by law, provide written notice thereof to the other party. Such notice will include the breached party's estimate of the number of the other party's records affected and the nature of the information exposed, together with the steps to be taken by the breached party to limit such exposure and avoid a recurrence thereof. The breached party will cooperate in the other party's investigation relating to the breach and address the cause of the breach.

14.5. **Business Continuity.**

14.5.1 **Business-Continuity Plan.** Customer hereby represents and warrants that it maintains a business-continuity plan that is consistent with its industry standards. Bank hereby represents and warrants that it maintains a business-continuity plan that (i) complies with federal banking law and regulations and (ii) is consistent with industry standards for providers of services similar to the Services.

14.5.2. **Transfer of Services.** In the event of a *force-majeure* event or a bankruptcy or insolvency of Bank that renders Bank unable to provide the Services, Bank will cooperate with Customer and the replacement vendor selected by Customer to transition performance of the Services to such replacement vendor, including through the delivery of any Account records to such replacement vendor. However, the foregoing will not require Bank to provide any Confidential Information of Bank to any third party unless such third party has executed a confidentiality agreement acceptable to Bank.

14.6. **Audit.**

14.6.1. **Third-Party Audit.** Customer hereby represents and warrants that it obtains an independent risk assessment of its privacy program, information-security program, and business-continuity plan annually. Bank hereby represents and warrants that it obtains an independent auditor's System and Organization Controls (SOC) 2 Report or its equivalent annually. Upon one party's request, the other party will provide the most recent such report to the requesting party.

14.6.2. **Assessment.** No more than once per calendar year, each party has the right to assess the policies, standards, and practices of the other party with respect to the performance of this Agreement, to the extent necessary to verify the other party's compliance with the terms of this Section. Each party hereby acknowledges that information which the other party deems confidential or proprietary may not be considered necessary to verify the other party's compliance. The assessment will be conducted during regular business hours upon not less than ninety (90) calendar days written notice by the requesting party to the other party on a date agreed upon by them. The other party will make efforts to resolve deficiencies noted as a result of such assessment in a manner commensurate to the risk those deficiencies represent.

14.6.3. **Regulatory Audit.** Each party hereby authorizes the other party to provide information regarding the performance of this Agreement to a Governmental Authority with authority to review the party's service arrangements, but only when the Governmental Authority specifically requests such information.

14.7. **Insurance.** Customer hereby represents that it maintains cyber-liability insurance that is consistent with its industry standards. Bank hereby represents and warrants that (i) Bank maintains Cyber Liability Insurance, Bankers Professional Liability Insurance, and a Financial Institution Bond (Crime and Dishonesty Policy) and (ii) such insurance complies with federal banking law and regulations and is consistent with industry standards for providers of services similar to the Services. Upon one party's request, the other party will provide the requesting party with copies of a certificate of insurance for each form of insurance stated above.

14.8. **Third Party/Subcontractor.** Each party hereby acknowledges that it is responsible for the actions of its officers, directors, employees, and agents with respect to the privacy, confidentiality, and security of Confidential Information.

Customer will not, and will not ask Bank to, disclose Bank's Confidential Information to any online portal or platform maintained by any third party that Customer has hired to manage or assess Customer's vendor due-diligence and monitoring activities, unless (i) Customer has identified the third party (and the portal or platform) to Bank, (ii) the third party has provided information about its information-security processes and procedures to Bank, in a form acceptable to Bank, (iii) Bank has assessed those processes and procedures, and (iv) Bank has notified Customer that such disclosure to the portal or platform is permitted under this Agreement.

SECTION 15 MISCELLANEOUS

15.1. Services Not Exclusive. Bank is free to render services to others, whether similar to those services rendered under this Agreement or of a different nature.

15.2. Binding Obligations. Customer and Bank each represent and warrant that (i) it has the power and authority to transact the business in which it is engaged and to execute, deliver, and perform this Agreement and has taken all action necessary to execute, deliver, and perform this Agreement and (ii) this Agreement constitutes its legal, valid, and binding obligation enforceable according to the terms hereof.

15.3. Complete Agreement; Amendment.

15.3.1. Complete Agreement. This Agreement contains a complete statement of all the arrangements between the parties with respect to its subject matter and supersedes any existing agreements between them concerning the subject.

15.3.2. Amendment. This Agreement may be amended at any time, in whole or in part, by a written instrument signed by Customer and Bank. Notwithstanding the foregoing, if the terms of **Exhibit A (Fee Schedule)** hereto set forth a method for amending such exhibit, then such terms alone govern amendments thereto.

15.3.3. Control Agreement. Customer has the power to direct Bank to enter into a separate written control agreement with respect to the Account or any Asset. Any such control agreement prevails over this Agreement to the extent such agreements are inconsistent with each other.

15.4. Governing Law; Venue. This Agreement will be governed, enforced, and interpreted according to the laws of the State without regard to conflicts of laws, except where pre-empted by federal law. All legal actions or other proceedings directly or indirectly relating to this Agreement will be brought in federal court (or, if unavailable, state court) sitting in the State. The parties submit to the jurisdiction of any such court in any such action or proceeding and waive any immunity from suit in such court or execution, attachment (whether before or after judgment), or other legal process in or by such court.

15.5. Successors and Assigns.

15.5.1. This Agreement binds, and inures to the benefit of, Customer, Bank, and their respective successors and assigns.

15.5.2. No party may assign any of its rights under this Agreement without the consent of each other party, which consent will not be unreasonably withheld. Customer hereby acknowledges that Bank will withhold consent unless and until Bank verifies an assignee's identity according to Bank's Customer Identification Program and, to that end, Customer hereby agrees to notify Bank of such assignment and provide Bank with the assignee's name, physical address, EIN, organizational documents, certificate of good standing, and license to do business, as well as other information that Bank may request. No consent is required if a party merges with, consolidates with, or sells substantially all of its assets to another entity, provided that such other entity assumes without delay, qualification, or limitation all obligations of that party under this Agreement by operation of law or by contract.

15.6. Severability. The provisions of this Agreement are severable. The invalidity of a provision herein will not affect the validity of any other provision.

15.7. **No Third-Party Beneficiaries.** This Agreement is made solely for the benefit of the parties. No person other than such parties has any rights or remedies under this Agreement.

15.8. **Solvency.** Customer hereby represents and warrants that Customer is neither insolvent nor subject to any pending bankruptcy proceeding. Customer will promptly notify Bank of any such insolvency or proceeding.

15.9. **Tax-Lot Selection-Method.** For the purpose of complying with IRS regulations requiring cost basis reporting, Customer hereby designates the tax-lot selection-method for the Account:

- ☐ **Minimize Gain** – Shares are sold from tax lots having the highest per unit federal tax cost with a holding period of more than one year.
- ☐ **First In First Out (FIFO)** – Shares are sold from tax lots having the earliest federal tax acquisition date.
- ☐ **Last In First Out (LIFO)** – Shares are sold from tax lots having the most recent federal tax acquisition date.
- ☐ **Highest Federal Cost First Out (HIFO)** – Shares are sold from tax lots having the highest federal tax cost per share.
- ☐ **Lowest Federal Cost First Out (LOFO)** – Shares are sold from tax lots having the lowest federal tax cost per share.
- ☐ **Specify Tax Lot** – Shares are sold from tax lots that you specify.
- ☐ **Average Federal Tax Cost** – Shares are sold across all tax lots using the average cost. If the Account holds investments for which this method is not permitted, the FIFO default method will be used, unless Customer directs otherwise.
- ☐ **Maximize Gain** – Shares are sold from tax lots having the lowest per unit federal tax cost.

If the foregoing does not designate one and only one tax-lot selection-method, then Customer is deemed to have designated FIFO method. If Customer wishes to use a tax-lot selection-method that is different from what is selected above for an individual trade, then Customer may designate such other selection-method when executing the trade.

15.10. **Shareholder Communications Act Election.** Under the Shareholder Communications Act of 1985, as amended, Bank must try to permit direct communications between a company that issues a security held in the Account (the “Securities-Issuer”) and any person who has or shares the power to vote, or the power to direct the voting of, that security (the “Voter”). Unless the Voter registers its objection with Bank, Bank must disclose the Voter’s name, address, and securities positions held in the Account to the Securities-Issuer upon the Securities-Issuer’s request (“Disclosure”). To the extent that Customer is the Voter, Customer hereby (i) acknowledges that failing to check one and only one box below will cause Customer to be deemed to have consented to Disclosure and (ii) registers its (*check only one*):

- ☐ Consent to Disclosure.
- ☐ Objection to Disclosure.

15.11. **Tax Reclaims.** To the extent Bank provides the Account with a service to minimize foreign withholding or reclaim foreign taxes withheld with respect to an Asset, Customer hereby directs Bank to disclose Customer’s name, address, and taxpayer identification number, as well as the Account’s position in the Asset, to Bank’s sub-custodians and other service providers, to the Asset’s issuer and the issuer’s agents, and to local (foreign) tax authorities as needed in order to provide such service.

15.12. **Abandoned Property.** Bank will escheat Assets pursuant to the applicable state’s abandoned property, escheat, or similar law, and Bank shall be held harmless therefrom. The provisions of this Section shall survive the termination of this Agreement.

15.13. **Legal Advice.** Customer hereby acknowledges that it (i) did not receive legal advice from Bank concerning this Agreement, (ii) had an adequate opportunity to consult an attorney of its choice before executing this Agreement, and (iii) executed this Agreement upon its own judgment and, if sought, the advice of such attorney.

15.14. **Waiver of Jury Trial.** Each party hereby irrevocably waives all right to a trial by jury in any action, proceeding, claim, or counterclaim (whether based on contract, tort, or otherwise) directly or indirectly arising out of or relating to this Agreement.

15.15. **Legal Action.** If Bank is served with a Legal Action, then Bank will, to the extent permitted by law, use commercially reasonable efforts to notify Customer of such service. Customer will reimburse Bank for any expenses, fees, costs, or other charges incurred by Bank in responding to the Legal Action, including, but not limited to, any fees charged by an attorney of Bank's choice. If Customer notifies Bank that Customer is seeking a protective order to resist the Legal Action, then Bank will provide reasonable cooperation at Customer's request and sole cost and expense. In any event, Bank may comply with the Legal Action at any time, except to the extent Bank has received a protective order that prevents Bank from complying.

15.16. **Interpleader.** With respect to Assets that are the subject of a dispute, Bank may file an interpleader action or other petition with a court of competent jurisdiction for directions with respect to the dispute. Customer will reimburse Bank for any expenses, fees, costs, or other charges incurred by Bank in filing such petition and implementing such directions, including, but not limited to, any fees charged by an attorney of Bank's choice. Before disbursing Assets pursuant to such directions, Bank will deduct therefrom an amount in payment or reimbursement for all (i) compensation, expenses, fees, costs, or other charges incurred by Bank in providing services under this Agreement and (ii) funds or securities advanced under this Agreement.

15.17. **Representations and Warranties.** Customer hereby covenants that, if any of the representations or warranties that it provides in this Agreement becomes inaccurate or incomplete, it will promptly notify Bank thereof and of any fact, omission, event, or change of circumstances related thereto.

15.18. **Publicity.** No party will disclose the existence of this Agreement or any terms thereof in advertising, promotional, or marketing materials without obtaining, in each case, the prior written consent of each other party.

15.19. **Shutdown.** Notwithstanding anything herein to the contrary, Bank shall have the power to segregate or restrict an asset, delay processing a direction or transaction, refuse to process a direction or transaction, suspend or close the Account, or terminate this Agreement at any time (i) to comply with Bank's economic sanctions or anti-money laundering policies or obligations, (ii) to safeguard against fraud, or (iii) pursuant to a court order or direction of an authorized governmental agency or as required by law, and Bank will incur no liability to any person or entity for any Harm in connection with any such segregation, restriction, delay, refusal, suspension, closure, or termination.

15.20. **Counterparts and Duplicates.** This Agreement may be executed in any number of counterparts, each of which shall be considered an original, but all of which together shall constitute the same instrument. This Agreement and any administrative form under this Agreement may be proved either by a signed original or by a reproduced copy thereof (including, not by way of limitation, a microfiche copy or an electronic file copy).

15.21. **E-signature.** Each party hereby (i) consents to electronically sign this Agreement, amendments thereto, and Account forms requiring its signature, but may, by notice to each other party, withdraw such consent or opt-out of electronic signing and (ii) covenants to rely on DocuSign (or another e-sign vendor as subsequently agreed upon by all parties) to facilitate any such e-signatures. The party creating the e-signed document through its account with the e-sign vendor hereby covenants to retain the authoritative copy and provide a copy to each other party. No party hereby forfeits any power to use a conventional handwritten signature as a means of signing this Agreement, amendments thereto, and Account forms.

15.22. **Effective Date.** This Agreement will become effective when all parties have signed it. The date of this Agreement will be the date this Agreement is signed by the last party to sign it (as indicated by the date associated with that party's signature).

IN WITNESS WHEREOF, an authorized officer of each party hereby executes this Agreement on the date stated beneath that party's signature.

October 18, 2022

The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Supervisors:

**APPROVAL OF MAXIMUM AND MINIMUM
2023 TICKET PRICE SCHEDULE FOR
HOLLYWOOD BOWL
(SUPERVISORIAL DISTRICT 3) (3-VOTES)**

Approval of the recommended actions will approve revisions to the 2023 Hollywood Bowl season maximum and minimum ticket price schedule proposed by the Los Angeles Philharmonic Association. Revisions to Hollywood Bowl's ticket prices for the 2023 season are based on an annual review of prices.

IT IS RECOMMENDED THAT YOUR BOARD, AFTER THE PUBLIC HEARING:

1. Find that the proposed actions are exempt from the California Environmental Quality Act, for the reasons stated in this Board letter and the record.
2. Approve the 2023 Hollywood Bowl season maximum and minimum ticket price schedule proposed by the Los Angeles Philharmonic Association, as provided in the resolution. And,
3. Instruct the Executive Officer of our Board to execute the attached resolution.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The Los Angeles Philharmonic Association (Association) has submitted its proposed schedule for maximum and minimum ticket prices for the 2023 Hollywood Bowl season as required by the Operating Agreement between the County of Los Angeles (County) and the Association.

The Association seeks to increase ticket prices, as outlined in Attachment I, to accommodate increased production, labor, marketing, and artists' costs. It should be noted, however, that in several instances the Association is recommending to maintain or decrease prices, and there are no increases in the lowest priced sections, including Q/U and V/X, except on Fridays, Saturdays, and Sundays; which have had no increases in over three years. The Association has developed a price schedule that keeps tickets reasonable and competitive with other similar venues in Los Angeles County.

The Hollywood Bowl ticket increases are based on a six-tiered structure which includes Tuesday and Thursday Classical, Wednesday Jazz, Friday Pop, Saturday Pop, Sunday Pop, and Sunday World Music performances. Over 50 percent of all Tuesday and Thursday Classical, Wednesday Jazz, and Sunday World concert tickets (9,175 per concert) are at proposed prices of \$39 or less; \$43 for Friday and Sunday Pops concerts; and \$50 for Saturday Pops concerts. Over a quarter of all seats on Tuesday and Thursday Classical (4,646 per concert) remain at prices of \$17 or less. Sixteen percent of all tickets on Wednesday Jazz (2,730 per concert) remain at prices of \$17 or less.

The Association will return the traditional locations of \$1 tickets for Tuesday and Thursday Classical performances to 380 from 1,052 of the top benches of Hollywood Bowl (which had been increased for the Centennial season), as well as maintain the 380 bench seats for Wednesday Jazz performances. The Section W seats will only increase to \$6, rather than the previous year's \$8 price that had been maintained for 15 years. Of note, the Association will continue to limit up to four \$1 seats per household per concert, to ensure as many people can gain access to those seats as possible. In addition, Box seat ticket prices reflect unique benefits at Hollywood Bowl and there are no other comparable outdoor venues that offer these benefits. Due to changing sales patterns, prices could vary for some concerts closer to the performance date (higher or lower), though the minimum and maximum prices within each concert category will not change. This practice is implemented by most major arts and sports organizations in the Los Angeles community.

The Association has submitted the following 2023 season fee increases for your Board's consideration:

Tuesday and Thursday Classical Nights:

There are no price increases proposed for bench sections F, K, L, M, N, P, Q, R, S, T, U, V, and X (10,804 seats per concert). A \$5 increase is proposed for bench section W (672 seats per concert), returning this section to prices as they were in 2005. A \$1 increase is proposed for Superseats, Ramps, and bench sections D, E, G2, and J2, (2,756 seats per concert). A \$3 increase is proposed for Terrace and Side Boxes (1,632 seats per concert). A \$4 increase is proposed for Garden boxes (1,291 seats per concert). A \$5 increase is proposed for Pool Circle boxes (164 seats per concert). These price changes result in a 2.1% change in overall prices for these concerts.

Wednesday Jazz Nights:

There are no price increases proposed for bench sections Q, U, V and X (2,058 seats per concert). A \$1 increase is proposed for Superseats, Ramps, and bench sections F, K, L, M, N, P, R, S, T & W (10,479 seats per concert). A \$2 increase is proposed for bench sections D, E, G2, and J2 (1,792 seats per concert). A \$4 increase is proposed for Terrace and Side boxes (1,632 seats per concert). A \$5 increase is proposed for Garden boxes (1,291 seats per concert). A \$7 increase is proposed for Pool Circle boxes (164 seats per concert). These price changes result in a 3.1% change in overall prices for these concerts.

Sunday World Nights:

There are no price increases proposed for bench sections L, P, Q, U, V, W, and X (4,997 seats per concert). A \$1 increase is proposed for bench sections F, K, M, N, R, S, and T (6,479 seats per concert). A \$2 increase is proposed for Superseats, Ramps, and bench sections D, E, G2, and J2 (2,853 seats per concert). A \$5 increase is proposed for Terrace and Side boxes (1,632 seats per concert). A \$6 increase is proposed for Garden boxes (1,291 seats per concert). An \$8 increase is proposed for Pool Circle boxes (164 seats per concert). These price changes result in a 3% change in overall prices for these concerts.

Friday and Sunday Pop Nights:

There is a \$1 price increase proposed for bench sections F, K, L, M, N, P, Q, R, S, T, U, V, W, and X (11,476 seats per concert). A \$2 increase is proposed for Superseats, Ramps, and bench sections D, E, G2, and J2 (2,853 seats per concert). A \$6 increase is proposed for Garden, Terrace, and Side boxes (2,923 seats per concert). An \$8 increase is proposed for Pool Circle boxes (164 seats per concert). These price changes result in a 3.4% change in overall prices for these concerts.

Saturday Pop Nights:

There is a \$1 price increase proposed for bench sections Q, U, V, W, and X (2,730 seats per concert). There is a \$2 increase proposed for bench sections F, K, L, M, N, P, R, S, and T (8,746 seats per concert). A \$3 increase is proposed for Superseats, Ramps, and bench sections D, E, G2, and J2 (2,853 seats per concert). An \$8 increase is proposed for Terrace and Side boxes (1,632 seats per concert). A \$9 increase is proposed for Garden Boxes (1,291 seats per concert). A \$12 increase is proposed for Pool Circle boxes (164 seats per concert). These price changes result in a 4.5% change in overall prices for these concerts.

Accessible Seating:

Hollywood Bowl accessible seating addresses the Americans with Disabilities Act requirements with a range of seating locations and tickets priced from the traditional \$1 seats to \$190 (accessible box sections). Price increases match the appropriate sections listed above. Reduced pricing will continue to be maintained as in previous seasons for the seats in the Third Promenade (last row in sections K1 through F3).

Special Event Tickets:

Due to marked increases in artist fees for special events, prices in this category are increasing at a higher rate than in the past. There is a \$5 price increase proposed for bench sections M and N (2,262 seats per concert). An \$8 increase is proposed for bench sections R, S, T, V, and X (2,296 seats per concert). A \$9 increase is proposed for bench sections L and P (2,267 seats per concert). A \$10 increase is proposed for bench sections Q, U, and W (2,350 seats per concert). An \$18 increase for bench sections F and K (2,301 seats per concert). A \$21 price increase for bench sections D, E, G2, and J2 (1,792 seats per concert). A \$51 increase is proposed for Superseats and Ramps (1,061 seats per concert). A \$39 increase is proposed for Terrace and Side boxes (1,632 seats per concert). A \$45 increase is proposed for Garden and Pool Circle boxes (1,455 seats per concert). These price changes result in a 14% change in overall prices for these rarely presented concerts.

Hollywood Bowl Gala Benefits:

The Association proposes a 6.5% decrease from the mid-range prices for Centennial Gala, with the minimum price at \$29 and the maximum price \$259 remaining the same.

Parking:

The Association proposes no increase for general parking. The maximum price of \$55 will remain the same (valet parking). The minimum parking price will remain the same at \$5.

Implementation of Strategic Plan Goals

The proposed recommendations will further the County's Strategic Plan Goals Pursuing Operational Effectiveness, Fiscal Responsibility, and Accountability (Goal III.3), by increasing revenues, enriching lives through cost-effective activities, and creating affordable, accessible, and quality activities to the surrounding community.

FISCAL IMPACT/FINANCING

The recommended actions will not have an impact on the County's General Fund. On June 22, 2004, your Board approved a 30-year Operating Lease between the County and the Association for the operation and maintenance of Hollywood Bowl. The new Operating Lease eliminated the Annual Net County Cost contribution and stipulated that the Association reimburse the County for all operating and maintenance expenses incurred at Hollywood Bowl via monthly rent payments. In addition, the lease established the Hollywood Bowl Improvement Fund, primarily earmarked for capital expenditures, equipment, and services and supplies for Hollywood Bowl.

The total funds in the Hollywood Bowl Improvement Fund for 2023 are estimated to be \$782,880 and will be used, as always, for capital expenditures, equipment, and services and supplies for Hollywood Bowl.

Operating Budget Impact

The recommended actions will not impact the Department of Parks and Recreation's operating budget.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The Operating Lease between the County and the Association requires that your Board approve changes to pricing schedule for tickets at Hollywood Bowl after a noticed public hearing. Your Board last approved changes to the ticket prices on October 19, 2021 for the 2022 season.

In accordance with Section 50402 of the Government Code, these changes may be approved by a resolution of your Board.

The proposed fees are exempt from Proposition 26 under Exception No. 2: Section 1 (e) (2) Exception for Fees for Services and Products Provided and Exception No. 4: Section 1 (e) (4)'s Exception for Use of Government Property, and do not need to obtain California voter approval.

The complete proposed pricing schedule is outlined in Attachment I.

County Counsel has approved the attached resolution as to form.

Public Hearing Notice

Pursuant to Section 66018 of the California Government Code, prior to adopting a new fee or approving an increase in an existing fee, a local agency shall hold a public hearing. In accordance with Section 6062a of the California Government Code, notice of the hearing shall be published. The County is in compliance with the requirements of these sections.

ENVIRONMENTAL DOCUMENTATION

The proposed action is exempt from the California Environmental Quality Act (CEQA). Approval of the maximum and minimum 2023 ticket price schedule for the Hollywood Bowl is for the purpose of meeting operating expenses and is exempt from CEQA pursuant to Section 21080(b)(8) of the California Public Resources Code and Section 15273(a) of the State CEQA Guidelines, because CEQA does not apply to the establishment, modification, structuring, restructuring, or approval of rates, tolls, fares, or other charges by public agencies.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

The increases are not anticipated to have a significant impact on services at the affected facilities.

Honorable Board of Supervisors
October 18, 2022
Page 7

CONCLUSION

Please instruct the Executive Officer-Clerk of the Board to forward three adopted copies of this letter and resolution to the Department of Parks and Recreation for distribution.

Should you have any questions please contact Mr. Hugo Maldonado at (626) 369-5147 or hmaldonado@parks.lacounty.gov, or Mr. Ruben Lopez at (626) 588-5300 or rlopez@parks.lacounty.gov, or Ms. Kimberly Rios at (626) 588-5368 or krios@parks.lacounty.gov.

Respectfully submitted,

Norma E. García-González

Executive Office, Board of Supervisor

RESOLUTION TO INCREASE TICKET PRICES AT HOLLYWOOD BOWL

WHEREAS, the Lease Agreement Number 74998 ("Agreement") between Los Angeles County ("County") and the Los Angeles Philharmonic Association ("Association") executed on June 22, 2004, requires the Association to submit its proposed maximum and minimum schedule of ticket prices to the Los Angeles County Board of Supervisors for approval; and

WHEREAS, it is in the County's interest to maintain the high standards expected by the public at Hollywood Bowl; and

WHEREAS, the Association has submitted its proposed schedule in accordance with the Agreement; and

WHEREAS, these increases will help offset operating costs; and

WHEREAS, the increases to the pricing schedule will allow for Hollywood Bowl to provide high caliber events which is in the public interest and welfare; and

WHEREAS, the proposed fees are exempt from Proposition 26 under Exception No. 2: Section 1 (e) (2) Exception for Fees for Services and Products Provided and Exception No. 4: Section 1 (e) (4)'s Exception for Use of Government Property, and do not need to obtain California voter approval for fees; and

WHEREAS, pursuant to Government Code Section 50402, the County has the authority to charge for use of park and recreational facilities as may be provided by resolution of the governing body; and

WHEREAS, the County has conducted a noticed public hearing on the fee increases; and

NOW, THEREFORE BE IT RESOLVED by the Board of Supervisors of the County of Los Angeles, State of California as follows:

The Association may make the adjustments to the maximum and minimum ticket price schedule only as outlined in "Attachment I" entitled "Los Angeles Philharmonic Association Hollywood Bowl 2023 Ticket Prices."

The foregoing resolution was adopted on the _____ day of _____, 2022, by the Board of Supervisors of the County of Los Angeles and ex-officio the governing body of all other special assessment and taxing districts, agencies and authorities for which said Board so acts.

Celia Zavala, Executive Officer
Clerk of the Board of Supervisors of the
County of Los Angeles

	TERMS (if applicable):		
	<p>Explanation: There will be minimal impact on expenditures for Public Works training of personnel. All associated costs, including training costs and the procurement of the new codes, are included in Public Works' General Fund (A01, Services and Supplies) Fiscal Year 2022-23 Budget.</p>		
PURPOSE OF REQUEST	<p>Public Works is seeking Board approval of proposed ordinances for updating the Los Angeles County Building Codes consistent with State law, for the ongoing enforcement of: Title 26, Los Angeles County Building Code; Title 27, Los Angeles County Electrical Code; Title 28, Los Angeles County Plumbing Code; Title 29, Los Angeles County Mechanical Code; Title 30, Los Angeles County Residential Code; Title 31, Los Angeles County Green Building Standards Code; and Title 33, Existing Building Code.</p>		

	<p>Public Works is seeking Board approval and adoption of these ordinances, which adopt the 2022 California Building Standards Code by reference with modifications that are necessary due to local climatic, geologic, or topographic conditions. Adoption of these ordinances implement and continue the Los Angeles County Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building code amendments. The ordinances will ensure consistency of enforcement of the building standards code in the unincorporated Los Angeles County and our contract cities after January 1, 2023.</p> <p>Public Works is seeking Board approval to file the adopted ordinances containing the Board of Supervisors' findings with the California Building Standards Commission and other state agencies as required by law. Public Works will develop and/or update forms, plan review sheets, policies, and associated documents related to these ordinances; develop training programs to update our staff on the new and significant changes to the building standards code; and update all relevant information and forms on the Building and Safety Division website.</p>
BACKGROUND (include internal/external issues that may exist including any related motions)	<p>The State of California publishes new building standards code every 3 years, which become effective 180 days after their publication. State law allows the County of Los Angeles to establish more restrictive amendments as necessary due to local climatic, geologic, or topographic conditions. These amendments must be adopted 30 days prior to the effective date. The effective date for the 2022 codes is January 1, 2023. Therefore, in order to comply with the timeline for adoption and amendment of the State Building Standards Codes, the initial hearing to introduce the ordinances, waive reading, and set the public hearing is requested for October 18, 2022, and a public hearing is requested for November 15, 2022.</p> <p>Adoption of these amendments is necessary to ensure public safety for County of Los Angeles residents and the contract cities we serve. We have worked closely with County Counsel on the amendments, as well as various jurisdictions within the County and code development committees in crafting our amendments.</p>
EQUITY INDEX OR LENS WAS UTILIZED	<p><input type="checkbox"/> Yes <input checked="" type="checkbox"/> No</p> <p>If Yes, please explain how:</p>
SUPPORTS ONE OF THE NINE BOARD PRIORITIES	<p><input checked="" type="checkbox"/> Yes <input type="checkbox"/> No</p> <p>If Yes, please state which one(s) and explain how:</p> <p>Board Priority No. 7: Sustainability. The amendments proposed in these ordinances support the Board's priority of creating more sustainable and resilient buildings and homes in Los Angeles County. Some of the changes proposed to the State Building laws include expanding Electric Vehicle Charging Station requirements, requiring low impact development compliance, setting design standards for more resilient structures that safeguard public health, safety, and general welfare, and adopting emergency housing standards for use during declarations of shelter crises.</p>

October 18, 2022

The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Supervisors:

**DEVELOPMENT SERVICES CORE SERVICE AREA
PROPOSED ORDINANCES – 2023 LOS ANGELES COUNTY
BUILDING, ELECTRICAL, PLUMBING, MECHANICAL, RESIDENTIAL,
GREEN BUILDING STANDARDS, AND EXISTING BUILDING CODES
(ALL SUPERVISORIAL DISTRICTS)
(3 VOTES)**

SUBJECT

Public Works is seeking Board approval of proposed ordinances to adopt the California Building Standards Codes, with amendments, as required by State law, for the enforcement of: Title 26, Los Angeles County Building Code; Title 27, Los Angeles County Electrical Code; Title 28, Los Angeles County Plumbing Code; Title 29, Los Angeles County Mechanical Code; Title 30, Los Angeles County Residential Code; Title 31, Los Angeles County Green Building Standards Code; and Title 33, Existing Building Code.

IT IS RECOMMENDED THAT THE BOARD:

Introduce, waive reading, and schedule a public hearing on November 15, 2022, regarding ordinances that adopt by reference the 2022 California Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes, with amendments.

IT IS RECOMMENDED THAT THE BOARD AFTER THE PUBLIC HEARING:

1. Find that the proposed ordinances are exempt from the provisions of the California Environmental Quality Act for the reasons stated in this letter and in the record of the project.
2. Find that the proposed changes and modifications to building standards contained in the 2022 California Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes are reasonably necessary due to local climatic, geological, and/or topographical conditions, as detailed in the seven respective ordinances; and find that adoption of the emergency housing appendices in Titles 26 and 30 are necessary because strict compliance with state and local standards and laws would prevent, hinder, or delay the mitigation of the effects of a declared shelter crisis or other emergency.
3. Approve the ordinances and establish their operative date as January 1, 2023.
4. Instruct the Director of Public Works to file the adopted ordinances containing the Board of Supervisors' findings with the California Building Standards Commission along with other state agencies as required by law.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of this action is to adopt the enclosed ordinances, as required by State law, which will add, update, and set forth provisions and regulations for the enforcement of the Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes within the unincorporated areas of the County of Los Angeles and the contract cities served by the County that elect to adopt the same ordinances by reference.

Implementation of Strategic Plan Goals

The County Strategic Plan directs the provisions of Strategy 111.1, Continually Pursue Development of our Workforce; and Strategy 111.3, Pursue Operational Effectiveness, Fiscal Responsibility, and Accountability, as it provides services to the public that have a wide-reaching positive effect on the entire community. The adoption of the County's building codes provides minimum construction and property maintenance standards that promote the health and welfare of the general public throughout the unincorporated area of the County. By incorporating the most up-to-date building and safety standards, the County will be able to ensure that its Strategic Goals are fully addressed.

FISCAL IMPACT/FINANCING

There will be minimal impact on expenditures for Public Works training of personnel. All associated costs, including these training costs and the procurement of the new codes, are included in the Public Works General Fund (A01, Services and Supplies) Fiscal Year 2022-23 Budget.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The State recently adopted the 2022 Edition of the California Building Standards Code, which includes the 2022 California Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes.

The California Health and Safety Code requires that the County adopt ordinances that impose the same building standards as are contained in the 2022 California Building Standards Code with the exception that the County may make amendments to these building standards that are more restrictive and that are reasonably necessary due to local climatic, geological, and/or topographical conditions.

The enclosed ordinances incorporate, by reference, the building standards contained in the 2022 California Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes together with critical and necessary County amendments. In accordance with Sections 17958.5 and 17958.7 of the Health and Safety Code, the Board must determine and expressly find that the amendments to the State standards are needed due to local climatic, geological, and/or topographical conditions.

Section 8698.4 of the Government Code permits local jurisdictions, upon declaration of a shelter crisis, to suspend health and safety standards for homeless shelters, provided those local jurisdictions have adopted reasonable local standards that at minimum meet the standards provided in the emergency housing appendices of the California Residential Code (Title 30 – Appendix AZ) and Building Code (Title 26 – Appendix P). In addition, at the time of the ordinance adoption, the local jurisdiction must determine that strict compliance with existing state and local standards, or laws would in any way prevent, hinder, or delay the mitigation of the effects of the shelter crisis.

The applicable finding(s) for each proposed amendment to the State's building standards are clearly delineated in a chart which is set forth in each of the proposed ordinances. The ordinances also contain various administrative changes that do not require special local findings. The last County update to the State Building Standards Code was approved by the Board on November 26, 2019.

In its continued efforts to provide consistency within the Los Angeles Basin and to provide the public with locally applicable and efficient codes, Public Works has, again, joined efforts with a majority of the cities within the County to undergo thorough examination of previous and proposed amendments to the building standards published by the State. Many of the proposed local amendments to the State Codes are based on the model language generated by the International Code Council Los Angeles Basin Chapter which has the support of many local jurisdictions. These local jurisdiction amendments are structured to be consistent with the 2022 State Code provisions. The goal of these multijurisdictional groups is to minimize differences in Code language and interpretation within the region, thereby assisting the local construction industry by unifying and streamlining the permitting process.

Health and Safety Code Section 17958 and 18941.5 require that all amendments, together with the unamended portions of the California Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes, become effective 180 days after the publication of the California Building Standards Code. The State has established that date to be January 1, 2023. Accordingly, it is recommended that the Board establish the operative date of the amendments, together with the unamended portions of the California Building Standards Code, to be January 1, 2023. The proposed amendments will then become operative when the Board's findings are filed with the State of California Building Standards Commission.

In accordance with the requirements of Government Code Section 50022.3, the Board must schedule a public hearing after the first reading of the title of the adopting ordinances. Notice of the hearing is required to be published pursuant to Government Code 6066. A copy of the California Building, Electrical, Plumbing, Mechanical, Residential, Green Building Standards, and Existing Building Codes must be on file with the Executive Office at least 15 days preceding the hearing and made available for public inspection.

A sample notice is submitted herewith.

ENVIRONMENTAL DOCUMENTATION

Adoption of these ordinances is exempt from the California Environmental Quality Act (CEQA) in that it can be seen with certainty that there is no possibility that the ordinance may have a significant effect on the environment pursuant to State CEQA Guidelines Section 15061(b)(3). Adoption of the proposed ordinances is covered by the general rule that CEQA applies only to projects that have the potential for causing a significant effect on the environment. Adoption of the proposed ordinances does not have such potential.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

Other departments embarking on construction projects will be required to comply with the provisions of these ordinances if applications for permits to begin construction are submitted on or after the operative date of these ordinances.

Copies of the proposed code changes were circulated to various professional associations including certain labor unions within the design and construction communities for review and comments. No comments were received by Public Works and changes to the proposed code changes were not necessary.

CONCLUSION

Upon approval of the enclosed ordinances, please return one adopted copy of this letter and one adopted copy of the ordinances to Public Works, Building and Safety Division.

Respectfully submitted,

MARK PESTRELLA, PE
Director of Public Works

ORDINANCE NO. _____

An ordinance amending Title 26 – Building Code – of the Los Angeles County Code, by adopting by reference the 2022 California Building Code, with certain changes and modifications, and making other revisions thereto.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Sections 119.1.2 through 119.1.14 of Chapter 1, Chapters 2 through 35, and Appendices C, H, I, J, and O which incorporate by reference and modify portions of the 2019 California Building Code, are hereby repealed.

SECTION 2. Chapter 1 is hereby amended to read as follows:

100 ADOPTION BY REFERENCE

Except as hereinafter changed or modified, Sections 1.2 through 1.14 of Chapter 1 of Division I of that certain building code known and designated as the ~~2019~~2022 California Building Code, as published by the California Building Standards Commission, are adopted and incorporated by reference into this Title 26 of the Los Angeles County Code as if fully set forth below, and shall be known as Sections 119.1.2 through 119.1.14, respectively, of Chapter 1 of Title 26 of the Los Angeles County Code.

Except as hereinafter changed or modified, Chapters 2 through 35 and Appendices C, H, I, J and ~~O~~P of that certain building code known and designated as the ~~2019~~2022 California Building Code, as published by the California Building Standards Commission, are adopted and incorporated by reference into this Title 26 of the Los Angeles County Code as if fully set forth below, and shall be known as Chapters 2

through 35, and Appendices C, H, I, J and ~~OP~~ of Title 26 of the Los Angeles County Code.

A copy of said California Building Code, hereinafter referred to as the CBC, including the above-designated appendices, shall be at all times maintained by the Building Official for use and examination by the public.

...

SECTION 102 UNSAFE BUILDINGS

...

102.5.2 Emergency procedure.

Whenever any portion of a building, structure, or grading work constitutes an immediate hazard to life or property, and in the opinion of the Building Official, the conditions are such that repairs, ~~or demolition, or barricade~~ must be undertaken within less than the designated period, the Building Official may take necessary action, such as performing alterations, repairs, barricading, grading and/or demolition ~~of the structures~~, to protect life or property, or both, after giving such notice to the parties concerned as the circumstances will permit or without any notice whatever when, in the Building Official's opinion, immediate action is necessary.

...

SECTION 104 ORGANIZATION AND ENFORCEMENT

...

104.3 Definitions

...

BUILDING DEPARTMENT shall mean the Building and Safety Division of the Department of Los Angeles County Public Works.

...

SECTION 106 PERMITS

...

106.3 Work Exempted.

A building permit shall not be required for the following:

...

2. Fences which are not used as a barrier to private swimming pools, spas, or hot tubs, and ground signs, provided that:

2.1 ~~Masonry or concrete~~ Fences do not exceed 6 feet (1.8 m) in height and are set back from public ways a distance at least equal to the fence height.

2.2 ~~Fences constructed of other materials do not exceed 6 feet (1.8 m) in height.~~

2.32 Ground signs do not exceed 6 feet (1.8 m) in height.

...

12. Sheds, office or storage buildings, and other structures that are less than 1,500 square feet (139 m²) and incidental to and work authorized by a valid grading or building permit. Such structures must be removed upon expiration of the permit or completion of the work covered by the permit.

...

SECTION 107 FEES

...

107.17 Annual review of fees.

The fees in this Code shall be reviewed annually by the Director of Public Works. Beginning on July 1, 1992, and thereafter on each succeeding July 1, the amount of each fee in this Code shall be adjusted as follows: Calculate the percentage movement between March of the previous year and March of the current year in the Consumer Price Index (CPI) for all urban consumers in the Los Angeles-Long Beach-Anaheim, CA areas, as published by the United States Government Bureau of Labor Statistics; and adjust each fee by said percentage amount and round off to the nearest 10 cents, provided, however, that no adjustment shall decrease any fee and no fee shall exceed the reasonable cost of providing services. When it is determined that the amount reasonably necessary to recover the cost of providing services is in excess of this adjustment, the Building Official may present fee proposals to the Board of Supervisors for approval.

...

SECTION 109 USE AND OCCUPANCY

109.1 General.

No building or structure or portion thereof shall be used or occupied, and no change in the existing occupancy classification of a building or structure or portion thereof shall be made until the Building Official has approved the building or structure or portion thereof for such use or occupancy as evidenced by the issuance of a certificate

of occupancy or a temporary certificate of occupancy. A building of Group R-1, R-2, R-2.1, R-3, R-3.1, or R-4 Occupancy, if erected on a site where grading has been performed without a grading permit or pursuant to a grading permit issued under provisions of this Code, shall not be occupied, nor shall gas or electric utilities be connected thereto, unless the grading has been completed in accordance with Appendix J or the Building Official has found, should the grading not be so completed, that the site conditions will pose no hazard to health, safety or welfare of occupants and/or occupants of adjacent properties, and that a temporary certificate of occupancy has been issued.

...

SECTION 3. Section 701A.1 is hereby amended to read as follows:

701A.1 Scope.

This Chapter applies to building materials, systems, and/or assemblies used in the exterior design and construction of new buildings located, and to additions, alterations, or repairs made to existing buildings, erected, constructed, or moved within a Wildland-Urban Interface (WUI) Fire Area as defined in Section 702A.

SECTION 4. Section 701A.3 is hereby amended to read as follows:

701A.3 Application.

New buildings, and any additions, alterations, or repairs made to existing buildings located in or moved within any Fire Hazard Severity Zone or any Wildland-Urban Interface (WUI) Fire Area designated by the ~~enforcing agency~~ Los Angeles County Fire Department, that is constructed after the application date shall comply with

the provisions of this eChapter (see Section 701A.3.1). This shall include all new buildings, and any additions, alterations, or repairs made to existing buildings, with residential, commercial, educational, institutional or similar occupancy type use, which shall be referred to in this chapter as “applicable building(s)” (see definition in Section 702A), as well as new buildings and structures, and any additions, alterations, or repairs made to existing buildings accessory to those applicable buildings (see Exceptions 1 and 4).

Exceptions:

...

4. ~~New a~~Accessory buildings and miscellaneous structures, including additions, alterations, or repairs, as specified in Section 710A shall comply only with the requirements of that sSection.

5. ~~Additions to and remodels of buildings originally constructed prior to July 1, 2008.~~ Reserved.

SECTION 5. Section 701A.3.1 is hereby amended to read as follows:

701A.3.1 Application date and where required.

New buildings for which an application for a building permit is submitted on or after July 1, 2008, and any additions, alterations, or repairs made to existing buildings for which an application for a building permit is submitted on or after January 1, 2023, located in any Fire Hazard Severity Zone or Wildland-Urban Interface Fire Area shall comply with all sections of this eChapter, including all of the following areas:

...

Exceptions:

1. ~~New~~ bBuildings located in any Fire Hazard Severity Zone within State Responsibility Areas, for which an application for a building permit is submitted on or after January 1, 2008, shall comply with all sections of this ~~e~~Chapter.

2. ~~New~~ bBuildings located in any Fire Hazard Severity Zone within State Responsibility Areas or any Wildland-Urban Interface Fire Area designated by cities and other local agencies for which an application for a building permit is submitted on or after December 1, 2005, but prior to July 1, 2008, shall only comply with the following sections of this ~~e~~Chapter:

...

SECTION 6. Section 701A.4 is hereby amended to read as follows:

701A.4 Inspection and certification.

Building permit applications and final completion approvals for buildings within the scope and application of this ~~e~~Chapter shall comply with the following:

1. Building permit issuance. The ~~local~~ bBuilding ~~e~~Official shall, prior to construction, provide the owner or applicant a certification that the building as proposed to be built complies with all applicable state and local building standards, including those for materials and construction methods for wildfire exposure as described in this ~~e~~Chapter. Issuance of a building permit by the ~~local~~ bBuilding ~~e~~Official for the proposed building shall be considered as complying with this ~~s~~Ection.

2. Building permit final. The ~~local~~ bBuilding ~~e~~Official shall, upon completion of construction, provide the owner or applicant with a copy of the final inspection report

that demonstrates the building was constructed in compliance with all applicable state and local building standards, including those for materials and construction methods for wildfire exposure as described in this ~~e~~Chapter. Issuance of a certificate of occupancy by the ~~local~~ Building Official for the proposed building shall be considered as complying with this ~~s~~Section.

SECTION 7. Section 702A is hereby amended to read as follows:

702A DEFINITIONS

...

FIRE HAZARD SEVERITY ZONES. Geographical areas designated pursuant to California Public Resources Codes Sections 4201 through 4204 and classified as Very High, High, or Moderate in State Responsibility Areas or as Local Responsibility Areas in Very High Fire Hazard Severity Zones designated pursuant to California Government Code Sections 51175 through 51189. See California Title 32 – Fire Code – of the Los Angeles County Code, Chapter 49.

...

FIRE PROTECTION PLAN. A document prepared for a specific project or development proposed for a Wildland-Urban Interface (WUI) Fire Area. It describes ways to minimize and mitigate potential for loss from wildfire exposure.

The Fire Protection Plan shall be in accordance with this ~~e~~Chapter and ~~the~~ California Title 32 – Fire Code – of the Los Angeles County Code, Chapter 49.

...

WILDLAND-URBAN INTERFACE (WUI). A geographical area identified by the

state as a "Fire Hazard Severity Zone" in accordance with the Public Resources Code Sections 4201 through 4204 and Government Code Sections 51175 through 51189, or other areas designated by the ~~enforcing agency~~ Los Angeles County Fire Department to be at a significant risk from wildfires.

SECTION 8. Section 703A.2 is hereby amended to read as follows:

703A.2 Qualification by testing.

Material and material assemblies tested in accordance with the requirements of Section 703A shall be accepted for use when the results and conditions of those tests are met. Product evaluation testing of material and material assemblies shall be approved or listed by the State Fire Marshal, the Building Official, or identified in a current report issued by an approved agency.

SECTION 9. Section 703A.3 is hereby amended to read as follows:

703A.3 Approved agency.

Product evaluation testing shall be performed by an approved agency as defined in Section 1702. The scope of accreditation for the approved agency shall include building product compliance with this eCode.

SECTION 10. Section 703A.5.2 is hereby amended to read as follows:

703A.5.2 Weathering.

Fire-retardant-treated wood ~~and fire-retardant-treated wood shingles and shakes~~ shall meet the fire test performance requirements of this eChapter after being subjected to the weathering conditions contained in the following standards, as applicable to the materials and the conditions of use.

SECTION 11. Section 703A.5.2.2 is hereby deleted in its entirety.

~~703A.5.2.2 Fire-retardant-treated wood shingles and shakes.~~

~~Fire-retardant-treated wood shingles and shakes shall be approved and listed by the State Fire Marshal in accordance with Section 208(c), Title 19 California Code of Regulations.~~

SECTION 12. Section 703A.6 is hereby amended to read as follows:

703A.6 Alternates for materials, design, tests, and methods of construction.

The ~~enforcing agency~~Building Official is permitted to modify the provisions of this ~~Chapter~~ for site-specific conditions in accordance with Chapter 1, Section 1.11.2.4104.2.7. When required by the ~~enforcing agency~~Building Official for the purposes of granting modifications, a fire protection plan shall be submitted in accordance with ~~the California~~Title 32 – Fire Code – of the Los Angeles County Code, Chapter 49.

SECTION 13. Section 704A.4 is hereby amended to read as follows:

704A.4 Alternative methods for determining ignition-resistant material.

...

~~3. Fire-retardant-treated wood shingles and shakes. Fire-retardant-treated wood shingles and shakes, as defined in section 1505.6 and listed by State Fire Marshal for use as "Class B" roof covering, shall be accepted as an Ignition-resistant wall covering material when installed over solid sheathing.~~

SECTION 14. Section 705A.2 is hereby amended to read as follows:

705A.2 Roof coverings.

Roof coverings shall be Class A as specified in Section 1505.2. Where the roofing profile has an air-space under the roof covering, installed over a combustible deck, a 72 lb. (32.7 kg) cap sheet complying with ASTM D3909 Standard Specification for “Asphalt Rolled Roofing (Glass Felt) Surfaced with Mineral Granules,” shall be installed over the roof deck. Bird stops shall be used at the eaves when the profile fits, to prevent debris at the eave. Hip and ridge caps shall be mudded in to prevent intrusion of fire or embers.

Exception: Cap sheet is not required when no less than 1” of mineral wool board or other noncombustible material is located between the roofing material and wood framing or deck.

Alternately, a Class A fire rated roof underlayment, tested in accordance with ASTM E108, shall be permitted to be used. If the sheathing consists of exterior fire-retardant-treated wood, the underlayment shall not be required to comply with a Class A classification. Bird stops shall be used at the eaves when the profile fits, to prevent debris at the eave. Hip and ridge caps shall be mudded in to prevent intrusion of fire or embers. Wood shingles and wood shakes are prohibited in any Fire Hazard Severity Zones regardless of classification.

SECTION 15. Section 710A.3 is hereby amended to read as follows:

710A.3 Where required.

...

When required by the ~~enforcing agency~~Building Official, miscellaneous structures that require a permit, and accessory buildings that are 120 square feet (11.15 m²) or less, when separated from an applicable building on the same lot by a distance of 3 feet (914 mm) or more but less than 50 feet (15 240 mm), shall comply with either Section 710A.3.4 or Section 710A.3.3, respectively.

...

SECTION 16. Section 710A.3.3 is hereby amended to read as follows:

710A.3.3 Accessory buildings 120 square feet (11.15 m²) or less, located 3 feet (914 mm) or more but less than 50 feet (15 240 mm).

When required by the ~~enforcing agency~~Building Official, accessory buildings 120 square feet (11.15 m²) or less and separated from an applicable building on the same lot by a distance of 3 feet (914 mm) or more but less than 50 feet (15 240 mm) shall be constructed of noncombustible materials or of ignition-resistant materials as described in Section 704A.2.

SECTION 17. Section 710A.3.4 is hereby amended to read as follows:

710A.3.4 Miscellaneous structures located 3 feet (914 mm) or more but less than 50 feet (15 240 mm).

When required by the ~~enforcing agency~~Building Official, miscellaneous structures that require a permit and are separated from an applicable building on the same lot by a distance of 3 feet (914 mm) or more but less than 50 feet (15 240 mm) shall be constructed of noncombustible materials or of ignition-resistant materials as described

in Section 704A.2.

SECTION 18. Section 1031.2.1 is hereby amended to read as follows:

1031.2.1 Operational constraints and opening control devices.

...

Where security bars (burglar bars) are installed on emergency egress and rescue windows or doors, ~~on or after July 1, 2000,~~ such devices shall comply with California Building Standards Code, Part 12, Chapter 12-3 and other applicable provisions of Part 2.

...

SECTION 19. Table 1507.3.7 is hereby amended to read as follows:

**TABLE 1507.3.7
CLAY AND CONCRETE TILE ATTACHMENT^{a, b, c}**

GENERAL – CLAY OR CONCRETE ROOF TILE				
Maximum Allowable Stress Design Wind Speed, V_{asd}^f (mph)	Mean roof height (feet)	Roof slope <3:12	Roof slope 3:12 and over	
85	0 - 60	<u>Minimum slope: 2.5:12</u>	Two fasteners per tile. Only one fastener on slopes of 7:12 and less for tiles with installed weight exceeding 7.5 lbs/sq. ft. having a width no greater than 16 inches.	
100	0 - 40	One fastener per tile. Flat tile without vertical laps. <u>Two fasteners per tile.</u>		
...		
INTERLOCKING CLAY OR CONCRETE ROOF TILE WITH PROJECTING ANCHOR LUGS ^{d, e} (Installations on spaced/solid sheathing with battens or spaced sheathing)				
Maximum Allowable Stress Design Wind Speed, V_{asd}^f (mph)	Mean roof height (feet)	Roof slope <5:12	Roof slope 5:12<12:12	Roof slope 12:12 and over
85	0 - 60	Fasteners are not required. Tiles with installed weight less than 9 lbs/sq. ft. require not	One fastener per tile every other row. All perimeter tiles	One fastener required for every tile. Tiles with

100	0 - 40	fewer than Minimum slope is 4:12. One fastener per tile.	require one fastener. Tiles with installed weight less than 9 lbs/sq.ft. require not fewer than one fastener per tile.	installed weight less than 9 lbs./sq. ft. require not fewer than one fastener per tile.
...
INTERLOCKING CLAY OR CONCRETE ROOF TILE WITH PROJECTING ANCHOR LUGS (Installations on solid sheathing without battens)				
Maximum Allowable Stress Design Wind Speed, V_{asdf} (mph)	Mean roof height (feet)	<u>All Minimum roof slopes 4 units vertical in 12 units horizontal</u> <u>Maximum slope 7 units vertical in 12 units horizontal</u>		
...		

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm, 1 mile per hour = 0.447 m/s, 1 pound per square foot = 4.882 kg/m².

^a Minimum fastener size. Hot dipped galvanized ring shank or other corrosion-resistant nails not less than No. 11 gage with 5/16-inch head. Fasteners shall be long enough to penetrate into the sheathing 3/4 inch or through the thickness of the sheathing, whichever is less. Attaching wire for clay and concrete tile shall not be smaller than 0.083 inch and shall be copper, brass, or stainless steel.

...

SECTION 20. Section 1613.5 is hereby added to read as follows:

1613.5 Modifications to ASCE 7.

The text of ASCE 7 shall be modified as indicated in Sections 1613.5.1 through 1613.5.3.

1613.5.1 ASCE 7, 12.2.3.1, Exception 3.

Modify ASCE 7, Section 12.2.3.1, Exception 3, to read as follows:

3. Detached one- and two-family dwellings up to two stories in height of light frame construction.

1613.5.2 ASCE 7, Section 12.11.2.2.3.

Modify ASCE 7, Section 12.11.2.2.3, to read as follows:

12.11.2.2.3 Wood diaphragms.

The anchorage of concrete or masonry structural walls to wood diaphragms shall be in accordance with AWC SDPWS 4.1.5.1 and this Section. Continuous ties required by this Section shall be in addition to the diaphragm sheathing. Anchorage shall not be accomplished by use of toenails or nails subject to withdrawal, nor shall wood ledgers or framing be used in cross-grain bending or cross-grain tension. The diaphragm sheathing shall not be considered effective as providing ties or struts required by this Section.

For structures assigned to Seismic Design Category D, E, or F, wood diaphragms supporting concrete or masonry walls shall comply with the following:

1. The spacing of continuous ties shall not exceed 40 feet. Added chords of diaphragms may be used to form subdiaphragms to transmit the anchorage forces to the main continuous crossties.

2. The maximum diaphragm shear used to determine the depth of the subdiaphragm shall not exceed 75 percent of the maximum diaphragm shear.

1613.5.3 ASCE 7, 12.12.3.

Modify ASCE 7 Equation 12.12-1 of Section 12.12.3 to read as follows:

$$\delta_M = \frac{C_d \delta_{max}}{I_e}$$

(Equation 12.12-1)

SECTION 21. Section 1613.6 is hereby added to read as follows:

1613.6 Seismic design provisions for hillside buildings.

1613.6.1 Purpose.

The purpose of this Section is to establish minimum regulations for the design and construction of new buildings and additions to existing buildings when constructing such buildings on or into slopes steeper than one unit vertical in three units horizontal (33.3 percent). These regulations establish minimum standards for seismic force resistance to reduce the risk of injury or loss of life in the event of earthquakes.

1613.6.2 Scope.

The provisions of this Section shall apply to the design of the lateral-force-resisting system for hillside buildings at and below the base level diaphragm. The design of the lateral-force-resisting system above the base level diaphragm shall be in accordance with the provisions for seismic and wind design as required elsewhere in this Chapter.

Exceptions:

1. Non-habitable accessory buildings and decks not supporting or supported from the main building are exempt from these regulations.
2. Additions to existing buildings that do not exceed 10 percent of the existing floor area provided that the addition is being supported completely by the existing foundation.

1613.6.3 Definitions.

For the purposes of this Section certain terms are defined as follows:

BASE LEVEL DIAPHRAGM is the floor at, or closest to, the top of the highest level of the foundation.

DIAPHRAGM ANCHORS are assemblies that connect a diaphragm to the adjacent foundation at the uphill diaphragm edge.

DOWNHILL DIRECTION is the descending direction of the slope approximately perpendicular to the slope contours.

FOUNDATION is concrete or masonry that supports a building, including footings, stem walls, retaining walls, and grade beams.

FOUNDATION EXTENDING IN THE DOWNHILL DIRECTION is a foundation running downhill and approximately perpendicular to the uphill foundation.

HILLSIDE BUILDING is any building or portion thereof constructed on or into a slope steeper than one unit vertical in three units horizontal (33.3 percent). If only a portion of the building is supported on or into the slope, these regulations apply to the entire building.

PRIMARY ANCHORS are diaphragm anchors designed for and providing a direct connection as described in Sections 1613.6.5 and 1613.6.7.3 between the diaphragm and the uphill foundation.

SECONDARY ANCHORS are diaphragm anchors designed for and providing a redundant diaphragm to foundation connection, as described in Sections 1613.6.6 and 1613.6.7.4.

UPHILL DIAPHRAGM EDGE is the edge of the diaphragm adjacent and closest to the highest ground level at the perimeter of the diaphragm.

UPHILL FOUNDATION is the foundation parallel and closest to the uphill diaphragm edge.

1613.6.4 Analysis and design.

1613.6.4.1 General.

Every hillside building within the scope of this Section shall be analyzed, designed, and constructed in accordance with the provisions of this Chapter. When the code-prescribed wind design produces greater effects, the wind design shall govern, but detailing requirements and limitations prescribed in this Section and all referenced Sections shall be followed.

1613.6.4.2 Base level diaphragm-downhill direction.

The following provisions shall apply to the seismic analysis and design of the connections for the base level diaphragm in the downhill direction.

1613.6.4.2.1 Base for lateral force design defined.

For seismic forces acting in the downhill direction, the base of the building shall be the floor at, or closest to, the top of the highest level of the foundation.

1613.6.4.2.2 Base shear.

In developing the base shear for seismic design, the response modification coefficient (R) shall not exceed 5 for bearing wall and building frame systems. The total base shear shall include the forces tributary to the base level diaphragm, including forces from the base level diaphragm.

1613.6.5 Base shear resistance for primary anchors.

1613.6.5.1 General.

The base shear in the downhill direction shall be resisted through primary anchors from diaphragm struts provided in the base level diaphragm to the foundation.

1613.6.5.2 Location of primary anchors.

A primary anchor and diaphragm strut shall be provided in line with each foundation extending in the downhill direction. Primary anchors and diaphragm struts shall also be provided where interior vertical lateral-force-resisting elements occur above and in contact with the base level diaphragm. The spacing of primary anchors and diaphragm struts or collectors shall in no case exceed 30 feet (9,144 mm).

1613.6.5.3 Design of primary anchors and diaphragm struts.

Primary anchors and diaphragm struts shall be designed in accordance with the requirements of Section 1613.6.8.

1613.6.5.4 Limitations.

The following lateral-force-resisting elements shall not be designed to resist seismic forces below the base level diaphragm in the downhill direction:

1. Wood structural panel wall sheathing;
2. Cement plaster and lath;
3. Gypsum wallboard; and
4. Tension-only braced frames.

Braced frames designed in accordance with the requirements of Section 2205.2.2 may be used to transfer forces from the primary anchors and diaphragm struts to the foundation provided lateral forces do not induce flexural stresses in any member of the frame or in the diaphragm struts. Deflections of frames shall account for the variation in slope of diagonal members when the frame is not rectangular.

1613.6.6 Base shear resistance for secondary anchors.

1613.6.6.1 General.

In addition to the primary anchors required by Section 1613.6.5, the base shear in the downhill direction shall be resisted through secondary anchors in the uphill foundation connected to diaphragm struts in the base level diaphragm.

Exception: Secondary anchors are not required where foundations extending in the downhill direction spaced at not more than 30 feet (9,144 mm) on center extend up to and are directly connected to the base level diaphragm for at least 70 percent of the diaphragm depth.

1613.6.6.2 Secondary anchor capacity and spacing.

Secondary anchors at the base level diaphragm shall be designed for a minimum force equal to the base shear, including forces tributary to the base level diaphragm, but not less than 600 pounds per lineal foot (8.76 kN/m). The secondary anchors shall be uniformly distributed along the uphill diaphragm edge and shall be spaced at a maximum of four feet (1,219 mm) on center.

1613.6.6.3 Design.

Secondary anchors and diaphragm struts shall be designed in accordance with Section 1613.6.8.

1613.6.7 Diaphragms below the base level for downhill direction.

The following provisions shall apply to the lateral analysis and design of the connections for all diaphragms below the base level diaphragm in the downhill direction.

1613.6.7.1 Diaphragm defined.

Every floor level below the base level diaphragm shall be designed as a diaphragm.

1613.6.7.2 Design force.

Each diaphragm below the base level diaphragm shall be designed for all tributary loads at that level using a minimum seismic force factor not less than the base shear coefficient.

1613.6.7.3 Design force-resistance for primary anchors.

The design force described in Section 1613.5.7.2 shall be resisted through primary anchors from diaphragm struts provided in each diaphragm to the foundation. Primary anchors shall be provided and designed in accordance with the requirements and limitations of Section 1613.5.5.

1613.6.7.4 Design force-resistance for secondary anchors.

1613.6.7.4.1 General.

In addition to the primary anchors required in Section 1613.5.7.3, the design force in the downhill direction shall be resisted through secondary anchors in the uphill foundation connected to diaphragm struts in each diaphragm below the base level.

Exception: Secondary anchors are not required where foundations extending in the downhill direction, spaced at not more than 30 feet (9,144 mm) on center, extend up to and are directly connected to each diaphragm below the base level for at least 70 percent of the diaphragm depth.

1613.6.7.4.2 Secondary anchor capacity.

Secondary anchors at each diaphragm below the base level diaphragm shall be designed for a minimum force equal to the design force but not less than 300 pounds per lineal foot (4.38 kN/m). The secondary anchors shall be uniformly distributed along the uphill diaphragm edge and shall be spaced at a maximum of four feet (1,219 mm) on center.

1613.6.7.4.3 Design.

Secondary anchors and diaphragm struts shall be designed in accordance with Section 1613.6.8.

1613.6.8 Primary and secondary anchorage and diaphragm strut design.

Primary and secondary anchors and diaphragm struts shall be designed in accordance with the following provisions:

1. Fasteners. All bolted fasteners used to develop connections to wood members shall be provided with square plate washers at all bolt heads and nuts. Washers shall be minimum 0.229 inch by 3 inches by 3 inches (5.82 mm by 76 mm by 76 mm) in size. Nuts shall be tightened to finger tight plus one-half (1/2) wrench turn prior to covering the framing.
2. Fastening. The diaphragm to foundation anchorage shall not be accomplished by the use of toenailing, nails subject to withdrawal, or wood in cross-grain bending or cross-grain tension.
3. Size of Wood Members. Wood diaphragm struts, collectors, and other

wood members connected to primary anchors shall not be less than three-inch (76 mm) nominal width. The effects of eccentricity on wood members shall be evaluated as required per Item 9.

4. Design. Primary and secondary anchorage, including diaphragm struts, splices, and collectors shall be designed for 125 percent of the tributary force.

5. Allowable Stress Increase. The one-third allowable stress increase permitted under Section 1605.3.2 shall not be taken when the working (allowable) stress design method is used.

6. Steel Element of Structural Wall Anchorage System. The strength design forces for steel elements of the structural wall anchorage system, with the exception of anchor bolts and reinforcing steel, shall be increased by 1.4 times the forces otherwise required.

7. Primary Anchors. The load path for primary anchors and diaphragm struts shall be fully developed into the diaphragm and into the foundation. The foundation must be shown to be adequate to resist the concentrated loads from the primary anchors.

8. Secondary Anchors. The load path for secondary anchors and diaphragm struts shall be fully developed in the diaphragm but need not be developed beyond the connection to the foundation.

9. Symmetry. All lateral force foundation anchorage and diaphragm strut connections shall be symmetrical. Eccentric connections may be permitted when demonstrated by calculation or tests that all components of force have been provided

for in the structural analysis or tests.

10. Wood Ledgers. Wood ledgers shall not be used to resist cross-grain bending or cross-grain tension.

1613.6.9 Lateral-force-resisting elements normal to the downhill direction.

1613.6.9.1 General.

In the direction normal to the downhill direction, lateral-force-resisting elements shall be designed in accordance with the requirements of this Section.

1613.6.9.2 Base shear.

In developing the base shear for seismic design, the response modification coefficient (R) shall not exceed 5 for bearing wall and building frame systems.

1613.6.9.3 Vertical distribution of seismic forces.

For seismic forces acting normal to the downhill direction the distribution of seismic forces over the height of the building using Section 12.8.3 of ASCE 7 shall be determined using the height measured from the top of the lowest level of the building foundation.

1613.6.9.4 Drift limitations.

The story drift below the base level diaphragm shall not exceed 0.007 times the story height at strength design force level. The total drift from the base level diaphragm to the top of the foundation shall not exceed 3/4 inch (19 mm). Where the story height or the height from the base level diaphragm to the top of the foundation varies because of a stepped footing or story offset, the height shall be measured from the average

height of the top of the foundation. The story drift shall not be reduced by the effect of horizontal diaphragm stiffness.

1613.6.9.5 Distribution of lateral forces.

1613.6.9.5.1 General.

The design lateral force shall be distributed to lateral-force-resisting elements of varying heights in accordance with the stiffness of each individual element.

1613.6.9.5.2 Wood structural panel sheathed walls.

The stiffness of a stepped wood structural panel shear wall may be determined by dividing the wall into adjacent rectangular elements, subject to the same top of wall deflection. Deflections of shear walls may be estimated by AWC SDPWS Section 4.3.2. Sheathing and fastening requirements for the stiffest section shall be used for the entire wall. Each section of wall shall be anchored for shear and uplift at each step. The minimum horizontal length of a step shall be 8 feet (2438 mm) and the maximum vertical height of a step shall be 2 feet, 8 inches (813 mm).

1613.6.9.5.3 Reinforced concrete or masonry shear walls.

Reinforced concrete or masonry shear walls shall have forces distributed in proportion to the rigidity of each section of the wall.

1613.6.9.6 Limitations.

The following lateral force-resisting-elements shall not be designed to resist lateral forces below the base level diaphragm in the direction normal to the downhill direction:

1. Cement plaster and lath;

2. Gypsum wallboard; and
3. Tension-only braced frames.

Braced frames designed in accordance with the requirements of Section 2205.2.1.2 of this Code may be designed as lateral-force-resisting elements in the direction normal to the downhill direction, provided lateral forces do not induce flexural stresses in any member of the frame. Deflections of frames shall account for the variation in slope of diagonal members when the frame is not rectangular.

1613.6.10 Specific design provisions.

1613.6.10.1 Footings and grade beams.

All footings and grade beams shall comply with the following:

1. Grade beams shall extend at least 12 inches (305 mm) below the lowest adjacent grade and provide a minimum 24-inch (610 mm) distance horizontally from the bottom outside face of the grade beam to the face of the descending slope.
2. Continuous footings shall be reinforced with at least two No. 4 reinforcing bars at the top and two No. 4 reinforcing bars at the bottom.
3. All main footing and grade beam reinforcement steel shall be bent into the intersecting footing and fully developed around each corner and intersection.
4. All concrete stem walls shall extend from the foundation and be reinforced as required for concrete or masonry walls.

1613.6.10.2 Protection against decay and termites.

All wood to earth separation shall comply with the following:

1. Where a footing or grade beam extends across a descending slope, the

stem wall, grade beam, or footing shall extend up to a minimum 18 inches (457 mm) above the highest adjacent grade.

Exception: At paved garage and doorway entrances to the building, the stem wall need only extend to the finished concrete slab, provided the wood framing is protected with a moisture proof barrier.

2. Wood ledgers supporting a vertical load of more than 100 pounds per lineal foot (1.46 kN/m) based on Allowable Stress Design (ASD) levels and located within 48 inches (1219 mm) of adjacent grade are prohibited. Galvanized steel ledgers and anchor bolts, with or without wood nailers, or treated or decay resistant sill plates supported on a concrete or masonry seat, may be used.

1613.6.10.3 Sill plates.

All sill plates and anchorage shall comply with the following:

1. All wood framed walls, including nonbearing walls, when resting on a footing, foundation, or grade beam stem wall, shall be supported on wood sill plates bearing on a level surface.
2. Power-driven fasteners shall not be used to anchor sill plates except at interior nonbearing walls not designed as shear walls.

1613.6.10.4 Column base plate anchorage.

The base of isolated wood posts (not framed into a stud wall) supporting a vertical load of 4000 pounds (17.8 kN) or more based on ASD levels, and the base plate for a steel column shall comply with the following:

1. When the post or column is supported on a pedestal extending above the

top of a footing or grade beam, the pedestal shall be designed and reinforced as required for concrete or masonry columns. The pedestal shall be reinforced with a minimum of four No. 4 bars extending to the bottom of the footing or grade beam. The top of exterior pedestals shall be sloped for positive drainage.

2. The base plate anchor bolts or the embedded portion of the post base, and the vertical reinforcing bars for the pedestal, shall be confined with two No. 4 or three No. 3 ties within the top five inches (127 mm) of the concrete or masonry pedestal. The base plate anchor bolts shall be embedded a minimum of 20 bolt diameters into the concrete or masonry pedestal. The base plate anchor bolts and post bases shall be galvanized and each anchor bolt shall have at least two galvanized nuts above the base plate.

1613.6.10.5 Steel beam to column supports.

All steel beam to column supports shall be positively braced in each direction. Steel beams shall have stiffener plates installed on each side of the beam web at the column. The stiffener plates shall be welded to each beam flange and the beam web. Each brace connection or structural member shall consist of at least two 5/8 inch (15.9 mm) diameter machine bolts.

SECTION 22. Section 1613.7 is hereby added to read as follows:

1613.7 Suspended ceilings.

Minimum design and installation standards for suspended ceilings shall be determined in accordance with the requirements of Section 2506.2.1 and this Section.

1613.7.1 Scope.

This part contains special requirements for suspended ceilings and lighting systems. Provisions of Section 13.5.6 of ASCE 7 shall apply except as modified herein.

1613.7.2 **General.**

The suspended ceilings and lighting systems shall be limited to 6 feet (1828 mm) below the structural deck unless the lateral bracing is designed by a licensed engineer or architect.

1613.7.3 **Sprinkler heads.**

All sprinkler heads (drops) except fire-resistance-rated floor/ceiling or roof/ceiling assemblies, shall be designed to allow for free movement of the sprinkler pipes with oversize rings, sleeves or adaptors through the ceiling tile. Sprinkler heads and other penetrations shall have a 2-inch (50mm) oversize ring, sleeve, or adapter through the ceiling tile to allow for free movement of at least 1 inch (25mm) in all horizontal directions. Alternatively, a swing joint that can accommodate 1 inch (25 mm) of ceiling movement in all horizontal directions is permitted to be provided at the top of the sprinkler head extension.

Sprinkler heads penetrating fire-resistance-rated floor/ceiling or roof/ceiling assemblies shall comply with Section 714.

1613.7.4 **Special requirements for means of egress.**

Suspended ceiling assemblies located along means of egress serving an occupant load of 30 or more and at lobbies accessory to Group A Occupancies shall comply with the following provisions.

1613.7.4.1 **General.**

Ceiling suspension systems shall be connected and braced with vertical hangers attached directly to the structural deck along the means of egress serving an occupant load of 30 or more and at lobbies accessory to Group A Occupancies. Spacing of vertical hangers shall not exceed 2 feet (610 mm) on center along the entire length of the suspended ceiling assembly located along the means of egress or at the lobby.

1613.7.4.2 Assembly device.

All lay-in panels shall be secured to the suspension ceiling assembly with two hold-down clips minimum for each tile within a 4-foot (1219 mm) radius of the exit lights and exit signs.

1613.7.4.3 Emergency systems.

Independent supports and braces shall be provided for light fixtures required for exit illumination. Power supply for exit illumination shall comply with the requirements of Section 1008.3 of this Code.

1613.7.4.4 Supports for appendages.

Separate support from the structural deck shall be provided for all appendages such as light fixtures, air diffusers, exit signs, and similar elements.

SECTION 23. Section 1704.2.3 is hereby amended to read as follows:

1704.2.3 Statement of special inspections.

The applicant shall submit a statement of special inspections in accordance with Section ~~106.4107.1, Chapter 1, Division II~~, as a condition for permit issuance. This statement shall be in accordance with Section 1704.3.

...

SECTION 24. Section 1704.6 is hereby amended to read as follows:

1704.6 Structural observations.

Where required by the provisions of Section 1704.6.1 the owner or the owner's authorized agent shall employ a ~~registered design professional~~ structural observer to perform structural observations. The structural observer shall visually observe representative locations of structural systems, details and load paths for general conformance to the approved construction documents. Structural observation does not include or waive the responsibility for the inspections in Section ~~440108~~ or the special inspections in Section 1705 or other sections of this eCode. The structural observer shall be one of the following individuals:

1. The registered design professional responsible for the structural design, or
2. A registered design professional designated by the registered design professional responsible for the structural design.

Prior to the commencement of observations, the structural observer shall submit to the ~~b~~Building ~~e~~Official a written statement identifying the frequency and extent of structural observations.

~~At the conclusion of the work included in the permit, the structural observer shall submit to the building official a written statement that the site visits have been made and identify any reported deficiencies that, to the best of the structural observer's knowledge, have not been resolved.~~

The owner or owner's authorized agent shall coordinate and call a preconstruction meeting between the structural observer, contractors, affected

subcontractors, and special inspectors. The structural observer shall preside over the meeting. The purpose of the meeting shall be to identify the major structural elements and connections that affect the vertical and lateral load resisting systems of the structure and to review scheduling of the required observations. A record of the meeting shall be included in the report submitted to the Building Official.

Observed deficiencies shall be reported in writing to the owner or owner's authorized agent, special inspector, contractor, and the Building Official. Upon the form prescribed by the Building Official, the structural observer shall submit to the Building Official a written statement at each significant construction stage stating that the site visits have been made and identifying any reported deficiencies which, to the best of the structural observer's knowledge, have not been resolved. A final report by the structural observer, which states that all observed deficiencies have been resolved, is required before acceptance of the work by the Building Official.

SECTION 25. Section 1704.6.1 is hereby amended to read as follows:

1704.6.1 Structural observations for structures.

...

3. ~~The structure is assigned to Seismic Design Category E, and is greater than two stories above the grade plane.~~A lateral design is required for the structure or portion thereof.

Exception: One-story wood framed Group R-3 and Group U Occupancies less than 2,000 square feet in area, provided the adjacent grade is not steeper than 1 unit vertical in 10 units horizontal (10 percent sloped), assigned to Seismic Design

Category D.

...

SECTION 26. Section 1705.3 is hereby amended to read as follows:

1705.3 Concrete Construction.

Special inspections and tests of concrete construction shall be performed in accordance with this ~~s~~Section and Table 1705.3.

Exception: Special inspections and tests shall not be required for:

1. Isolated spread concrete footings of buildings three stories or less above grade plane that are fully supported on earth or rock where the structural design of the footing is based on a specified compressive strength (f'c) not greater than 2,500 pounds per square inch (psi) (17.2 Mpa) regardless of the compressive strength specified in the construction documents or used in the footing construction.

...

~~4. Concrete foundation walls constructed in accordance with Table 1807.1.6.2.~~

- ~~54. Concrete patios, driveways and sidewalks, on grade.~~

SECTION 27. Section 1705.13 is hereby amended to read as follows:

1705.13 Special inspections for seismic resistance.

...

Exception: The special inspections specified in Sections 1705.13.1 through 1705.13.9 are not required for structures designed and constructed in accordance with one of the following:

...

3. The structure is a detached one- or two-family dwelling not exceeding two stories above grade plane, provided the structure is not assigned to Seismic Design Category D, E, or F and does not have any of the following horizontal or vertical irregularities in accordance with Section 12.3 of ASCE 7:

...

SECTION 28. Section 1807.1.4 is hereby amended to read as follows:

1807.1.4 Permanent wood foundations systems.

Permanent wood foundation systems shall be designed and installed in accordance with AWC PWF. Lumber and plywood shall be preservative-treated in accordance with AWPA U1 (Commodity Specification A, Special Requirement 4.2), and shall be identified in accordance with Section 2303.1.9.1. Permanent wood foundation systems shall not be used for structures assigned to Seismic Design Category D, E, or F.

SECTION 29. Section 1807.1.6 is hereby amended to read as follows:

1807.1.6 Prescriptive design of concrete and masonry foundation walls.

Concrete and masonry foundation walls that are laterally supported at the top and bottom shall be permitted to be designed and constructed in accordance with this ~~s~~Section. Prescriptive design of foundation walls shall not be used for structures assigned to Seismic Design Category D, E, or F.

SECTION 30. Section 1807.2 is hereby amended to read as follows:

1807.2 Retaining walls.

Retaining walls shall be designed in accordance with Section 1807.2.1 through 1807.2.5. Freestanding cantilever walls shall be designed in accordance with Section 1807.2.5. Retaining walls assigned to Seismic Design Category D, E, or F shall not be partially or wholly constructed of wood.

SECTION 31. Section 1807.3.1 is hereby amended to read as follows:

1807.3.1 Limitations.

The design procedures outlined in this ~~s~~Section are subject to the following limitations:

1. The frictional resistance for structural walls and slabs on silts and clays shall be limited to one-half of the normal force imposed on the soils by the weight of the footing or slab.
2. Posts embedded in earth shall not be used to provide lateral support for structural or nonstructural materials such as plaster, masonry or concrete unless bracing is provided that develops the limited deflection required.

Wood poles shall be treated in accordance with AWPA U1 for sawn timber posts (Commodity Specification A, Use Category 4B) and for round timber posts (Commodity Specification B, Use Category 4B). Wood poles and posts embedded in direct contact with soil shall not be used for structures assigned to Seismic Design Category D, E, or F.

Wood poles and posts embedded in accordance with Methods 2 and 3 of Section 1807.3.3 shall not be permitted for structures assigned to Seismic Design Category D,

E, or F, except when used to support nonhabitable, nonoccupiable structures such as fences when approved by the Building Official.

SECTION 32. Section 1809.3 is hereby amended to read as follows:

1809.3 Stepped footings.

...

For structures assigned to Seismic Design Category D, E, or F, the stepping requirement shall also apply to the top surface of continuous footings supporting walls.
Footings shall be reinforced with four No. 4 reinforcing bars. Two bars shall be located at the top and bottom of the footings as shown in Figure 1809.3.

SECTION 33. Figure 1809.3 is hereby added to read as follows:

FIGURE 1809.3

STEPPED FOOTING

SECTION 34. Section 1809.7 is hereby amended to read as follows:

1809.7 Prescriptive footings for light-frame construction.

Where a specific design is not provided, concrete or masonry-unit footings supporting walls of light-frame construction shall be permitted to be designed in accordance with Table 1809.7. Prescriptive footings in accordance with Table 1809.7 shall not be used to support structures that exceed one story above grade plane and are assigned to Seismic Design Category D, E, or F.

SECTION 35. Table 1809.7 is hereby amended to read as follows:

TABLE 1809.7

**PRESCRIPTIVE FOOTINGS SUPPORTING WALLS OF
LIGHT-FRAME CONSTRUCTION^{a, b, c, d, e}**

NUMBER OF FLOORS SUPPORTED BY THE FOOTING^f	WIDTH OF FOOTING (inches)	THICKNESS OF FOOTING (inches)
1	12	6
2	15	6
3	18	8 ^g

...

c. ~~Interior stud bearing walls shall be permitted to be supported by isolated footings. The footing width and length shall be twice the width shown in this table, and footings shall be spaced not more than 6 feet on center.~~ [Reserved].

...

g. ~~Plain concrete footings for Group R-3 occupancies shall be permitted to be 6 inches thick.~~

SECTION 36. Section 1809.12 is hereby amended to read as follows:

1809.12 Timber footings.

Timber footings shall be permitted for buildings of Type V construction and as otherwise approved by the Building Official. Such footings shall be treated in accordance with AWPA U1 (Commodity Specification A, Use Category 4B). Treated timbers are not required where placed entirely below permanent water level, or where used as capping for wood piles that project above the water level over submerged or marsh lands. The compressive stresses perpendicular to grain in untreated timber footings supported upon treated piles shall not exceed 70 percent of the allowable stresses for the species and grade of timber as specified in the ANSI/AWC NDS. Timber footings shall not be used in structures assigned to Seismic Design Category D, E, or F.

SECTION 37. Section 1810.3.2.4 is hereby amended to read as follows:

1810.3.2.4 Timber.

Timber deep foundation elements shall be designed as piles or poles in accordance with ANSI/AWC NDS. Round timber elements shall conform to ASTM D25. Sawn timber elements shall conform to DOC PS-20. Timber shall not be used in structures assigned to Seismic Design Category D, E, or F.

SECTION 38. Section 1905.1 is hereby amended to read as follows:

1905.1 General.

The text of ACI 318 shall be modified as indicated in Sections 1905.1.1 through 1905.1.811.

SECTION 39. Section 1905.1.7 is hereby amended to read as follows:

1905.1.7 ACI 318, Section 14.1.4.

Delete ACI 318, Section 14.1.4, and replace with the following:

...

14.1.4.1 – Structures assigned to Seismic Design Category C, D, E₁ or F shall not have elements of structural plain concrete, except as follows:

- ~~Structural plain concrete basement, foundation or other walls below the base as defined in ASCE 7 are permitted in detached one- and two-family dwellings three stories or less in height constructed with stud bearing walls. In dwellings assigned to Seismic Design Category D or E, the height of the wall shall not exceed 8 feet (2438 mm), the thickness shall not be less than 7½ inches (190 mm), and the wall shall retain no more than 4 feet (1219 mm) of unbalanced fill. Walls shall have reinforcement in accordance with 14.6.1.~~ Concrete used for fill with a minimum cement content of two (2) sacks of Portland cement or cementitious material per cubic yard.

- Isolated footings of plain concrete supporting pedestals or columns are permitted, provided the projection of the footing beyond the face of the supported member does not exceed the footing thickness.

~~Exception: In detached one- and two-family dwellings three stories or less in height, the projection of the footing beyond the face of the supported member is permitted to exceed the footing thickness.~~

- Plain concrete footings supporting walls are permitted, provided the footings have at least two continuous longitudinal reinforcing bars. Bars shall not be

smaller than No. 4 and shall have a total area of not less than 0.002 times the gross cross-sectional area of the footing. ~~For footings that exceed 8 inches (203 mm) in thickness, a~~ minimum of one bar shall be provided at the top and bottom of the footing. Continuity of reinforcement shall be provided at corners and intersections.

Exceptions:

1. ~~In Seismic Design Categories A, B and C, d~~Detached one- and two-family dwellings three stories or less in height and constructed with stud-bearing walls are permitted to have plain concrete footings ~~without longitudinal reinforcement~~with at least two continuous longitudinal reinforcing bars not smaller than No. 4 and a total area of less than 0.002 times the gross cross-sectional area of the footing.

2. ~~For foundation systems consisting of a plain concrete footing and a plain concrete stemwall, a minimum of one bar shall be provided at the top of the stemwall and at the bottom of the footing.~~

3. ~~Where a slab on ground is cast monolithically with the footing, one No. 5 bar is permitted to be located at either the top of the slab or bottom of the footing.~~

SECTION 40. Section 1905.1.8 is hereby amended to read as follows:

1905.1.8 ACI 318, Section 17.2.3.

These requirements shall be applicable to all buildings. Modify ACI 318,

Sections 17.2.3.4.2, 17.2.3.4.3 (d)₁ and 17.2.3.5.2 to read as follows:

...

SECTION 41. Section 1905.1.9 is hereby added to read as follows:

1905.1.9. ACI 318, Section 18.7.5.

Modify ACI 318, Section 18.7.5, by adding Sections 18.7.5.8 and 18.7.5.9 as follows:

18.7.5.8 Where the calculated point of contraflexure is not within the middle half of the member clear height, provide transverse reinforcement as specified in ACI 318, Sections 18.7.5.1, Items (a) through (c), over the full height of the member.

18.7.5.9 At any section where the design strength, ϕP_n , of the column is less than the sum of the shears V_e computed in accordance with ACI 318, Sections 18.7.6.1 and 18.6.5.1, for all the beams framing into the column above the level under consideration, transverse reinforcement as specified in ACI 318, Sections 18.7.5.1 through 18.7.5.3, shall be provided. For beams framing into opposite sides of the column, the moment components may be assumed to be of opposite sign. For the determination of the design strength, ϕP_n , of the column, these moments may be assumed to result from the deformation of the frame in any one principal axis.

SECTION 42. Section 1905.1.10 is hereby added to read as follows:

1905.1.10. ACI 318, Section 18.10.4.

Modify ACI 318, Section 18.10.4, by adding Section 18.10.4.7 as follows:

18.10.4.7 Walls and portions of walls with $P_u > 0.35P_o$ shall not be considered to contribute to the calculated shear strength of the structure for resisting earthquake-induced forces. Such walls shall conform to the requirements of ACI 318, Section 18.14.

SECTION 43. Section 1905.1.11 is hereby added to read as follows:

1905.1.11 ACI 318, Section 18.12.6.

Modify ACI 318, by adding Section 18.12.6.2, as follows:

18.12.6.2 Collector and boundary elements in topping slabs placed over precast floor and roof elements shall not be less than 3 inches (76 mm) or $6 d_b$ in thickness, where d_b is the diameter of the largest reinforcement in the topping slab.

SECTION 44. Section 2304.10.2 is hereby amended to read as follows:

2304.10.2 Fastener requirements.

Connections for wood members shall be designed in accordance with the appropriate methodology in Section 2302.1. The number and size of fasteners connecting wood members shall not be less than that set forth in Table 2304.10.2.

Staple fasteners in Table 2304.10.2 shall not be used to resist or transfer seismic forces in structures assigned to Seismic Design Category D, E, or F.

Exception: Staples may be used to resist or transfer seismic forces when the allowable shear values are substantiated by cyclic testing and approved by the Building Official.

...

SECTION 45. Table 2304.10.2 is hereby amended to read as follows:

TABLE 2304.10.2
FASTENING SCHEDULE^h

...

h. Staples shall not be used to resist or transfer seismic forces in structures assigned to Seismic Design Category D, E, or F.

SECTION 46. Section 2304.10.3.1 is hereby added to read as follows:

2304.10.3.1 Quality of nails.

In Seismic Design Category D, E, or F, mechanically-driven nails used in wood structural panel shear walls shall meet the same dimensions as that required for hand-driven nails, including diameter, minimum length, and minimum head diameter. Clipped head or box nails are not permitted in new construction. The allowable design value for clipped head nails in existing construction may be taken at no more than the nail-head-area ratio of that of the same size hand-driven nails.

SECTION 47. Section 2304.12.2.8 is hereby amended to read as follows:

2304.12.2.8 Wood used in retaining walls and cribs.

Wood installed in retaining or crib walls shall be preservative treated in accordance with AWPA U1 for soil and fresh water use. Wood shall not be used in retaining or crib walls for structures assigned to Seismic Design Category D, E, or F.

SECTION 48. Section 2305.4 is hereby added to read as follows:

2305.4 Hold-down connectors.

In Seismic Design Category D, E, or F, hold-down connectors shall be designed to resist shear wall overturning moments using 75 percent of the allowable seismic load values. Such values shall be established in a valid research report from approved sources or by accepted engineering practice and the provisions of this Code.

Exception: Values established by specialized cyclic and dynamic testing may be used when approved by the Building Official in accordance with Section 104.2.8.

Connector bolts into wood framing shall require steel plate washers on the post

on the opposite side of the anchorage device. Plate size shall be a minimum of 0.229 inches by 3 inches by 3 inches (5.82 mm by 76 mm by 76 mm) in size. Hold-down connectors shall be tightened to finger tight plus one-half (1/2) wrench turn just prior to covering the wall framing.

SECTION 49. Section 2306.2 is hereby amended to read as follows:

2306.2 Wood-frame diaphragms.

Wood-frame diaphragms shall be designed and constructed in accordance with AWC SDPWS. Where panels are fastened to framing members with staples, requirements and limitations of AWC SDPWS shall be met and the allowable shear values set forth in Table 2306.2(1) or 2306.2(2) shall only be permitted for structures assigned to Seismic Design Category A, B, or C.

Exception: Allowable shear values where panels are fastened to framing members with staples may be used if such values are substantiated by cyclic testing and approved by the Building Official.

The allowable shear values in Tables 2306.2(1) and 2306.2(2) are permitted to be increased 40 percent for wind design.

Wood structural panel diaphragms used to resist seismic forces in structures assigned to Seismic Design Category D, E or F shall be applied directly to the framing members.

Exception: Wood structural panel diaphragms are permitted to be fastened over solid lumber planking or laminated decking, provided the panel joints and lumber planking or laminated decking joints do not coincide.

SECTION 50. Section 2306.3 is hereby amended to read as follows:

2306.3 Wood-frame shear walls.

Wood-frame shear walls shall be designed and constructed in accordance with AWC SDPWS. For structures assigned to Seismic Design Category D, E, or F, application of Tables 4.3A and 4.3B of AWC SDPWS shall include the following:

1. Wood structural panel thickness for shear walls shall not be less than 3/8 inch thick and studs shall not be spaced at more than 16 inches on center.
2. The maximum nominal unit shear capacities for 3/8 inch wood structural panels resisting seismic forces in structures assigned to Seismic Design Category D, E, or F is 400 pounds per linear foot (plf).

Exception: Other nominal unit shear capacities may be permitted if such values are substantiated by cyclic testing and approved by the Building Official.

3. Nails shall be placed not less than 1/2 inch from the panel edges and not less than 3/8 inch from the edge of the connecting members for shear greater than 350 plf using ASD or 500 plf using LRFD. Nails shall be placed not less than 3/8 inch from panel edges and not less than 1/4 inch from the edge of the connecting members for shears of 350 plf or less using ASD or 500 plf or less using LRFD.

For structures assigned to Seismic Design Category D, E or F, application of Table 4.3B of ANSI/AWC SDPWS shall not be allowed.

For structures assigned to Seismic Design Category D, E, or F, application of Table 4.3C of ANSI/AWC SDPWS shall not be used below the top level in a multi-level building.

Where panels are fastened to framing members with staples, requirements and limitations of AWC SDPWS shall be met and the allowable shear values set forth in Table 2306.3(1), 2306.3(2) or 2306.3(3) shall only be permitted for structures assigned to Seismic Design Category A, B, or C.

Exception: Allowable shear values where panels are fastened to framing members with staples may be used if such values are substantiated by cyclic testing and approved by the Building Official.

The allowable shear values in Tables 2306.3(1) and 2306.3(2) are permitted to be increased 40 percent for wind design. Panels complying with ANSI/APA PRP-210 shall be permitted to use design values for Plywood Siding in the AWC SDPWS.

Wood structural panel shear walls used to resist seismic forces in structures assigned to Seismic Design Category D, E, or F shall be applied directly to the framing members.

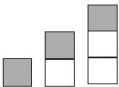

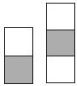

SECTION 51. Section 2307.2 is hereby added to read as follows:

2307.2 Wood-frame panel shear walls.

Wood-frame shear walls shall be designed and constructed in accordance with Section 2306.3 as applicable.

SECTION 52. Table 2308.6.1 is hereby amended to read as follows:

TABLE 2308.6.1^a
WALL BRACING REQUIREMENTS

SEISMIC DESIGN CATEGORY	STORY CONDITION (SEE SECTION 2308.2)	MAXIMUM SPACING OF BRACED WALL LINES	BRACED PANEL LOCATION, SPACING (O.C.) AND MINIMUM PERCENTAGE (X)			MAXIMUM DISTANCE OF BRACED WALL PANELS FROM EACH END OF BRACED WALL LINE
			Bracing method ^b			
			LIB	DWB, WSP	SFB, PBS, PCP, HPS, GB ^{c,d}	
A and B		35'- 0"	Each end and ≤ 25'- 0" o.c.	Each end and ≤ 25'- 0" o.c.	Each end and ≤ 25'- 0" o.c.	12'- 6"

		35'- 0"	NP	Each end and ≤ 25'- 0" o.c.	Each end and ≤ 25'- 0" o.c.	12'- 6"
C		35'- 0"	NP	Each end and ≤ 25'- 0" o.c.	Each end and ≤ 25'- 0" o.c.	12'- 6"
		35'- 0"	NP	Each end and ≤ 25'- 0" o.c. (minimum 25% of wall length) ^e	Each end and ≤ 25'- 0" o.c. (minimum 25% of wall length) ^e	12'- 6"
D and E <u>f, g, h</u>		25'- 0"	NP	$S_{DS} < 0.50$: Each end and ≤ 25'- 0" o.c. (minimum 21% of wall length) ^e	$S_{DS} < 0.50$: Each end and ≤ 25'- 0" o.c. (minimum 43% of wall length) ^e	8'- 0"
				$0.5 \leq S_{DS} < 0.75$: Each end and ≤ 25'- 0" o.c. (minimum 32% of wall length) ^e	$0.5 \leq S_{DS} < 0.75$: Each end and ≤ 25'- 0" o.c. (minimum 59% of wall length) ^e	
				$0.75 \leq S_{DS} \leq 1.00$: Each end and ≤ 25'- 0" o.c. (minimum 37% of wall length) ^e	$0.75 \leq S_{DS} \leq 1.00$: Each end and ≤ 25'- 0" o.c. (minimum 75% of wall length)	
				$S_{DS} > 1.00$: Each end and ≤ 25'- 0" o.c. (minimum 48% of wall length) ^e	$S_{DS} > 1.00$: Each end and ≤ 25'- 0" o.c. (minimum 100% of wall length) ^e	

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm.

NP = Not Permitted.

a. This table specifies minimum requirements for braced wall panels along interior or exterior braced wall lines.

b. See Section 2308.6.3 for full description of bracing methods.

c. For Method GB, gypsum wallboard applied to framing supports that are spaced at 16 inches on center.

d. The required lengths shall be doubled for gypsum board applied to only one face of a braced wall panel.

e. Percentage shown represents the minimum amount of bracing required along the building length (or wall length if the structure has an irregular shape).

f. DWB, SFB, PBS, and HPS wall braces are not permitted in Seismic Design Categories D or E.

g. Minimum length of panel bracing of one face of the wall for WSP sheathing shall be at least 4'-0" long or both faces of the wall for GB or PCP sheathing shall be at least 8'-0" long; h/w ratio shall not exceed 2:1. Wall framing to which sheathing used for bracing is applied shall be nominal 2 inch wide (actual 1 1/2 inch (38 mm) or larger members and spaced a maximum of 16 inches on center. Braced wall panel construction types shall not be mixed within a braced wall line.

h. WSP sheathing shall be a minimum of 15/32" thick nailed with 8d common placed 3/8 inches from panel edges and spaced not more than 6 inches on center and 12 inches on center along intermediate framing members.

SECTION 53. Section 2308.6.5.1 is hereby amended to read as follows:

2308.6.5.1 Alternate braced wall (ABW).

An ABW shall be constructed in accordance with this section and Figure

2308.6.5.1. In one-story buildings, each panel shall have a length of not less than 2 feet 8 inches (813 mm) and a height of not more than 10 feet (3048 mm). Each panel shall be sheathed on one face with 3/8-inch (3.2 mm) minimum-thickness wood structural panel sheathing nailed with 8d common or galvanized box nails in accordance with Table 2304.10.1 and blocked at wood structural panel edges. For structures assigned to Seismic Design Category D or E, each panel shall be sheathed on one face with 15/32-inch minimum-thickness (11.9 mm) wood structural panel sheathing nailed with 8d common nails spaced 3 inches on panel edges, 3 inches at intermediate supports.

Two anchor bolts installed in accordance with Section 2308.3.1 shall be provided in each panel. Anchor bolts shall be placed at each panel outside quarter points. Each panel end stud shall have a hold-down device fastened to the foundation, capable of providing an approved uplift capacity of not less than 1,800 pounds (8006 N). The hold-down device shall be installed in accordance with the manufacturer's recommendations.

The ABW shall be supported directly on a foundation or on floor framing supported directly on a foundation that is continuous across the entire length of the braced wall line. This foundation shall be reinforced with not less than one No. 4 bar top and bottom. Where the continuous foundation is required to have a depth greater than 12 inches (305 mm), a minimum 12-inch by 12-inch (305 mm by 305 mm) continuous footing ~~or turned-down slab edge~~ is permitted at door openings in the braced wall line.

This continuous footing ~~or turned-down slab~~ edge shall be reinforced with not less than one No. 4 bar top and bottom. This reinforcement shall be lapped ~~45~~24 inches (~~384~~610 mm) with the reinforcement required in the continuous foundation located directly under the braced wall line.

...

SECTION 54. Figure 2308.6.5.1 is hereby amended to read as follows:

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm.

a. For structures assigned to Seismic Design Category D or E, sheathed on one face with 15/32-inch-minimum-thickness (11.9 mm) wood structural panel sheathing.

**FIGURE 2308.6.5.1
ALTERNATE BRACED WALL PANEL (ABW)**

SECTION 55. Section 2308.6.5.2 is hereby amended to read as follows:

2308.6.5.2 Portal frame with hold-downs (PFH).

A PFH shall be constructed in accordance with this section and Figure 2308.6.5.2. The adjacent door or window opening shall have a full-length header.

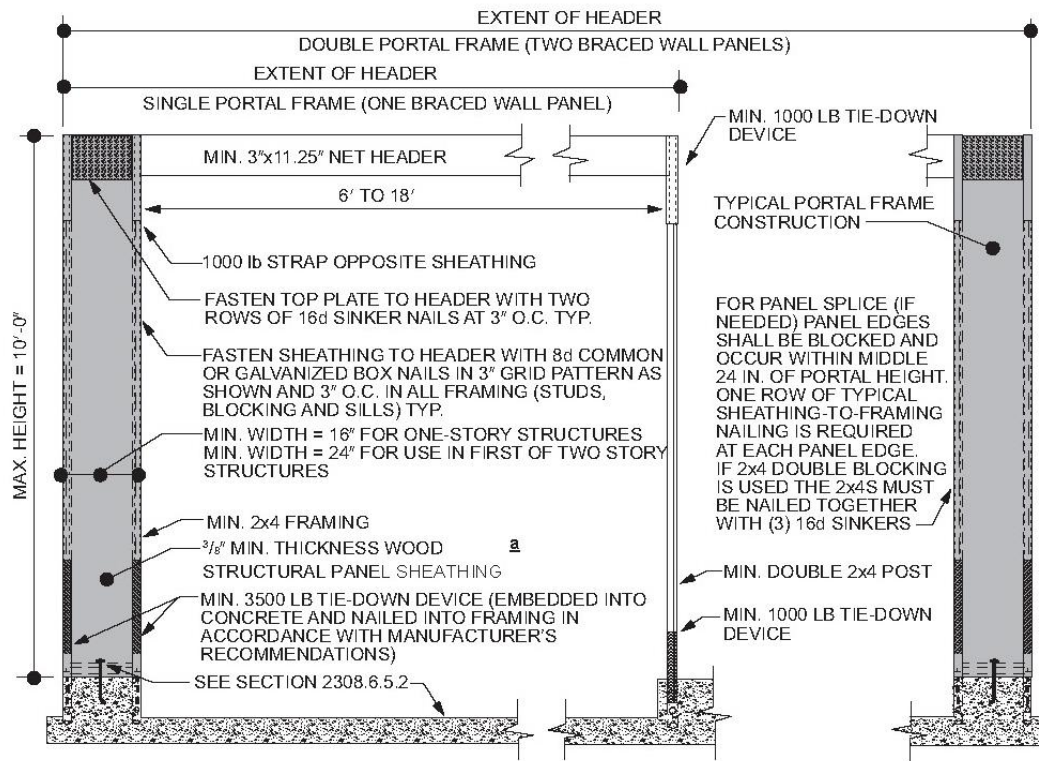

In one-story buildings, each panel shall have a length of not less than 16 inches (406 mm) and a height of not more than 10 feet (3048 mm). Each panel shall be sheathed on one face with a single layer of 3/8-inch (9.5 mm) minimum-thickness wood

structural panel sheathing nailed with 8d common or galvanized box nails in accordance with Figure 2308.6.5.2. For structures assigned to Seismic Design Category D or E, each panel shall be sheathed on one face with 15/32-inch minimum-thickness (11.9 mm) wood structural panel sheathing nailed with 8d common nails spaced 3 inches on panel edges, 3 inches at intermediate supports and in accordance with Figure 2308.6.5.2. The wood structural panel sheathing shall extend up over the solid sawn or glued-laminated header and shall be nailed in accordance with Figure 2308.6.5.2. A built-up header consisting of at least two 2-inch by 12-inch (51 mm by 305 mm) boards, fastened in accordance with Item 24 of Table 2304.10.1 shall be permitted to be used. A spacer, if used, shall be placed on the side of the built-up beam opposite the wood structural panel sheathing. The header shall extend between the inside faces of the first full-length outer studs of each panel. The clear span of the header between the inner studs of each panel shall be not less than 6 feet (1829 mm) and not more than 18 feet (5486 mm) in length. A strap with an uplift capacity of not less than 1,000 pounds (4,400 N) shall fasten the header to the inner studs opposite the sheathing. One anchor bolt not less than 5/8 inch (15.9 mm) diameter and installed in accordance with Section 2308.3.1 shall be provided in the center of each sill plate. The studs at each end of the panel shall have a hold-down device fastened to the foundation with an uplift capacity of not less than 3,500 pounds (15 570 N).

Where a panel is located on one side of the opening, the header shall extend between the inside face of the first full-length stud of the panel and the bearing studs at the other end of the opening. A strap with an uplift capacity of not less than

1,000 pounds (4400 N) shall fasten the header to the bearing studs. The bearing studs shall also have a hold-down device fastened to the foundation with an uplift capacity of not less than 1,000 pounds (4400 N). The hold-down devices shall be an embedded strap type, installed in accordance with the manufacturer's recommendations. The PFH panels shall be supported directly on a foundation that is continuous across the entire length of the braced wall line. This foundation shall be reinforced with not less than one No. 4 bar top and bottom. Where the continuous foundation is required to have a depth greater than 12 inches (305 mm), a minimum 12-inch by 12-inch (305 mm by 305 mm) continuous footing or turned-down slab edge is permitted at door openings in the braced wall line. This continuous footing or turned-down slab edge shall be reinforced with not less than one No. 4 bar top and bottom. This reinforcement shall be lapped not less than ~~45~~24 inches (~~381~~610 mm) with the reinforcement required in the continuous foundation located directly under the braced wall line.

...
SECTION 56. Figure 2308.6.5.2 is hereby amended to read as follows:

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm, 1 pound = 4.448 N.

a. For structures assigned to Seismic Design Category D or E, sheathed on one face with 15/32-inch-minimum-thickness (11.9 mm) wood structural panel sheathing.

**FIGURE 2308.6.5.2
PORTAL FRAME WITH HOLD-DOWNS (PFH)**

SECTION 57. Section 2308.6.8.1 is hereby amended to read as follows:

2308.6.8.1 Foundation requirements.

...

Exception: For structures with a maximum plan dimension not more than 50 feet (15 240 mm), continuous foundations are required at exterior walls only for structures assigned to Seismic Design Category A, B, or C.

For structures in Seismic Design Categories D and E, exterior braced wall panels shall be in the same plane vertically with the foundation or the portion of the structure

containing the offset shall be designed in accordance with accepted engineering practice and Section 2308.1.1.

Exceptions:

~~1. Exterior braced wall panels shall be permitted to be located not more than 4 feet (1219 mm) from the foundation below where supported by a floor constructed in accordance with all of the following:~~

~~1.1. Cantilevers or setbacks shall not exceed four times the nominal depth of the floor joists.~~

~~1.2. Floor joists shall be 2 inches by 10 inches (51 mm by 254 mm) or larger and spaced not more than 16 inches (406 mm) on center.~~

~~1.3. The ratio of the back span to the cantilever shall be not less than 2 to 1.~~

~~1.4. Floor joists at ends of braced wall panels shall be doubled.~~

~~1.5. A continuous rim joist shall be connected to the ends of cantilevered joists. The rim joist is permitted to be spliced using a metal tie not less than 0.058 inch (1.47 mm) (16 galvanized gage) and 1 1/2 inches (38 mm) in width fastened with six 16d common nails on each side. The metal tie shall have a yield stress not less than 33,000 psi (227 MPa).~~

~~1.6. Joists at setbacks or the end of cantilevered joists shall not carry gravity loads from more than a single story having uniform wall and roof loads nor carry the reactions from headers having a span of 8 feet (2438 mm) or more.~~

~~2. The end of a required braced wall panel shall be allowed to extend not~~

~~more than 1 foot (305 mm) over an opening in the wall below. This requirement is applicable to braced wall panels offset in plane and braced wall panels offset out of plane as permitted by Exception 1. Braced wall panels are permitted to extend over an opening not more than 8 feet (2438 mm) in width where the header is a 4-inch by 12-inch (102 mm by 305 mm) or larger member.~~

SECTION 58. Section 2308.6.9 is hereby amended to read as follows:

2308.6.9 Attachment of sheathing.

Fastening of braced wall panel sheathing shall not be less than that prescribed in Tables 2308.6.1 or 2304.10.2. Wall sheathing shall not be attached to framing members by adhesives. Staple fasteners in Table 2304.10.2 shall not be used to resist or transfer seismic forces in structures assigned to Seismic Design Category D, E, or F.

Exception: Staples may be used to resist or transfer seismic forces when the allowable shear values are substantiated by cyclic testing and approved by the Building Official.

All braced wall panels shall extend to the roof sheathing and shall be attached to parallel roof rafters or blocking above with framing clips (18 gauge minimum) spaced at maximum 24 inches (6096 mm) on center with four 8d nails per leg (total eight 8d nails per clip). Braced wall panels shall be laterally braced at each top corner and at maximum 24 inch (6096 mm) intervals along the top plate of discontinuous vertical framing.

SECTION 59. Section 3115 is hereby amended to read as follows:

SECTION 3115 INTERMODAL SHIPPING CONTAINERS

3115.1 General.

...

Exceptions:

...

6. Single-unit stand-alone intermodal shipping containers used as temporary storage or construction trailer on active construction sites. Construction support facilities for uses and activities not directly associated with the actual processes of construction, including but not limited to, offices, meeting rooms, plan rooms, other administrative or support functions shall not be exempt from Section 3115.

...

3115.8.1 Foundations and supports.

Intermodal shipping containers repurposed for use as a permanent building or structure shall be supported on foundations or other supporting structures designed and constructed in accordance with Chapters 16 through 23.

...

3115.8.1.2 Stacking.

Intermodal shipping containers used to support stacked units shall comply with Section 3115.8.4.

3115.8.2 Welds.

~~New welds and connections shall be equal to or greater than the original connections.~~ The strength of new welds and connections shall be no less than the strength provided by the original connections. All new welds and connections shall be

designed and constructed in accordance with Chapters 16, 17 and 22.

...

3115.8.4 Detailed structural design procedure.

A structural analysis meeting the requirements of this Section shall be provided to the Building Official to demonstrate the structural adequacy of the intermodal shipping containers.

Exception: Structures using an ~~intermodal shipping containers~~ designed in accordance with Section 3115.8.5.

3115.8.4.1 Material properties.

Structural material properties for existing intermodal shipping container steel components shall be established by ~~material testing where the steel grade and composition cannot be identified by the manufacturer's designation as to manufacture and mill test~~ Section 2202.

3115.8.4.2 Seismic design parameters.

The seismic force-resisting system shall be designed and detailed in accordance with ASCE 7 and one of the following:

1. Where all or portions of the ~~corrugated steel container sides~~ profiled steel panel elements are considered to be the seismic force-resisting system, design and detailing shall be in accordance with ~~the~~ AISI S100 and ASCE 7, Table 12.2-1 requirements for ~~light frame bearing wall systems with shear panels of all other materials~~ steel systems not specifically detailed for seismic resistance, excluding cantilevered column systems.

2. Where all or portions of the ~~corrugated steel container sides~~ profiled steel panel elements are retained, but are not considered to be part of the seismic force-resisting system, an independent seismic force-resisting system shall be selected, designed and detailed in accordance with ASCE 7, Table 12.2-1.

3. Where all or portions of the ~~corrugated steel container sides~~ profiled steel panel elements are retained and integrated into a seismic force-resisting system other than as permitted by Section 3115.8.4.2 Item 1, seismic design parameters shall be developed from testing and analysis in accordance with Section 104.11 and ASCE 7, Section 12.2.1.1 or 12.2.1.2.

3115.8.4.3 Allowable shear value.

The allowable shear values for the ~~intermodal shipping container corrugated~~ profiled steel sheet panel side walls and end walls shall be ~~demonstrated by testing and analysis accordance with Section 104.11~~ determined in accordance with the design approach selected in Section 3115.8.4.2. Where penetrations are made in the side walls or end walls designated as part of the lateral force-resisting system, the penetrations shall be substantiated by rational analysis.

...

3115.8.5.2 Simplified structural design assumptions.

Where permitted by Section 3115.8.5.1, single-unit, stand-alone intermodal shipping containers shall be designed using the following assumptions for the ~~corrugated steel shear walls~~ profiled steel panel side walls and end walls:

1. The appropriate detailing requirements contained in Chapters 16 through

23.

2. Response modification coefficient, $R = 2$,
3. Over strength factor, $\Omega_0 = 2.5$,
4. Deflection amplification factor, $C_d = 2$, and
5. Limits on structural height, $h_n = 9.5$ feet (2900 mm).

3115.8.5.3 Allowable shear value.

The allowable shear for the ~~corrugated~~profiled steel panel side walls (longitudinal) and end walls (transverse) for wind design and seismic design using the coefficients of Section 3115.8.5.2 shall be in accordance with Table 3115.8.5.3, provided that all of the following conditions are met:

1. The total linear length of all openings in any individual side walls or end walls shall be limited to not more than 50 percent of the length of that side wall(s) or end wall(s), as shown in Figure 3115.8.5.3(1).
2. Any full height wall length, or portion thereof, less than 4 feet (305 mm) shall not be considered as a portion of the lateral force-resisting system, as shown in Figure 3115.8.5.3(2).
3. All side walls or end walls used as part of the lateral force-resisting system shall have an existing or new boundary element on all sides to form a continuous load path, or paths, with adequate strength and stiffness to transfer all forces from the point of application to the final point of resistance, as shown in Figure 3115.8.5.3(3). The existing door interlocking mechanism shall not be considered as a component of the required load path.

4. Where openings are made in container walls, floors or roofs, for doors, windows and other openings:

4.1 The opening shall be framed with steel elements that are designed in accordance with Chapters 16 and 22.

4.2 The cross section and material grade of any new steel element shall be equal to or greater than the steel element removed.

5. A maximum of one penetration not greater than 6-inches (152 mm) in diameter for conduits, pipes, tubes or vents, or not greater than 16 square inches (10 323 mm²) for electrical boxes, is permitted for each individual 8-foot (2438 mm) length of lateral force-resisting wall. Penetrations located in walls that are not part of the lateral force-resisting system shall not be limited in size or quantity. Existing intermodal shipping container vents shall not be considered a penetration, as shown in Figure 3115.8.5.3(4).

6. End wall door or doors designated as part of the lateral force-resisting system shall be intermittently welded closed around the full perimeters of the door panels.

SECTION 60. Table 3115.8.5.3 is hereby amended to read as follows:

TABLE 3115.8.5.3
ALLOWABLE SHEAR VALUES FOR INTERMODAL SHIPPING CONTAINER CORRUGATED STEEL
PROFIED STEEL PANEL SIDE WALLS AND END WALLS FOR WIND OR SEISMIC LOADING

...

- a. The allowable ~~strength~~ shear values for the side walls and end walls of the intermodal shipping containers are derived from ISO 1496-1 and reduced by a factor of safety of 5.
- b. Container designation type is derived from ISO 668.
- c. Limitations of Sections 3115.8.5.1 and 3115.8.5.3 shall apply.

SECTION 61. Section H103.1 is hereby amended to read as follows:

H103.1 Location restrictions.

Signs shall not be erected, constructed, or maintained so as to obstruct any fire escape or any window or door or opening used as part of a means of egress or as part of the accessible route, except as permitted by Chapters 10, 11A, and 11B, or so as to prevent free passage from one part of a roof to any other part thereof. A sign shall not be attached in any form, shape or manner to a fire escape, nor be placed in such manner as to interfere with any opening required for ventilation.

SECTION 62. Section H103.2 is hereby added as follows:

H103.2 Projections and clearances.

Signs extending beyond the exterior wall of the building shall comply with Section 705.2 and the following requirements.

Signs may project over a public street, public sidewalk or building line in accordance with Section 3202 and a distance as determined by the clearance of the bottoms thereof above the level of the sidewalk or grade immediately below, whichever is more restrictive, as follows:

Clearance less than 8 feet (2438 mm) shall be prohibited.

Clearance 8 feet (2438 mm) and above, a 1 foot (305 mm) projection is permitted; and for each additional 2-foot clearance (610 mm), an additional 1-foot (305 mm) projection is permitted.

No structure shall have a projection of more than 5 feet (1524 mm). A projecting sign built above and in connection with a marquee may have such a projection of 5 feet

(1524 mm) without clearance between sign and marquee. No structure shall project beyond the curb line, regardless of clearance above grade.

Signs projecting more than 6 inches (152 mm) from the face of building over private property used or intended to be used by the general public shall have a minimum clearance of 8 feet (2438 mm) above said sidewalk or grade.

No sign shall project into any alley whatsoever below a height of 14 feet (4267 mm) above grade, and no sign shall project into any alley by more than 6 inches (152 mm) when its height is 14 feet (4267 mm) or more above grade.

SECTION 63. Section H104.1 is hereby amended to read as follows:

H104.1 Identification.

Every ~~outdoor advertising display sign~~ other than wall signs hereafter erected, constructed or maintained, for which a permit is required, shall be plainly marked with the name of the person, firm or corporation erecting and maintaining such sign, and the weight of the sign, and shall have affixed on the front thereof the permit number issued for said sign or other method of identification approved by the ~~b~~Building ~~e~~Official.

SECTION 64. Section H105.1 is hereby amended to read as follows:

H105.1 General requirements.

Signs shall be designed and constructed to comply with the provisions of this ~~e~~Code for use of materials, loads and stresses. Glass panels used in signs shall comply with the requirements of Chapter 24.

SECTION 65. Section H106.1 is hereby amended to read as follows:

H106.1 Illumination.

A sign shall not be illuminated by other than electrical means, and electrical devices and wiring shall be installed in accordance with the requirements of the California Electrical Code - Title 27 of the Los Angeles County Code, and a separate electrical permit shall be obtained. Any open spark or flame shall not be used for display purposes unless specifically approved.

SECTION 66. Section H106.2 is hereby amended to read as follows:

H106.2 Electrical service.

Signs that require electrical service shall comply with ~~NEPA 70~~ the Electrical Code - Title 27 of the Los Angeles County Code.

SECTION 67. Section H110.1 is hereby amended to read as follows:

H110.1 General.

Roof signs shall be constructed entirely of metal or other approved noncombustible material except as provided for in Sections H106.1.1 and H107.1. Provisions shall be made for electric grounding of metallic parts. Where combustible materials are permitted in letters or other ornamental features, wiring and tubing shall be kept free and insulated therefrom. Roof signs shall be so constructed as to leave a clear space of not less than 6 feet (1829 mm) between the roof level and the lowest part of the sign and shall have not less than 5 feet (1524 mm) clearance between the vertical supports thereof. Roof sign structures shall not project beyond an exterior wall.

Exception: Signs on flat roofs with every part of the roof accessible shall not be required to provide clear space between the roof level and the lowest part of the sign.

Blocks, angles, or supports fastened to the roof shall be located as not to

interfere with the drainage of the roof and, where necessary, flashing or counter flashing shall be placed.

SECTION 68. Section H116 is hereby deleted in its entirety:

SECTION H116 ————— REFERENCED STANDARDS

H.116.1 ————— General. —

~~See Table H115.1 for standards that are referenced in various sections of this appendix. Standards are listed by the standard definition with the effective date, standard title, and the section or sections of this appendix that reference the standard.~~

TABLE 116.1

REFERENCED STANDARDS

ASTM D635-14	Test Method for Rate of Burning and/or Extent and Time of Burning of Plastics in a Horizontal Position	H107.1.1
NFPA 70-20	California Electrical Code	H106.1, H106.2
NFPA 701-19	Methods of Fire Test for Flame Propagation of Textiles and Films	H106.1.1

SECTION 69. Section J101 is hereby amended to read as follows:

J101 GENERAL

J101.1 Scope.

The provisions of this ~~chapter~~Appendix apply to grading, excavation, and earthwork construction, including fills and embankments, and the control of runoff from

graded sites, including erosion sediments and construction-related pollutants. Where
conflicts occur between the technical requirements of this chapter and the geotechnical
report, the geotechnical report shall govern. The purpose of this Appendix is to
safeguard life, limb, property, and the public welfare by regulating grading on property
subject to this Code.

J101.2 Flood hazard areas.

Unless the applicant has submitted an engineering analysis a hydrology and
hydraulic analysis, prepared in accordance with standard engineering practice by a
registered design professional California licensed civil engineer, that demonstrates the
proposed work will not result in any increase in the level of the base flood, grading,
excavation and earthwork construction, including fills and embankments, shall not be
permitted in floodways designated in Chapter 11.60 of Title 11 – Health and Safety – of
the Los Angeles County Code, or in floodways that are in flood hazard areas
established in Section 1612.3, or in flood hazard areas where design flood elevations
are specified but floodways have not been designated.

J101.3 General hazards.

Whenever the Building Official determines that any existing excavation,
embankment, or fill on property subject to this Code has become a hazard to life and
limb, or endangers property, or adversely affects the safety, use, or stability of a public
way or drainage channel, the Building Official may give written notice thereof to the
owner of the property upon which the excavation, embankment, or fill is located, or
other person or agent in control of said property. Upon receipt of said notice, the owner

or other person or agent in control of the property shall repair, eliminate, or secure such excavation, embankment, or fill so as to eliminate the hazard, in conformance with the requirements of this Code, within the period specified in said notice.

J101.4 Safety precautions.

If at any stage of the work the Building Official determines by inspection that unpermitted grading or grading work pursuant to a grading permit is likely to endanger any public or private property, or result in the deposition of debris on any public way, or interfere with any existing drainage course, the Building Official may order the work stopped by notice in writing served on any persons engaged in doing or causing such work to be done, and any such person shall immediately stop such work. The Building Official may authorize the work to proceed if the Building Official finds that adequate safety precautions can be taken or corrective measures incorporated in the work to avoid likelihood of such danger, deposition, or interference.

If the grading work as done was performed without a grading permit or has created or resulted in a hazardous condition, the Building Official shall give written notice requiring correction thereof as specified in Section J103 and Section J101 of this Code.

J101.5 Protection of utilities.

Both the permittee and the owner of the property on which the grading is performed shall be responsible for the prevention of damage to any public and/or private utilities or services.

J101.6 Protection of adjacent property.

Both the permittee and owner of the property on which the grading is performed shall be responsible for the prevention of damage to adjacent property. No person shall excavate on land sufficiently close to the property line to endanger any adjoining public street, sidewalk, alley, or other public or private property without taking adequate measures to support and protect such property from settling, cracking, or other damage that might result from the proposed work. Any person performing any grading that involves imported or exported materials shall take special precautions, as approved by the Building Official, to prevent such materials from being deposited on adjacent properties, any public way, and/or any drainage course.

J101.7 Storm water control measures.

Both the permittee and the owner of the property on which the grading is performed shall put into effect and maintain all precautionary measures necessary to protect adjacent water courses and public or private property from damage by erosion, flooding, and deposition of mud, debris, and construction-related pollutants originating from the site during grading and related construction activities.

J101.8 Maintenance of protective devices and rodent control.

All drainage structures and other protective devices and all burrowing rodent control measures, as shown on the grading plans approved by the Building Official, shall be maintained in a good condition and, when necessary, promptly repaired by the permittee or the owner of the property on which grading has been performed or by any other person or agent in control of such property.

J101.9 Correlation with other sections.

The provisions of this Appendix are independent of the provisions of Chapter 99 of this Code relating to building and property rehabilitation. This Section may be applied even though the same facts have been used to determine that there is substandard property subject to the provisions of Chapter 99.

J101.10 **Conditions of approval.**

In granting any permit under this Code, the Building Official may include such conditions as may be reasonably necessary to prevent creation of a nuisance or hazard to public or private property. Such conditions may include, but shall not be limited to:

1. Improvement of any existing grading to comply with the standards of this Code.
2. Requirements for securing of excavations or fills that would otherwise be hazardous.
3. Requirements for temporary excavations and shoring that are to be implemented on site and shown on the plans.
4. Requirements for mitigating, stabilizing, or eliminating unpermitted grading conducted on site.

SECTION 70. Section J102.1 is hereby amended to read as follows:

J102.1 **Definitions.**

The following words and terms shall, for the purposes of this appendix, have the meanings shown herein. Refer to Chapter 2 of this code for general definitions. For the purposes of this Appendix, the terms, phrases, and words listed in this Section and their derivatives shall have the indicated meanings.

APPROVAL. When the proposed work or completed work conforms to this Appendix, as determined by and to the satisfaction of the Building Official.

AS-BUILT. See Section J105.12.

BEDROCK. The relatively solid, undisturbed rock in place either at the ground surface or beneath superficial deposits of alluvium, colluvium, and/or soil.

BENCH. A relatively level step excavated into earth material on which fill is to be placed.

BEST MANAGEMENT PRACTICE (BMP). Practices, prohibitions of practices, or other activities to reduce or eliminate the discharge of pollutants to surface waters. BMPs include structural and nonstructural controls, management practices, operation and maintenance procedures, and system, design, and engineering methods that are required to be employed in order to comply with the requirements of the National Pollution Discharge Elimination System (NPDES) permit issued to the County of Los Angeles (see Section 106.4.3 and Title 31 – Green Building Standards Code – of the Los Angeles County Code).

BORROW. Earth material acquired from an off-site location for use in grading on a site.

CIVIL ENGINEER. A professional engineer licensed in the State of California to practice in the field of civil works.

CIVIL ENGINEERING. The application of the knowledge of the forces of nature, principles of mechanics, and the properties of materials to the evaluation, design, and construction of civil works.

COMPACTION. The densification of a fill by mechanical means.

CUT. See "Excavation."

DESILTING BASINS. Physical structures, constructed for the removal of sediments from surface water runoff.

DESIGN ENGINEER. The Civil Engineer responsible for the preparation of the grading plans for the site grading work.

DOWN DRAIN. A device for collecting water from a swale or ditch located on or above a slope, and safely delivering it to an approved drainage facility.

EARTH MATERIAL. Any rock, natural soil, or fill, or any combination thereof.

ENGINEERING GEOLOGIST. A geologist experienced and knowledgeable in engineering geology, holding a license as a geologist in the specialty of engineering geology issued by the State of California under the applicable provisions of the Geologist and Geophysicist Act of the Business and Professions Code.

ENGINEERING GEOLOGY. The application of geologic knowledge and principles in the investigation and evaluation of naturally occurring rock and soil for use in the design of civil works.

EROSION. The wearing away of the ground surface as a result of the movement of wind, water, or ice.

EXCAVATION. The removal of earth material by artificial means, also referred to as a cut.

FIELD ENGINEER. The Civil Engineer responsible for performing the functions as set forth in Section J105.3.

FILL. Deposition of earth materials by artificial means.

GEOTECHNICAL ENGINEER. See "Soils Engineer".

GEOTECHNICAL HAZARD. An adverse condition due to landslide, settlement, and/or slippage. These hazards include, but are not limited to, loose debris, slopewash, and mud flows from natural or graded slopes.

GRADE. The vertical location of the ground surface.

GRADE, EXISTING. The grade prior to grading.

GRADE, FINAL. See Section J105.7.

GRADE, FINISHED. The grade of the site at the conclusion of all grading efforts.

GRADE, INITIAL. See Section J105.7.

GRADE, ROUGH. See Section J105.7.

GRADING. An excavation or fill or combination thereof.

KEY. A compacted fill placed in a trench excavated in earth material beneath the toe of a slope.

LANDSCAPE ARCHITECT. A person who holds a certificate to practice landscape architecture in the State of California under the applicable landscape architecture provisions of Division 3, Chapter 3.5, of the Business and Professions Code.

LINE. The horizontal location of the ground surface.

PERMITTEE. See Section J105.6.

PRIVATE SEWAGE DISPOSAL SYSTEM. A septic tank with effluent discharging into a subsurface disposal field, into one or more seepage pits, or into a

combination of a subsurface disposal field and a seepage pit or of such other facilities as may be permitted in accordance with the procedures and requirements set forth in Title 28 – Plumbing Code – of the Los Angeles County Code and as required by the Los Angeles County Department of Public Health.

PROJECT CONSULTANTS. The professional consultants required by this Code, which may consist of the Design Engineer, Field Engineer, Soils Engineer, Engineering Geologist, and Landscape Architect as applicable to this Appendix.

PROFESSIONAL INSPECTION. The inspection required by this Code to be performed by the Project Consultants. Such inspections shall be sufficient to form an opinion relating to the conduct of the work.

QSD. Qualified SWPPP Developer as defined in the California State Construction General Permit.

QSP. Qualified SWPPP Practitioner as defined in the California State Construction General Permit.

SITE. A lot or parcel of land or contiguous combination thereof, under the same ownership, where grading is performed or permitted.

SLOPE. An inclined surface, the inclination of which is expressed as a ratio of horizontal distance to vertical distance.

SOIL. Naturally occurring superficial deposits overlying parent bedrock.

SOILS ENGINEER (GEOTECHNICAL ENGINEER). A licensed civil engineer experienced and knowledgeable in the practice of soils engineering.

SOILS ENGINEERING (GEOTECHNICAL ENGINEERING). The application of

the principles of soils mechanics in the investigation, evaluation, and design of civil works involving the use of earth materials and the inspection or testing of construction thereof.

STORM DRAIN SYSTEM. A conveyance or system of conveyances, including roads with drainage systems, municipal streets, catch basins, curbs, gutters, ditches, and man-made channels, designed or used for collecting and conveying storm water.

STORM WATER POLLUTION PREVENTION PLAN (SWPPP). A site drawing with details, notes, and related documents that identify the measures proposed by the permittee to: (1) control erosion and prevent sediment and construction-related pollutants from being carried offsite by storm water, and (2) prevent non-storm-water discharges from entering the storm drain system.

SURFACE DRAINAGE. Flows over the ground surface.

SOIL TESTING AGENCY. An agency regularly engaged in the testing of soils and rock under the direction of a Civil Engineer experienced in soil testing.

TERRACE. A relatively level step constructed in the face of a graded slope for drainage and maintenance purposes.

SECTION 71. Section J103 is hereby amended to read as follows:

SECTION J103 PERMITS REQUIRED

J103.1 Permits required.

Except as exempted in Section J103.2, grading shall not be performed without first having obtained a permit ~~therefor~~ from the ~~b~~B~~uilding~~ ~~e~~O~~fficial~~. A grading permit does not include the construction of retaining walls or other structures. A separate

permit shall be obtained for each site and may cover both excavations and fills. Any engineered grading as described in Section J104.2.3 shall be performed by a contractor licensed by the State of California to perform the work described hereon. Regular grading less than 5,000 cubic yards may require a licensed contractor if the Building Official determines that special conditions or hazards exist.

J103.2 Exemptions.

A grading permit shall not be required for the following:

1. When approved by the Building Official, Grading in an isolated, self-contained area, provided that the public is not endangered and that such grading will not adversely affect adjoining properties or public rights of way.

...

7. Exploratory excavations performed under the direction of a registered design professional Geotechnical Engineer or Engineering Geologist. This shall not exempt grading of access roads or pads created for exploratory excavations. Exploratory excavations must not create a hazardous condition to adjacent properties or the public in accordance with Section J101.3. A restoration plan must be provided and approved by the Building Official for all grading of access roads or pads. Restoration shall be completed within 90 days after the completion of soils testing unless otherwise approved by the Building Official.

8. An excavation that does not exceed 50 cubic yards (38.3 m³) and complies with one of the following conditions and as shown in Figure J103.2:

(a) Is less than 2 feet (0.6 m) in depth.

(b) Does not create a cut slope greater than 5 feet (1.5 m) measured vertically upward from the cut surface to the surface of the natural grade and is not steeper than 2 units horizontal to 1 unit vertical (50 percent slope).

9. A fill not intended to support a structure that does not obstruct a drainage course and complies with one of the following conditions and as shown in Figure

J103.2:

(a) Is less than 1 foot (0.3 m) in depth and is placed on natural terrain with a slope flatter than 5 units horizontal to 1 unit vertical (20 percent slope).

(b) Is less than 3 feet (0.9 m) in depth at its deepest point measured vertically upward from natural grade to the surface of the fill, does not exceed 50 cubic yards, and creates a fill slope no steeper than 2 units horizontal to 1 unit vertical (50 percent slope).

(c) Is less than 5 feet (1.5 m) in depth at its deepest point measured vertically upward from natural grade to the surface of the fill, does not exceed 20 cubic yards, and creates a fill slope no steeper than 2 units horizontal to 1 unit vertical (50 percent slope).

Exemption from the permit requirements of this aAppendix shall not be deemed to grant authorization for any work to be done in any manner in violation of the provisions of this eCode or any other laws or ordinances of this jurisdiction.

J103.3 Unpermitted grading.

A person shall not own, use, occupy, or maintain any site containing unpermitted grading. For the purposes of this Code, unpermitted grading shall be defined as either

of the following:

(1) Grading that was performed, at any point in time, without the required permit(s) having first been obtained from the Building Official, pursuant to Section J103.1; or

(2) Grading for which a permit was obtained pursuant to this Section, but which was not completed, pursuant to Section J105, prior to the expiration of the permit, pursuant to Section 106.5.4.

(3) Grading for which a permit was obtained pursuant to this Section, but where grading was performed outside the scope of the permit, pursuant to Section J105.

If the Building Official has determined that unpermitted grading was performed or has created or resulted in a hazardous condition, the Building Official shall give written notice requiring correction thereof as specified in Section 103, and in accordance with J101 of this Code.

The Building Official may require such conditions as may be reasonably necessary to prevent creation of a nuisance or hazard to public or private property. Such conditions may include, but shall not be limited to conditions set forth in Section J101.10.

J103.4 Availability of permit at site.

No person shall perform any grading that requires a permit under this Appendix unless a copy of the grading permit and approved grading plans are in the possession of a responsible person and available at the site for the Building Official's reference.

J103.5 Grading fees.

Fees shall be assessed in accordance with the provisions of this Section. The amount of the fees shall be as specified in Section 107.

1. Plan Review Fees. When a plan or other data are required to be submitted, a plan review fee shall be paid at the time of submitting plans and specifications for review. Separate plan review fees shall apply to retaining walls or major drainage structures as required elsewhere in this Code. For excavation and fill on the same site, the fee shall be based on the volume of excavation or fill, whichever is greater.

2. Permit Fees. A fee for each grading permit shall be paid to the Building Official at the time of issuance of the permit. Separate permits and fees shall apply to retaining walls or major drainage structures as required elsewhere in this Code.

3. Site Inspection Fee. When the Building Official finds that a visual inspection of the site is necessary to establish drainage requirements for the protection of property, existing buildings, or the proposed construction, a site inspection shall be made during plan check of grading plans. A fee for such inspection shall be paid to the Building Official at the time of submitting plans and specifications for review.

J103.6 Compliance with zoning code.

The Building Official may refuse to issue a grading permit for work on a site if either the proposed grading or the proposed land use for the site shown on the grading plan application does not comply with the provisions of Title 22 – Planning and Zoning – of the Los Angeles County Code.

J103.7 Grading security.

J103.7.1 Scope and purpose.

The Building Official may require a permittee or the owner(s) of the property on which the grading is proposed to occur to provide security, as a condition of the issuance of a grading permit for any grading involving more than 1,000 cubic yards (764.6 m³). Where unusual conditions or special hazards exist, the Building Official may require security for grading involving less than 1,000 cubic yards (764.6 m³). The purpose of the security shall be to guarantee the permittee's obligation to mitigate any hazardous conditions, including flood and geotechnical hazards, that may be created if the grading is not completed in accordance with the approved plans and specifications, and to complete any work that the Building Official determines is necessary to bring the property into compliance with this Appendix.

Security required by this Section may include incidental off-site grading on property contiguous with the site to be developed, provided written consent of the owner of such contiguous property is filed with the Building Official.

The Building Official may waive the requirements for security for the following:

1. Grading being done by or for a governmental agency.
2. Grading necessary to remove a geotechnical hazard, where such work is covered by an agreement and security is posted pursuant to the provisions of Title 21 – Subdivisions – of the Los Angeles County Code.
3. Grading on a site, not exceeding a slope of three units horizontal to one unit vertical, provided such grading as determined by the Building Official will not affect drainage from or to adjacent properties.

4. Filling of holes or depressions, provided such grading will not affect the drainage from or to adjacent properties.

J103.7.2 Form of security.

The security referred to in Section J103.7.1 shall be in one of the following forms:

1. A bond furnished by a corporate surety authorized to do business in this state.

2. Cash.

3. Savings and loan certificates or shares deposited and assigned to the County as provided in Chapter 4.36 of Title 4 – Revenue and Finance – of the Los Angeles County Code.

4. An instrument of credit from a financial institution subject to regulation by the state or federal government and pledging that funds in the amount required by the Building Official are on deposit and guaranteed for payment, or a letter of credit is issued by such a financial institution.

J103.7.3 Amount of security.

The amount of security shall be based on the number of cubic yards of material in either excavation or fill, whichever is greater, and the cost of all drainage or other protective devices or work necessary to eliminate potential flooding and geotechnical hazards. That portion of the security valuation based on the volume of material in either excavation or fill shall be computed as follows:

100,000 cubic yards or less – 50 percent of the estimated cost of grading work.

Over 100,000 cubic yards – 50 percent of the cost of the first 100,000 cubic

yards plus 25 percent of the estimated cost of that portion in excess of 100,000 cubic yards.

When the rough grading has been completed in conformance with the requirements of this Code, the Building Official may, at his or her discretion, consent to a proportionate reduction of the security to an amount estimated to be adequate to ensure completion of the grading work, site development, or planting remaining to be performed. The costs referred to in this Section shall be as estimated by the Building Official.

J103.7.4 Conditions.

All security shall include the conditions that the principal shall:

1. Comply with all of the provisions of this Code, applicable laws, and ordinances;
2. Comply with all of the terms and conditions of the grading permit, and
3. Complete all of the work authorized by the permit.

J103.7.5 Term of security.

The term of each security shall begin upon the filing with the Building Official, and the security shall remain in effect until the work authorized by the grading permit is completed and approved by the Building Official.

J103.7.6 Default procedures.

In the event any grading for which a permit has been issued is not completed in accordance with the approved plans and specifications for said work or with all terms and conditions of the grading permit, the Building Official may declare that a default has

occurred. The Building Official shall give notice thereof to the principal and surety or financial institution executing the security, or to the owner in the case of a cash bond or assignment.

The Building Official may thereafter determine the work that is necessary to mitigate any hazardous or unsafe conditions on the site and cause such work to be performed.

Where the security consists of a bond or instrument of credit, the surety or financial institution executing the security shall be responsible for the payment of all costs and expenses incurred by the Building Official in causing such work to be performed, up to the full amount of the security. In the case of cash security or assignment, the Building Official may pay all costs and expenses incurred in causing such work to be performed from the funds deposited and return any unused portion of such deposit or funds to the person making said deposit or assignment.

J103.7.7 Right of entry.

The Building Official or the authorized representative of any surety company or financial institution furnishing the security shall have access to the premises described in the permit for the purpose of inspecting the work.

In the event of default, as described in Section J103.7.6, the surety or financial institution furnishing the security, or the Building Official, or any person employed or engaged on the behalf of any of these parties, shall have the right to go upon the premises to perform the mitigation work, as described in Section J103.7.6.

Neither the permittee, owner, or any other person shall interfere with or obstruct the ingress into or egress from any such premises of any authorized representative of the surety or financial institution executing the security or the Building Official engaged to perform the mitigation work, as described in Section J103.7.6.

SECTION 82.

Figure J103.2 is hereby added to read as follows:

EXCAVATIONS		FILLS	
		- NOT INTENDED TO SUPPORT STRUCTURES - DO NOT OBSTRUCT A DRAINAGE COURSE	
AN EXCAVATION WHICH IS LESS THAN 2 FT IN DEPTH AND DOES NOT EXCEED 50CY		FILL PLACED ON NATURAL GRADE NOT STEEPER THAN 5:1 AND LESS THAN 1FT DEEP	
AN EXCAVATION WHICH CREATES A CUT SLOPE NOT GREATER THAN 5FT IN HEIGHT, NOT STEEPER THAN 2:1, AND DOES NOT EXCEED 50CY		FILL LESS THAN 3FT DEEP AT ITS DEEPEST POINT THAT DOES NOT EXCEED 50CY	
		FILL LESS THAN 5FT DEEP AT ITS DEEPEST POINT THAT DOES NOT EXCEED 20CY	

FIGURE J103.2

GRADING EXEMPTION CASES

SECTION 72.

Section J104 is hereby amended to read as follows:

SECTION J104

PERMIT APPLICATION AND SUBMITTALS

J104.1

Submittal requirements.

In addition to the provisions of Section ~~105.3 and 1.8.4, as applicable~~ 106.4, the applicant shall state the ~~estimated quantities of excavation and fill~~ following:

1. The estimated quantities of excavation, fill, borrow, removal, or

combination thereof.

2. The proposed land use for the site on which the grading is to be performed.

J104.2 Site plan requirements.

In addition to the provisions of Section ~~407~~106, a grading plan shall show the existing grade and finished grade in contour intervals of sufficient clarity to indicate the nature and extent of the work and show in detail that it complies with the requirements of this eCode. The plans shall show the existing grade on adjoining properties in sufficient detail to identify how grade changes will conform to the requirements of this eCode.

J104.2.1 Grading designation.

Grading in excess of 5,000 cubic yards (3,825 m³), or that is proposed to support any structure, shall be designated as "engineered grading." All engineered grading shall be performed in accordance with an approved grading plan and specifications prepared by a Civil Engineer, unless otherwise required by the Building Official.

Grading involving less than 5,000 cubic yards (3,825 m³), and that will not support any structure, shall be designated "regular grading" unless the permittee chooses to have the grading be designated as engineered grading, or the Building Official determines that, due to the existence of special conditions or unusual hazards, the grading should be designated as engineered grading.

J104.2.2 Regular grading requirements.

In addition to the provisions of Sections 106 and J104.2, an application for a

regular grading permit shall be accompanied by plans of sufficient clarity to indicate the nature and extent of the work. The plans shall give the location of the work, the name of the owner, and the name of the person who prepared the plan. The plan shall include the following information:

1. General vicinity of the proposed site.
2. Limits and depths of cut and fill.
3. Location of any buildings or structures where work is to be performed, and the location of any buildings or structures within 15 feet (4.6 m) of the proposed grading.
4. Contours, flow areas, elevations, or slopes that define existing and proposed drainage patterns.
5. Storm water mitigation measures in accordance with the requirements of Section 106.4.3 of this Code. See Section J110.8 for specific requirements.
6. Location of existing and proposed utilities, drainage facilities, and recorded public and private easements and restricted use areas.
7. Location of all recorded floodways as established by Chapter 11.60 of Title 11 – Health and Safety – of the Los Angeles County Code.
8. Location of all Special Flood Hazard Areas as designated and defined in Title 44 of the Code of Federal Regulations.

J104.2.3 Engineered grading requirements.

In addition to the provisions of Sections 106 and J104.2, an application for a permit for engineered grading shall be accompanied by plans and specifications, and supporting data consisting of a geotechnical report and engineering geology report.

Specifications shall contain information covering construction and material requirements. Plans shall be drawn to scale on paper and shall be of sufficient clarity to indicate the nature and extent of the work proposed and shall show in detail that the proposed work will conform to the provisions of this Code and all relevant laws, ordinances, rules, and regulations. The first sheet of the plans shall depict the location of the proposed work, the name and address of the owner, and the name and address of the person who prepared the plans.

The plans shall include or be accompanied by the following information:

1. General vicinity of the proposed site.
2. Property limits and accurate contours of existing ground and details of terrain and area drainage.
3. Limiting dimensions, elevations, or finish contours to be achieved by the grading, proposed drainage channels, and related construction.
4. Detailed plans of all surface and subsurface drainage devices, walls, cribbing, dams, and other protective devices to be constructed with, or as a part of, the proposed work. A map showing the drainage area and the estimated runoff of the area served by any drains shall also be provided.
5. Location of any existing or proposed buildings or structures located on the property on which the work is to be performed and the location of any buildings or structures on adjacent properties that are within 15 feet (4.6 m) of the property or that may be affected by the proposed grading operations.
6. Recommendations in the geotechnical report and the engineering geology

report shall be incorporated into the grading plans or specifications. When approved by the Building Official, specific recommendations contained in the soils engineering report and the engineering geology report, that are applicable to grading, may be included by reference.

7. The dates of the geotechnical and engineering geology reports together with the names, addresses, and phone numbers of the firms or individuals who prepared the reports.

8. A statement of the quantities of material to be excavated and/or filled. Earthwork quantities shall include quantities for geotechnical and geological remediation. In addition, a statement of the quantities of material to be imported or exported from the site.

9. A statement of the estimated starting and completion dates for proposed work.

10. A statement signed by the owner, acknowledging that a Design Engineer, Field Engineer, Geotechnical Engineer, and Engineering Geologist, when appropriate, will be employed to perform the services required by this Code, when the Building Official requires that such professional persons be so employed. These acknowledgments shall be on a form furnished by the Building Official.

11. Storm water mitigation measures are required to be shown on the grading plan in accordance with the requirement of Section 106.4.3 of this Code. See Section J110.8 for specific requirements.

12. A drainage plan for those portions of property proposed to be utilized as a

building site (building pad), including elevations of floors with respect to finish site grade and locations of proposed stoops, slabs, and fences that may affect drainage.

13. Location and type of any proposed private sewage disposal system, including the location of the expansion area.

14. Location of existing and proposed utilities, drainage facilities, and recorded public and private easements and restricted use areas.

15. Location of all recorded floodways as established by Chapter 11.60 of Title 11 – Health and Safety – of the Los Angeles County Code.

16. Location of all Special Flood Hazard Areas as designated and defined in Title 44 of the Code of Federal Regulations.

J104.3 Geotechnical and engineering geology reports.

~~A geotechnical report prepared by registered design professionals shall be provided. The report shall contain not less than the following:~~

- ~~1. The nature and distribution of existing soils;~~
- ~~2. Conclusions and recommendations for grading procedures;~~
- ~~3. Soil design criteria for any structures or embankments required to accomplish the proposed grading; and~~
- ~~4. Where necessary, slope stability studies, and recommendations and conclusions regarding site geology.~~

The geotechnical report required by Section J104.2.3 shall include data regarding the nature, distribution, and strength of existing soils, conclusions, and recommendations for grading procedures and design criteria for corrective measures.

including buttress fills, when necessary, and an opinion on the adequacy for the intended use of sites to be developed by the proposed grading as affected by geotechnical factors, including the stability of slopes. All reports shall conform with the requirements of Section 111 and shall be subject to review by the Building Official. Supplemental reports and data may be required as the Building Official may deem necessary. Recommendations included in the reports and approved by the Building Official shall be incorporated in the grading plan or specifications.

The engineering geology report required by Section J104.2.3 shall include an adequate description of the geology of the site, conclusions, and recommendations regarding the effect of geologic conditions on the proposed development, and an opinion on the adequacy for the intended use of sites to be developed by the proposed grading, as affected by geologic factors. The engineering geology report shall include a geologic map and cross sections utilizing the most recent grading plan as a base. All reports shall conform with the requirements of Section 111 and shall be subject to review by the Building Official. Supplemental reports and data may be required as the Building Official may deem necessary. Recommendations included in the reports and approved by the Building Official shall be incorporated in the grading plan or specifications.

Exception: A geotechnical or engineering geology report is not required where the ~~b~~Building ~~code~~ Official determines that the nature of the work applied for is such that a report is not necessary.

J104.4 Liquefaction study.

For sites with mapped maximum considered earthquake spectral response accelerations at short periods (S_s) greater than 0.5g as determined by Section 1613, a study of the liquefaction potential of the site shall be provided and the recommendations incorporated in the plans. A geotechnical investigation will be required when the proposed work is a "Project" as defined in California Public Resources Code section 2693, and is located in an area designated as a "Seismic Hazard Zone" as defined in section 3722 of Title 14 of the California Code of Regulations and on Seismic Hazard Zone Maps issued by the State Geologist under Public Resources Code section 2696.

Exception: A liquefaction study is not required where the Building Official determines from established local data that the liquefaction potential is low.

SECTION 73. Section J105 is hereby amended to read as follows:

SECTION J105 INSPECTIONS

J105.1 General.

Grading inspections shall be governed by Section 110, Chapter 1, Division II of this code 108 and as indicated herein. Grading operations for which a permit is required shall be subject to inspection by the Building Official. In addition, professional inspection of grading operations shall be performed by the Field Engineer, the Geotechnical Engineer, and the Engineering Geologist retained to provide such services in accordance with this Section for engineered grading and as required by the Building Official for regular grading.

J105.2**Special and supplemental inspections.**

The special inspection requirements of Section 1705.6 shall apply to work performed under a grading permit where required by the Building Official. In addition to the called inspections specified in Section J105.7, the Building Official may make such other inspections as may be deemed necessary to determine that the work is being performed in conformance with the requirements of this Code. The Building Official may require investigations and reports by an approved soil testing agency, Geotechnical Engineer and/or Engineering Geologist, and Field Engineer. Inspection reports shall be provided when requested in writing by the Building Official.

The Building Official may require continuous inspection of drainage devices by the Field Engineer in accordance with this Section when the Building Official determines that the drainage devices are necessary for the protection of the structures in accordance with Section 110.

J105.3**Field engineer.**

The Field Engineer shall provide professional inspection of those parts of the grading project within such engineer's area of technical specialty, oversee and coordinate all field surveys, including setting grade stakes, and provide site inspections during grading operations to ensure the site is graded in accordance with the approved grading plan and the appropriate requirements of this Code. During site grading, and at the completion of both rough grading and final grading, the Field Engineer shall submit statements and reports as required by Sections J105.11 and J105.12. If revised grading plans are required during the course of the work, they shall be prepared by a

Civil Engineer and approved by the Building Official.

J105.4 **Geotechnical engineer.**

The Geotechnical Engineer shall provide professional inspection of those parts of the grading project within such engineer's area of technical specialty, which shall include observation during grading and testing for required compaction. The Geotechnical Engineer shall provide sufficient observation during the preparation of the natural ground and placement and compaction of the fill to verify that such work is being performed in accordance with the conditions of the approved plan and the appropriate requirements of this Appendix. If conditions differing from the approved geotechnical engineering and engineering geology reports are encountered during grading, the Geotechnical Engineer shall provide revised recommendations to the permittee, the Building Official, and the Field Engineer.

J105.5 **Engineering geologist.**

The Engineering Geologist shall provide professional inspection of those parts of the grading project within such engineer's area of technical specialty, which shall include professional inspection of the bedrock excavation to determine if conditions encountered are in conformance with the approved report. If conditions differing from the approved engineering geology report are encountered, the Engineering Geologist shall provide revised recommendations to the Geotechnical Engineer.

J105.6 **Permittee.**

The permittee shall be responsible for ensuring that the grading is performed in accordance with the approved plans and specifications and in conformance with the

provisions of this Code. The permittee shall engage project consultants, if required under the provisions of this Code, to provide professional inspections on a timely basis. The permittee shall act as a coordinator between the project consultants, the contractor, and the Building Official. In the event of changed conditions, the permittee shall be responsible for informing the Building Official of such change and shall provide revised plans for approval.

J105.7 Required inspections.

The permittee shall call for an inspection by the Building Official at the following various stages of work and shall obtain the approval of the Building Official prior to proceeding to the next stage of work:

Pre-grade. Before any construction or grading activities occur at the site. Permittee shall schedule a pre-grade inspection with the Building Official. The permittee shall ensure that all project consultants are present at the pre-grade inspection.

Initial grade. When the site has been cleared of vegetation and unapproved fill, and has been scarified, benched, or otherwise prepared for fill. No fill shall have been placed prior to this inspection.

Rough grade. When approximate final elevations have been established, drainage terraces, swales, and other drainage devices necessary for the protection of the building sites from flooding have been installed, berms have been installed at the top of the slopes, and the statements required by Section J105.12 have been received.

Final grade. When grading has been completed, all drainage devices necessary

to drain the building pad have been installed, slope planting has been established, irrigation systems have been installed, and the as-built plans and required statements and reports have been submitted.

J105.8 Notification of noncompliance.

If, in the course of fulfilling their respective duties under this Appendix, the Field Engineer, the Geotechnical Engineer, or the Engineering Geologist determines that the work is not being done in conformance with this Appendix or the approved grading plans, the Field Engineer, the Geotechnical Engineer, or the Engineering Geologist shall immediately report, in writing, the discrepancies and the recommended corrective measures to the permittee and to the Building Official.

J105.9 Transfer of responsibility.

If the Field Engineer, the Geotechnical Engineer, or the Engineering Geologist of record is changed at any time after the grading plans required pursuant to Section J104.2.2 or J104.2.3 have been approved by the Building Official, the permittee shall immediately provide written notice of such change to the Building Official. The Building Official may stop the grading from commencing or continuing until the permittee has identified a replacement and the replacement has agreed in writing to assume responsibility for those parts of the grading project that are within the replacement's area of technical competence.

J105.10 Non-inspected grading.

No person shall own, use, occupy, or maintain any non-inspected grading. For the purposes of this Code, non-inspected grading shall be defined as any grading for

which a grading permit was first obtained, pursuant to Section J103, above, but which has progressed beyond any point requiring inspection and approval by the Building Official without such inspection and approval having been obtained.

J105.11 Routine field inspections and reports.

Unless otherwise directed by the Building Official, the Field Engineer for all engineered grading projects shall prepare routine inspection reports and shall file these reports with the Building Official as follows:

1. Bi-weekly during all times when grading of 400 cubic yards or more per week is occurring on the site;
2. Monthly, at all other times; and
3. At any time when requested in writing by the Building Official.

Such reports shall certify to the Building Official that the Field Engineer has inspected the grading site and related activities and has found them in compliance with the approved grading plans and specifications, this Code, all grading permit conditions, and all other applicable ordinances and requirements. The reports shall conform to a standard "Report of Grading Activities" form, which shall be provided by the Building Official.

J105.12 Completion of work.

Upon completion of the rough grading work and at the final completion of the work, the following reports and drawings and supplements thereto are required for engineered grading or when professional inspection is otherwise required by the Building Official:

1. An "as-built" grading plan prepared by the Field Engineer retained to provide such services in accordance with Section J105.3 showing all plan revisions as approved by the Building Official. This shall include original ground surface elevations, as-built ground surface elevations, lot drainage patterns, and the locations and elevations of surface drainage facilities and the outlets of subsurface drains. As-built locations, elevations, and details of subsurface drains shall be shown as reported by the Geotechnical Engineer.

The as-built grading plan shall be accompanied by a certification by the Field Engineer that to the best of his or her knowledge, the work within the Field Engineer's area of responsibility was done in accordance with the final approved grading plan.

2. A report prepared by the Geotechnical Engineer retained to provide such services in accordance with Section J105.4, including locations and elevations of field density tests, summaries of field and laboratory tests, other substantiating data, and comments on any changes made during grading and their effect on the recommendations made in the approved geotechnical engineering investigation report. The report shall include a certification by the Geotechnical Engineer that, to the best of his or her knowledge, the work within the Geotechnical Engineer's area of responsibility is in accordance with the approved geotechnical engineering report and applicable provisions of this Appendix. The report shall contain a finding regarding the safety of the completed grading and any proposed structures against hazard from landslide, settlement, or slippage.

3. A report prepared by the Engineering Geologist retained to provide such

services in accordance with Section J105.5, including a final description of the geology of the site and any new information disclosed during the grading and the effect of such new information, if any, on the recommendations incorporated in the approved grading plan. The report shall contain a certification by the Engineering Geologist that, to the best of his or her knowledge, the work within the Engineering Geologist's area of responsibility is in accordance with the approved engineering geology report and applicable provisions of this Appendix. The report shall contain a finding regarding the safety of the completed grading and any proposed structures against hazard from landslide, settlement, or slippage. The report shall contain a final as-built geologic map and cross-sections depicting all the information collected prior to and during grading.

4. The grading contractor shall certify, on a form prescribed by the Building Official, that the grading conforms to said as-built plan and the approved specifications.

5. When a landscape permit is required by Section 490.1 of the California Department of Water Resources Model Water Efficient Landscape Ordinance, the Landscape Architect shall certify on a form prescribed by the Building Official that the landscaping conforms to approved landscape plans and specifications.

J105.13 Notification of completion.

The permittee shall notify the Building Official when the grading operation is ready for final inspection. Final approval shall not be given until all work, including installation of all drainage facilities and their protective devices, and all erosion-control measures, have been completed in accordance with the final approved grading plan, and all required reports have been submitted and approved.

J105.14 **Change of ownership.**

Unless otherwise required by the Building Official, when a grading permit has been issued on a site and the owner sells the property prior to final grading approval, the new property owner shall be required to obtain a new grading permit.

SECTION 74. Section J106.1 is hereby amended to read as follows:

J106.1 **Maximum cut slope.**

The slope of cut surfaces shall be not steeper than is safe for the intended use, and shall be not more than one unit vertical in two units horizontal (50-percent slope) unless the owner or the owner's authorized agent furnishes a geotechnical or an engineering geology report, or both, justifying a steeper slope. The reports must contain a statement by the Geotechnical Engineer or Engineering Geologist that the site was investigated and an opinion that a steeper slope will be stable and will not create a hazard to public or private property, in conformance with the requirements of Section 111. The Building Official may require the slope of the cut surfaces to be flatter in slope than 2 units horizontal to 1 unit vertical if the Building Official finds it necessary for the stability and safety of the slope.

Exceptions:

1.——A cut surface shall be permitted to be at a slope of 1.5 units horizontal to one unit vertical (67-percent slope) provided that all of the following are met:

- 4.1. It is not intended to support structures or surcharges.
- 4.2. It is adequately protected against erosion.
- 4.3. It is no more than 8 feet (2438 mm) in height.

4.4. It is approved by the ~~b~~Building code ~~e~~Official.

4.5. Ground water is not encountered.

2. ~~— A cut surface in bedrock shall be permitted to be at a slope of one unit horizontal to one unit vertical (100 percent slope).~~

SECTION 75. Section J107 is hereby amended to read as follows:

SECTION J107 FILLS

J107.1 General.

Unless otherwise recommended in the geotechnical report, fills shall comply with the provisions of this ~~s~~Section.

Exception: The Building Official may permit a deviation from the provisions of this Appendix for minor fills not intended to support structures, where no geotechnical report has been prepared.

J107.2 Surface Preparation.

Fill slopes shall not be constructed on natural slopes steeper than 2 units horizontal to 1 unit vertical (50 percent slope). The ground surface shall be prepared to receive fill by removing vegetation, topsoil, and other unsuitable materials (including any existing fill that does not meet the requirements of this Appendix), and scarifying the ground to provide a bond with the fill material.

Subdrains shall be provided under all fills placed in natural drainage courses and in other locations where seepage is evident, except where the Geotechnical Engineer or Engineering Geologist recommends otherwise. Such sub-drainage systems shall be of a material and design approved by the Geotechnical Engineer and acceptable to the

Building Official. The Geotechnical Engineer shall provide continuous inspection during the process of subdrain installations. The location of the subdrains shall be shown on a plan prepared by the Geotechnical Engineer. Excavations for the subdrains shall be inspected by the Engineering Geologist when such subdrains are included in the recommendations of the Engineering Geologist.

J107.3 Benching.

Where existing grade is at a slope steeper than one unit vertical in five units horizontal (20-percent slope) and the depth of the fill exceeds 5 feet (1524 mm),₁ benching shall be provided into sound bedrock or other competent material as determined by the Geotechnical Engineer in accordance with Figure J107.3, or as determined by the Geotechnical Engineer. When fill is to be placed over a cut, Aa key shall be provided that is not less than 10 feet (3048 mm) in width and 2 feet (610 mm) in depth. The area beyond the toe of fill shall be sloped for sheet overflow or a paved drain shall be constructed thereon. The Geotechnical Engineer or Engineering Geologist, or both, shall inspect and approve the cut as being suitable for the foundation and placement of fill material before any fill material is placed on the excavation.

J107.4 Fill material.

Fill material shall not include organic, frozen,₁ or other deleterious materials. Rock or similar irreducible material greater than 12 inches (305 mm) in any dimension shall not be included in fills.

Exception: The Building Official may permit placement of larger rock when the Geotechnical Engineer properly devises and recommends a method of placement, and

continuously inspects the placement and approves the fill stability. The following requirements shall also apply:

1. Prior to issuance of the grading permit, potential rock disposal areas shall be delineated on the grading plan.
2. Rock sizes greater than 12 inches (0.3 m) in maximum dimension shall be 10 feet (3.0 m) or more below grade, measured vertically.
3. Rocks shall be placed so as to assure filling of all voids with well-graded soil.
4. The reports submitted by the Geotechnical Engineer shall acknowledge the placement of the oversized material and whether the work was performed in accordance with the engineer's recommendations and the approved plans.
5. The location of oversized rock dispersal areas shall be shown on the as-built plan.

J107.5 Compaction.

All fill material shall be compacted to a minimum of 90 percent of maximum density as determined by ASTM D1557, Modified Proctor, in lifts not exceeding 12 inches (305 mm) in depth within 40 feet (12.2 m) below finished grade and 93 percent of maximum dry density deeper than 40 feet (12.2 m) below finished grade, unless a lower relative compaction (not less than 90 percent of maximum dry density) is justified by the Geotechnical Engineer and approved by the Building Official. Where ASTM D1557, Modified Proctor, is not applicable, a test acceptable to the Building Official shall be used.

Field density shall be determined by a method acceptable to the Building Official. However, not less than ten percent of the required density tests, uniformly distributed, shall be obtained by the Sand Cone Method.

Fill slopes steeper than 2 units horizontal to 1 unit vertical (50-percent slope) shall be constructed by the placement of soil a sufficient distance beyond the proposed finish slope to allow compaction equipment to operate at the outer surface limits of the final slope surface. The excess fill is to be removed prior to completion or rough grading. Other construction procedures may be utilized when it is first shown to the satisfaction of the Building Official that the angle of slope, construction method, and other factors will comply with the intent of this Section.

J107.6 Maximum slope.

The slope of fill surfaces shall be not steeper than is safe for the intended use. Fill slopes steeper than one unit vertical in two units horizontal (50-percent slope) shall be justified by a geotechnical reports or engineering data conforming to the requirements of Section 111, containing a statement by the Geotechnical Engineer that the site has been investigated and an opinion that a steeper fill slope will be stable and will not create a hazard to public or private property. Substantiating calculations and supporting data may be required where the Building Official determines that such information is necessary to verify the stability and safety of the proposed slope. The Building Official may require the fill slope to be constructed with a face flatter in slope than 2 units horizontal to 1 unit vertical (50-percent slope) if the Building Official finds it necessary for stability and safety of the slope.

J107.7 **Slopes to receive fill.**

Where fill is to be placed above the top of an existing slope steeper than 3 units horizontal to 1 unit vertical (33-percent slope), the toe of the fill shall be set back from the top edge of the existing slope a minimum distance of 6 feet (1.8 m) measured horizontally or such other distance as may be specifically recommended by a Geotechnical Engineer or Engineering Geologist and approved by the Building Official.

J107.8 **Inspection of fill.**

For engineered grading, the Geotechnical Engineer shall provide sufficient inspections during the preparation of the natural ground and the placement and compaction of the fill to ensure that the work is performed in accordance with the conditions of plan approval and the appropriate requirements of this Appendix. In addition to the above, the Geotechnical Engineer shall provide continuous inspection during the entire fill placement and compaction of fills that will exceed a vertical height or depth of 30 feet (9.1 m) or result in a slope surface steeper than 2 units horizontal to 1 unit vertical (50-percent slope).

J107.9 **Testing of fills.**

Sufficient tests of the fill soils shall be made to determine the density and to verify compliance of the soil properties with the design requirements. This includes soil types and shear strengths in accordance with Section J111 Referenced Standards.

SECTION 76. Section J108 is hereby amended to read as follows:

SECTION J108 SETBACKS

J108.1 General.

Cut and fill slopes shall be set back from the property lines in accordance with this ~~s~~Section. Setback dimensions shall be measured perpendicular to the property line and shall be as shown in Figure J108.1, unless substantiating data is submitted justifying reduced setbacks and reduced setbacks are recommended in a geotechnical engineering and engineering geology report approved by the Building Official.

J108.2 Top of slope.

The setback at the top of a cut slope shall be not less than that shown in Figure J108.1, or than is required to accommodate any required interceptor drains, whichever is greater. For graded slopes, the property line between adjacent lots shall be at the apex of the berm at the top of the slope. Property lines between adjacent lots shall not be located on a graded slope steeper than 5 units horizontal to 1 unit vertical (20-percent slope).

J108.3 Toe of fill ~~s~~Slope protection.

The setback from the toe of a fill slope shall not be less than that shown by Figure J108.1. Where required to protect adjacent properties at the toe of a slope from adverse effects of the grading, additional protection, approved by the ~~b~~Building ~~e~~Official, shall be included. Examples of such protection may include but shall not be limited to:

1. Setbacks greater than those required by Figure J108.1.
2. Provisions for retaining walls or similar construction.
3. Erosion protection of the fill slopes.
4. Provision for the control of surface waters.

J108.4 Alternate setbacks.

The Building Official may approve alternate setbacks if he or she determines that no hazard to life or property will be created or increased. The Building Official may require an investigation and recommendation by a qualified engineer or Engineering Geologist to justify any proposed alternate setback.

SECTION 77. Figure J108.1 is hereby amended to read as follows:

FIGURE J108.1
DRAINAGE SETBACK DIMENSIONS

SECTION 78. Section J109 is hereby amended to read as follows:

SECTION J109 DRAINAGE AND TERRACING

J109.1 General.

Unless otherwise recommended by a ~~registered design professional~~ licensed Civil

Engineer and approved by the Building Official, drainage facilities and terracing shall be provided in accordance with the requirements of this sSection J109.2 for all cut and fill slopes 3 units horizontal to 1 unit vertical (33-percent slope) and steeper.

EXCEPTION: ~~Drainage facilities and terracing need not be provided where the ground slope is not steeper than one unit vertical in three units horizontal (33-percent slope).~~

For slopes flatter than 3 units horizontal to 1 unit vertical (33-percent slope) and steeper than 5 units horizontal to 1 unit vertical (20-percent slope), a paved swale or ditch shall be installed at 30 foot (9.1 m) vertical intervals to control surface drainage and debris. Swales shall be sized based on contributory area and have adequate capacity to convey intercepted waters to the point of disposal as defined in Section J109.5. Swales must be paved with reinforced concrete not less than 3 inches (0.08 m) in thickness, reinforced with 6-inch (0.2 m) by 6-inch (0.2 m) No. 10 by No. 10 welded wire fabric or equivalent reinforcing centered in the concrete slab or an equivalent approved by the Building Official. Swales must have a minimum flow line depth of 1 foot (0.3 m) and a minimum paved width of 18 inches (0.5 m). Swales shall have a minimum gradient of not less than 5 percent. There shall be no reduction in grade along the direction of flow unless the velocity of flow is such that slope debris will remain in suspension on the reduced grade.

J109.2 Drainage Terraces.

Drainage Terraces not less than 6 feet (1829 mm)8 feet (2.4 m) in width shall be established at not more than 30-foot (9144 mm) vertical intervals on all cut or fill slopes

to control surface drainage and debris. ~~Suitable access shall be provided to allow for cleaning and maintenance.~~

~~Where more than two terraces are required, one terrace, located at approximately mid-height, shall be at least 12 feet (3658 mm) in width.~~

~~Swales or ditches shall be provided on terraces. They shall have a minimum gradient of one unit vertical in 20 units horizontal (5-percent slope) and shall be paved with concrete not less than 3 inches (76 mm) in thickness, or with other materials suitable to the application. They shall have a depth not less than 12 inches (305 mm) and a width not less than 5 feet (1524 mm).~~

~~A single run of swale or ditch shall not collect runoff from a tributary area exceeding 13,500 square feet (1256 m²) (projected) without discharging into a down drain.~~
When only one terrace is required, it shall be at mid-height. For cut or fill slopes greater than 100 feet (30.5 m) and up to 120 feet (36.6 m) in vertical height, one terrace at approximately mid-height shall be 20 feet (6.1 m) in width. Terrace widths and spacing for cut and fill slopes greater than 120 feet (36.6 m) in height shall be designed by the Civil Engineer and approved by the Building Official. Suitable access shall be provided to permit proper cleaning and maintenance.

Drainage swales on terraces shall have a longitudinal grade of not less than 5 percent nor more than 12 percent and a minimum depth of 1 foot (0.3 m) at the flow line. There shall be no reduction in grade along the direction of flow unless the velocity of flow is such that slope debris will remain in suspension on the reduced grade.
Drainage swales must be paved with reinforced concrete not less than 3 inches (0.8 m)

in thickness, reinforced with 6-inch (0.2 m) by 6-inch (0.2 m) No. 10 by No. 10 welded wire fabric or equivalent reinforcing centered in the concrete slab or an approved equal paving. Drainage swales shall have a minimum depth at the deepest point of 1 foot (0.3 m) and a minimum paved width of 5 feet (1.5 m). Drainage swales on terraces shall be sized based on contributory area and have adequate capacity to convey intercepted waters to the point of disposal as defined in Section J109.5. Downdrains or drainage outlets shall be provided at approximately 300 foot (91.4 m) intervals along the drainage terrace or at equivalent locations. Down drains and drainage outlets shall be of approved materials and of adequate capacity to convey the intercepted waters to the point of disposal as defined in Section J109.5.

J109.3 Interceptor drains and overflow protection.

Berms, interceptor drains, swales, or other devices shall be installed along the top of cut slopes receiving drainage from a tributary width greater than 40 feet (12 192 mm), measured horizontally, to prevent surface waters from overflowing onto and damaging the face of a slope. Berms used for slope protection shall not be less than 12 inches (0.3 m) above the level of the pad and shall slope back at least 4 feet (1.2 m) from the top of the slope.

Interceptor drains shall be installed along the top of graded slopes greater than 5 feet in height receiving drainage from a slope with a tributary width greater than 30 feet (9.1 m), measured horizontally. They shall have a minimum depth of 1 foot (305 mm) and a minimum width of 3 feet (915 mm). The slope shall be approved by the Building Official, but shall be not less than one unit vertical in 50 units horizontal (2-

percent slope). The drain shall be paved with concrete not less than 3 inches (76mm) in thickness, or by other materials suitable to the application, and reinforced as required for drainage terraces. Discharge from the drain shall be accomplished in a manner to prevent erosion and shall be approved by the ~~b~~Building ~~e~~Official.

...

J109.5 Disposal.

All drainage facilities shall be designed to convey waters to the nearest-practicable street, storm drain, or natural watercourse or drainage way approved by the Building Official or other appropriate governmental agency, provided that the discharge of such waters at that location will not create or increase a hazard to life or property. Erosion of the ground in the area of discharge shall be prevented by installation of non-erosive down drains or other devices. Desilting basins, filter barriers, or other methods, as approved by the Building Official, shall be utilized to remove sediments from surface waters before such waters are allowed to enter streets, storm drains, or natural watercourses. If the drainage device discharges onto natural ground, riprap or a similar energy dissipator may be required.

Building pads shall have a minimum drainage gradient of 2 percent toward an approved drainage facility or a public street unless otherwise directed by the Building Official. A lesser slope may be approved by the Building Official for sites graded in relatively flat terrain, or where special drainage provisions are made, when the Building Official finds such modification will not result in a hazard to life or property.

SECTION 79. Section J110 is hereby amended to read as follows:

SECTION J110 SLOPE PLANTING AND EROSION CONTROL

J110.1 General.

The faces of cut and fill slopes shall be prepared and maintained to control erosion. This control shall ~~be permitted to consist of effective planting,~~ erosion control blankets, soil stabilizers, or other means as approved by the Building Official.

Exception: Erosion control measures need not be provided on cut slopes not subject to erosion due to the erosion-resistant character of the materials, as approved by the Project Consultants to the satisfaction of the Building Official.

...

J110.3 Planting.

The surface of all cut slopes more than 5 feet (1.5 m) in height and fill slopes more than 3 feet (0.9 m) in height shall be protected against damage from erosion by planting with grass or ground cover plants. Slopes exceeding 15 feet (4.6 m) in vertical height shall also be planted with shrubs, spaced at not to exceed 10 feet (3 m) on center, or trees, spaced at not to exceed 20 feet (6.1 m) on center; or a combination of shrubs and trees at an equivalent spacing, in addition to the grass or ground cover plants. The plants selected and planting methods used shall be suitable for the soil and climatic conditions of the site.

Plant material shall be selected that will produce a coverage of permanent planting to effectively control erosion. Consideration shall be given to deep-rooted plant material needing limited watering, maintenance, high root to shoot ratio, wind

susceptibility, and fire-retardant characteristics. All plant materials must be approved by the Building Official.

Planting may be modified for the site if specific recommendations are provided by both the Geotechnical Engineer and a Landscape Architect. Specific recommendations must consider soils and climatic conditions, irrigation requirements, planting methods, fire-retardant characteristics, water efficiency, maintenance needs, and other regulatory requirements. Recommendations must include a finding that the alternative planting will provide a permanent and effective method of erosion control. Modifications to planting must be approved by the Building Official prior to installation.

J110.4 Irrigation.

Slopes required to be planted by Section J110.3 shall be provided with an approved system of irrigation that is designed to cover all portions of the slope. Irrigation system plans shall be submitted to and approved by the Building Official prior to installation. A functional test of the system may be required.

For slopes less than 20 feet (6.1 m) in vertical height, hose bibs to permit hand watering will be acceptable if such hose bibs are installed at conveniently accessible locations where a hose no longer than 50 feet (15.2 m) is necessary for irrigation.

Irrigation requirements may be modified for the site if specific recommendations are provided by both the Geotechnical Engineer and a Landscape Architect. Specific recommendations must consider soils and climatic conditions, plant types, planting methods, fire-retardant characteristics, water efficiency, maintenance needs, and other regulatory requirements. Recommendations must include a finding that the alternative

irrigation method will sustain the proposed planting and provide a permanent and effective method of erosion control. Modifications for irrigation systems must be approved by the Building Official prior to installation.

J110.5 Plans and specifications.

Planting and irrigation plans shall be submitted for slopes that are required to be planted and irrigated pursuant to Sections J110.3 and J110.4. Except as otherwise required by the Building Official for minor grading, the plans for slopes 20 feet (6.1 m) or more in vertical height shall be prepared and signed by a Civil Engineer or Landscape Architect. If requested by the Building Official, planting and irrigation details shall be included on the grading plan.

J110.6 Rodent control.

Fill slopes shall be protected from potential slope damage by a preventative program of rodent control.

J110.7 Release of security.

The planting and irrigation systems required by this Section shall be installed as soon as practical after rough grading. Prior to final approval of grading and before the release of the grading security, the planting shall be well established and growing on the slopes and there shall be evidence of an effective rodent control program.

J110.8 National Pollutant Discharge Elimination System (NPDES) compliance.

J110.8.1 General.

All grading plans and permits and the owner of any property on which such

grading is performed shall comply with the provisions of this Section for NPDES compliance.

All best management practices shall be installed before grading begins or as instructed in writing by the Building Official for unpermitted grading as defined by Section J103.3. As grading progresses, all best management practices shall be updated as necessary to prevent erosion and to control construction-related pollutants from discharging from the site. All best management practices shall be maintained in good working order to the satisfaction of the Building Official until final grading approval has been granted by the Building Official and all permanent drainage and erosion control systems, if required, are in place. Failure to comply with this Section is subject to "Noncompliance Penalties" pursuant to Section J110.8.5. Payment of a penalty shall not relieve any persons from fully complying with the requirements of this Code in the execution of the work.

J110.8.2 Storm Water Pollution Prevention Plan (SWPPP).

The Building Official may require a SWPPP. The SWPPP shall contain details of best management practices, including desilting basins or other temporary drainage or control measures, or both, as may be necessary to control construction-related pollutants that originate from the site as a result of construction-related activities. When the Building Official requires a SWPPP, no grading permit shall be issued until the SWPPP has been submitted to and approved by the Building Official.

For unpermitted grading as defined by Section J103.3 upon written request, a SWPPP in compliance with the provisions of this Section and Section 106.4.3 for

NPDES compliance shall be submitted to the Building Official. Failure to comply with this Section is subject to "Noncompliance Penalties" per Section J110.8.5. Payment of a penalty shall not relieve any persons from fully complying with the requirements of this Code in the execution of the work.

J110.8.3 Erosion and Sediment Control Plans (ESCP).

Where a grading permit is issued and the Building Official determines that the grading will not be completed prior to November 1, the owner of the site on which the grading is being performed shall, on or before October 1, file or cause to be filed with the Building Official an ESCP. The ESCP shall include specific best management practices to minimize the transport of sediment and protect public and private property from the effects of erosion, flooding, or the deposition of mud, debris, or construction-related pollutants. The best management practices shown on the ESCP shall be installed on or before October 15. The plans shall be revised annually or as required by the Building Official to reflect the current site conditions.

The ESCP shall be accompanied by an application for plan checking services and plan-checking fees in an amount determined by the Building Official, up to but not exceeding 10 percent of the original grading permit fee.

Failure to comply with this Section is subject to "Noncompliance Penalties" pursuant to Section J110.8.5. Payment of a penalty shall not relieve any persons from fully complying with the requirements of this Code in the execution of the work.

J110.8.4 Storm Water Pollution Prevention Plan (SWPPP), effect of noncompliance.

Should the owner fail to submit the SWPPP or the ESCP as required by Section J110.8, or fail to install the best management practices, it shall be deemed that a default has occurred under the conditions of the grading permit security. The Building Official may thereafter enter the property for the purpose of installing, by County forces or by other means, the drainage, erosion control, and other devices shown on the approved plans, or if there are no approved plans, as the Building Official may deem necessary to protect adjoining property from the effects of erosion, flooding, or the deposition of mud, debris, or constructed-related pollutants.

The Building Official shall also have the authority to impose and collect the penalties imposed by Section J110.8.5. Payment of a penalty shall not relieve any persons from fully complying with the requirements of this Code in the execution of the work.

J110.8.5 Noncompliance penalties.

The amount of the penalties shall be as follows:

1. If a SWPPP or an ESCP is not submitted as prescribed in

Sections J110.8.2 and J110.8.3:

<u>Grading Permit Volume</u>	<u>Penalty</u>
<u>1-10,000 cubic yards (1-7645.5 m³)</u>	<u>\$50.00 per day</u>
<u>10,001-100,000 cubic yards (7646.3-76455 m³)</u>	<u>\$250.00 per day</u>
<u>More than 100,000 cubic yards (76455 m³)</u>	<u>\$500.00 per day</u>

2. If the best management practices for storm water pollution prevention and wet weather erosion control, as approved by the Building Official, are not installed as prescribed in this Section J110.8:

<u>Grading Permit Volume</u>	<u>Penalty</u>
<u>1-10,000 cubic yards (1-7645.5 m³)</u>	<u>\$100.00 per day</u>
<u>10,001-100,000 cubic yards (7646.3-76455 m³)</u>	<u>\$250.00 per day</u>
<u>More than 100,000 cubic yards (76455 m³)</u>	<u>\$500.00 per day</u>

NOTE: See Section 108 for inspection request requirements.

SECTION 80. Section J111 is hereby amended to read as follows:

SECTION J111 REFERENCED STANDARDS

<u>ASTM D1557-12</u>	<u>Test Method for Laboratory Compaction Characteristics of Soil Using Modified Effort [56,000 ft-lb/ft³ (2,700kN-m/m³)]</u>	<u>J 107.5</u>
----------------------	--	----------------

These regulations establish minimum standards and are not intended to prevent the use of alternate materials, methods, or means of conforming to such standards, provided such alternate has been approved by the Building Official.

The Building Official shall approve such an alternate provided they determine that the alternate is, for the purpose intended, at least the equivalent of that prescribed in this Code in quality, strength, effectiveness, durability, and safety.

The Building Official shall require that sufficient evidence or proof be submitted to substantiate any claims regarding the alternate.

The standards listed below are recognized standards. Compliance with these recognized standards shall be prima facie evidence of compliance with the standards set forth in Sections J104 and J107.

<u>ASTM D 1557 – Latest Revision</u>	<u>Laboratory Characteristics Compaction of Soil Using Modified Effort</u>	<u>J107.5</u>
<u>ASTM D 1556 – Latest Revision</u>	<u>Density and Unit Weight of Soils In Place by the Sand Cone Method</u>	<u>J104.2.3, J104.3 and J107.9</u>
<u>ASTM D 2167 – Latest Revision</u>	<u>Density and Unit Weight of Soils In Place by the Rubber Balloon Method</u>	<u>J104.2.3 J104.3 and J107.9</u>

<u>ASTM D 2937 – Latest Revision</u>	<u>Density of Soils in Place by the Drive Cylinder Method</u>	<u>J104.2.3</u> <u>J104.3 and J107.9</u>
<u>ASTM D 2922 – Latest Revision</u>	<u>Density of Soil and Soil Aggregate In Place by Nuclear Methods</u>	<u>J104.2.3</u> <u>J104.3 and J107.9</u>
<u>ASTM D 3017 – Latest Revision</u>	<u>Water Content of Soil and Rock in Place by Nuclear Methods</u>	<u>J104.2.3</u> <u>J104.3 and J107.9</u>

SECTION 81. Section P101.1 is hereby amended to read as follows:

P101.1 Scope.

This appendix ~~shall be applicable~~applies to emergency housing and emergency housing facilities, as defined in Section P102, when and to the extent that the County of Los Angeles Board of Supervisors ("Board") finds, by motion, resolution, or otherwise, that this appendix applies to a specific state of emergency, local emergency, or declaration of shelter crisis.

SECTION 82. Section P102.1 is hereby amended to read as follows:

P102.1 General.

...

ENFORCING AGENCY. The Building Official as defined in Section 104.3 of this Code.

...

SECTION 83. Section P103.1 is hereby amended to read as follows:

P103.1 General.

Emergency sleeping cabins, emergency transportable housing units, membrane structures and tents constructed and/or assembled in accordance with this appendix, shall be occupied only during the duration of the declaration of state of emergency, local

emergency, or shelter crisis.

...

SECTION 84. Section P103.4 is hereby amended to read as follows:

P103.4 Fire and life safety requirements not addressed in this appendix.

If not otherwise addressed in this appendix, fire and life safety measures, including, but not limited to, means of egress, fire separation, fire sprinklers, smoke alarms, and carbon monoxide alarms, shall be determined and enforced by the enforcing agency in consultation with the Departments of Public Health, Fire and other pertinent County departments, as applicable.

SECTION 85. Section P106.1 is hereby amended to read as follows:

P106.1 General.

...

Tents and membrane structures shall be provided with means of ventilation (natural and/or mechanical) allowing for adequate air replacement, as determined by the enforcing agency.

SECTION 86. Section P107.1 is hereby amended to read as follows:

P107.1 General.

Emergency housing shall comply with the applicable requirements in Chapter 11B and/or the US Access Board Final Guidelines for Emergency Transportable Housing as determined by the enforcing agency.

...

SECTION 87. Section P110.1.1 is hereby added to read as follows:

P110.1.1 Backflow prevention.

Backflow prevention devices shall be provided in accordance with Section 602.3 of the Plumbing Code.

SECTION 88. Section P110.1.2 is hereby added to read as follows:

P110.1.2 Drinking fountains.

An adequate number of drinking fountains, bottle fillers or drinking facilities shall be provided as determined by the enforcing agency.

SECTION 89. Section P110.3 is hereby amended to read as follows:

P110.3 Toilet and bathing facilities.

...

The maximum travel distance from any sleeping and/or living area to the toilet facility shall not exceed 300 feet (91.4 m) or as determined by the enforcing agency.

SECTION 90. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 California Building Code. Some of those changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Building Standards Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code contained in this ordinance are reasonably

necessary because of local climatic, geological, or topographical conditions in the County of Los Angeles due to the potential for seismic activity in the region, topographical conditions that contribute to the spread of wild fires, and climatic conditions that impact air quality and increase the risk of wild fires. Without limiting the foregoing, the County makes additional findings herein:

BUILDING CODE AMENDMENTS

Code Section	Condition	Explanation of Amendment
106.3.2, Item 2	Administrative Geologic	The Los Angeles region is
701A.1	Climatic	Clarifies the application of Chapter 7A to include additions, alterations, and/or relocated buildings. Many areas of the County have been designated as Fire Hazard Severity Zones due to low humidity, strong winds, and dry vegetation. Additions, alterations, and/or relocated buildings have the same fire risk as new buildings.
701A.3	Climatic	Clarifies the application of Chapter 7A to include additions, alterations, and/or relocated buildings. Many areas of the County have been designated as Fire Hazard Severity Zones due to the increased risk of fire caused by low humidity, strong winds, and dry vegetation. Additions, alterations, and/or relocated buildings have the same fire risk as new buildings.
701A.3.1	Climatic	Clarifies the application of Chapter 7A to include additions, alterations, and/or relocated buildings. Many areas of the County have been designated as Fire Hazard Severity Zones due to the increased risk of fire caused by low humidity, strong winds, and dry vegetation. Additions, alterations, and/or relocated buildings have the same fire risk as new buildings.
703A.5.2 and 703A.5.2.2	Climatic	Disallows the use of wood-shingle/wood-shake roofs due to the increased risk of fire in the County caused by low humidity, strong winds, and dry vegetation in high fire severity zones.
704A.4	Climatic	Disallows the use of wood-shingle/wood-shake roofs due to the increased risk of fire in the County caused by

Code Section	Condition	Explanation of Amendment
		low humidity, strong winds, and dry vegetation in high fire severity zones.
705A.2	Climatic	Disallows the use of wood-shingle/wood-shake roofs and requires the use of Class A roof covering due to the increased risk of fire in the County caused by low humidity, strong winds, and dry vegetation in high fire severity zones.
1031.2.1	Geological	The greater Los Angeles/Long Beach region is a densely populated area having buildings constructed over and near a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. The proposed amendment is intended to prevent occupants from being trapped in a building and to allow rescue workers to easily enter after an earthquake.

Table 1507.3.7	Geological	Table amended to require proper anchorage for clay or concrete tiles from sliding or rotating due to the increased risk of significant earthquakes in the County. This amendment incorporates the design provisions developed based on detailed study of the 1994 Northridge and the 1971 Sylmar earthquakes.
1613.5 and 1613.5.1	Geological	Observed damages to one- and two-family dwellings of light frame construction after the Northridge Earthquake may have been partially attributed to vertical irregularities common to this type of occupancy and construction. In an effort to improve quality of construction and incorporate lesson learned from studies after the Northridge Earthquake, the proposed modification to ASCE 7-16 Section 12.2.3.1 Exception 3 by limiting the number of stories and height of the structure to two stories will significantly minimize the impact of vertical irregularities and concentration of inelastic behavior from mixed structural systems. This proposed amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
1613.5.2	Geological	A joint Structural Engineers Association of Southern California (SEAOSC), Los Angeles County and Los Angeles City Task Force investigated the performance

		<p>of concrete and masonry construction with flexible wood diaphragm failures after the Northridge earthquake. It was concluded at that time that continuous ties are needed at specified spacing to control cross grain tension in the interior of the diaphragm. Additionally, there was a need to limit subdiaphragm allowable shear loads to control combined orthogonal stresses within the diaphragm. Recognizing the importance and need to continue the recommendation made by the task force while taking into consideration the improve performances and standards for diaphragm construction today, this proposal increases the continuous tie spacing limit to 40 ft in lieu of 25 ft and to use 75% of the allowable code diaphragm shear to determine the depth of the sub-diaphragm in lieu of the 300 plf and is deemed appropriate and acceptable. Due to the frequency of this type of failure during the past significant earthquakes, various jurisdictions within the Los Angeles region have taken this additional step to prevent roof or floor diaphragms from pulling away from concrete or masonry walls. This proposed amendment is a continuation of an amendment adopted during previous code adoption cycles.</p>
1613.5.3	Geological	<p>The inclusion of the importance factor in this equation has the unintended consequence of reducing the minimum seismic separation distance for important facilities such as hospitals, schools, police and fire stations from adjoining structures. The proposal to omit the importance factor from Equation 12.12-1 will ensure that a safe seismic separation distance is provided. This proposed amendment is a continuation of an amendment adopted during previous code adoption cycles.</p>
1613.6	Geological Topographical	<p>Section is added to improve seismic safety of buildings constructed on or into hillsides. Due to the local topographical and geological conditions of the sites within the Los Angeles region and their probabilities for earthquakes, this technical amendment is required to address and clarify special needs for buildings constructed on hillside locations. A SEAOSC and Los Angeles City Joint Task Force investigated the performance of hillside building failures after the Northridge earthquake. Numerous hillside failures resulted in loss of life and millions of dollars in damage.</p>

		These criteria were developed to minimize the damage to these structures and have been in use by both the City and County of Los Angeles for several years with much success. This amendment is a continuation of an amendment adopted during previous code adoption cycles.
1613.7	Geological	The greater Los Angeles region is a densely populated area having buildings constructed over and near a vast array of fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. The proposed modification requiring safe design and construction requirements for ceiling suspension systems to resist seismic loads is intended to minimize the amount of damage within a building and therefore need to be incorporated into the code to assure that new buildings and additions to existing buildings are designed and constructed in accordance with the scope and objectives of the California Building Code.
1704.6	Geological Administrative	The language in Sections 1704.6 of the California Building Code permits the owner to employ any registered design professional to perform structural observations with minimum guidelines. However, it is important that the registered design professional responsible for the structural design has thorough knowledge of the building he/she designed. By requiring the registered design professional responsible for the structural design, or their designee, who was involved with the design to observe the construction, the quality of the observation for major structural elements and connections that affect the vertical and lateral load resisting systems of the structure will greatly be increased. Additional requirements are provided to help clarify the role and duties of the structural observer and the method of reporting and correcting observed deficiencies to the Building Official. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
1704.6.1	Geological	With the higher seismic demand placed on buildings and structures in this region, the language in sections 1704.6.1, Item 3, of the California Building Code would permit many low-rise buildings and structures with

		complex structural elements to be constructed without the benefit of a structural observation. By requiring a registered design professional to observe the construction, the quality of the observation for major structural elements and connections that affect the vertical and lateral load resisting systems of the structure will be greatly increased. An exception is provided to permit simple structures and buildings to be excluded. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
--	--	---

1705.3	Geological	Results from studies after the 1994 Northridge Earthquake indicated that a significant portion of the damage was attributable to lack of quality control during construction resulting in poor performance of the building or structure. Therefore, the amendment restricts the exceptions to the requirement for special inspection. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
1705.13	Geological	In Southern California, very few detached one- or two-family dwellings not exceeding two stories above grade plane are built as "box-type" structures specially for those in hillside areas and near the oceanfront. Many with steel moment frames or braced frames, and/or cantilevered columns, can still be shown as "regular" structures by calculations. With the higher seismic demand placed on buildings and structures in this region, the language in section 1705.13, Item 3, of the California Building Code would permit many detached one- or two-family dwellings not exceeding two stories above grade plane with complex structural elements to be constructed without the benefit of special inspections. By requiring special inspections, the quality of major structural elements and connections that affect the vertical and lateral load resisting systems of the structure will be greatly increased. The exception should only be allowed for detached one- or two-family dwellings not exceeding two stories above grade plane assigned to Seismic Design Categories A, B, and C.
1807.1.4	Climatic	No substantiating data has been provided to show that a

	Geological	wood foundation is effective in supporting buildings and structures during a seismic event while being subject to deterioration caused by the combined detrimental effect of constant moisture in the soil and wood-destroying organisms. Wood retaining walls, when they are not properly treated and protected against deterioration, have performed very poorly and have led to slope failures. Most contractors are typically accustomed to construction in dry and temperate weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. The proposed amendment takes the necessary precautionary steps to reduce or eliminate potential problems that may result by using wood foundations that experience relatively rapid decay due to the fact that the region does not experience temperatures cold enough to destroy or retard the growth and proliferation of wood-destroying organisms. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the local climate and the increased risk of significant earthquakes in the County.
1807.1.6	Geological	With the higher seismic demand placed on buildings and structures in this region, it is necessary to take precautionary steps to reduce or eliminate potential problems that may result by following prescriptive design provisions that do not take into consideration the surrounding environment. Plain concrete performs poorly in withstanding the cyclic forces resulting from seismic events. In addition, no substantiating data has been provided to show that under-reinforced foundation walls are effective in resisting seismic loads, and may potentially lead to a higher risk of failure. It is important that the benefit and expertise of a registered design professional be obtained to properly analyze the structure and take these issues into consideration. This amendment is a continuation of an amendment adopted during previous code adoption cycles.
1807.2	Climatic, Geological	No substantiating data has been provided to show that wood foundation systems are effective in supporting buildings and structures during a seismic event while being subject to deterioration caused by the combined detrimental effects of constant moisture in the soil and

		<p>wood-destroying organisms. Wood foundation systems not properly treated and protected against deterioration, have performed very poorly and have led to slope failures. Most contractors are typically accustomed to construction in dry and temperate weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. The proposed amendment takes the precautionary steps to reduce or eliminate potential problems that may result in using wood foundation systems that experience relatively rapid decay due to the fact that the region does not experience temperatures cold enough to destroy or retard the growth and proliferation of wood-destroying organisms. This proposed amendment is a continuation of an amendment adopted during previous code adoption cycles.</p>
1807.3.1	Climatic, Geological	<p>No substantiating data has been provided to show that wood foundation systems are effective in supporting buildings and structures during a seismic event while being subject to deterioration caused by the combined detrimental effects of constant moisture in the soil and wood-destroying organisms. Wood foundation systems not properly treated and protected against deterioration, have performed very poorly and have led to slope failures. Most contractors are typically accustomed to construction in dry and temperate weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. The proposed amendment takes the precautionary steps to reduce or eliminate potential problems that may result in using wood foundation systems that experience relatively rapid decay due to the fact that the region does not experience temperatures cold enough to destroy or retard the growth and proliferation of wood-destroying organisms. This proposed amendment is a continuation of an amendment adopted during previous code adoption cycles.</p>
1809.3 and Figure	Geological	<p>With the higher seismic demand placed on buildings and structures in this region, it is necessary to take</p>

1809.3		precautionary steps to reduce or eliminate potential problems that may result for under-reinforced footings located on sloped surfaces. Requiring minimum reinforcement for stepped footings is intended to address the problem of poor performance of plain or under-reinforced footings during a seismic event. This amendment is a continuation of an amendment adopted during previous code adoption cycles.
1809.7 and Table 1809.7	Geological	No substantiating data has been provided to show that under-reinforced footings are effective in resisting seismic loads, and therefore they may potentially lead to a higher risk of failure. This amendment requires minimum reinforcement in continuous footings to address the problem of poor performance of plain or under-reinforced footings during a seismic event. With the higher seismic demand placed on buildings and structures in this region, it is necessary to take precautionary steps to reduce or eliminate potential problems that may result by following prescriptive design provisions for footings that do not take into consideration the surrounding environment. It is important that the benefit and expertise of a registered design professional be obtained to properly analyze the structure and take these factors into consideration. This amendment reflects the recommendations by the SEAOSC and the Los Angeles City Joint Task Force, which investigated the performance deficiencies observed in the 1994 Northridge Earthquake. This amendment is a continuation of an amendment adopted during previous code adoption cycles.
1809.12	Climatic Geological	No substantiating data has been provided to show that timber footings are effective in supporting buildings and structures during a seismic event while being subject to deterioration caused by the combined detrimental effects of constant moisture in the soil and wood-destroying organisms. Timber footings, when they are not properly treated and protected against deterioration, have performed very poorly. Most contractors are typically accustomed to construction in dry and temperate weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. The proposed amendment takes the necessary precautionary steps to

		reduce or eliminate potential problems, which may result by using timber footings that experience relatively rapid decay due to the fact that the region does not experience temperatures cold enough to destroy or retard the growth and proliferation of wood-destroying organisms. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the local climate and the increased risk of significant earthquakes in the County.
1810.3.2.4	Climatic Geological	No substantiating data has been provided to show that timber footings are effective in supporting buildings and structures during a seismic event while being subject to deterioration caused by the combined detrimental effects of constant moisture in the soil and wood-destroying organisms. Timber footings, when they are not properly treated and protected against deterioration, have performed very poorly. Most contractors are typically accustomed to construction in dry and temperate weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. The proposed amendment takes the necessary precautionary steps to reduce or eliminate potential problems that may result by using timber footings that experience relatively rapid decay due to the fact that the region does not experience temperatures cold enough to destroy or retard the growth and proliferation of wood-destroying organisms. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the local climate and the increased risk of significant earthquakes in the County.
1905.1	Geological	This amendment is intended to carry over critical provisions for the design of concrete columns in moment frames from the legacy 1997 Uniform Building Code. Increased confinement is critical to the integrity of such columns and these modifications ensure that it is provided when certain thresholds are exceeded. In addition, this amendment carries over from the legacy 1997 Uniform Building Code a critical provision for the design of concrete shear walls. It essentially limits the use of very highly gravity-loaded walls in being included in the seismic load resisting system, since their failure could have catastrophic effect on the building.

		<p>Furthermore, this amendment was incorporated in the code based on observations from the 1994 Northridge Earthquake. Rebar placed in very thin concrete topping slabs have been observed in some instances to have popped out of the slab due to insufficient concrete coverage. This modification ensures that critical boundary and collector rebars are placed in sufficiently thick topping slab to prevent buckling of such reinforcements. This proposed amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.</p>
1905.1.7	Geological	<p>This amendment requires minimum reinforcement in continuous footings to address the problem of poor performance of plain or under-reinforced footings during a seismic event. This amendment reflects the recommendations by the SEAOSC and the Los Angeles City Joint Task Force, which investigated the poor performance observed in the 1994 Northridge Earthquake. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.</p>
1905.1.8 through 1905.1.11	Geological	<p>These amendments are intended to carry over critical provisions for the design of concrete columns in moment frames from the Uniform Building Code (UBC). Increased confinement is critical to the integrity of such columns and these modifications ensure that it is provided when certain thresholds are exceeded. In addition, this amendment carries over from the UBC a critical provision for the design of concrete shear walls. It essentially limits the use of very highly gravity-loaded walls from being included in the seismic load resisting system, since their failure could have a catastrophic effect on the building. Furthermore, this amendment was incorporated into this Code based on observations from the 1994 Northridge Earthquake. Rebar placed in very thin concrete topping slabs has been observed in some instances to have popped out of the slab due to insufficient concrete coverage. This modification ensures that critical boundary and collector rebars are placed in sufficiently thick slabs to prevent buckling of such reinforcements. This amendment is a continuation of an amendment adopted during previous code</p>

		adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
2304.10.2 and Table 2304.10.2	Geological	Due to the high geologic activities in the Southern California area and the expected higher level of performance on buildings and structures, this proposed local amendment limits the use of staple fasteners in resisting or transferring seismic forces. In September 2007, limited cyclic testing data was provided to the ICC, Los Angeles Chapter Structural Code Committee, showing that stapled wood structural shear panels do not exhibit the same behavior as nailed wood structural shear panels. The test results of stapled wood structural shear panels demonstrated much lower strength and drift than nailed wood structural shear panel test results. Therefore, the use of staples as fasteners to resist or transfer seismic forces shall not be permitted without being substantiated by cyclic testing. This amendment is a continuation of a similar amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
2304.10.3.1	Geological	The overdriving of nails into the structural wood panels still remains a concern when pneumatic nail guns are used for wood structural panel shear wall nailing. Box nails were observed to cause massive and multiple failures of the typical 3/8-inch thick plywood during the 1994 Northridge Earthquake. The use of clipped head nails continues to be restricted from use in wood structural panel shear walls where the minimum nail head size must be maintained in order to minimize nails from pulling through sheathing materials. Clipped or mechanically driven nails used in wood structural panel shear wall construction were found to perform much worse in previous wood structural panel shear wall testing done at the University of California Irvine. The existing test results indicated that, under cyclic loading, the wood structural panel shear walls were less energy absorbent and less ductile. The panels reached ultimate load capacity and failed at substantially less lateral deflection than those using same-size hand-driven nails. This amendment reflects the recommendations by the SEAOSC and the Los Angeles City Joint Task Force, which investigated the poor performance observed in 1994 Northridge Earthquake.

		This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
2304.12.2.8	Climatic Geological	No substantiating data has been provided to show that wood used in retaining or crib walls is effective in supporting buildings and structures during a seismic event while being subject to deterioration caused by the combined detrimental effect of constant moisture in the soil and wood-destroying organisms. Wood used in retaining or crib walls, when it is not properly treated and protected against deterioration, has performed very poorly. Most contractors are typically accustomed to construction in dry and temperate weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. The proposed amendment takes the necessary precautionary steps to reduce or eliminate potential problems that may result by using wood in retaining or crib walls, which experience relatively rapid decay due to the fact that the region does not experience temperatures cold enough to destroy or retard the growth and proliferation of wood-destroying organisms. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the local climate and the increased risk of significant earthquakes in the County.
2305.4	Geological	Many of the hold-down connectors currently in use do not have any acceptance report based on dynamic testing protocols. This amendment continues to limit the allowable capacity to 75% of the acceptance report value to provide an additional factor of safety for statically tested anchorage devices. Cyclic forces imparted on buildings and structures by seismic activity cause more damage than equivalent forces that are applied in a static manner. Steel plate washers will reduce the additional damage that can result when hold-down connectors are fastened to wood framing members. This amendment reflects the recommendations by the SEAOSC and the Los Angeles City Joint Task Force, which investigated the poor performance observed in the 1994 Northridge Earthquake. This amendment is a continuation of an

		amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
2306.2 2306.3 2307.2 2308.6.5.1 2308.6.5.2 Figure 2308.6.5.1 and Figure 2308.6.5.2	Geological	The SEAOSC and the Los Angeles City Joint Task Force that investigated damage to buildings and structures during the 1994 Northridge Earthquake recommended reducing allowable shear values in wood structural panel shear walls or diaphragms that were not substantiated by cyclic testing. That recommendation was consistent with a report to the Governor from the Seismic Safety Commission of the State of California recommending that code requirements be "more thoroughly substantiated with testing." The allowable shear values for wood structural panel shear walls or diaphragms fastened with staples are based on monotonic testing and do not take into consideration that earthquake forces load shear wall or diaphragm in a repeating and fully reversible manner. In September 2007, limited cyclic testing was conducted by a private engineering firm to determine if wood structural panels fastened with staples would exhibit the same behavior as wood structural panels fastened with common nails. The test result revealed that wood structural panels fastened with staples demonstrated much lower strength and stiffness than wood structural panels fastened with common nails. It was recommended that the use of staples as fasteners for wood structural panel shear walls or diaphragms not be permitted to resist seismic forces in structures assigned to Seismic Design Categories D, E and F unless it can be substantiated by cyclic testing. Furthermore, the cities and unincorporated areas within the Los Angeles region have taken extra measures to maintain the structural integrity of the framing of shear walls and diaphragms designed for high levels of seismic forces by requiring wood sheathing be applied directly over the framing members and prohibiting the use of panels placed over gypsum sheathing. This amendment is intended to prevent the undesirable performance of nails when gypsum board softens due to cyclic earthquake displacements and the nail ultimately does not have any engagement in a solid material within the thickness of the gypsum board. This amendment continues the previous amendment adopted during the 2007 code

		adoption cycle.
2308.6.8.1	Geological	With the higher seismic demand placed on buildings and structures in this region, interior walls can easily be called upon to resist over half of the seismic loading imposed on simple buildings or structures. Without a continuous foundation to support the braced wall line, seismic loads would be transferred through other elements such as non-structural concrete slab floors, wood floors, etc. The purpose of this amendment is to limit the use of the exception to structures assigned to Seismic Design Category A, B or C where lower seismic demands are expected. Requiring interior braced walls be supported by continuous foundations is intended to reduce or eliminate the poor performance of buildings or structures. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
Table 2308.6.1	Geological	This amendment specifies minimum sheathing thickness and nail size and spacing so as to provide a uniform standard of construction for designers and buildings to follow. This is intended to improve the performance level of buildings and structures that are subject to the higher seismic demands placed on buildings or structure in this region. This proposed amendment reflects the recommendations by the SEAOSC and the Los Angeles City Joint Task Force, which investigated the performance deficiencies observed in the 1994 Northridge Earthquake. This amendment is a continuation of an amendment adopted during previous code adoption cycles, and is necessary due to the increased risk of significant earthquakes in the County.
2308.6.9	Geological	Due to the high geologic activities in the Southern California area and the required higher level of performance of buildings and structures, this amendment limits the use of staple fasteners in resisting or transferring seismic forces. In September 2007, limited cyclic testing data was provided to the ICC, Los Angeles Chapter Structural Code Committee, showing that stapled wood structural shear panels do not exhibit the same behavior as nailed wood structural shear panels. The test results of stapled wood structural shear panels demonstrated much lower

		<p>strength and drift than nailed wood structural shear panel test results. Therefore, the use of staples as fasteners to resist or transfer seismic forces shall not be permitted without being substantiated by cyclic testing. This amendment is a continuation of a similar amendment adopted during previous code adoption cycles.</p>
3115; Table 3115.8.5.3	Climatic, Geologic	<p>The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the recent 1994 Northridge Earthquake. The region is further impacted by construction of buildings and structures utilizing traditional construction materials that impact the amount of energy, air quality, greenhouse gas emission and construction waste in the area. The proposed amendment addresses structural design requirements specific to intermodal shipping containers, reduce environmental impact of unused and unrecycled intermodal shipping containers, and increase sustainability by reducing consumption of traditional construction materials. The proposed modification needs to be incorporated into the code to assure that new buildings and additions to existing buildings utilizing intermodal shipping containers are designed and constructed in accordance with the scope and objectives of the California Building Code and California Green Building Standards Code</p>
Appendix C	Climatic, Geologic, Voluntary appendix	<p>Los Angeles County is a diverse region with both densely populated urban areas and rural areas with various agricultural and animal husbandry establishments. Many areas of the County have been designated as Fire Hazard Severity Zones due to the increased risk of fire caused by low humidity, strong winds, and dry vegetation, particularly the rural areas which are often used for agricultural purposes. Furthermore, the Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. Due to the need for agricultural buildings to perform appropriately in the County due to its geology and climate, adoption of building standards for such structures is required.</p>
Appendix H	Climatic, Geologic,	<p>Los Angeles County is a diverse region with both densely populated urban areas and rural areas with</p>

	Voluntary appendix	various signs used in the County. The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. In addition, weather events occur seasonally with high winds such as the Santa Ana Winds. Due to the need for signs to perform well in the County due to its climate and geology, adoption of building standards for signs is required.
H103.1	Geologic, Administrative Voluntary appendix	Los Angeles County is a diverse region with both densely populated urban areas and rural areas with various signs used in the County. The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. This provision is amended to cross-reference to applicable legal provisions and also to ensure that signs are located in such a way as to avoid damage to adjacent structures and people given the potential for earthquakes in the County.
H103.2	Geologic, Administrative Voluntary appendix	Los Angeles County is a diverse region with both densely populated urban areas and rural areas with various signs used in the County. The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. This provision is amended to cross-reference to applicable legal provisions and also to ensure that sign projections and clearances are located in such a way as to avoid damage to adjacent structures and people given the potential for earthquakes in the County.
H104.1	Geologic, Voluntary appendix	The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. Due to the risk of geologic activities in the Southern California area, buildings and structures require a high level of performance which is directly proportional to the weight of a structure. By adding the weight of a sign to the identification placard, it will improve the ability to provide structural verification in the event of damage or future modifications.

H105.1	Administrative Voluntary Appendix	The amendment provides a cross reference to Chapter 24 for userconvenience.
H106.1, H106.2	Administrative Voluntary appendix	This change corrects a call out from the model electrical code to the relevant local electrical code and clarifies that a separate electrical permit is required for user convenience.
H110.1	Climatic, Voluntary appendix	Due to the potential for severe local weather conditions with torrential rain, it is necessary to clarify that no portions of the roof sign and supporting members may interfere with proper roof drainage to prevent the potential for roof collapse due to water accumulation.
H116	Climatic, Voluntary appendix	Due to the potential for severe local weather with high speed winds and hot, dry conditions, it is necessary that the most recent test standards as specified in Chapter 35 are adopted in lieu of the older test standards specified in Section H116. This ensures that the risk from fires is minimized.
J101.1 to J101.9	Geological Topographical Climatic	These Sections are revised to include erosion and sediment control measures to address the complex and diverse set of soil types and geologic conditions that exist in the Los Angeles County region.
J101.10	Geological Topographical Climatic	This Section is revised to maintain safety and integrity of public or private property adjacent to grading sites due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J103.1 – J103.2 and Figure J103.2	Geological Topographical Climatic	Sections revised to provide adequate control of grading operations typical to the Los Angeles County region due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J104.2.1 – J104.4	Geological Topographical Climatic	Sections revised or added to provide adequate control of grading operations typical to the Los Angeles County region due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J105.1- J105.14	Geological Topographical Climatic	Sections revised or added to provide adequate control of grading operations typical to the Los Angeles County region due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.

J106.1	Geological Topographical Climatic	Section revised to require more stringent cut slope ratios to address the complex and diverse set of soil types and geologic conditions that exist in the Los Angeles County region.
J107.1- J107.7	Geological Topographical Climatic	Sections revised to provide more stringent fill requirements for slope stability, and settlement due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J107.8 – J107.9	Geological Topographical Climatic	Sections revised to provide more stringent inspection and testing requirements for fill slope stability due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J108.1 – J108.4	Geological Topographical Climatic	Sections revised to provide more stringent slope setback requirements to address the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J109.1 – J109.3	Geological Topographical Climatic	Sections revised to provide more stringent drainage and terracing requirements to address the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J109.5	Geological Topographical Climatic	Subsection added to provide for adequate outlet of drainage flows due to the diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J110.1 - J110.8.5	Geological Topographical Climatic	Sections revised or added to provide for State requirements of storm water pollution prevention and more stringent slope planting, and slope stability requirements to control erosion due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
J111	Geological Topographical Climatic	Section revised to reference additional standards for soils testing due to the complex and diverse set of soil types, climates, and geologic conditions that exist in the Los Angeles County region.
Appendix P P101.1, P102.1, P103.1, P103.4, P107.1	Administrative Voluntary Appendix Climatic Geologic Topographical	Adoption of this appendix is necessary because strict compliance with state and local standards and laws would prevent, hinder, or delay the mitigation of the effects of a declared shelter crisis or other emergency. The modifications to this appendix are administrative in nature, to provide clarification of various provisions of the language of this voluntary Appendix.

P106.1	Climatic,	Los Angeles County is subject to extreme temperatures, and many of these membrane structures will be erected and occupied during severe weather events. It is necessary to include this amendment to ensure the safety, health and comfort of the occupants is maintained during extreme heat and cold.
P110.1.1, P110.1.2	Administrative	These sections are a cross reference to the State Plumbing Code requirement for user convenience and is not adding a new building standard nor enacting a more restrictive requirement. To the extent findings are requested, see prefatory language in this Section.
P110.3	Climatic, Voluntary appendix	The County may utilize mobile restroom facilities that are physically separate from the living facilities. Due to the potential for severe local weather conditions, with extreme temperatures or torrential rain, the distance to the restroom facilities required for the comfort, safety and health of displaced people should be reduced to 300 feet or as determined by the Building Official.

SECTION 93. This ordinance shall become operative on January 1, 2023.

[TITLE26BUILDINGCODE2022CSCC]

ANALYSIS

This ordinance repeals those provisions of Title 27 – Electrical Code – of the Los Angeles County Code that incorporate by reference portions of the 2019 California Electrical Code, and replaces them with provisions that incorporate by reference portions of the 2022 California Electrical Code. Unless deleted or modified herein, the previously enacted provisions of Title 27 continue in effect.

State law requires that the County's Electrical Code impose the same requirements as are contained in the building standards published in the most recent edition of the California Electrical Code except for changes or modifications deemed reasonably necessary by the County because of local climatic, geological, or topographical conditions. Any changes and modifications to requirements contained in the building standards published in the 2022 California Electrical Code that are contained in this ordinance (and are not administrative in nature) are based upon express findings, contained in the ordinance, that such changes are reasonably necessary due to local climatic, geological, or topographical conditions.

This ordinance also makes certain modifications to the administrative provisions of Title 27.

DAWYN R. HARRISON
Acting County Counsel

Requested: 7/26/22
Revised: 8/30/22

ORDINANCE NO. _____

An ordinance amending Title 27 – Electrical Code – of the Los Angeles County Code, by adopting and incorporating by reference portions of the 2022 California Electrical Code with certain changes and modifications, and making other revisions thereto.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Sections 89.102 through 89.114 of Article 89, Article 90, Chapters 1 through 9, and Annexes A, B, C, D, E, F, G, H, I, and J, of Title 27 of the Los Angeles County Code, which incorporate by reference and modify portions of the 2019 California Electrical Code, are hereby repealed.

SECTION 2. Section 80-1.5 is hereby amended to read as follows:

Sec. 80-1.5. California Electrical Code (CEC) Adoption by Reference.

Except as hereinafter changed or modified, Sections 89.102 through 89.114 of Article 89, Article 90, Chapters 1 through 9, and Annexes A, B, C, D, E, F, G, H, I, and J, of that certain Electrical Code known and designated as the ~~2019~~2022 California Electrical Code as published by the California Building Standards Commission are adopted and incorporated by reference into this Title 27 of the Los Angeles County Code as if fully set forth below, as Sections 89.102 through 89.114 of Article 89, Article 90, Chapters 1 through 9, and Annexes A, B, C, D, E, F, G, H, I, and J, of Title 27 of the Los Angeles County Code.

A copy of the ~~2019~~2022 California Electrical Code, hereinafter referred to as the CEC, shall be at all times maintained by the Chief Electrical Inspector for use and examination by the public.

SECTION 3. Section 220.41 is hereby added to read as follows:

Sec. 220.41. Energy Storage Readiness.

For all new one- and two-family dwelling units, the service panels and/or sub panels shall have the capacity of an additional load not less than 5 kVA for every 2,000 square feet of living space, or any fraction thereof, designated to accommodate future energy storage system(s). This load shall be considered continuous, and demand factors shall not apply. Additionally, the service panels and/or sub panels shall have space(s) reserved/dedicated to permit installation of the branch circuit overcurrent protective device(s) for the energy storage system.

SECTION 4. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 California Electrical Code. Some of these changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Electrical Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code that are contained in this ordinance (and are not administrative in nature) are reasonably necessary because of local climatic, geological,

or topographical conditions in the County of Los Angeles, as more particularly described in the table set forth below.

TABLE

ELECTRICAL CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
220.41	Climatic	The County of Los Angeles is a densely populated area with varying and occasionally immoderate temperatures and weather conditions. This creates the need for highly efficient buildings to reduce demand on the electrical grid and, in turn, reduce the use of fossil fuels and improve air quality. The proposed amendment will provide a cost-effective means for homeowners to increase energy savings and reduce the demand on the electrical grid by requiring the installation of an energy storage system for current or future use, with minimal need for additional construction and modification of the existing electrical system.

SECTION 5. This ordinance shall become operative on January 1, 2023.

[TITLE27ELECTRICALCODE2022CSCC]

ORDINANCE NO. _____

An ordinance amending Title 28 – Plumbing Code – of the Los Angeles County Code, by adopting and incorporating by reference portions of the 2022 California Plumbing Code, with certain changes and modifications, and making other revisions thereto.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Sections 119.1.2.0 through 119.1.14.0 of Chapter 1, Chapters 2 through 17, Appendices A, B, D, H, I, and J, which incorporate by reference and modify portions of the 2019 California Plumbing Code, and Appendix S are hereby repealed.

SECTION 2. Chapter 1 is hereby amended to read as follows:

CHAPTER 1

ADMINISTRATION

100 ADOPTION BY REFERENCE.

Except as hereinafter changed or modified, Sections 1.2.0 through 1.14.0 of Chapter 1, Division I, of that certain Plumbing Code known and designated as the 2019 2022 California Plumbing Code as published by the California Building Standards Commission, are adopted and incorporated by reference into this Title 28 of the Los Angeles County Code as if fully set forth below, and shall be known as Sections 119.1.2.0 through 119.1.14.0, respectively, of Chapter 1 of Title 28 of the Los Angeles County Code.

Except as hereinafter changed or modified, Chapters 2 through 17 and Appendices A, B, D, H, I, and J of that certain Plumbing Code known and designated as the ~~2019~~2022 California Plumbing Code as published by the California Building Standards Commission, are adopted and incorporated by reference into this Title 28 of the Los Angeles County Code as if fully set forth below, and shall be known as Chapters 2 through 17, and Appendices A, B, D, H, I, and J of Title 28 of the Los Angeles County Code.

A copy of the ~~2019~~2022 California Plumbing Code shall be at all times maintained by the Chief Plumbing Inspector for use and examination by the public.

...

103.19 Annual Review of Fees. The fees ~~contained~~ in this Code shall be reviewed annually by the ~~Department~~Director of Public Works. Beginning on July 1, 1992, and thereafter on each succeeding July 1, the amount of each fee in this Code shall be adjusted as follows: Calculate the percentage movement between March of the previous year and March of the current year in the Consumer Price Index (CPI) for all urban consumers in the Los Angeles-Long Beach-Anaheim, CA areas, as published by the United States Government Bureau of Labor Statistics; ~~then~~and adjust each fee by said percentage amount ~~and round off to the nearest ten (10) cents,~~ provided, however, that no adjustment shall decrease any fee and no fee shall exceed the reasonable cost of providing services. When it is determined that the amount reasonably necessary to recover the cost of providing services is in excess of this adjustment, the Chief Plumbing Inspector may present fee proposals to the Board of

Supervisors for approval.

SECTION 3. Section 204.0 is hereby amended to read as follows:

204.0 – B –

...

Building Code. The most recent edition of Title 26 of the Los Angeles County Code.

...

SECTION 4. Section 206.0 is hereby amended to read as follows:

206.0 – D –

...

Demand Hot Water Recirculation System. A hot water recirculation system requiring manual activation and equipped with a thermostat that will automatically shut off the recirculation pump when the water temperature reaches a preset level at the point of use.

...

SECTION 5. Section 207.0 is hereby amended to read as follows:

207.0 – E –

...

Electrical Code. The most recent edition of Title 27 of the Los Angeles County Code.

...

SECTION 6. Section 210.0 is hereby amended to read as follows:

210.0

– H –

...

Hot Water Recirculation System. A hot water distribution system that reduces the time needed to deliver hot water to fixtures that are distant from the water heater, boiler, or other water heating equipment. The recirculation system is comprised of hot water supply and return piping with shutoff valves, balancing valves, and circulating pumps, and a method of controlling the circulating system.

...

SECTION 6. Section 215.0 is hereby amended to read as follows:

215.0

– M –

...

Mechanical Code. The most recent edition of Title 29 of the Los Angeles County Code.

...

SECTION 7. Section 301.2.2 is hereby amended to read as follows:

301.2.2

Standards. Standards listed or referred to in this eChapter or other chapters cover materials that will conform to the requirements of this eCode, where used in accordance with the limitations imposed in this or other chapters thereof and their listing. Where a standard covers materials of various grades, weights, quality, or configurations, the portion of the listed standard that is applicable shall be used. Design and materials for special conditions or materials not provided for herein shall be permitted to be used only by special permission of the Authority Having Jurisdiction

after the Authority Having Jurisdiction has been satisfied as to their adequacy. A list of plumbing standards that appear in specific sections of this code is referenced in Table 1701.1. Standards referenced in Table 1701.1 shall be applied as indicated in the applicable referenced section. A list of additional approved standards, publications, practices, and guides that are not referenced in specific sections of this code appear in Table 1701.2. Solar thermal energy systems and material standards are referenced in Tables S 18.1 and S 18.2 of Appendix S. ~~An IAPMO Installation Standards~~ isare referenced in Appendix I for the convenience of the users of this eCode. It is not considered as a part of this eCode unless formally adopted as such by the Authority Having Jurisdiction.

SECTION 8. Section 301.3 is hereby amended to read as follows:

301.3 Alternate Materials and Methods of Construction
Equivalency and Modifications.

301.3.1 Alternate Materials and Methods of Construction.

Nothing in this eCode is intended to prevent the use of systems, methods, or devices of equivalent or superior quality, strength, fire resistance, effectiveness, durability, and safety over those prescribed by this eCode. Technical documentation shall be submitted to the Authority Having Jurisdiction to demonstrate equivalency prior to installation. The Authority Having Jurisdiction shall have the authority to approve or disapprove the system, method, or device for the intended purpose on a case by case basis. [HCD 1] (See Section 1.8.7).

...

301.3.1.1 Testing.

...

301.3.1.1.1 Tests.

...

301.3.1.2.1.2 Request by Authority Having Jurisdiction.

...

301.3.2 Modifications. Whenever there are practical difficulties involved in carrying out the provisions of this Code, the Authority Having Jurisdiction shall have the authority to grant modifications on a case by case basis, upon application of the owner or the owner's authorized agent, provided the Authority Having Jurisdiction shall first find that a special individual reason makes the strict letter of this Code impractical, that the modification is in conformity with the spirit and purpose of this Code, and that such modification does not lessen any health, fire-protection, or other life-safety related requirements. The details of any action granting modifications shall be recorded and entered in the files of the Authority Having Jurisdiction. Application for approval of a modification shall be in accordance with Section 103.12.2.

SECTION 9. Section 304.1 is hereby amended to read as follows:

304.1 General. Plumbing fixtures, drains, appurtenances, and appliances; used to receive or discharge liquid wastes or sewage; shall be connected properly to the drainage system of the building or premises, in accordance with the requirements of this eCode.

Exception: *[HCD 1] Limited-density owner-built rural dwellings. Where conventional plumbing, in all or in part, is installed within the structure, it shall be*

installed in accordance with the provisions of this eCode. Alternative materials and methods shall be permitted provided that the design complies with the intent of the eCode, and that such alternatives shall perform to protect health and safety for the intended purpose.

Dual waste piping shall be installed to permit the discharge from clothes washers, bathtubs, showers, and bathroom/restroom wash basins to be used for a graywater irrigation system. Partial connection of plumbing fixtures to the graywater system, based on accepted engineering practices and required volume of water for irrigation, shall be accepted. Graywater systems shall be designed and installed in accordance with Chapter 15 and other parts of this Code.

Exceptions:

(1) Buildings with a graywater system, rain catchment system, or recycled water system.

(2) Sites with landscape areas not exceeding 500 square feet.

(3) Projects where graywater systems are not permitted due to geological conditions.

(4) Additions and alterations that use the existing building drain.

SECTION 10. Section 601.2.3 is hereby added to read as follows:

601.2.3 Hot Water Recirculation Systems. A hot water recirculation system shall be installed, as defined in Chapter 2, and shall not allow more than 0.6 gallons of water to be delivered to any fixture before hot water arrives. Hot water recirculation systems may include, but are not limited to, the following:

- (1) Timer-initiated systems.
- (2) Temperature sensor-initiated systems.
- (3) Occupancy sensor-initiated systems.
- (4) Smart hot water recirculation systems.
- (5) Demand hot water recirculation systems.
- (6) Other systems acceptable to the Authority Having Jurisdiction.

Exception: Minor additions and alterations as determined by the Authority Having Jurisdiction that utilizes the existing water distribution pipe system and which does not contain a hot water recirculation system.

SECTION 11. Section 609.7 is hereby amended to read as follows:

609.7 Abutting Lot. Nothing contained in this eCode shall be construed to prohibit the use of all or part of an abutting or adjacent lot or lots to:

...

SECTION 12. Section 721.3 is hereby added to read as follows:

721.3 Public Sewer. If the public sewer does not extend to a point from which each building on a lot or parcel of land large enough to permit future subdivision can be independently served, the property owner shall construct a public sewer as required by Title 20 – Utilities – of the Los Angeles County Code, Division 2 – Sanitary Sewer and Industrial Waste Ordinance, to provide adequate sewerage for each such possible parcel.

Exception: When the Authority Having Jurisdiction finds that the character of a lot is such that no further subdivision can be reasonably anticipated, or the use is such

as to preclude subdivision, or where the owner has executed a covenant stating that the lot or parcel of land, together with all improvements thereon, will be maintained as a unit and that before any subdivision is made or any portion of said lot is transferred to another owner, separate sewerage facilities as hereinbefore required in this Section will be installed, the drainage system of all buildings may be connected to a common building sewer or private sewage disposal system. The covenant shall be recorded by the owner in the office of the Registrar-Recorder as part of the conditions of ownership of said property. Such agreement shall be binding on all heirs, successors, and assigns to said property.

This exception shall apply only while the whole of such lot remains in one undivided ownership. Upon the transfer of any portion of such lot other than the whole thereof to another owner, whether such transfer is made before or after the operative date of the ordinance adding this provision, the exception shall cease and a person shall not use or maintain any building or structure except in compliance with the provisions of this Code. As used in this Section, a sale, foreclosure, or contract to sell by the terms of which the purchaser is given the right of possession shall be deemed a transfer.

SECTION 13. Section 728.0 is hereby added to read as follows:

728.0 **Building Sewer Connection Requirements.**

728.1 **Size.** That portion of the building sewer extending from the public sewer to the property line shall be not less than four (4) inches (100 mm) in internal diameter.

728.2 **Depth.** When laid within the limits of any public thoroughfare when the public sewer is sufficiently deep, no building sewer shall be less than six (6) feet (1.8 m) below grade. Whenever practicable, the alignment and grade of each building sewer shall be straight from the public sewer to the property line.

728.3 **Taps and Saddles.** Whenever it becomes necessary to connect a building sewer to a public sewer at a point where no branch fitting has been installed in the public sewer, such connection shall be made as required by Title 20 – Utilities – of the Los Angeles County Code, Division 2 – Sanitary Sewer and Industrial Waste Ordinance.

728.4 **Connection to Trunks.** Whenever required, an approved-type unvented running trap shall be installed in each building sewer, which is connected directly to a trunk sewer by any means whatsoever. Each such running trap shall be installed in the building sewer between the house drain or drains and the connection to the trunk sewer. A T-type cleanout shall be installed in the building sewer immediately below the running trap. This cleanout need not be extended to grade. Every running trap and cleanout shall be located on the lot served by the building sewer.

728.5 **Street Widening.** Where a future street or road-widening area has been established by the master plan of highways or in any other manner, all work installed in such area shall conform to the requirements established in this or other related ordinances for work on public property.

728.6 **Main Line Required.** Building sewer construction shall conform to the requirements of main line sewers as set forth in Title 20 – Utilities – of

the Los Angeles County Code, Division 2 – Sanitary Sewer and Industrial Waste

Ordinance, when either of the following conditions exists:

1. Where the Authority Having Jurisdiction requires such construction because of the character or quantity of the sewage or industrial waste to be discharged.

2. Where the sewer is designed to be, or proposed to be, dedicated to the County of Los Angeles at the present or any future time.

SECTION 14. Table H 101.8 of Appendix H is hereby amended to read as follows:

TABLE H 101.8
LOCATION OF SEWAGE DISPOSAL SYSTEM

MINIMUM HORIZONTAL DISTANCE	BUILDING SEWER	SEPTIC TANK	DISPOSAL FIELD	SEEPAGE PIT OR CESSPOOL
Building or structures ¹	2 feet	5 feet	8 feet	8 feet
Property line adjoining private property	Clear ²	5 feet	5 feet	8 feet
Water supply wells ³	50 feet ³	50 feet	100 feet	150 feet
Streams and other bodies of water ²	50 feet	50 feet	100 feet ⁷	150 feet ⁷
Trees ¹⁰		10 feet		10 feet
Seepage pits or cesspools ⁸		5 feet	5 feet	12 feet
Disposal field ⁸		5 feet	4 feet ⁴	5 feet
On-site domestic water service line	1 foot ⁵	5 feet	5 feet	5 feet
Distribution box			5 feet	5 feet
Pressure public water main	10 feet ⁶	10 feet	10 feet	10 feet

For SI units: 1 foot = 304.8 mm

Notes:

- 1 Including porches and steps, whether covered or uncovered, breezeways, roofed porte cocheres, roofed patios, carports, covered walks, covered driveways, and similar structures or appurtenances.
- 2 See Section 312.3.
- 3 Drainage piping shall clear domestic water supply wells by not less than 50 feet (15 240 mm). This distance shall be permitted to be reduced to not less than 25 feet (7620 mm) where the drainage piping is constructed of materials approved for use within a building.
- 4 Plus 2 feet (610 mm) for each additional 1 foot (305 mm) of depth in excess of 1 foot (305 mm) below the bottom of the drain line. (See Section H 601.0)
- 5 See Section 720.0.

- 6 For parallel construction -- For crossings, approval by the Health Department shall be required.
- 7 These minimum clear horizontal distances shall also apply between disposal fields, seepage pits, and the mean high-tide line.
- 8 Where disposal fields, seepage pits, or both are installed in sloping ground, the minimum horizontal distance between any part of the leaching system and ground surface shall be 15 feet (4572 mm).
- 9 Where special hazards are involved, the distance required shall be increased as may be directed by the Authority Having Jurisdiction.
- 10 The septic tank and seepage pit shall not be within the protected zone of an oak tree as defined by Section 22.14.150 of Title 22 – Planning and Zoning – of the Los Angeles County Code.

SECTION 15. Table H 201.1(1) of Appendix H is hereby amended to read as follows:

TABLE H 201.1(1)
CAPACITY OF SEPTIC TANKS^{1, 2, 3, 4, 5}

SINGLE-FAMILY DWELLINGS - NUMBER OF BEDROOMS	MULTIPLE DWELLING UNITS OR APARTMENTS - ONE BEDROOM EACH	OTHER USES: MAXIMUM FIXTURE UNITS SERVED PER TABLE 702.1	MINIMUM SEPTIC TANK CAPACITY (gallons)
1 or 2	—	15	750
3	—	20	1000
4	2 units	25	1200
5 or 6	3	33	1500
—	4	45	2000
—	5	55	2250
—	6	60	2500
—	7	70	2750
—	8	80	3000
—	9	90	3250
—	10	100	3500

For SI units: 1 gallon = 3.785 L

Notes:

- 1 Extra bedroom, 150 gallons (568 L) each.
- 2 Extra dwelling units over 10:250 gallons (946 L) each.
- 3 Extra fixture units over 100, 25 gallons (94.6 L) per fixture unit.
- 4 Septic tank sizes in this table include sludge storage capacity and the connection of domestic food waste disposers without further volume increase.
- 5 Applies to mobile homes not installed in a mobile home park.

SECTION 16. Table H 201.1(2) of Appendix H is hereby amended to read as follows:

TABLE H 201.1(2)
DESIGN CRITERIA OF FIVESIX TYPICAL SOILS

TYPE OF SOIL	REQUIRED SQUARE FEET OF LEACHING AREA PER 100 GALLONS	MAXIMUM ABSORPTION CAPACITY IN GALLONS PER SQUARE FEET OF LEACHING AREA FOR A 24 HOUR PERIOD
Coarse sand or gravel	20	5.0
Fine sand	25	4.0
Sandy loam or sandy clay	40	2.5
<u>Sandy clay</u>	<u>60</u>	<u>1.66</u>
Clay with considerable sand or gravel	90	1.1
Clay with small amount of sand or gravel	120	0.8

For SI units: 1 square foot = 0.0929 m², 1 gallon = 3.785 L, 1 gallon per square foot = 40.7 L/m²

SECTION 17. Table H 201.1(3) of Appendix H is hereby amended to read as follows:

TABLE H 201.1(3)
LEACHING AREA SIZE BASED ON SEPTIC TANK CAPACITY

REQUIRED SQUARE FEET OF LEACHING AREA PER 100 GALLONS SEPTIC TANK CAPACITY (square feet per 100 gallons)	MAXIMUM SEPTIC TANK SIZE ALLOWABLE (gallons)
20-25	7500
40	5000
<u>60</u>	<u>3500</u>
90	3500 <u>3000</u>
120	3000 <u>2500</u>

For SI units: 1 square foot per 100 gallons = 0.000245 m²/L, 1 gallon = 3.785 L

SECTION 18. Table H 201.1(4) of Appendix H is hereby amended to read as follows:

TABLE H 201.1(4)

ESTIMATED WASTE SEWAGE FLOW RATES^{1, 2, 3}

DRAFT

TYPE OF OCCUPANCY	GALLONS PER DAY
Airports (per employee)	15
Airports (per passenger)	5
Auto washers – check with equipment manufacturer	-
Bowling alleys – with snack bar only (per lane)	75
Campground – with central comfort station (per person)	35
Campground – with flush toilets - no showers (per person)	25
Camps (day) – no meals served (per person)	15
Camps (summer and seasonal camps) – (per person)	50
Churches – sanctuary (per seat)	5
Churches – with kitchen waste (per seat)	7
Dance halls – (per person)	5
Factories – no showers (per employee)	25
Factories – with showers (per employee)	35
Factories – with cafeteria (per employee)	5
Hospitals – (per bed)	250
Hospitals – kitchen waste only (per bed)	25
Hospitals – laundry waste only (per bed)	40
Hotels – no kitchen waste (per bed)	60
Institutions – resident (per person)	75
Nursing home – (per person)	125
Rest home – (per person)	125
Laundries – self-service with minimum 10 hours per day (per wash-cycle machine)	300 50
Laundries – commercial check with manufacturer's specification	-
Motel (per bed space)	50
Motel – with kitchen (per bed space)	60

Offices – (per employee)	20
Parks – mobile homes (per space)	250
Parks (picnic) – with toilets only (per parking space)	20
Parks (recreational vehicles) – without water hook-up (per space)	75
Parks (recreational vehicles) – with water and sewer hook-up (per space)	100
Restaurants – cafeteria (per employee seat)	50 20
Restaurants – with toilet waste (per customer)	7
Restaurants – with kitchen waste (per meal)	6
Restaurants – with kitchen waste disposable service (per meal)	2
Restaurants – with garbage disposal (per meal)	4
Restaurants – with cocktail lounge (per customer)	2
Schools staff and office (per person)	20
Schools – elementary (per student)	15
Schools – intermediate and high (per student)	20
Schools – with gym and showers (per student)	5
Schools – with cafeteria (per student)	3
Schools (boarding) – total waste (per person)	100
Service station – with toilets for 1 st bay	1000
Service station – with toilets for each additional bay	500
Stores – (per employee)	20
Stores – with public restrooms (per 10 square feet of floor space)	1
Swimming pools – public (per person)	10
Theaters – auditoriums (per seat)	5
Theaters – with drive-in (per space)	10

For SI units: 1 square foot = 0.0929 m², 1 gallon per day 3.785 L/day

Notes:

1. Sewage disposal systems sized using the estimated waste/sewage flow rates shall be calculated as follows:

- (a) ~~Waste/sewage flow, up to 1500 gallons per day (5678 L/day)~~
Flow x 1.5 = septic tank size
- (b) ~~Waste/sewage flow, over 1500 gallons per day (5678 L/day)~~

Flow x 0.75 + 1125 = septic tank size
(e) ~~Secondary system shall be sized for total flow per 24 hours.~~

²¹ See Section H 201.1.

³² Because of the many variables encountered, it is not possible to set absolute values for waste/sewage flow rates for all situations. The designer should evaluate each situation and, where figures in this table need modification, they should be made with the concurrence of the Authority Having Jurisdiction.

SECTION 19. Section H 301.1 is hereby amended to read as follows:

H 301.1 General.

. . .

(3) No excavation for a leach line or leach bed shall be located within 5 feet (1524 mm) of ~~the groundwater table~~ nor to a depth where sewage is capable of ~~contaminating~~ may contaminate the underground water stratum ~~that is useable for domestic purposes.~~

Exception: ~~In areas where the records or data indicate that the groundwaters are grossly degraded, the 5 foot (1524 mm) separation requirement shall be permitted to be reduced by the Authority Having Jurisdiction.~~ When approved by the Authority Having Jurisdiction, this distance may be reduced to 5 feet (1524 mm) from ocean water. The applicant shall supply evidence of groundwater depth to the satisfaction of the Authority Having Jurisdiction.

(4) The minimum effective absorption area in any seepage pit shall be calculated as the excavated sidewall area below the inlet exclusive of any hardpan, rock, clay, or other impervious formations. The minimum required area of porous formation shall be provided in one or more seepage pits. No excavation shall extend within 10 feet (3048 mm) of ~~the groundwater table~~ nor to a depth where sewage is ~~capable of contaminating~~ may contaminate the underground water stratum ~~that is~~

useable for domestic purposes.

Exception: ~~In areas where the records or data indicate that the groundwaters are grossly degraded, the 10 foot (3048 mm) separation requirement shall be permitted to be reduced by the Authority Having Jurisdiction.~~ When approved by the Authority Having Jurisdiction, this distance may be reduced to 5 feet (1524 mm) from ocean water.

...

SECTION 20. Section H 401.3 is hereby amended to read as follows:

H 401.3 Absorption Rates. Where a percolation test is required, the proposed system shall have the capability to absorb a quantity of clear water in a 24-hour period equal to at least five times the liquid capacity of the proposed septic tank.
~~n~~No private disposal system shall be permitted to serve a building if that test shows the absorption capacity of the soil is less than 0.83 gallons per square foot (gal/ft²) (33.8 L/m²) or more than 5.12 gal/ft² (208.6 L/m²) of leaching area per 24 hours. Where the percolation test shows an absorption rate greater than 5.12 gal/ft² (208.6 L/m²) per 24 hours, a private disposal system shall be permitted where the site does not overlie groundwaters protected for drinking water supplies, a minimum thickness of 2 feet (610 mm) of the native soil below the entire proposed system is replaced by loamy sand, and the system design is based on percolation tests made in the loamy sand.

SECTION 21. Section H 601.5 is hereby amended to read as follows:

H 601.5 Distribution Boxes. Where two or more drain lines are installed, an approved distribution box of sufficient size to receive lateral lines shall be

installed at the head of each disposal field. The inverts of outlets shall be level, and the invert of the inlet shall be not less than 1 inch (25.4 mm) above the outlets. Distribution boxes shall be designed to ensure equal flow and shall be installed on a level concrete slab in natural or compacted soil. Distribution boxes shall be coated on the inside with a bituminous coating or other approved method acceptable to the Authority Having Jurisdiction.

SECTION 22. Section H 601.8 is hereby amended to read as follows:

H 601.8 Dosing Tanks. ~~Where the quantity of sewage exceeds the amount that is permitted to be disposed in 500 lineal feet (152.4 m) of leach line, a dosing tank shall be used. Dosing tanks shall be equipped with an automatic siphon or pump that discharges the tank once every 3 or 4 hours. The tank shall have a capacity equal to 60 to 75 percent of the interior capacity of the pipe to be dosed at one time. Where the total length of pipe exceeds 1000 lineal feet (305 m), the dosing tank shall be provided with two siphons or pumps dosing alternately and each serving one half of the leach field.~~ Automatic syphon or dosing tanks shall be installed when required or as permitted by the Authority Having Jurisdiction.

SECTION 23. Section H 701.2 is hereby amended to read as follows:

H 701.2 Multiple Installations. Multiple seepage pit installations shall be served through an approved distribution box or be connected in series ~~using watertight connection laid on undisturbed or compacted soil. The outlet from the pit shall have.~~ When connected in series, the effluent shall leave each pit through an approved vented leg fitting extending not less than 12 inches (305 mm) below the inlet

~~fitting~~downward into such existing pit and having its outlet flow line at least 6 inches
below the inlet. All pipe between pits shall be laid with approved watertight joints.

SECTION 24. Section H 1001.1 is hereby amended to read as follows:

H 1001.1 **Inspection.** Inspection requirements shall comply with the following:

(1) Applicable provisions of Section ~~405.0~~104.0 of this eCode and this
aAppendix shall be required. Plans shall be required in accordance with
Section ~~403.3~~102.1 of this eCode.

...

(5) Disposal fields and seepage pits shall not be installed in uncompacted fill.

SECTION 25. Section H 1101.6 is hereby added to read as follows:

H 1101.6 **Excavation.** No excavation for an abandoned sewer or
sewage facility shall be left unattended at any time, unless the permittee shall have first
provided a suitable and adequate barricade to assure public safety.

SECTION 26. Appendix S is added as follows:

APPENDIX S

SOLAR THERMAL ENERGY SYSTEMS

S 1.0 **General.**

In addition to the requirements of this Appendix, the provisions of this Code and
Title 29 - Mechanical Code of the Los Angeles County Code shall apply to the erection,
installation, alteration, relocation, replacement, addition to, use, maintenance and repair

of solar thermal energy systems, including but not limited to equipment and appliances intended to utilize solar thermal energy for water heating and swimming pool heating.

S 2.0 Definitions.

For the purpose of this Appendix, certain terms, words, phrases and their derivatives shall be construed as set forth in this Section. Whenever terms are not defined, their ordinary dictionary meaning shall apply.

Absorber. That part of the solar collector that receives the incident radiation energy.

Absorptance. The collecting of heat, measured as percent of total radiation available.

Ambient Temperature. Surrounding temperature.

Aperture. The maximum projected area of a solar collector through which the unconcentrated solar radiant energy is admitted.

Area, Absorber. The total projected heat transfer area from which the absorbed solar irradiation heats the transfer media.

Auxiliary Heating System. Equipment using non-solar energy sources to supplement or backup the output provided by a solar thermal energy system.

Closed Loop System. A system where the fluid is enclosed in a piping system that is not vented to the atmosphere.

Collector. See Solar Collector.

Collector Cover (Glazing). The material covering the aperture to provide thermal and environmental protection.

Collector System. That section of the solar system that includes the collector and piping or ducts from the collector to the storage system.

Combustible Liquid. A liquid having a flash point at or above 100°F (38°C). Combustible liquids shall be divided into the following classifications:

- (1) Class II liquids having a flash point above 100°F (38°C) and below 140°F (60°C).
- (2) Class IIIA liquids having a flash point at or above 140°F (60°C) and below 200°F (93°C).
- (3) Class IIIB liquids having a flash point at or above 200°F (93°C).

The classifications of combustible liquids do not include compressed gases or cryogenic fluids.

Concentrating Solar Collector. A solar collector that uses reflectors, lenses, or other optical elements to concentrate the radiant energy passing through the aperture onto an absorber of which the surface area is smaller than the aperture area.

Design Pressure. The maximum allowable pressure for which a specific part of a system is designed.

Design Temperature. The maximum allowable continuous or intermittent temperature for which a specific part of a solar energy system is designed to operate safely and reliably.

Distribution System. That section of the solar system from the storage system to the point of use.

Drainback System. A closed loop system, which allows gravity draining of the heat transfer fluid into, lower portions or the solar loop under prescribed circumstances.

Draindown (Drainback). An active solar energy system in which the fluid in the solar collector is drained from the solar energy system under prescribed circumstances.

Energy Collector Fluid. That fluid used to transfer energy from the collector to the storage system or point of use.

Energy Storage Fluid (or Media). That fluid (or media) used in the storage container for storing collected energy.

Energy Transfer Fluid. That fluid used within a closed system either from the collector to the storage system or from the storage system to the point of use.

Essentially Nontoxic Transfer Fluid. Fluid generally recognized as safe by the Food and Drug Administration (FDA) as food grade.

External Auxiliary Heating. Auxiliary heating device located outside the storage. The heat is transferred to the storage by direct or indirect charging via a charge loop.

Fail-Safe Freeze Protection. A freeze-protection method that does not rely on the activation or continued operation of any mechanical or electrical component.

Flammable Liquid. Any liquid that has a flash point below 100°F (38°C), and has a vapor pressure not exceeding 40 psi (276 kPa) at 100°F (38°C). Flammable liquids shall be known as Class I liquids and shall be divided into the following classifications:

- (1) Class IA liquids having a flash point below 73°F (23°C) and a boiling point below 100°F (38°C).

(2) Class IB liquids having a flash point below 73°F (23°C) and a boiling point at or above 100°F (38°C).

(3) Class IC liquids having a flash point at or above 73°F (23°C) and below 100°F (38°C).

Flash Point. The minimum temperature corrected to a pressure of 14.7 psi (101 kPa) at which a test flame causes the vapors of a portion of the sample to ignite under the conditions specified by the test procedures and apparatus. The flash point of a liquid shall be determined in accordance with ASTM D 56, ASTM D 93, or ASTM D 3278.

Freeze Protection. Any method for protecting solar thermal systems from damage due to freezing conditions where installed in locations where freezing ambient temperature conditions exist.

Heat Exchanger. A device that transfers heat from one medium to another.

Heat Transfer Medium. The medium used to transfer energy from the solar collectors to the thermal storage or load.

Immersed Heat Exchanger. Heat exchanger, which is completely surrounded with the fluid in the storage tank.

Instantaneous Efficiency. The amount of energy removed by the transfer fluid per gross collector area. During the specified time period, divided by the total solar radiation incident on the collector per unit area during the same test period, under steady state or quasi-steady state.

Integral Collector Storage. A solar thermal heating system that uses a solar collector that has all or most of its heat transfer medium inside the collector.

Langelier Saturation Index. A formula used to measure water balance or mineral saturation control of pool, spa, or hot tub water. Total alkalinity, calcium hardness, pH, water temperature, and total dissolved solids are measured, given a factor, and calculated to determine whether water has a tendency to be corrosive or scale forming.

Open Loop System. A system where the fluid is enclosed in a piping system that is vented to the atmosphere.

Out-Gassing. As applied to thermal energy, the thermal process by which materials expel gas.

Passive Solar Systems. As used in these requirements, are solar systems that utilize elements of a building, without augmentation by mechanical components such as blowers or pumps, to provide for the collections, storage, or distribution of solar energy for heating, cooling, or both.

Rock Storage. A bin, basement, or other container filled with rock to act as an energy reservoir for a solar system.

Solar Collector. A device used to absorb energy from the sun.

Solar Energy System. A configuration of equipment and components to collect, convey, store, and convert the sun's energy for a purpose.

Solar Energy System Components. Any appliance, assembly, device, equipment, or piping used in the conversion of solar energy into thermal energy for service water heating, pool water heating, space heating and cooling, and electrical service.

Solar Thermal Energy System. See Solar Thermal System.

Solar Thermal System. A complete assembly of subsystems which convert solar energy into thermal energy and utilize this energy for service water heating, pool water heating, space heating and cooling purposes.

Storage Temperature. Temperature of the storage medium.

Thermal Energy. The amount of sensible heat energy stored within a material or fluid. The product of the mass, specific thermal capacity and temperature increase/decrease of the material or fluid. Also known as sensible heat energy.

Thermal Storage. A tank or vessel used in a solar thermal, hydronic, or geothermal system, in which thermal energy is stored.

Thermosiphon. The natural circulation of fluids due to temperature differential.

Total Alkalinity. The sum of all alkaline minerals in the water that is primarily in bicarbonate form, but also as sodium, calcium, magnesium, potassium carbonates, and hydroxides. It is a measure of the water's ability to resist changes in pH.

S 3.0 Permits Required.

It shall be unlawful for a person, firm, or corporation to construct, install, alter, repair, replace, or remodel a solar thermal energy system regulated by this Code or cause the same to be done without first obtaining a separate permit for each separate system or interconnected set of systems as specified in Section 103.0 of this Code.

S 4.0 Plans and Specifications.

Plans, engineering calculations, diagrams, and other data shall be submitted in one or more sets with each application for a permit. Where required by the Authority

Having Jurisdiction, the plans, computations, diagrams, specifications and other data shall be prepared by, and the solar thermal energy system designed by, an engineer, an architect, or both who shall be licensed by the state to practice as such.

Exception: The submission of plans, calculations or other data may be waived where the Authority Having Jurisdiction determines that the nature of the work applied for is such that reviewing of plans is not necessary to obtain compliance within the Code.

S 5.0 Installation.

S 5.1 Listed Appliances. Except as otherwise provided in this Code, the installation of appliances regulated by this Code shall be in accordance with the conditions of the listing. The appliance installer shall leave the manufacturer's installation and operating instructions attached to the appliance. Clearances of listed appliances from combustible materials shall be as specified in the listing or on the rating plate.

S 5.2 Standards. Standards listed or referred to in this Appendix or other provisions of this Code cover materials that will conform to the requirements of this Code, where used in accordance with the limitations prescribed in this Code and their listing. Where a standard covers materials of various grades, weights, quality, or configurations, the portion of the listed standard that is applicable shall be used. Design and materials for special conditions or materials not provided for herein may be permitted as authorized by Section 301.3. A list of standards that appear in specific sections of this Appendix are referenced in Table S 18.1. A List of additional standards,

publications, practices and guides that are not referenced in specific sections of this Appendix appear in Table S 18.2. The documents indicated in Table S 18.2 shall be permitted in accordance with Section 301.3.

S 6.0 Inspection and Testing.

S 6.1 General. Solar thermal energy systems for which a permit is required by this Code shall be inspected by the Authority Having Jurisdiction. No solar thermal energy system or portion thereof shall be covered, concealed, or put into use until it first has been tested, inspected, and approved as prescribed in this Code. Neither the Authority Having Jurisdiction nor the jurisdiction shall be liable for expense entailed in the removal or replacement of material required to permit inspection. Solar thermal energy systems regulated by this Code shall not be connected to the water, the energy fuel supply, or the sewer system until authorized by the Authority Having Jurisdiction. Installation of a solar thermal energy system shall comply with other parts of this Code including Section 104.0.

S 6.2 Required Inspection. New solar thermal energy system work and such portions of existing systems as affected by new work, or changes, shall be inspected by the Authority Having Jurisdiction to ensure compliance with the requirements of this Code and to ensure that the installation and construction of the solar thermal energy system is in accordance with approved plans. The Authority Having Jurisdiction shall make the following inspections and other such inspections as necessary. The permittee or the permittee's authorized agent shall be responsible for the scheduling of such inspections as follows:

- (1) Underground inspection shall be made after trenches or ditches are excavated and bedded, piping installed, and before backfill is put in place.
- (2) Rough-in inspection shall be made prior to the installation of wall or ceiling membranes.
- (3) Final inspection shall be made upon completion of the installation.

S 6.3 Testing. Solar thermal energy systems shall be tested and approved as required by this Code or the Authority Having Jurisdiction.

S 6.3.1 Piping. The piping of the solar thermal system shall be tested with water, air, a heat transfer medium, or as recommended by the manufacturer's instructions, except that plastic pipe shall not be tested with air. The Authority Having Jurisdiction shall be permitted to require the removal of plugs, etc., to ascertain where the pressure has reached all parts of the system.

S 6.3.2 System Requirements. Prior to the installation of insulation and startup, a solar thermal system, including piping, collectors, heat exchangers, and other related equipment, shall be tested and proved airtight.

S 6.3.2.1 Direct (Open Loop) Systems. Direct (open loop) systems shall be tested under a water pressure not less than one and one-half times the maximum design operating pressure or 150 pounds force per square inch (psi) (1034 kPa), whichever is more. Systems shall withstand the test without leaking for a period of not less than 15 minutes.

S 6.3.2.2 Indirect (Closed Loop) Systems. Indirect (closed loop) systems shall be hydrostatically tested at one and one-half times the maximum designed operating

pressure in accordance with the manufacturer's installation instructions. Systems shall withstand the test without leaking for a period of not less than 15 minutes.

S 6.3.3 Test Pressure for Storage Tanks. The test pressure for storage tanks that are subject to water pressure from utility mains (with or without a pressure reducing valve) shall be two times the working pressure but not less than 300 psi (2068 kPa).

S 6.3.3.1 Pressure Type. Pressure-type storage tanks exceeding 15 psi (103 kPa) shall be tested in accordance with ASME BPVC Section VIII. Pressure-type storage tanks not exceeding 15 psi (103 kPa) shall be hydrostatically tested at one and one-half times the maximum design operating pressure.

S 6.3.3.2 Atmospheric-Type. Atmospheric-type thermal storage tanks shall be tested by filling with water for a period of 24 hours prior to inspection and shall withstand the test without leaking. No thermal storage tank or portion thereof shall be covered or concealed prior to approval.

S 6.3.4 Connection to Service Utilities. No person shall make connections from a source of energy or fuel to a solar thermal energy system or equipment regulated by this Code and for which a permit is required until approved by the Authority Having Jurisdiction. No person shall make connection from a water-supply line nor shall connect to a sewer system regulated by this Code and for which a permit is required until approved by the Authority Having Jurisdiction. The Authority Having Jurisdiction shall be permitted to authorize temporary connection of the solar thermal energy system equipment to the source of energy or fuel for the purpose of testing the equipment.

S 7.0 Water Heating Systems.

S 7.1 Solar Water Heating System. Solar water heating systems shall be in accordance with IAPMO S1001.1 or ICC 900/SRCC 300. Where solar collectors are capable of being isolated from the remainder of the system, a suitable pressure relief valve shall be installed in the isolatable section.

S 7.2 Auxiliary Heating System. An auxiliary heating system shall be installed in conjunction with the solar thermal system and shall be adequate to provide service in the absence of solar thermal energy input. An auxiliary heating system that utilizes electricity as the energy source shall be in accordance with Section S 15.0. Auxiliary heating systems that utilize solid fuel or fuel gas as the energy source shall be in accordance with Title 29 - Mechanical Code of the Los Angeles County Code.

S 8.0 Abandonment.

S 8.1 General. An abandoned solar thermal energy system or part thereof shall be disconnected from remaining systems, drained, plugged, and capped in a manner satisfactory to the Authority Having Jurisdiction.

S 8.2 Storage Tank. An underground water storage tank that has been abandoned or discontinued otherwise from use in a solar thermal energy system shall be completely drained and filled with earth, sand, gravel, concrete, or other approved material or removed in a manner satisfactory to the Authority Having Jurisdiction.

S 9.0 Tanks.

S 9.1 Storage Tanks.

S 9.1.1 Plans. Plans for tanks shall be submitted to the Authority Having Jurisdiction for approval, unless listed by an approved listing agency. Such plans shall show dimensions, reinforcing, structural calculations, and such other pertinent data as required by the Authority Having Jurisdiction.

S 9.1.2 Atmospheric Tanks. Atmospheric storage tanks shall be vented to the atmosphere and installed in accordance with the manufacturer's installation instructions.

S 9.1.2.1 Overflow. Gravity tanks shall be installed with an overflow opening of not less than 2 inches in diameter. The openings shall be above ground and installed with a screened return bend.

S 9.1.2.2 Makeup Water. Makeup water from a potable water system to an atmospheric tank shall be protected by an air gap.

S 9.1.2.3 Draining. An overflow shall be provided for an atmospheric tank. The overflow shall be provided with a means of drainage in accordance with Section 303.0 of this Code. The overflow for an atmospheric tank containing nonpotable water shall be emptied into an approved container.

S 9.1.3 Prefabricated Storage Tanks. Prefabricated tanks shall be listed by an approved agency and labeled.

S 9.1.4 Pressure Vessels. A pressure-type storage tank exceeding an operating pressure of 15 psi (103kPa) shall be constructed in accordance with ASME BPVC Section VIII.1. Fiber-reinforced plastic storage tanks shall be constructed in accordance with ASME BPVC Section X.

S 9.1.5 Devices. Devices attached to or within a tank shall be accessible for repair and replacement.

S 9.1.5.1 Safety Devices. Pressure-type thermal storage tanks shall be installed with a listed combination temperature and pressure relief valve in accordance with Section S 13.3.1. The temperature setting shall not exceed 210°F (99°C) and the pressure setting shall not exceed 150 percent of the maximum designed operating pressure of the system, or 150 percent of the established normal operating pressure of the piping materials, or the labeled maximum operating pressure of a pressure-type storage tank, whichever is less. The pressure and temperature setting shall not exceed the pressure and temperature rating of the tank or as recommended by the tank manufacturer.

Storage tanks and bottom fed tanks connected to a water heater shall be designed to withstand vacuum induced pressure, or shall be provided with a vacuum relief in accordance with Section S 13.3.4. The vacuum relief valve shall be installed at the top of the tank and shall have an operating pressure not to exceed 200 psi (1379 kPa) and a temperature rating not to exceed 250°F (121°C). The size of such vacuum relief valves shall have a minimum rated capacity for the equipment served. This Section shall not apply to pressurized captive air diaphragm or bladder tanks.

S 9.1.6 Separate Storage Tanks. For installations with separate storage tanks, a pressure relief valve and temperature relief valve or combination thereof shall be installed on both the main storage tank and auxiliary tank.

S 9.1.6.1 Isolation Valves. Storage tanks shall be provided with isolation valves for servicing.

S 9.1.7 Underground Storage Tanks. Tanks shall be permitted to be buried underground where designed and constructed for such installation.

S 9.1.8 Tank Covers. Tank covers shall be structurally designed to withstand anticipated loads and pressures in accordance with the manufacturer's instructions.

S 9.1.9 Drainage Pan. Where water heater, boiler, or other thermal storage tank is installed in an attic, attic-ceiling assembly, floor-ceiling assembly, or floor subfloor assembly where damage could result from a leaking water heater, boiler or tank, a watertight pan of corrosion-resistant materials shall be installed beneath the water heater, boiler, or tank, with not less than 3/4 of an inch (20 mm) diameter drain to an approved location. Such pan shall be not less than 1 ½ inches (38mm) in depth.

S 9.1.10 Storage Tank Construction and Materials.

S 9.1.10.1 Construction. Storage tanks shall be constructed of durable materials not subject to excessive corrosion or decay and shall be watertight. Each such tank shall be structurally designed to withstand anticipated loads and pressures and shall be installed level and on a solid bed.

S 9.1.10.2 Concrete. The walls and floor of each poured-in-place, concrete tank shall be monolithic. The exterior walls shall be double-formed so as to provide exposure of the exterior walls during the required water test. The compressive strength of a concrete tank wall, top and covers, or floor shall be not less than 2500 psi (lb/in²)

(1.7577 E+06 kg/m²). Where required by the Authority Having Jurisdiction, the concrete shall be sulfate resistant (Type V Portland Cement).

S 9.1.10.3 Metal Tanks. Metal tanks shall be welded, riveted and caulked, brazed, bolted, or constructed using a combination of these methods.

S 9.1.10.4 Filler Metal. Filler metal used in brazing shall be non-ferrous metal or an alloy having a melting point above 1000°F (538°C) and below that of the metal joined.

S 9.1.10.5 Insulation. Tank insulation shall have a thermal resistance not less than as shown in Table S 9.1.10.5. The temperature difference shall be calculated as the difference between the design operating temperature of the tank and the temperature of the surrounding air, or soil where the tank is installed underground. Where such data is not available, a temperature difference of 50°F (28°C) shall be used.

TABLE S 9.1.10.5

TEMPERATURE DIFFERENCE(°F)	THERMAL RESISTANCE (R)[°F•h•ft ² /(Btu)]
50	6
100	12
150	18
200	24
250	30

For SI units: °C = °F(0.5555556), 1 degree Fahrenheit hour square foot per British thermal unit = [0.176 (m²•K)/W], 1 British thermal unit inch per degree Fahrenheit hour square feet = 0.1441 W/(m•K)

* Based on thermal conductivity (k) of 0.20 [(Btu•inch)/(°F•h•ft²)] (0.03 W/(m•K))

S 9.2 Expansion Tanks.

S 9.2.1 Where Required. An expansion tank shall be installed in a solar thermal energy system as a means for controlling increased pressure caused by thermal expansion. Expansion tanks shall be of the closed type and securely fastened to the structure. Tanks shall be rated for the pressure of the system. Supports shall be capable of carrying twice the weight of the tank filled with water without placing strain on the connecting piping.

Solar thermal energy systems incorporating hot water tanks or fluid relief columns shall be installed to prevent freezing under normal operating conditions.

S 9.2.2 Closed-Type Solar Thermal Energy Systems. Closed-type systems shall have an airtight tank or other approved air cushion that will be consistent with the volume and capacity of the system, and shall be designed for a hydrostatic test pressure of two and one-half times the allowable working pressure of the system. Expansion tanks for systems designed to operate at more than 30 pounds-force per square inch (psi) (207 kPa) shall comply with ASME BPVC Section VIII.1. Provisions shall be made for draining the tank without emptying the system.

S 9.2.3 Minimum Capacity of Closed-Type Expansion Tanks. The minimum capacity for a gravity-type hot water system expansion tank shall be in accordance with Table S 9.2.3(1). The minimum capacity for a forced-type hot water system expansion tank shall be in accordance with Table S 9.2.3(2) or Equation S 9.2.3(1). The minimum capacity for diaphragm tanks shall be in accordance with Table S 9.2.3(2) or Equation S 9.2.3(2).

Equation S 9.2.3(1)

$$\frac{(C_1 t - C_2) V_s}{\left(\frac{P_a}{P_f} - \frac{P_a}{P_o} \right)} V_t(\text{forced type}) =$$

Equation S 9.2.3(2)

$$\frac{(C_1 t - C_2) V_s}{\left(1 - \frac{P_f}{P_o} \right)} V_t(\text{diaphragm}) =$$

Where:

$C_1 = 0.00041$

$C_2 = 0.0466$

V_t = Minimum volume of expansion tank, gallons (L)

V_s = Volume of system, not including expansion tank, gallons (L)

t = Average operating temperature, °F (°C).

P_a = Atmospheric pressure, pounds per square inch (kPa)

P_f = Fill pressure, pounds per square inch (kPa)

P_o = Maximum operating pressure, pounds per square inch (kPa)

For SI units: $C_1 = 0.000738$, $C_2 = 0.03348$, 1 gallon = 3.785 L, °C = (°F-32)/1.8,

1 pound per square inch = 6.8947 kPa

TABLE S 9.2.3(1)
EXPANSION TANK CAPACITIES FOR GRAVITY
HOT WATER SYSTEMS¹

INSTALLED EQUIVALENT DIRECT RADIATION² (square feet)	TANK CAPACITY (gallons)
Up to 350	18
Up to 450	21
Up to 650	24
Up to 900	30
Up to 1100	35
Up to 1400	40
Up to 1600	2 to 30
Up to 1800	2 to 30
Up to 2000	2 to 35
Up to 2400	2 to 40

For SI units: 1 gallon = 3.785 L, 1 square foot = 0.0929 m²

Notes:

- 1 Based on a two-pipe system with an average operating water temperature of 170°F (77°C), using cast-iron column radiation with a heat emission rate of 150 British thermal units per square foot hour [Btu/(ft²•h)] (473 W/m²) equivalent direct radiation.
- 2 For systems exceeding 2400 square feet (222.9 m²) of installed equivalent direct water radiation, the required capacity of the cushion tank shall be increased on the basis of 1 gallon (4 L) tank capacity per 33 square feet (3.1 m²) of additional equivalent direct radiation.

TABLE S 9.2.3(2)
EXPANSION TANK CAPACITIES FOR FORCED
WATER SYSTEMS¹

SYSTEM VOLUME ² (gallons)	TANK CAPACITY DIAPHRAGM TYPE (gallons)	TANK CAPACITY (gallons)
100	9	15
200	17	30
300	25	45
400	33	60
500	42	75
1000	83	150
2000	165	300

For SI units: 1 gallon = 3.785 L

Notes:

- 1 Based on an average operating water temperature of 195°F (91°C), a fill pressure of 12 psig (83 kPa), and an operating pressure of not more than 30 psig (207 kPa).
- 2 Includes volume of water in boiler, radiation, and piping, not including expansion tank.

S 10.0 Solar Collectors.

S 10.1 General. Frames and braces exposed to the weather shall be constructed of materials for exterior locations, and protected from corrosion or deterioration, in accordance with the requirements of the Authority Having Jurisdiction.

S 10.1.1 Construction. Collectors shall be designed and constructed to prevent interior condensation, out-gassing, or other processes that will reduce the transmission properties of the glazing, reduce the efficiency of the insulation, or otherwise adversely affect the performance of the collector.

S 10.1.2 Flat Plate Collector Glass. Flat plate collector glass shall be tempered.

S 10.1.3 Plastic. Plastic used in collector and other parts of the solar thermal energy system construction shall be installed in accordance with the manufacturer's installation instructions.

S 10.1.4 Listing. Collectors that are manufactured as a complete component shall be listed or labeled by an approved listing agency in accordance with ICC 901/SRCC 100, UL 1279, or equivalent standard.

S 10.1.5 Air Collectors. Materials exposed within air collectors shall be noncombustible or shall have a flame spread index not to exceed 25 and a smoke developed index not to exceed 50 where tested as a composite product in accordance with ASTM E 84 or UL 723.

S 10.1.5.1 Testing. Materials used within an air collector shall not smoke, smolder, glow, or flame where tested in accordance with ASTM C 411 at temperatures exposed to in service. In no case shall the test temperature be less than 250°F (121°C).

S 10.2 Solar Collector Installation.

S 10.2.1 General. Solar collectors shall be anchored to roof structures or other surfaces in accordance with the manufacturer's installation instructions and Title 26 - Building of Los Angeles County. Collectors shall be mounted to minimize the accumulation of debris. Connecting pipes shall not be used to provide support for a solar collector.

S 10.2.2 Roof Installations. Anchors secured to and through a roofing material shall be made to maintain the water integrity of the roof covering. Roof drainage shall not be impaired by the installation of collectors. Solar collectors that are not an integral part of the roofing system shall be installed to preserve the integrity of the roof surface.

S 10.2.3 Above Or On The Roof. Collectors located above or on roofs, and functioning as building components, shall not reduce the required fire-resistance and fire-retardance classification of the roof covering materials.

Exceptions:

- (1) Collectors located on one- and two-family dwellings.
- (2) Collectors located on buildings not exceeding three stories in height or 9000 square feet (836.13 m²) total floor area, or both, provided:
 - (a) The collectors are noncombustible.
 - (b) Collectors with plastic covers have noncombustible sides and bottoms, and the total area covered and the collector shall not exceed the following:
 - i. Plastic CC1 – 33⅓ percent of the roof area,

- ii. Plastic CC2 – 25 percent of the roof area, and
- (c) Collectors with plastic film covers having a thickness of not more than 0.010 of an inch (0.25 mm) shall have noncombustible sides and bottoms, and the total area covered by the collector shall not exceed $33\frac{1}{3}$ percent of the roof area.

S 10.2.4 Ground Installations. Solar collectors shall terminate above finished grade to avoid obstruction by vegetation, snow, or ice. The supporting columns shall extend below the frost line.

S.10.2.5 Wall Mounted. Solar collectors mounted on a wall shall be secured and fastened in accordance with Section 313.0 of this Code.

S 10.2.6 Access. Access shall be provided to collectors and components in an approved manner. A work space adjacent to collectors for maintenance and repair shall be provided in accordance with requirements of the Authority Having Jurisdiction.

S 10.2.7 Stagnation Condition. The collector and other parts of the solar thermal assembly shall be capable of withstanding stagnant conditions in accordance with the manufacturer's instructions where high solar flux and no flow occurs.

S 10.2.8 Waterproofing. Joints between structural supports and buildings or dwellings, including penetrations made by bolts or other means of fastening, shall be made watertight with approved material.

S 10.2.9 Fasteners. Mountings and fasteners shall be made of corrosion-resistant materials. Carbon steel mountings and fasteners shall be classified as noncorrosive in accordance with ASME SA194.

S 10.2.10 Combustible Materials. Solar thermal energy systems constructed with combustible materials shall not be located on or adjacent to construction required to be of noncombustible materials or in Very High Fire Hazard Severity Zone as defined in Title 32 - Fire Code of the Los Angeles County Code, unless approved by the Authority Having Jurisdiction.

S 10.2.11 Orientation. Collectors shall be located and oriented in accordance with the manufacturer's installation instructions.

S 10.3 Fire Safety Requirements.

S 10.3.1 Building Components. Collectors that function as building components shall be in compliance with Title 26 – Building Code of the Los Angeles County Code.

S 11.0 Hazardous Heat Transfer Medium for Solar Thermal Energy Systems.

Heat-transfer mediums that are hazardous shall not be used in solar thermal energy systems, except where approved by the Authority Having Jurisdiction.

S 11.1 Flash Points. The flash point of a heat-transfer medium shall be 50°F (10°C) or more above the design maximum temperature.

S 11.2 Discharge. The collector, collector manifold, and manifold relief valve shall not discharge directly or indirectly into the building or toward an open flame or other source of ignition.

S 12.0 Heat Exchangers.

S 12.1 General. Solar thermal energy systems utilizing heat exchangers shall protect the potable water system from being contaminated by the heat transfer medium.

Systems that incorporate a single-wall heat exchanger to separate potable water from the heat transfer fluid shall meet all of the following requirements:

- (1) The heat transfer medium is either potable water or contains fluids recognized as safe by the Food and Drug Administration (FDA) as food grade.
- (2) A tag or label shall be securely affixed to the heat source with the word “CAUTION” and the following statements:
 - (a) The heat transfer medium shall be water or other nontoxic fluid recognized as safe by the FDA.
 - (b) The maximum operating pressure of the heat exchanger shall not exceed the maximum operating pressure of the potable water supply.
- (3) The word “CAUTION” and the statements listed above shall have an uppercase height of not less than 0.120 of an inch (3.048 mm). The vertical spacing between lines of type shall be not less than 0.046 of an inch (1.168 mm). Lowercase letters shall be not less than compatible with the uppercase letter size specification.

Systems that do not comply with the requirements for a single-wall heat exchanger shall install a double-wall heat exchanger. Double-wall heat exchangers shall separate the potable water from the heat transfer medium by providing a space between the two walls vented to the atmosphere.

S 13.0 Valves.

S 13.1 General. Valves shall be rated for the operating temperature and pressures of the solar thermal energy system and shall be compatible with the type of

heat transfer medium and piping materials. Valves shall be installed in accordance with this Section.

S 13.2 Heat Exchanger. Shutoff valves and isolation valves shall be installed on the supply and return side of the heat exchanger.

Exception: Where a heat exchanger is an integral part of a boiler or is a part of a manufactured boiler and heat exchanger packaged unit, and is capable of being isolated from the hydronic system by supply and return valves.

S 13.3 Pressure Vessels. Isolation valves shall be installed on connections to pressure vessels.

S 13.4 Pressure Reducing Valves. Isolation valves shall be installed on both sides of a pressure reducing valve.

S 13.5 Equipment, Components, and Appliances. Serviceable equipment, components, and appliances within the system shall have isolation valves installed upstream and downstream of such devices.

S 13.6 Expansion Tanks. Isolation valves shall be installed at connections to non-diaphragm-type expansions tanks.

S 13.7 Flow Balancing Valves. Where flow balancing valves are installed, such valves shall be capable of increasing or decreasing the amount of flow by means of adjustment.

S 13.7.1 Location. Balancing valves shall be installed at the outlet of each group of collectors.

S 13.8 Control Valves. An approved three-way valve shall be permitted to be installed for manual control systems. An approved electric control valve shall be permitted to be installed for automatic control systems. The installation and operation of automatic control valves shall comply with the manufacturer's instructions.

S 13.8.1 Mixing or Temperature Control Valves. Where mixing or temperature control valves are installed, such valves shall be capable of obtaining the design water temperature and design flow requirements.

S 13.9 Thermosiphoning. An approved type check valve shall be installed on liquid heat transfer piping to control thermosiphoning of heated liquids.

S 13.10 Air Removal Device or Air Vents. Isolation valves shall be installed where air removal devices or automatic air vents are utilized to permit cleaning, inspection, or repair without shutting the system down.

S 13.11 Closed Loop Systems. Closed loop systems, where hose bibbs or similar valves are used to charge or drain the system, shall be of loose key type; have valve outlets capped; or have handles removed where the system is operational.

S 13.12 Fullway Valves. A fullway valve shall be installed in the following locations:

- (1) On the water supply to a solar thermal energy system.
- (2) On the water supply pipe to a gravity or pressurized water tank.
- (3) On the water supply pipe to a water heater.

S 13.13 Accessible. Required fullway or shutoff valves shall be accessible.

S 14.0 Piping and Cross-connection Control For Solar Thermal Energy

Systems.

S 14.1 Cross Connection Control. No piping installation, or part thereof, shall be made in such a manner that it will be possible for used, unclean, polluted, or contaminated water, mixtures, or substances to enter a portion of the potable water system from a pipe, tank, receptor, or any other equipment by reason of backsiphonage, suction, or any other cause, either during normal use and operation thereof, or where such pipe, tank, receptor, or equipment is subject to pressure exceeding the operating pressure in the potable water system.

S 14.2 Materials.

S 14.2.1 Piping Materials. Piping, tubing and fittings materials shall comply with Table S 14.2. Joining methods shall be in accordance with Section 605.0. Materials in contact with the heat transfer medium shall be approved for such use. Galvanized steel shall not be used for solar thermal piping systems containing antifreeze. Black steel shall not be used in systems with entrained air. Unions between dissimilar metals shall comply with Sections 310.6 and 605.15. The material used shall be capable of withstanding the maximum temperature and pressure of the system.

S 14.2.1.1 Plastic. Plastic used in the construction of a solar thermal system shall be installed in accordance with the manufacturer's installation instructions.

S 14.2.1.2 Combustible Materials. Combustible materials shall not be located on or adjacent to construction required to be of noncombustible materials or in fire areas, unless approved by the Authority Having Jurisdiction.

S 14.2.1.3 Adhesives. Adhesives used in a solar collector shall not vaporize at the design temperature.

S 14.2.1.4 Potable Water. Materials in contact with potable water shall comply with NSF 61. Piping in solar thermal systems designed to convey potable water shall be flushed and disinfected in accordance with this Code.

S 14.2.1.5 Racks. Dissimilar metals used for racking shall be isolated to prevent galvanic corrosion. Paint shall not be used as a method of isolation.

S 14.2.1.6 Fasteners. Mountings and fasteners shall be made of corrosion-resistant materials. Carbon steel mountings and fasteners shall be classified as noncorrosive in accordance with ASME SA194.

S 14.2.2 Storage Tank Connectors. Flexible metallic storage tank connectors or reinforced flexible storage tank connectors connecting a storage tank to the piping system shall be in accordance with the applicable standards referenced in Table S 18.1. Copper or stainless steel flexible connectors shall not exceed 24 inches (610 mm). PEX, PE-AL-PE, or PE-RT tubing shall not be installed within the first 18 inches (457 mm) of piping connected to a storage tank.

S 14.2.2.1 Flexible Connectors. Listed flexible connectors shall be installed in readily accessible locations, unless otherwise indicated in the listing.

S 14.3 Safety Devices.

S 14.3.1 Pressure Relief Valves. Solar thermal energy system components containing pressurized fluids shall be protected against pressures exceeding design limitations with a pressure relief valve. Each section of the system in which excessive

pressures are capable of developing shall have a relief device located so that a section cannot be isolated from a relief device. Pressure and temperature relief valves shall be installed in accordance with the terms of their listing and the manufacturer's installation instructions.

TABLE S 14.2
MATERIALS FOR SOLAR THERMAL SYSTEM, PIPING, TUBING, AND FITTINGS

MATERIAL	STANDARDS	
	PIPING/TUBING	FITTINGS
Copper/Copper Alloy	ASTM B42, ASTM B43, ASTM B75, ASTM B88, ASTM B135, ASTM B251*, ASTM B302, ASTM B447	ASME B16.15, ASME B16.18, ASME B16.22, ASME B16.23, ASME B16.24, ASME B16.26, ASME B16.29, ASME B16.51, ASSE 1061, ASTM F3226, IAPMO PS 117
Steel	ASTM A53, ASTM A106, ASTM A254	ASME B16.5, ASME B16.9, ASME B16.11, ASTM A420, ASTM F3226, IAPMO PS 117
Gray Iron	—	ASTM A126
Malleable Iron	—	ASME B16.3
Chlorinated Polyvinyl Chloride (CPVC)	ASTM D2846, ASTM F441, ASTM F442, CSA B137.6	ASSE 1061, ASTM D2846, ASTM F437, ASTM F438, ASTM F439, ASTM F1970, CSA B137.6
Polyethylene (PE)	ASTM D1693, ASTM D2513, ASTM D2683, ASTM D2737, ASTM D3035, ASTM D3350, ASTM F714, ASTM F2165, AWWA C901, CSA B137.1, NSF 358-1	ASTM D2609, ASTM D2683, ASTM D3261, ASTM F1055, ASTM F2165, CSA B137.1, NSF 358-1
Cross-Linked Polyethylene (PEX)	ASTM F876, ASTM F2165, ASTM F3253, CSA B137.5, NSF 358-3	ASSE 1061, ASTM F877, ASTM F1055, ASTM F1807, ASTM F1960, ASTM F2080, ASTM F2098, ASTM F2159, ASTM F2165, ASTM F2735, ASTM F3253, ASTM F3347, ASTM F3348, CSA B137.5, NSF 358-3

Polyvinyl Chloride (PVC)	ASTM D1785, ASTM D2241, CSA B137.3	ASTM D2464, ASTM D2466, ASTM D2467, ASTM F1970, CSA B137.2, CSA B137.3
Raised Temperature Polyethylene (PE-RT)	ASTM F2165, ASTM F2623, ASTM F2769, CSA B137.18	ASSE 1061, ASTM D3261, ASTM F1055, ASTM F1807, ASTM F2159, ASTM F2165, ASTM F2735, ASTM F2769, CSA B137.18
Cross-Linked Polyethylene/Aluminum/ Cross-	ASTM F1281, ASTM F2165, CSA B137.10	ASTM F1281, ASTM F1974, ASTM F2165, ASTM F2434, CSA

Linked Polyethylene (PEX-AL-PEX)		B137.10
Polyethylene/Aluminum/Polyethylene (PE-AL-PE)	ASTM F1282, ASTM F2165, CSA B137.9	ASTM F1282, ASTM F1974, ASTM F2165, CSA B137.9
Stainless Steel	ASTM A269, ASTM A312, ASTM A554, ASTM A778	ASTM F1476, ASTM F1548, ASTM F3226, IAPMO PS 117
Chlorinated Polyvinyl Chloride/Aluminum/Chlorinated Polyvinyl Chloride (CPVC/AL/CPVC)	ASTM F2855	ASTM D2846

Note:

* Only Type K, L, or M shall be permitted to be installed.

S 14.3.2 Pressurized Vessels. Pressurized vessels shall be provided with overpressure protection by means of a listed pressure relief valve installed in accordance with the manufacturer's installation instructions.

S 14.3.3 Discharge Piping. The discharge piping serving a temperature relief valve, pressure relief valve, or combination of both shall have no valves, obstructions, or means of isolation and comply with the following:

- 1) The discharge pipe shall equal the size of the valve outlet and shall discharge full size to the flood level of the area receiving the discharge and pointing down.
- 2) Materials shall be rated at not less than the operating temperature of the system and approved for such use or shall comply with ASME A112.4.1.
- 3) The discharge pipe shall discharge independently by gravity through an air gap into the drainage system or outside of the building with the end of the pipe not exceeding 2 feet (610 mm) and not less than 6 inches (152 mm) above the ground and pointing downwards.

- 4) The discharge pipe shall discharge in such a manner that does not cause personal injury or structural damage.
- 5) No part of such discharge pipe shall be trapped or subject to freezing.
- 6) The terminal end of the pipe shall not be threaded.
- 7) Discharge from a relief valve into a water heater pan is prohibited.
- 8) The discharge termination point shall be readily observable.

S 14.3.4 Vacuum Relief Valves. System components that are subjected to a vacuum while in operation or during shutdown shall be protected with vacuum relief valves. Where the piping configuration, equipment location, and valve outlets are located below the storage tank elevation, the system shall be equipped with a vacuum relief valve at the highest point.

S 14.3.5 Temperature Regulation. Where a system is capable of providing potable water at temperatures that exceed 140°F (60°C), a thermostatic mixing valve that is in accordance with ASSE 1017 shall be provided to limit the water supplied to the potable hot water distribution system to a temperature of 140°F (60°C) or less.

S 14.4 Protection of System Components.

S 14.4.1 Materials. System components in contact with heat-transfer mediums shall be approved for such use. Components installed outdoors shall be resistant to ultraviolet radiation.

S 14.4.2 Corrosion. Solar thermal energy systems and components subject to corrosion shall be protected in an approved manner. Metal parts exposed to atmospheric conditions shall be of corrosion-resistant material.

S 14.4.3 Mechanical Damage. Portions of a solar thermal energy system installed where subjected to mechanical damage shall be guarded against such damage by being installed behind approved barriers or, where located within a garage, be elevated or located out of the normal path of a vehicle.

S 14.4.4 Freeze Protection. Unless designed for such conditions, solar thermal energy systems and components that contain liquid as the heat transfer medium shall be protected from freezing, by means of fail-safe freeze protection in accordance with this Section, where the ambient temperature may be less than 46°F (8°C).

S 14.4.4.1 Antifreeze. Antifreeze shall be used in accordance with the solar thermal system manufacturer's instructions.

S 14.4.4.2 Drainback. Drainback systems shall drain by gravity and shall be permitted to be installed in applications where the ambient temperature may not be less than -60°F (-51°C).

S 14.4.4.3 Integral Collector Storage. Integral collector storage systems shall be permitted to be installed in applications where the ambient temperature may not be less than 23°F (-5°C) and the duration of below-freezing episodes exceeding 18 hours. Exposed piping in a solar thermal energy system shall be protected with insulation having a thermal resistance of not less than R-5.0.

S 14.4.4.4 Indirect Thermosiphon. Indirect thermosiphon systems shall be permitted to be installed in applications where the ambient temperature may not be less than 23°F (-5°C). Exposed piping in a solar thermal energy system shall be protected with insulation having a thermal resistance of not less than R-5.

S 14.4.4.5 Air Heating Systems. Air solar heating systems shall be permitted to be used in accordance with the manufacturer's instructions.

S 14.4.4.6 Labeling. A label indicating the method of freeze protection for the system shall be attached to the system in a visible location.

S 14.4.4.7 Piping. Fittings, pipe slope, and collector shall be designed to allow for manual gravity draining and air filling of solar thermal energy system components and piping. Pipe slope for gravity draining shall be not less than 1/4 inch per foot (20.8 mm/m) of horizontal length. Collector header pipes or absorber plate riser tubes internal to the collector shall be sloped in accordance with the manufacturer's instructions. Where a means to drain the system is provided, a drain valve shall be installed.

S 14.4.5 Water Hammer Protection. The flow of the hydronic piping system shall be designed to prevent water hammer.

S 14.4.6 Heat Transfer Fluid. Solar thermal piping shall be identified with an orange background with black uppercase lettering, with the words "CAUTION: HEAT TRANSFER FLUID, DO NOT DRINK." Each solar thermal energy system shall be identified to designate the medium being conveyed. The minimum size of the letters and length of the color field shall comply with Table S 14.4.6.

Each outlet on the solar thermal piping system shall be posted with black uppercase lettering as follows:

"CAUTION: HEAT TRANSFER FLUID, DO NOT DRINK."

TABLE S 14.4.6
MINIMUM LENGTH OF COLOR FIELD AND SIZE OF LETTERS

OUTSIDE DIAMETER OF PIPE OR COVERING (inches)	MINIMUM LENGTH OF COLOR FIELD (inches)	MINIMUM SIZE OF LETTERS (inches)
½ to 1¼	8	½
1½ to 2	8	¾
2½ to 6	12	1¼
8 to 10	24	2½
Over 10	32	3½

For SI units: 1 inch = 25.4 mm

S 14.4.7 Insulation.

S 14.4.7.1 General. The temperature of surfaces within reach of building occupants shall not exceed 140°F (60°C) unless the surfaces are protected by insulation. Where sleeves are installed, the insulation shall continue full size through them. Coverings and insulation used for piping shall be of material approved for the operating temperature of the system and the installation environment. Where installed in a plenum, the insulation, jackets and lap-seal adhesives, including pipe coverings and linings, shall have a flame spread index not to exceed 25 and a smoke-developed index not to exceed 50 where tested in accordance with ASTM E84 or UL 723.

S 14.4.7.2 Heat Loss. Insulation shall be installed on interconnecting solar and hot water piping. The final 5 feet (1524 mm) of the cold water supply line, or the entire length where less than 5 feet (1524 mm), shall be insulated. The insulation thickness shall be in accordance with Table S 14.4.7.3(1) or Table S 14.4.7.3(2), or the insulation installed shall have an R-value of not less than R-2.6 degree Fahrenheit hour square foot per British thermal unit (°F•h•ft²/Btu) (R-0.46 m²•K/W). Piping, storage tanks, and circulating air ductwork shall be insulated. Ductwork and piping shall be permitted to not

be insulated where exposed in conditioned spaces, and the heat loss from such ducts or piping does not otherwise contribute to the heating or cooling load within such space.

Exception: Low temperature, aboveground piping installed for swimming pools, spas, and hot tubs in accordance with the manufacturer's installation instructions unless such piping is located within a building.

S 14.4.7.3 Piping. Pipes and fittings, other than unions, flanges, or valves, shall be insulated. Insulation material shall be approved for continuous operating temperatures of not less than 220°F (104°C). [See Table S 14.4.7.3(1) and Table S 14.4.7.3(2)].

TABLE S 14.4.7.3(1)

For SI units: 1 inch = 25 mm

* Thickness values are applicable for calcium silicate, cellular foam plastics, cellular glass, mineral fiber, and perlite preformed insulation materials.

S 14.4.7.4 Fittings. Fittings shall be insulated with mitered sections, molded fittings, insulating cement, or flexible insulation.

S 14.4.7.5 Installation. Insulation shall be finished with a jacket or facing with the laps sealed with adhesives or staples so as to secure the insulation on the pipe. Insulation jacket seams shall be on the underside of the piping and shall overlap in accordance with the manufacturer's installation instructions. Joints and seams shall be sealed with a sealant that is approved for both the material and environmental conditions. In lieu of jackets, molded insulation shall be permitted to be secured with 16 gauge galvanized wire ties not exceeding 9 inches (229 mm) on center.

S 14.4.7.5.1 Exterior Applications. Insulation for exterior applications shall be finished with an approved jacket or facing with the surfaces and laps sealed. Jacketing, facing, and tape used for exterior applications shall be designed for such use. Where flexible insulation is used, it shall be wrapped and sealed against water penetration. Insulation used for exterior applications shall be resistant to extreme temperatures, UV exposure, and moisture.

S 15.0 Specific Requirements.

S 15.1 Electrical.

S 15.1.1 Wiring. Electrical connections, wiring, and devices shall be installed in accordance with NFPA 70. Electrical equipment, appliances, and devices installed in areas that contain flammable vapors or dusts shall be of a type approved for such environment.

S 15.1.2 Controls. Required electrical, mechanical, safety, and operating controls shall be listed or labeled by a listing agency. Electrical controls shall be of such design and construction as to be suitable for installation in the environment in which they are located.

S 15.2 Flow Directions. Flow directions shall be permanently affixed on the solar thermal energy system.

S 15.3 Attic Installations. An attic space in which solar energy system components are installed shall comply with Section 508.4 of this Code.

S 15.4 Connections to Drainage System Required. Receptors, drains, appurtenances, and appliances, used to receive or discharge liquid wastes, shall be

connected to the drainage system of the building or premises in accordance with the requirements of this Code.

S 15.5 Dry Storage Systems.

S 15.5.1 Waterproofing. The containment structure for dry thermal storage systems shall be constructed in an approved manner to prevent the infiltration of water or moisture.

S 15.5.2 Detecting Water Intrusion. The containment structure shall be capable of fully containing spillage or moisture accumulation that occurs. The structure shall have a means, such as a sight glass, to detect spillage or moisture accumulation, and shall be fitted with a drainage device to eliminate spillage.

S 15.5.3 Rock as Storage Material. Systems utilizing rock as the thermal storage material shall use clean, washed rock that is free of organic material.

S 15.5.4 Odor and Particulate Control. Thermal storage materials and containment structures, including interior protective coating, shall not impart toxic elements, particulate matter, or odor to areas of human occupancy.

S 15.6 Heat Pumps. Heat pumps shall be in compliance with Table S 15.6, as applicable. Heat pumps shall also be listed and labeled in accordance with UL 1995 or UL 60335-2-40. Heat pumps shall be fitted with a means to indicate that the compressor is locked out.

TABLE S 15.6

TYPE OF HEAT PUMP	STANDARDS
Water-to-Air	AHRI/ASHRAE/ISO 13256-1
Water-to-Water	AHRI/ASHRAE/ISO 13256-2
Air Source	AHRI 210/240

S 16.0 Solar Thermal Energy Systems for Swimming Pool, Spas and Hot

Tubs.

S 16.1 Water Chemistry. Where water from a swimming pool, spa or hot tub is heated by way of circulation through solar collectors, the chemistry of such water shall comply with the requirements of Section S 16.2 and shall be filtered in accordance with Section S 16.3 and Section S 16.3.1 of this Code.

S 16.2 Parameters. Parameters for chemicals used within a swimming pool, spa, or hot tub shall be in accordance with Table S 16.2.

TABLE S 16.2
WATER CHEMISTRY

PARAMETER	ACCEPTABLE RANGE
Calcium hardness	200 – 400 parts per million (ppm)
Langelier Saturation Index	0 (+ or - 0.3 acceptable)
pH	7.2 – 7.8
TDS	< 1500 ppm
Total alkalinity	80 – 120 ppm

For SI Units: 1 part per million = 1 mg/L

S 16.3 Filter. A filter shall be provided to remove debris from the water entering the solar loop.

Exception: A solar swimming pool, spa, or hot tub heating system with a heat exchanger.

S 16.3.1 Location. A filter shall be located upstream of a pump used to direct water to solar collectors.

S 16.4 Corrosion Resistant. Glazed solar collectors made of copper shall not be used for solar pool, spa, or hot tub heating.

Exception: Where a heat exchanger is provided between the collector circuit and the swimming pool, spa, or hot tub water.

S 17.0 Certificate of Compliance. Upon completion of the solar thermal energy system, the permittee shall sign a Certificate of Compliance with this Code. The Certificate of Compliance shall also list the following information:

- (1) Type of freeze protection;
- (2) Mixing valve setting degrees Fahrenheit (° F);
- (3) Subsystem working pressure (if applicable) psi;
- (4) Subsystem test pressure (if applicable) psi;
- (5) Heat exchanger make and model number (if applicable);
- (6) Circulating pump over temperature protection shut-off setting degrees Fahrenheit (° F) for one-tank systems where the water heater controls utilize fusible-link type over temperature protection.

This Certificate shall be posted in a conspicuous location at or near the water heater.

S 18.0 General.

S 18.1 Referenced Standards. The standards listed in Table S 18.1 are referenced in various sections of this Appendix and shall be considered part of the requirements of this Code. The standards are listed herein by the standard number and effective date, the title and application. The application of the referenced standard(s) shall be as specified in Section S 5.2.

SECTION 27. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 California Plumbing Code. Some of those changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Building Standards Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code contained in this ordinance are reasonably necessary because of local climatic, geological, or topographical conditions in the County of Los Angeles due to the potential for seismic activity in the region, topographical conditions that contribute to the spread of wild fires, and climatic conditions that impact air quality and increase the risk of wild fires. Without limiting the foregoing, the County makes additional findings herein:

PLUMBING CODE AMENDMENTS

CODE SECTION	CONDITION	EXPLANATION
Section 304.1	Geological Topographical Climatic	The County of Los Angeles is a densely populated area with buildings constructed within a region where water is scarce and domestic water service is impacted by immoderate and varying weather conditions, including periods of extended drought. The proposed measures will require buildings to be more water efficient and allow greater conservation of domestic water due to these local conditions.
Sections 601.2.3	Geological Topographical Climatic	The County of Los Angeles is a densely populated area with buildings constructed within a region where water is scarce and domestic water service is impacted by immoderate and varying weather conditions, including periods of extended drought. The proposed measures will require buildings to be more water efficient and allow greater conservation of domestic water due to these local conditions.
Section 721.3	Geological Topographical	To allow for the proper operation of existing Los Angeles County sewer infrastructure and establish consistency with Title 20 – Utilities – of the Los Angeles County Code, Division 2 (Sanitary Sewers and Industrial Waste) due to local soil conditions and topography.
Sections 728.1 to 728.6	Geological Topographical	To allow for the proper operation of existing Los Angeles County sewer infrastructure and establish consistency with Title 20 – Utilities – of the Los Angeles County Code, Division 2 (Sanitary Sewers and Industrial Waste) due to local soil conditions and topography.

CODE SECTION	CONDITION	EXPLANATION
Table H 101.8	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions and to provide protections for native, protected oak trees that are consistent with Title 22 – Zoning and Planning – of the Los Angeles County Code, Chapter 22.174 (Oak Tree Permits).
Table H 201.1(1)	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions, sewer capacity, and sewage treatment.
Table H 201.1(2)	Geological Topographical	To establish consistency with requirements of the County Health Department for sewer capacity and sewage treatment due to local soil conditions.
Table H 201.1(3)	Geological Topographical	To establish consistency with requirements of the County Health Department for sewer capacity and sewage treatment due to local soil conditions.
Table H 201.1(4)	Geological Topographical	To establish consistency with requirements of the County Health Department for sewer capacity and sewage treatment due to local soil conditions.
Section H 301.1	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions.
Section H 401.3	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions.
Section H 601.5	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions.
Section H 601.8	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions.

CODE SECTION	CONDITION	EXPLANATION
Section H 701.2	Geological Topographical	To establish more restrictive requirements for protection of local groundwater due to local soil conditions.
Section H 1001.1	Geological	To establish more restrictive requirements to prevent earth movement based on local soil and seismic conditions.
Section H 1101.6	Geological	To establish more restrictive requirements to prevent earth movement based on local soil and seismic conditions.
Appendix S	Climatic	To establish requirements for solar thermal energy systems based provisions in the Uniform Solar, Hydronics and Geothermal Code (USHGC) which is developed by the International Association of Plumbing and Mechanical Officials. The County of Los Angeles is a densely populated area, with elevated levels of greenhouse gas emissions. Standards to regulate the installation of solar thermal energy systems will facilitate safe and efficient installations of these systems to improve local air quality, thereby improving the health of the County's residents, businesses and visitors.

SECTION 32. This ordinance shall become operative on January 1, 2023.

[TITLE28PLUMBINGCODE2022CSCC]

ORDINANCE NO. _

An ordinance amending Title 29 – Mechanical Code – of the Los Angeles County Code, by adopting and incorporating, by reference, portions of the 2022 California Mechanical Code, with certain changes and modifications, and making other revisions thereto.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Sections 119.1.2.0 through 119.1.14.0 of Chapter 1, Chapters 2 through 17, and Appendices B, C, and D, which incorporated by reference and modified portions of the 2019 California Mechanical Code, are hereby repealed.

SECTION 2. Section 100 is hereby amended to read as follows:

100 -- ADOPTION BY REFERENCE.

Except as hereinafter changed or modified, Sections 1.2.0 through 1.14.0 of Chapter 1, Division I, of that certain Mechanical Code known and designated as the ~~2019~~2022 California Mechanical Code as published by the California Building Standards Commission are adopted and incorporated, by reference, into this Title 29 of the Los Angeles County Code, as if fully set forth below, and shall be known as Sections 119.1.2.0 through 119.1.14.0, respectively, of Chapter 1 of Title 29 of the Los Angeles County Code.

Except as hereinafter changed or modified, Chapters 2 through 17, and Appendices B, C, and D of that certain Mechanical Code known and designated as the ~~2019~~2022 California Mechanical Code as published by the California Building Standards Commission are adopted and incorporated, by reference, into this Title 29 of

the Los Angeles County Code as if fully set forth below, and shall be known as Chapters 2 through 17 and Appendices B, C, and D of Title 29 of the Los Angeles County Code.

A copy of the ~~2019~~2022 California Mechanical Code shall be at all times maintained by the Chief Mechanical Inspector for use and examination by the public.

SECTION 3. Section 117.0 is hereby amended to read as follows:

117.0 Annual Review of Fees. The fees contained in this Code shall be reviewed annually by the Director of the Department of Public Works. Beginning on July 1, 1992, and thereafter on each succeeding July 1, the amount of each fee in this Code shall be adjusted as follows: Calculate the percentage movement between March of the previous year and March of the current year in the Consumer Price Index (CPI) for all urban consumers in the Los Angeles-Long Beach-Anaheim, CA areas, as published by the United States Government Bureau of Labor Statistics, and adjust each fee by said percentage amount ~~and round off to the nearest ten (10) cents;~~ provided however, that no adjustment shall decrease any fee and no fee shall exceed ~~this~~ the reasonable cost of providing services. When it is determined that the amount reasonably necessary to recover the cost of providing services is in excess of this adjustment, the Chief Mechanical Inspector may present fee proposals to the Board of Supervisors for approval.

SECTION 4. Section 204.0 is hereby amended to read as follows:

204.0 – B –

...

Building Code. ~~The building code that is adopted by this jurisdiction. [HCD1, HCD 2, OSHPD 1, 1R, 2, 3, 4 & 5, and SFM]~~ "Building Code" shall mean the California Building Code, Title 24, Part 2 The most recent edition of Title 26 of the Los Angeles County Code.

...

SECTION 5. Section 207.0 is hereby amended to read as follows:

207.0 **– E –**

...

Electrical Code. ~~The National Electrical Code promulgated by the National Fire Protection Association, as adopted by this jurisdiction. [HCD 1 & HCD 2]~~ Whenever the term "Electrical Code" is used in this code, it shall mean the California Electrical Code, Title 24, Part 3 The most recent edition of Title 27 of the Los Angeles County Code.

...

SECTION 6. Section 218.0 is hereby amended to read as follows:

218.0 **– P –**

...

Plumbing Code. ~~The Uniform Plumbing Code promulgated by the International Association of Plumbing and Mechanical Officials, as adopted by this jurisdiction. [HCD 1 & HCD 2]~~ Whenever the term "Plumbing Code" is used in this code, it shall mean the California Plumbing Code, Title 24, Part 5 The most recent edition of Title 28 of the Los Angeles County Code.

...

SECTION 7. Section 302.2 is hereby amended to read as follows:

302.2 ALTERNATE MATERIALS AND METHODS OF CONSTRUCTION EQUIVALENCY AND MODIFICATIONS.

302.2.1 Alternate Materials and Methods of Construction.

Nothing in this eCode is intended to prevent the use of systems, methods, or devices of equivalent or superior quality, strength, fire resistance, effectiveness, durability, and safety over those prescribed by this eCode. Technical documentation shall be submitted to the Authority Having Jurisdiction to demonstrate equivalency. The Authority Having Jurisdiction shall have the authority to approve or disapprove the system, method, or device for the intended purpose on a case-by-case basis.

...

302.2.1.1 Testing.

...

302.2.1.1.1 Tests.

...

302.2.1.21.2 Requests by the Authority Having Jurisdiction.

...

302.2.1.2 Application. Application for the use of an alternate material or method of construction shall be submitted in writing to the Chief Mechanical Inspector together with a filing fee of \$285.60. When staff review exceeds two hours, an additional fee of \$142.80 per hour shall be charged for each hour or fraction thereof in

excess of two hours.

302.2.2 Modifications. Whenever there are practical difficulties involved in carrying out the provisions of this Code, the Authority Having Jurisdiction shall have the authority to grant modifications on a case-by-case basis, upon application of the owner or the owner's authorized agent, provided the Authority Having Jurisdiction shall first find that a special individual reason makes the strict letter of this Code impractical, and that the modification is in conformity with the spirit and purpose of this Code, and that such modification does not lessen any health, fire-protection, or other life-safety-related requirements. The details of any action granting modifications shall be recorded and entered in the files of the Authority Having Jurisdiction. The application for approval of a modification shall be in accordance with Section 302.2.1.2.

SECTION 8. Section 501.1 is hereby amended to read as follows:

501.1 Applicability. This eChapter includes requirements for environmental air ducts, product-conveying systems, and commercial hoods and kitchen ventilation. Part I addresses environmental air ducts and product-conveying systems. Part II addresses commercial hoods and kitchen ventilation. Ventilation systems installed to control occupational health hazards shall comply with the requirements of the Health Officer.

SECTION 9. Section 510.1.6 is hereby amended to read as follows:

510.1.6 Bracing and Supports. Duct bracing and supports shall be of noncombustible material, securely attached to the structure, not less than the gauge required for grease-duct construction, and designed to carry gravity and lateral loads

within the stress limitations of the ~~b~~Building ~~e~~Code. Bolts, screws, rivets, and other mechanical fasteners shall not penetrate duct walls.

SECTION 10. Section 603.7.1.1 is hereby amended to read as follows:

603.7.1.1 Rectangular Ducts. Supports for rectangular ducts shall be installed on two opposite sides of each duct and shall be welded, riveted, bolted, or metal screwed to each side of the duct at intervals specified.

SECTION 11. Section 1114.4 is hereby added to read as follows:

1114.4 Approvals Required. The method of discharge of systems containing other than group A1 refrigerants shall comply with the pertinent requirements of Title 32 – Fire Code – and Division 2 of Title 20 – Sanitary Sewer and Industrial Waste – of the Los Angeles County Code.

SECTION 12. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 Edition of the California Mechanical Code. Some of these changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Mechanical Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code contained in this ordinance are reasonably necessary because of local climatic, geological, or topographical conditions in the County of Los Angeles due to the potential for seismic activity in the region,

topographical conditions that contribute to the spread of wild fires, and climatic conditions that impact air quality and increase the risk of wild fires. Modifications that are administrative in nature do not require findings pursuant to the Health and Safety Code and applicable law. Without limiting the foregoing, the County makes additional findings herein:

TABLE

MECHANICAL CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
501.1	Climatic	Additional Health Department requirements are necessary due to local air quality concerns.
510.1.6	Geological	High geologic activities, such as seismic events, in the Southern California area necessitate this local amendment for bracing and support.
603.7.1.1	Geological	High geologic activities, such as seismic events, in the Southern California area necessitate this local amendment for bracing and support.

MECHANICAL CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
1114.4	Geological	High geologic activities, such as seismic events, in the Southern California area necessitate this local amendment to reduce damage and potential for toxic refrigerant release during a seismic event caused by shifting equipment and to minimize impacts to the sewer system in such an event.

SECTION 15. This ordinance shall become operative on January 1, 2023.

[TITLE29MECHANICALCODE2022CSCC]

ORDINANCE NO. _____

An ordinance amending Title 30 – Residential Code – of the Los Angeles County Code, by adopting and incorporating by reference the 2022 California Residential Code, with certain changes and modifications.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Chapters 2 through 10, Chapter 44, Appendix H, Q, S, X which incorporate by reference, and modify, portions of the 2019 California Residential Code, are hereby repealed.

SECTION 2. Chapter 1 is hereby amended to read as follows:

R100 ADOPTION BY REFERENCE

Except as hereinafter changed or modified, Sections 102 through 119 of Chapter 1, Section 1206 of Chapter 12, and Chapters 67, 68, 69, 98, 99, and Appendix J of Title 26 of the Los Angeles County Code are adopted and incorporated by reference into this Title 30 as if fully set forth below, and shall be known as Sections 102 through 119 of Chapter 1, Section 1206 of Chapter 12, and Chapters 67, 68, 69, 98, 99, and Appendix J of Title 30 of the Los Angeles County Code.

Except as hereinafter changed or modified, Chapters 2 through 10, Chapter 44, and Appendices AH, AQ, AS, and ~~XAZ~~ of that certain code known and designated as the ~~2019~~2022 California Residential Code as published by the California Building Standards Commission are adopted and incorporated by reference into this Title 30 as if fully set forth below, and shall be known as Chapters 2 through 10, Chapter 44, and Appendices AH, AQ, AS, and ~~XAZ~~ of Title 30 of the Los Angeles County Code. A copy

of the ~~2019~~2022 California Residential Code shall be at all times maintained by the Building Official for use and examination by the public.

R101 TITLE, PURPOSE, AND INTENT

...

R101.3 Scope.

...

Exceptions:

1. Live/work units complying with the requirements of Section ~~449~~508.5 of the Los Angeles County Building Code shall be permitted to be built as one- and two-family dwellings or townhouses. Fire suppression otherwise required by Section ~~449.5~~508.5.7 of the Los Angeles County Building Code for buildings and structures constructed under this Code shall conform to Section 903.3.1.3 of the Los Angeles County Building Code.

...

SECTION 3. Section R301.1.3.2 is hereby amended to read as follows:

R301.1.3.2 ~~Woodframe structures greater than two stories.~~

The ~~b~~Building ~~e~~Official shall require construction documents to be approved and stamped by a California licensed architect or engineer for all dwellings of woodframe construction more than two stories and basement in height located in Seismic Design Category A, B, or C. Notwithstanding other sections of law, the law establishing these provisions is found in Business and Professions Code Sections 5537 and 6737.1.

The Building Official shall require construction documents to be approved and stamped by a California licensed architect or engineer for all dwellings of woodframe construction more than one story in height or with a basement located in Seismic Design Category D₀, D₁, or D₂ or E.

SECTION 4. Section R301.1.5 is hereby added to read as follows:

R301.1.5 Seismic design provisions for buildings constructed on or into slopes steeper than one unit vertical in three units horizontal (33.3 percent slope).

The design and construction of new buildings and additions to existing buildings when constructed on or into slopes steeper than one unit vertical in three units horizontal (33.3 percent slope) shall comply with Section 1613.6 of the Los Angeles County Building Code.

SECTION 5. Section R301.2 is hereby amended to read as follows:

R301.2 Climatic and geographic design criteria.

Buildings shall be constructed in accordance with the provisions of this eCode as limited by the provisions of this sSection. ~~Additional criteria shall be established by the local jurisdiction and set forth~~ Consult with the Building Official regarding additional criteria in Table R301.2.

SECTION 6. Section R301.2.2.6 is hereby amended to read as follows:

R301.2.2.6 Irregular buildings.

...

1. **Shear wall or braced wall offsets out of plane.** Conditions where exterior shear wall lines or braced wall panels are not in one plane vertically from the foundation to the uppermost story in which they are required.

Exception: ~~For wood light frame construction, floors with cantilevers or setbacks not exceeding four times the nominal depth of the wood floor joists are permitted to support braced wall panels that are out of plane with braced wall panels below provided that all of the following are satisfied:~~

- ~~1. Floor joists are nominal 2 inches by 10 inches (51 mm by 254 mm) or larger and spaced not more than 16 inches (406 mm) on center.~~
- ~~2. The ratio of the back span to the cantilever is not less than 2 to 1.~~
- ~~3. Floor joists at ends of braced wall panels are doubled.~~
- ~~4. For wood frame construction, a continuous rim joist is connected to ends of cantilever joists. Where spliced, the rim joists shall be spliced using a galvanized metal tie not less than 0.058 inch (1.5 mm) (16 gage) and 1 1/2 inches (38 mm) wide fastened with six 16d nails on each side of the splice; or a block of the same size as the rim joist and of sufficient length to fit securely between the joist space at which the splice occurs, fastened with eight 16d nails on each side of the splice.~~
- ~~5. Gravity loads carried at the end of cantilevered joists are limited to uniform wall and roof loads and the reactions from headers having a span of 8 feet (2438 mm) or less.~~

2. **Lateral support of roofs and floors.** Conditions where a section of floor or roof is not laterally supported by shear walls or braced wall lines on all edges.

Exception: Portions of floors that do not support shear walls, braced wall panels above, or roofs shall be permitted to extend not more than 6 feet (1829 mm) beyond a shear wall or braced wall line.

3. **Shear wall or braced wall offsets in plane.** Conditions where the end of a braced wall panel occurs over an opening in the wall below ~~and extends more than 1 foot (305 mm) horizontally past the edge of the opening.~~ This provision is applicable to shear walls and braced wall panels offset in plane and to braced wall panels offset out of plane in accordance with the exception to Item 1.

Exception: ~~For wood light frame wall construction, one end of a braced wall panel shall be permitted to extend more than 1 foot (305 mm) over an opening not more than 8 feet (2438 mm) in width in the wall below provided that the opening includes a header in accordance with all of the following:~~

1. ~~The building width, loading condition and framing member species limitations of Table R602.7(1) shall apply.~~

2. ~~The header is composed of:~~

2.1 ~~Not less than one 2x12 or two 2x10 for an opening not more than 4 feet (1219 mm) wide.~~

2.2. ~~Not less than two 2x12 or three 2x10 for an opening not more than 6 feet (1829 mm) in width.~~

2.3. ~~Not less than three 2x12 or four 2x10 for an opening not more than 8 feet (2438 mm) in width.~~

~~3. The entire length of the braced wall panel does not occur over an opening in the wall below.~~

4. **Floor and roof opening.** Conditions where an opening in a floor or roof exceeds the lesser of 12 feet (3658 mm) or 50 percent of the least floor or roof dimension.

5. **Floor Level offset.** Conditions where portions of a floor level are vertically offset.

Exceptions:

~~1. Framing supported directly by continuous foundations at the perimeter of the building.~~

~~2. For wood light frame construction, floors shall be permitted to be vertically offset when the floor framing is lapped or tied together as required by section R502.6.1.~~

...

SECTION 7. Section R301.2.2.11 is hereby added to read as follows:

R301.2.2.11 Anchorage of mechanical, electrical, or plumbing components and equipment.

Mechanical, electrical, or plumbing components and equipment shall be anchored to the structure. Anchorage of the components and equipment shall be designed to resist loads in accordance with the Los Angeles County Building Code and ASCE 7, except where the component is positively attached to the structure and flexible connections are provided between the component and associated ductwork, piping, and conduit; and either:

1. The component weighs 400 pounds (1,780 N) or less and has a center of mass located 4 feet (1.22 m) or less above the supporting structure; or
2. The component weighs 20 pounds (89N) or less or, in the case of a distributed system, 5 pounds per foot (73 N/m) or less.

SECTION 8. Table R302.1(2) is hereby amended as follows:

TABLE R302.1(2)
EXTERIOR WALLS—DWELLINGS AND ACCESSORY BUILDINGS WITH AUTOMATIC RESIDENTIAL FIRE SPRINKLER PROTECTION

EXTERIOR WALL ELEMENT		MINIMUM FIRE-RESISTANCE RATING	MINIMUM FIRE SEPARATION DISTANCE
Walls	Fire-resistance rated	1 hour—tested in accordance with ASTM E119, UL 263 or Section 703.3 of the <i>California Building Code</i> with exposure from the outside	0 feet
	Not fire-resistance rated	0 hours	3 feet ^a
Projections	Not allowed	NA	< 2 feet
	Fire-resistance rated	1 hour on the underside, or heavy timber, or fire-retardant-treated wood ^{b, c}	2 feet ^a
	Not fire-resistance rated	0 hours	3 feet
Openings in walls	Not allowed	NA	< 3 feet
	Unlimited	0 hours	3 feet ^a
Penetrations	All	Comply with Section R302.4	< 3 feet
		None required	3 feet ^a

For SI: 1 foot = 304.8 mm

- a. ~~Reserved. For residential subdivisions where all dwellings are equipped throughout with an automatic sprinkler system installed in accordance with Section R313, the fire separation distance for exterior walls not fire-resistance rated and for fire-resistance-rated projections shall be permitted to be reduced to 0 feet, and unlimited unprotected openings and penetrations shall be permitted, where the adjoining lot provides an open setback yard that is 6 feet or more in width on the opposite side of the property line.~~

...

SECTION 9. Section R337.1.1 is hereby amended to read as follows:

R337.1.1 Scope.

Section R337 and all subsections apply to building materials, systems and or assemblies used in the exterior design and construction of new buildings, and to additions, alterations, or repairs made to existing buildings, erected, constructed,

located, or moved within a Wildland-Urban Interface (WUI) Fire Area as defined in Section R337.2.

SECTION 10. Section R337.1.3 is hereby amended to read as follows:

R337.1.3 Application.

New buildings, and any additions, alterations, or repairs made to existing buildings located in or moved within any Fire Hazard Severity Zone or any Wildland-Urban Interface (WUI) Fire Area designated by the enforcing agency Los Angeles County Fire Department constructed after the application date shall comply with the provisions of this ~~s~~Section. This shall include all new buildings, and any additions, alterations, or repairs made to existing buildings, with residential, commercial, educational, institutional or similar occupancy type use, which shall be referred to in this chapter as “applicable building” (see definition in Section R337.2), as well as new buildings and structures, and any additions, alterations, or repairs made to existing buildings accessory to those applicable buildings (see Exceptions 1 and 4).

Exceptions:

...

4. ~~New a~~Accessory buildings and miscellaneous structures, including additions, alterations, or repairs, as specified in Section R337.10 shall comply only with the requirements of that ~~s~~Section.

5. ~~Additions to and remodels of buildings originally constructed prior to July 1, 2008.~~ Reserved.

SECTION 11. Section R337.1.3.1 is hereby amended to read as follows:

R337.1.3.1 Application date and where required.

New buildings for which an application for a building permit is submitted on or after July 1, 2008, and any additions, alterations, or repairs made to existing buildings for which an application for a building permit is submitted on or after January 1, 2023, located in any Fire Hazard Severity Zone or Wildland-Urban Interface Fire Area shall comply with all sections of this chapter, including all of the following areas:

...

Exceptions:

1. ~~New~~ bBuildings located in any Fire Hazard Severity Zone within State Responsibility Areas, for which an application for a building permit is submitted on or after January 1, 2008, shall comply with all sections of this ehapter.

2. ~~New~~ bBuildings located in any Fire Hazard Severity Zone within State Responsibility Areas or any Wildland-Urban Interface Fire Area designated by cities and other local agencies for which an application for a building permit is submitted on or after December 1, 2005, but prior to July 1, 2008, shall only comply with the following sections of this ehapter:

...

SECTION 12. Section R337.1.4 is hereby amended to read as follows:

R337.1.4 Inspection and certification.

...

1. Building permit issuance. The local Building Official shall, prior to construction, provide the owner or applicant a certification that the building as proposed to be built complies with all applicable state and local building standards, including those for materials and construction methods for wildfire exposure as described in this Chapter. Issuance of a building permit by the local Building Official for the proposed building shall be considered as complying with this Section.

2. Building permit final. The local Building Official shall, upon completion of construction, provide the owner or applicant with a copy of the final inspection report that demonstrates the building was constructed in compliance with all applicable state and local building standards, including those for materials and construction methods for wildfire exposure as described in this Chapter. Issuance of a certificate of occupancy by the local Building Official for the proposed building shall be considered as complying with this Section.

SECTION 13. Section R337.2 is hereby amended to read as follows:

SECTION R337.2

DEFINITIONS

...

FIRE PROTECTION PLAN. A document prepared for a specific project or development proposed for a Wildland-Urban Interface (WUI) Fire Area. It describes ways to minimize and mitigate potential for loss from wildfire exposure. See the California Title 32 – Fire Code – of the Los Angeles County Code, Chapter 49 for required elements of a Fire Protection Plan.

FIRE HAZARD SEVERITY ZONES. Geographical areas designated pursuant to California Public Resources Codes Sections 4201 through 4204 and classified as Very-High, High, or Moderate in State Responsibility Areas or as Local Responsibility Areas in Very-High Fire Hazard Severity Zones designated pursuant to California Government Code Sections 51175 through 51189. See California Title 32 – Fire Code – of the Los Angeles County Code, Chapter 49.

...

WILDLAND-URBAN INTERFACE (WUI). A geographical area identified by the state as a "Fire Hazard Severity Zone" in accordance with the Public Resources Code Sections 4201 through 4204 and Government Code Sections 51175 through 51189, or other areas designated by the ~~enforcing agency~~ Los Angeles County Fire Department to be at a significant risk from wildfires.

SECTION 14. Section R337.3.2 is hereby amended to read as follows:

R337.3.2 Qualification by testing.

Material and material assemblies tested in accordance with the requirements of Section R337.3 shall be accepted for use when the results and conditions of those tests are met. Product evaluation testing of material and material assemblies shall be approved or listed by the State Fire Marshal or the Building Official, or identified in a current report issued by an approved agency.

SECTION 15. Section R337.3.3 is hereby amended to read as follows:

R337.3.3 Approved agency.

Product evaluation testing shall be performed by an approved agency as defined in Section 1702 of the ~~California~~Los Angeles County Building Code. The scope of accreditation for the approved agency shall include building product compliance with the ~~California~~Los Angeles County Building Code.

SECTION 16. Section R337.3.5.2 is hereby amended to read as follows:

R337.3.5.2 Weathering.

Fire-retardant-treated wood ~~and fire-retardant-treated wood shingles and shakes~~ shall meet the fire test performance requirements of this ~~s~~Section after being subjected to the weathering conditions contained in the following standards, as applicable to the materials and the conditions of use.

SECTION 17. Section R337.3.5.2.1 is hereby amended to read as follows:

R337.3.5.2.1 Fire-retardant-treated wood.

Fire-retardant-treated wood shall be tested in accordance with ASTM D2898 (Method A), and the requirements of Section 2303.2 of the ~~California~~Los Angeles County Building Code.

SECTION 18. Section R337.3.5.2.2 is hereby deleted in its entirety.

~~**R337.3.5.2.2 Fire-retardant-treated wood shingles and shakes.** Fire-retardant-treated wood shingles and shakes shall be approved and listed by the State Fire Marshal in accordance with Section 208(c), Title 19 California Code of Regulations.~~

SECTION 19. Section R337.3.6 is hereby amended to read as follows:

R337.3.6 Alternates for materials, design, tests and methods of construction.

The ~~enforcing agency~~Building Official is permitted to modify the provisions of this ~~e~~Chapter for site-specific conditions in accordance with Chapter 1, Section ~~1.11.2.4~~104.2.7. When required by the ~~enforcing agency~~Building Official for the purposes of granting modifications, a fire protection plan shall be submitted in accordance with ~~the California~~ Title 32 – Fire Code – of the Los Angeles County Code, Chapter 49.

SECTION 20. Section R337.4.4 is hereby amended to read as follows:

R337.4.4 Alternative methods for determining ignition-resistant material.

...

2. Fire-retardant-treated wood. Fire-retardant-treated wood identified for exterior use that complies with the requirements of Section 2303.2 of the ~~California~~Los Angeles County Building Code.

~~3. Fire-retardant-treated wood shingles and shakes. Fire-retardant-treated wood shingles and shakes, as defined in section 1505.6 of the California Building Code and listed by State Fire Marshal for use as “Class B” roof covering, shall be accepted as an Ignition-resistant wall covering material when installed over solid sheathing.~~

SECTION 21. Section R337.5.2 is hereby amended to read as follows:

R337.5.2 Roof coverings.

Roof coverings shall be Class A as specified in Section R902.1. Where the roofing profile has an airspace under the roof covering, installed over a combustible deck, a 72 lb. (32.7 kg) cap sheet complying with ASTM D3909 Standard Specification

for “Asphalt Rolled Roofing (Glass Felt) Surfaced with Mineral Granules,” shall be installed over the roof deck. Bird stops shall be used at the eaves when the profile fits, to prevent debris at the eave. Hip and ridge caps shall be mudded in to prevent intrusion of fire or embers.

Exception: Cap sheet is not required when no less than 1” of mineral wool board or other noncombustible material is located between the roofing material and wood framing or deck.

Alternately, a Class A fire rated roof underlayment, tested in accordance with ASTM E108, shall be permitted to be used. If the sheathing consists of exterior fire-retardant-treated wood, the underlayment shall not be required to comply with a Class A classification. Bird stops shall be used at the eaves when the profile fits, to prevent debris at the eave. Hip and ridge caps shall be mudded in to prevent intrusion of fire or embers. Wood shingles and wood shakes are prohibited in any Fire Hazard Severity Zones regardless of classification.

SECTION 22. Section R337.6.1 is hereby amended to read as follows:

R337.6.1 General.

Where provided, ventilation openings for enclosed attics, gable ends, ridge ends, under eaves and cornices, enclosed eave soffit spaces, enclosed rafter spaces formed where ceilings are applied directly to the underside of roof rafters, underfloor ventilation, foundations and crawl spaces, or any other opening intended to permit ventilation, either in a horizontal or vertical plane, shall be in accordance with Section 1202 of the California Los Angeles County Building Code and Sections R337.6.1 through R337.6.2

to resist building ignition from the intrusion of burning embers and flame through the ventilation openings.

SECTION 23. Section R337.10.3 is hereby amended to read as follows:

R337.10.3 Where required.

...

When required by the ~~enforcing agency~~Building Official, miscellaneous structures that require a permit, and accessory buildings that are 120 square feet (11 m²) or less, when separated from an applicable building on the same lot by a distance of 3 feet (914 mm) or more but less than 50 feet (15 m), shall comply with either Section R337.10.3.4 or Section R337.10.3.3, respectively.

...

SECTION 24. Section R337.10.3.3 is hereby amended to read as follows:

R337.10.3.3 Accessory buildings 120 square feet (11 m²) or less, located 3 feet (914 mm) or more but less than 50 feet (15 m).

When required by the ~~enforcing agency~~Building Official, accessory buildings 120 square feet (11 m²) or less and separated from an applicable building on the same lot by a distance of 3 feet (914 mm) or more but less than 50 feet (15 m) shall be constructed of noncombustible materials or of ignition-resistant materials as described in Section R337.4.2.

SECTION 25. Section R337.10.3.4 is hereby amended to read as follows:

R337.10.3.4 Miscellaneous structures located 3 feet (914

mm) or more but less than 50 feet (15 m).

When required by the enforcing agency Building Official, miscellaneous structures that require a permit and are separated from an applicable building on the same lot by a distance of 3 feet (914 mm) or more but less than 50 feet (15 m) shall be constructed of noncombustible materials or of ignition-resistant materials as described in Section R337.4.3.

SECTION 26. Section R401.1 is hereby amended to read as follows:

R401.1 Application.

...

Wood foundations in Seismic Design Category D₀, D₁, or D₂ shall ~~be designed in accordance with accepted engineering practice~~ not be permitted.

Exception: In non-occupied, single-story, detached storage sheds and similar uses other than carport or garage, provided the gross floor area does not exceed 200 square feet, the plate height does not exceed 12 feet in height above the grade plane at any point, and the maximum roof projection does not exceed 24 inches.

SECTION 27. Section R403.1.2 is hereby amended to read as follows:

R403.1.2 Continuous footing in Seismic Design Categories D₀, D₁ and D₂.

Exterior walls of buildings located in Seismic Design Categories D₀, D₁ and D₂ shall be supported by continuous solid or fully grouted masonry or concrete footings. ~~Other footing materials or systems shall be designed in accordance with accepted engineering practices.~~ Required interior braced wall panels in buildings located in

Seismic Design Categories D₀, D₁ and D₂ ~~with plan dimensions greater than 50 feet (15 240 mm)~~ shall be supported by continuous solid or fully grouted masonry or concrete footings in accordance with Section R403.1.3.4, ~~except for two-story buildings in Seismic Design Category D₂, in which all braced wall panels, interior and exterior, shall be supported on continuous foundations.~~

~~Exception: Two-story buildings shall be permitted to have interior braced wall panels supported on continuous foundations at intervals not exceeding 50 feet (15 240 mm) provided that:~~

- ~~1. The height of cripple walls does not exceed 4 feet (1219 mm).~~
- ~~2. First floor braced wall panels are supported on doubled floor joists, continuous blocking or floor beams.~~
- ~~3. The distance between bracing lines does not exceed twice the building width measured parallel to the braced wall line.~~

SECTION 28. Section R403.1.3.6 is hereby amended to read as follows:

R403.1.3.6 Isolated concrete footings.

In detached one- and two-family dwellings located in Seismic Design Category A, B, or C that are three stories or less in height and constructed with stud bearing walls, isolated plain concrete footings supporting columns or pedestals are permitted.

SECTION 29. Section R403.1.5 is hereby amended to read as follows:

R403.1.5 Slope.

The top surface of footings shall be level. The bottom surface of footings shall not have a slope exceeding 1 unit vertical in 10 units horizontal (10-percent slope).

Footings shall be stepped where it is necessary to change the elevation of the top surface of the footings or where the slope of the bottom surface of the footings will exceed one unit vertical in 10 units horizontal (10-percent slope).

For structures located in Seismic Design Category D₀, D₁, or D₂, stepped footings shall be reinforced with two No. 4 reinforcing bars. Two bars shall be located at the top and bottom of the footings as shown in Figure R403.1.5.

SECTION 30. Figure R403.1.5 is hereby added to read as follows:

**FIGURE R403.1.5
STEPPED FOOTING**

SECTION 31. Section R404.2 is hereby amended to read as follows:

R404.2 Wood foundation walls.

Wood foundation walls shall be constructed in accordance with the provisions of Sections R404.2.1 through R404.2.6 and with the details shown in Figures R403.1(2) and R403.1(3). Wood foundation walls shall not be used for structures located in Seismic Design Category D₀, D₁, or D₂.

SECTION 32. Section R501.2 is hereby amended to read as follows:

R501.2 Requirements.

Floor construction shall be capable of accommodating all loads in accordance with Section R301 and of transmitting the resulting loads to the supporting structural elements. Mechanical or plumbing fixtures and equipment shall be attached or anchored to the structure in accordance with Section R301.2.2.11.

SECTION 33. Section R503.2.4 is hereby added to read as follows:

R503.2.4 Openings in horizontal diaphragms.

Openings in horizontal diaphragms with a dimension perpendicular to the joist that is greater than 4 feet (1.2 m) shall be constructed in accordance with Figure R503.2.4.

SECTION 34. Figure R503.2.4 is hereby added to read as follows:

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm.

FIGURE R503.2.4

OPENING IN HORIZONTAL DIAPHRAGMS

Notes:

- a. Blockings shall be provided beyond headers.
- b. Metal ties not less than 0.058 inch [1.47 mm (16 galvanized gage)] by 1.5 inches (38 mm) wide with eight 16d common nails on each side of the header-joist intersection. The metal ties shall have a minimum yield of 33,000 psi (227 MPa).
- c. Openings in diaphragms shall be further limited in accordance with Section R301.2.2.6.

SECTION 35. Table R602.3(1) is hereby amended to read as follows:

TABLE R602.3(1)

FASTENING SCHEDULE

...

- a. Nails are smooth-common, box or deformed shanks except where otherwise stated. Nails used for framing and sheathing connections are carbon steel and shall have minimum average bending yield strengths as shown: 80 ksi for shank diameter of 0.192 inch (20d common nail), 90 ksi for shank diameters larger than 0.142 inch but not larger than 0.177 inch, and 100 ksi for shank diameters of 0.142 inch or less. Connections using nails and staples of other materials, such as stainless steel, shall be designed by accepted engineering practice or approved under Section R404.14104.2.8. Use of staples in roof, floor, subfloor, and braced wall panels shall be prohibited in Seismic Design Category D₀, D₁, or D₂.

...

SECTION 36. Table R602.3(2) is hereby amended to read as follows:

TABLE R602.3(2)

ALTERNATE ATTACHMENTS TO TABLE R602.3(1)

...

- b. Staples shall have a minimum crown width of 7/16-inch except as noted. Use of staples in roof, floor, subfloor, and braced wall panels shall be prohibited in Seismic Design Category D₀, D₁, or D₂.

...

SECTION 37. Section R602.3.2 is hereby amended to read as follows:

R602.3.2 Top plate.

...

Exception: In other than Seismic Design Category D₀, D₁, or D₂, a single top plate used as an alternative to a double top plate shall comply with the following:

...

SECTION 38. Table R602.3.2 is hereby amended to read as follows:

**TABLE R602.3.2
SINGLE TOP-PLATE SPLICE CONNECTION DETAILS**

CONDITION	TOP-PLATE SPLICE LOCATION			
	Corners and intersecting walls		Butt joints in straight walls	
	Splice plate size	Minimum nails each side of joint	Splice plate size	Minimum nails each side of joint
Structures in SDC A-C; and in SDC D ₀ , D ₁ , and D ₂ with braced wall line spacing less than 25 feet	3" × 6" × 0.036" galvanized steel plate or equivalent	(6) 8d box (2 1/2" × 0.113") nails	3' × 12" × 0.036" galvanized steel plate or equivalent	(12) 8d box (2 1/2" × 0.113") nails
Structures in SDC D ₀ , D ₁ , and D ₂ with braced wall line spacing greater than or equal to 25 feet	3" × 8" by 0.036" galvanized steel plate or equivalent	(9) 8d box (2 1/2" × 0.113") nails	3' × 16" × 0.036" galvanized steel plate or equivalent	(18) 8d box (2 1/2" × 0.113") nails

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm.

SECTION 39. Section R602.10.2.3 is hereby amended to read as follows:

R602.10.2.3 Minimum number of braced wall panels.

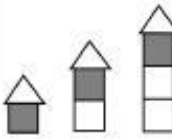

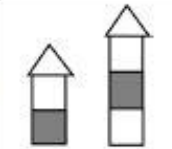

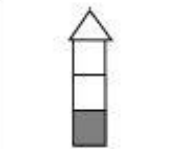

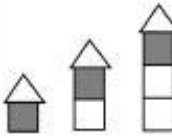

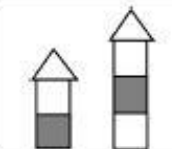

Braced wall lines with a length of 16 feet (4877 mm) or less shall have not less than two braced wall panels of any length or one braced wall panel equal to 48 inches (1219 mm) or more. Braced wall lines greater than 16 feet (4877 mm) shall have not less than two braced wall panels. In Seismic Design Category D₀, D₁, or D₂, no braced wall panel shall have a contributing length less than 48 inches in length or as required in Section R602.10.3, whichever is greater.

SECTION 40. Table R602.10.3(3) is hereby amended to read as follows:

METHOD PFH—PORTAL FRAME WITH HOLD-DOWNS
AT DETACHED GARAGE DOOR OPENINGS

SECTION 45.

Figure R602.10.6.4 is hereby amended to read as follows:

For SI: 1 inch = 25.4 mm, 1 foot = 304.8 mm.

FIGURE R602.10.6.4
METHOD CS-PF—CONTINUOUSLY SHEATHED PORTAL FRAME PANEL CONSTRUCTION

SECTION 46.

Section R606.4.4 is hereby amended to read as follows:

R606.4.4 Parapet walls.

Unreinforced solid masonry parapet walls shall not be less than 8 inches (203 mm) thick and their height shall not exceed four times their thickness.

Unreinforced hollow unit masonry parapet walls shall be not less than 8 inches (203 mm) thick, and their height shall not exceed three times their thickness. Masonry parapet walls in areas subject to wind loads of 30 pounds per square foot (1.44 kPa), or located in Seismic Design Category D₀, D₁, or D₂, or on townhouses in Seismic Design Category C shall be reinforced in accordance with Section R606.12.

SECTION 47. Section R606.12.2.2.3 is hereby amended to read as follows:

R606.12.2.2.3 Reinforcement requirements for masonry elements.

Masonry elements listed in Section R606.12.2.2.2 shall be reinforced in either the horizontal or vertical direction as shown in Figure R606.11(2) and in accordance with the following:

1. Horizontal reinforcement. Horizontal joint reinforcement shall consist of ~~not less than two longitudinal W1.7 wires spaced not more than 16 inches (406 mm) for walls greater than 4 inches (102 mm) in width and not less than one longitudinal W1.7 wire spaced not more than 16 inches (406 mm) for walls not exceeding 4 inches (102 mm) in width; or not less than one No. 4 bar spaced not more than 48 inches (1219 mm).~~ Where two longitudinal wires of joint reinforcement are used, the space between these wires shall be the widest that the mortar joint will accommodate.

Horizontal reinforcement shall be provided within 16 inches (406 mm) of the top and bottom of these masonry elements.

2. Vertical reinforcement. Vertical reinforcement shall consist of not less than one No. 4 bar spaced not more than 48 inches (1219 mm). Vertical reinforcement shall be located within ~~468~~ inches (~~406203~~ mm) of the ends of masonry walls.

SECTION 48. Section R803.2.4 is hereby added to read as follows:

R803.2.4 Openings in horizontal diaphragms.

Openings in horizontal diaphragms shall conform with Section R503.2.4.

SECTION 49. Section R1001.3.1 is hereby amended to read as follows:

R1001.3.1 Vertical reinforcing.

For chimneys up to 40 inches (1016 mm) wide, four No. 4 continuous vertical bars adequately anchored into the concrete foundation shall be placed between wythes of solid masonry or within the cells of hollow unit masonry and grouted in accordance with Section R606. Grout shall be prevented from bonding with the flue liner so that the flue liner is free to move with thermal expansion. For chimneys more than 40 inches (1016 mm) wide, two additional No. 4 vertical bars adequately anchored into the concrete foundation shall be provided for each additional flue incorporated into the chimney or for each additional 40 inches (1016 mm) in width or fraction thereof.

SECTION 50. Section AS106.1 is hereby amended to read as follows:

AS106.1 General. In other than Seismic Design Category D₀, D₁, D₂, E, or F,
pPlastered strawbale walls shall be permitted to be used as structural walls in accordance with the prescriptive provisions of this section.

SECTION 51. Section AZ101.1 is hereby amended to read as follows:

AZ101.1 Scope.

This appendix ~~shall be applicable~~applies to emergency housing and emergency housing facilities, as defined in Section AZ102, when and to the extent that the County of Los Angeles Board of Supervisors ("Board") finds, by motion, resolution, or otherwise, that this appendix applies to a specific state of emergency, local emergency, or declaration of shelter crisis.

SECTION 52. Section AZ102.1 is hereby amended to read as follows:

AZ102.1 General.

...

ENFORCING AGENCY. The Building Official as defined in Section 104.3 of this Code.

...

SECTION 53. Section AZ103.1 is hereby amended to read as follows:

AZ103.1 General.

Emergency sleeping cabins, emergency transportable housing units, membrane structures and tents constructed and/or assembled in accordance with this appendix, shall be occupied only during the duration of the declaration of state of emergency, local emergency, or shelter crisis.

...

SECTION 54. Section AZ103.4 is hereby amended to read as follows:

AZ103.4 Fire and life safety requirements not addressed in this

appendix.

If not otherwise addressed in this appendix, fire and life safety measures, including, but not limited to, means of egress, fire separation, fire sprinklers, smoke alarms, and carbon monoxide alarms, shall be determined and enforced by the enforcing agency in consultation with the Departments of Public Health, Fire and other pertinent County departments, as applicable.

SECTION 55. Section AZ106.1 is hereby amended to read as follows:

AZ106.1 General.

...

Tents and membrane structures shall be provided with means of ventilation (natural and/or mechanical) allowing for adequate air replacement, as determined by the enforcing agency.

SECTION 56. Section AZ107.1 is hereby amended to read as follows:

AZ107.1 General.

Emergency housing shall comply with the applicable requirements in Chapter 11B and/or the US Access Board Final Guidelines for Emergency Transportable Housing as determined by the enforcing agency.

...

SECTION 57. Section AZ110.1.1 is hereby added to read as follows:

AZ110.1.1 Backflow prevention.

Backflow prevention devices shall be provided in accordance with Section 602.3 of the Plumbing Code.

SECTION 58. Section AZ110.1.2 is hereby added to read as follows:

AZ110.1.2 Drinking fountains.

An adequate number of drinking fountains, bottle fillers or drinking facilities shall be provided as determined by the enforcing agency.

SECTION 59. Section AZ110.3 is hereby amended to read as follows:

AZ110.3 Toilet and bathing facilities.

...

The maximum travel distance from any sleeping and/or living area to the toilet facility shall not exceed 300 feet (91.4 m) or as determined by the enforcing agency.

SECTION 60. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 Edition of the California Residential Code. Some of these changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Building Standards Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code contained in this ordinance are reasonably necessary because of local climatic, geological, or topographical conditions in the County of Los Angeles due to the potential for seismic activity in the region, topographical conditions that contribute to the spread of wild fires, and climatic

conditions that impact air quality and increase the risk of wild fires. Without limiting the foregoing, the County makes additional findings herein:

Code Section	Condition	Explanation of Amendment
R301.1.3.2	Geological	<p>Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. After the 1994 Northridge Earthquake, the Wood Frame Construction Joint Task Force recommended that the quality of woodframe construction needed to be greatly improved. The Task Force recommended that structural plans be prepared by the engineer or architect so that plan examiners, building inspectors, contractors, and special inspectors may logically follow and construct the seismic force-resisting systems as presented in the construction documents. For buildings or structures located in Seismic Design Category D₀, D₁, D₂, or E that are subject to a greater level of seismic forces, the requirement to have a California licensed architect or engineer prepare the construction documents is intended to minimize or reduce structural deficiencies that may cause excessive damage or injuries in woodframe buildings. Involvement of a registered professional will minimize the occurrence of structural deficiencies such as plan and vertical irregularities, improper shear transfer of the seismic force-resisting system, missed details or connections important to the structural system, and the improper application of the prescriptive requirements of the California Residential Code.</p>
R301.1.5	Geological Topographical	<p>Due to the local topographical and geological conditions of the sites within the greater Los Angeles region and their susceptibility to earthquakes, this technical amendment is required to address and clarify special needs for buildings constructed on hillside locations. A joint Structural Engineers Association of Southern California (SEAOSC) and Los Angeles City Joint Task Force investigated the performance of hillside building failures after the Northridge Earthquake. Numerous hillside failures resulted in loss of life and millions of dollars in damage. These criteria were developed to minimize</p>

Code Section	Condition	Explanation of Amendment
		the damage to these structures and have been in use by the City and County of Los Angeles for several years.
R301.2.2.6	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. Due to the high geologic activities in the Southern California area and the necessary higher level of performance required for buildings and structures, this local amendment limits the type of irregular conditions as specified in the 2022 California Residential Code. Such limitations are recommended to reduce structural damage in the event of an earthquake. The County of Los Angeles and cities in this region have implemented these extra measures to maintain the structural integrity of the framing of the shear walls and all associated elements when designed for high levels of seismic loads.
R301.2.2.11	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. Due to the high geologic activity in the Southern California area and the necessary higher level of performance required for buildings and structures, this local amendment limits the potential anchorage and supporting frame failure resulting from additional weight. There is no limitation for weight of mechanical and plumbing fixtures and equipment in the International Residential Code. Requirements from ASCE 7 and the International Building Code would permit equipment weighing up to 400 lbs. when mounted at 4 feet or less above the floor or attic level without engineering design. Where equipment exceeds this requirement, it is the intent of this amendment that a registered design professional be required to analyze if the floor support is adequate and structurally sound.
Table R302.1(2)	Climatic	This amendment will not allow unprotected openings (openings that do not resist the spread of fire) to be in the exterior wall of a residential building that is located on a property line. This amendment is necessary due to local climatic conditions. The hot, dry weather conditions of late summer in combination with the Santa Ana winds creates an extreme fire

Code Section	Condition	Explanation of Amendment
		danger. Residential buildings with unprotected openings located on a property line may permit fires to spread from the inside of the building to adjacent properties and likewise from exterior properties to the interior of the building.
R337.1.1	Climatic	Extends the application of Chapter R337 to include additions, alterations, and/or relocated buildings. Many areas of Los Angeles County have been designated as Fire Hazard Severity Zones due to low humidity, strong winds, and dry vegetation. Additions, alterations, and/or relocated buildings have the same fire risk as new buildings.
R337.1.3	Climatic	Extends the application of Chapter R337 to include additions, alterations, and/or relocated buildings. Many areas of Los Angeles County have been designated as Fire Hazard Severity Zones due to the increased risk of fire caused by low humidity, strong winds, and dry vegetation. Additions, alterations, and/or relocated buildings have the same fire risk as new buildings.

R337.1.3.1	Climatic	Extends the application of Chapter R337 to include additions, alterations, and/or relocated buildings. Many areas of Los Angeles County have been designated as Fire Hazard Severity Zones due to the increased risk of fire caused by low humidity, strong winds, and dry vegetation. Additions, alterations, and/or relocated buildings have the same fire risk as new buildings.
R337.3.5.2	Climatic	Disallows the use of wood-shingle/wood-shake roofs due to the increased risk of fire in Los Angeles County caused by low humidity, strong winds, and dry vegetation in Fire Hazard Severity Zones.
R337.3.5.2.2	Climatic	Disallows the use of wood-shingle/wood-shake roofs due to the increased risk of fire in Los Angeles County caused by low humidity, strong winds, and dry vegetation in Fire Hazard Severity Zones.
R337.4.4	Climatic	Disallows the use of wood-shingle/wood-shake roofs due to the increased risk of fire in Los Angeles County caused by low humidity, strong winds, and dry vegetation in Fire Hazard Severity Zones.
R337.5.2	Climatic	Disallows the use of wood-shingle/wood-shake roofs and requires the use of Class A roof covering due to the increased risk of fire in Los Angeles County caused by low humidity, strong winds, and dry vegetation in Fire Hazard Severity Zones.
R401.1	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. Wood foundations, even those that are preservative-treated, encounter a higher risk of deterioration when contacting the adjacent ground. The required seismic anchorage and transfer of lateral forces into the foundation system necessary for 2-story structures and foundation walls could become compromised at varying states of wood decay. In addition, global structure overturning moment and sliding resistance is reduced when utilizing wood foundations as opposed to conventional concrete or masonry systems. However, non-occupied, single-story storage structures pose significantly less risk to human safety and may utilize the wood foundation guidelines specified in this Chapter.
R403.1.2 R403.1.3.6	Climatic	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern

R403.1.5 Figure R403.1.5	Geological	California area. These amendments require minimum reinforcement in continuous footings and stepped footings to address the problem of poor performance of plain or under-reinforced footings during a seismic event. These amendments implement the recommendations of SEAOSC and the Los Angeles City Joint Task Force resulting from their investigation of the 1994 Northridge Earthquake. Interior walls can easily be called upon to resist over half of the seismic loading imposed on simple buildings or structures. Without a continuous foundation to support the braced wall line, seismic loads would be transferred through other elements such as non-structural concrete slab floors, wood floors, etc. Requiring interior braced walls to be supported by continuous foundations is intended to reduce or eliminate the poor performance of buildings or structures.
R404.2	Climatic Geological	No substantiating data has been provided to show that wood foundations are effective in supporting structures and buildings during a seismic event while being subject to deterioration caused by the presence of water and other materials detrimental to wood foundations in the soil. Wood foundations, when they are not properly treated and protected against deterioration, have performed very poorly and have led to slope failures. Most contractors are typically accustomed to construction in dry weather in the Southern California region and are not generally familiar with the necessary precautions and treatment of wood that makes it suitable for both seismic events and wet applications. With the higher seismic demand placed on buildings and structures in this region, coupled with the dryer weather conditions, it is the intent of this amendment to reduce or eliminate potential problems resulting from the use of wood footings and foundations.
R501.2	Geological	Due to the high geologic activities in the Southern California area and the necessary higher level of performance required for buildings and structures, this local amendment limits the potential anchorage and supporting frame failure resulting from additional weight. There is no limitation for weight of mechanical and plumbing fixtures and equipment in

		<p>the International Residential Code. Requirements from ASCE 7 and the International Building Code would permit equipment weighing up to 400 lbs. when mounted at 4 feet or less above the floor or attic level without engineering design. Where equipment exceeds this requirement, it is the intent of this amendment that a registered design professional be required to analyze if the floor support is adequate and structurally sound.</p>
<p>R503.2.4 Figure R503.2.4</p>	<p>Geological</p>	<p>Section R502.10 of the Code does not provide any prescriptive criteria to limit the maximum floor opening size, nor does Section R503 provide any details to address the issue of shear transfer near larger floor openings. With the higher seismic demand placed on buildings and structures in this region, it is important to ensure that a complete load path is provided to reduce or eliminate potential damage caused by seismic forces. Requiring blocking with metal ties around larger floor openings and limiting opening size is consistent with the requirements of Section R301.2.2.2.5.</p>
<p>Table R602.3(1) Table R602.3(2)</p>	<p>Geological</p>	<p>Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. In September 2007, limited cyclic testing data was provided to the ICC Los Angeles Chapter Structural Code Committee showing that stapled wood structural shear panels do not exhibit the same behavior as the nailed wood structural shear panels. The test results of the stapled wood structural shear panels demonstrated lower strength and drift than the nailed wood structural shear panel test results. Therefore, the use of staples as fasteners for shear walls sheathed with other materials shall not be permitted without being substantiated by cyclic testing.</p>

R602.3.2 Table R602.3.2	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. The County of Los Angeles and cities in this region have taken extra measures to maintain the structural integrity of the framing of the shear walls when designed for high levels of seismic loads by eliminating single top plate construction. The performance of modern day braced wall panel construction is directly related to an adequate load path extending from the roof diaphragm to the foundation system.
R602.10.2.3	Geological	The greater Los Angeles region is a densely populated area having buildings and structures constructed over and near a vast array of fault systems capable of producing major earthquakes, including, but not limited, to the 1994 Northridge Earthquake. Plywood shear walls with high aspect ratio experienced many failures during the Northridge Earthquake. This proposed amendment specifies a minimum braced wall length to meet an aspect ratio consistent with other sections of the California Residential Code, and to assure that new buildings and additions to existing buildings are designed and constructed in accordance with the scope and objectives of the California Residential Code. This is intended to improve the performance level of buildings and structures that are subject to the higher seismic demands and reduce and limit potential damage to property. This proposed amendment reflects the recommendations by SEAOSC and the Los Angeles City Joint Task Force that investigated the poor performance observed during the 1994 Northridge Earthquake.
Table R602.10.3(3)	Geological	Due to the high geologic activities in the Southern California area and the necessary higher level of performance of buildings and structures, this local amendment reduces or eliminates the allowable shear values for shear walls sheathed with lath, plaster or gypsum board. The poor performance of such shear walls sheathed with other materials in the 1994 Northridge Earthquake was investigated by SEAOSC and the Los Angeles City Joint Task Force. The County of Los Angeles and cities in this region have taken extra measures to maintain the structural

		integrity of the framing of the shear walls when designed for high levels of seismic loads.
Table R602.10.4	Geological	3/8" thick 3 ply-plywood shear walls experienced many failures during the Northridge Earthquake. This amendment specifies minimum WSP sheathing thickness and nail size and spacing, so as to provide a uniform standard of construction to improve the performance level of buildings and structures, given the potential for higher seismic demands placed on buildings or structure in this region. This proposed amendment reflects the recommendations by SEAOSC and the Los Angeles City Joint Task Force following the 1994 Northridge Earthquake. In September 2007, cyclic testing data was provided to the Los Angeles Chapter Structural Code Committee showing that stapled wood structural shear panels underperformed nailed wood structural shear panels. Test results of the stapled wood structural shear panels appeared much lower in strength and drift than the nailed wood structural shear panel test results.
Table R602.10.5	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. The poor performance of such shear walls sheathed in the 1994 Northridge Earthquake was investigated by SEAOSC and the Los Angeles City Joint Task Force. The County of Los Angeles and cities in this region have taken extra measures to maintain the structural integrity with respect to the "maximum shear wall aspect ratios" of the framing of the shear walls when designed for high levels of seismic loads. This amendment is consistent with the shear wall aspect ratio provision of Section 4.3.4 of AWC SDPWS-2015.
Figure R602.10.6.1	Geological	3/8" thick 3 ply-plywood shear walls experienced many failures during the Northridge Earthquake. The poor performance of shear walls in the 1994 Northridge Earthquake was investigated by SEAOSC and the Los Angeles City Joint Task Force. Box nails were observed to cause massive and multiple failures of the typical 3/8" thick 3 ply-plywood during the Northridge Earthquake. The County of Los Angeles and cities in this region have taken extra measures to maintain the structural integrity of the framing of the

		shear walls when designed for high levels of seismic loads. The performance of modern day braced wall panel construction is directly related to an adequate load path extending from the roof diaphragm to the foundation system.
Figure R602.10.6.2	Geological	3/8" thick 3 ply-plywood shear walls experienced many failures during the Northridge Earthquake. The poor performance of such shear walls in the 1994 Northridge Earthquake was investigated by SEAOSC and the Los Angeles City Joint Task Force. The County of Los Angeles and cities in this region have taken extra measures to maintain the structural integrity of the framing of the shear walls when designed for high levels of seismic loads. Box nails were observed to cause massive and multiple failures of typical 3/8-inch thick plywood during the Northridge Earthquake. This change to the minimum lap splice requirement is consistent with Section 12.16.1 of ACI 318-11. This amendment is a continuation of amendments adopted during prior Code adoption cycles.
Figure R602.10.6.4	Geological	3/8" thick 3 ply-plywood shear walls experienced many failures during the Northridge Earthquake. The poor performance of such shear walls in the 1994 Northridge Earthquake was investigated by SEAOSC and the Los Angeles City Joint Task Force. The County of Los Angeles and cities in this region have taken extra measures to maintain the structural integrity of the framing of the shear walls when designed for high levels of seismic loads. The proposal in which "washers shall be a minimum of 0.229 inch by 3 inches by 3 inches in size" is consistent with Section R602.11.1 of the California Residential Code and Section 2308.3.1 of the California Building Code. This amendment is a continuation of amendments adopted during prior Code adoption cycle.
R606.4.4	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. The addition of the word "or" will prevent the use of unreinforced parapets in Seismic Design Category D ₀ , D ₁ or D ₂ , or on townhouses in Seismic Design Category C.

R606.12.2.2.3	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. Reinforcement using longitudinal wires for buildings and structures located in high seismic areas is not as ductile as deformed rebar. Having vertical reinforcement closer to the ends of masonry walls help to improve the seismic performance of masonry buildings and structures.
R803.2.4	Geological	Section R802 of the Code does not provide any prescriptive criteria to limit the maximum size of roof openings, nor does Section R803 provide any details to address the issue of shear transfer near larger roof openings. With the higher seismic demand placed on buildings and structures in this region, it is important to ensure that a complete load path is provided to reduce or eliminate potential damage caused by seismic forces. Requiring blocking with metal ties around larger roof openings and limiting the size of openings is consistent with the requirements of Section R301.2.2.6.

R1001.3.1	Geological	Los Angeles County is prone to seismic activity due to the existence of active faults in the Southern California area. The performance of fireplaces/chimneys without anchorage to the foundation has been observed to be inadequate during major earthquakes. The lack of anchorage to the foundation results in overturn or displacement.
Appendix AZ AZ101.1, AZ102.1, AZ103.1, AZ103.4, AZ107.1	Administrative, Voluntary Appendix Climatic Geologic Topographical	Adoption of this appendix is necessary because strict compliance with state and local standards and laws would prevent, hinder, or delay the mitigation of the effects of a declared shelter crisis or other emergency. The modifications to this appendix are administrative in nature, to provide clarification of various provisions of the language of this voluntary Appendix.
AZ106.1	Climatic, Voluntary Appendix	Los Angeles County is subject to extreme temperatures, and many of these membrane structures will be erected and occupied during severe weather events. It is necessary to include this amendment to ensure the safety, health and comfort of the occupants is maintained during extreme heat and cold.
AZ110.1.1, AZ110.1.2	Administrative, Voluntary Appendix	These sections are simply a cross reference to the State Plumbing Code requirement for user convenience and is not adding a new building standard nor enacting a more restrictive requirement. To the extent findings are requested, see prefatory language in this Section.
AZ110.3	Climatic, Voluntary Appendix	The County may utilize mobile restroom facilities that are physically separate from the living facilities. Due to the potential for severe local weather conditions, with extreme temperatures or torrential rain, the distance to the restroom facilities required for the comfort, safety and health of displaced people should be reduced to 300 feet or as determined by the Building Official.

SECTION 63. This ordinance shall become operative on January 1, 2023.

[TITLE30RESIDENTIALCODE2022CSCC]

ANALYSIS

This ordinance repeals those provisions of Title 31 – Green Building Standards Code – of the Los Angeles County Code, that incorporated by reference portions of the 2019 Edition of the California Green Building Standards Code, and the ordinance replaces them with provisions incorporating by reference portions of the 2022 California Green Building Standards Code, published by the California Building Standards Commission, with certain changes and modifications.

State law requires that the County adopt ordinances that contain the same requirements as are contained in the building standards published in the most recent edition of the California Green Building Standards Code. State law allows the County to change or modify these requirements only if it determines that such changes or modifications are reasonably necessary because of local climatic, geological, or topographical conditions.

The changes and modifications to requirements contained in the building standards published in the 2022 California Green Building Standards Code that are contained in this ordinance are based upon express findings, contained in the ordinance, that such changes are reasonably necessary due to local climatic, geological, or topographical conditions. This ordinance also makes certain modifications to the administrative portions of Title 31, and incorporates by reference certain administrative provisions contained in Title 26 – Building Code.

Very truly yours,

DAWYN R. HARRISON
Acting County Counsel

By

CAROLE B. SUZUKI
Senior Deputy County Counsel
Public Works Division

Requested: 8/13/22
Revised: 8/29/22

ORDINANCE NO. _____

An ordinance amending Title 31 – Green Building Standards Code – of the Los Angeles County Code, by adopting and incorporating by reference the 2022 California Green Building Standards Code, with certain changes and modifications, and making other revisions thereto.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Chapters 2 through 8, and Appendix A4 and Appendix A5, which incorporate by reference and modify portions of the 2019 California Green Building Standards Code, are hereby repealed.

SECTION 2. Section 100 is hereby amended to read as follows:

100 ADOPTION BY REFERENCE

Except as hereinafter changed or modified, Sections 102 through 119 of Chapter 1 of Title 26 of the Los Angeles County Code are adopted and incorporated by reference into this Title 31 as if fully set forth below, and shall be known as Sections 102 through 119 of Chapter 1 of Title 31 of the Los Angeles County Code.

Except as hereinafter changed or modified, Chapters 2 through 8, and Appendix A4 and Appendix A5, of that certain code known and designated as the 2019~~22~~ California Green Building Standards Code, as published by the California Building Standards Commission, are adopted and incorporated by reference into this Title 31, as if fully set forth below, and shall be known as Chapters 2 through 8, and Appendix A4 and Appendix A5, of Title 31 of the Los Angeles County Code.

A copy of the 2019~~22~~ California Green Building Standards Code shall be at all times maintained by the Building Official for use and examination by the public.

SECTION 3. Section 202 is hereby amended to read, in alphabetical order as follows:

202 DEFINITIONS

...

COOL ROOF. A roofing material that reduces heat gain through the roof and has either high thermal emittance and high solar reflectance, or low thermal emittance and exceptionally high solar reflectance, as specified in Title 24, Part 6, of the California Energy Code.

COOL ROOF RATING COUNCIL or CRRC. The entity recognized by the California Energy Commission to rate and certify the reflectance and emittance values of roofing products.

...

DEVELOPMENT. Any activity requiring discretionary or non-discretionary land use or construction approval from the County that results in the creation, addition, modification or replacement of impervious surface area, which is not part of routine maintenance activity. Development includes, but is not limited to, land subdivisions; the construction, installation, addition, or replacement of a building or structure; expansion of a building footprint; and land-disturbing activities related to structural or impervious surfaces. Development shall not include routine maintenance of original lines and grades and/or hydraulic capacity.

...

SECTION 4. Section 301 is hereby amended to read as follows:

301 GENERAL

301.1 Scope.

Buildings and structures shall be designed to include the green building measures ~~specified as mandatory in the application checklists contained in this code.~~ Voluntary green building measures are also included in the application checklists and may be included in the design and construction of structures covered by this code, but are not required unless adopted by a city, county or city and county as specified in ~~Section 101.7~~indicated in Sections 301.1.1, 301.2, and 301.3.

301.1.1 ~~Additions and alterations~~Residential construction.

[HCD]

The mandatory provisions of Chapter 4 shall be applied to newly constructed low-rise and high-rise residential buildings and structures six stories or less and additions to or alterations of existing residential buildings where the addition or alteration increases the building's conditioned area, volume or size. The requirements shall apply only to and/or within the specified area of the addition or alteration.

...

Newly constructed high-rise residential buildings of seven stories or greater shall comply with Section 301.3.

301.3 Nonresidential ~~additions and alterations~~construction.

[BSC - CG]

...

301.3.3 Nonresidential buildings greater than or equal to 25,000 square feet.

In addition to the requirements of Section 301.3, any newly constructed nonresidential building greater than or equal to 25,000 square feet shall comply with all requirements of Section A5.601.2.4 Tier 1. Roofing materials shall comply with Tier 2 requirements of Table A5.106.11.2.3 [BSC].

Exceptions:

1. Compliance with Section A5.601.2.3 shall be voluntary.
2. High-rise residential buildings of seven stories or greater shall comply with Table A4.106.5.1(4) in lieu of Table A5.106.11.2.3.

SECTION 5. Section 4.106.4 is hereby amended to read as follows:

...

4.106.4.1 New one- and two-family dwellings and townhouses with attached private garages.

For each dwelling unit, install a listed raceway ~~to accommodate~~and a dedicated 208/240-volt branch circuit. The raceway shall not be less than trade size 1 (nominal 1-inch inside diameter). The raceway shall originate at the main service or subpanel and shall terminate into a listed ~~cabinet, box, or other enclosure~~attachment plug in close proximity to the proposed location of an EV charger. Raceways are required to be continuous at enclosed, inaccessible or concealed areas and spaces. The service

panel and/or subpanel shall provide capacity to install a 40-ampere 208/240-volt minimum dedicated branch circuit and space(s) reserved to permit installation of a branch circuit overcurrent protective device.

~~Exception: A raceway is not required if a minimum 40-ampere 208/240-volt dedicated EV branch circuit is installed in close proximity to the proposed location of an EV charger at the time of original construction in accordance with the California Electrical Code.~~

4.106.4.1.1 Identification.

The service panel or subpanel circuit directory shall identify the overcurrent protective device space(s) reserved for future EV charging as "EV CAPABLE". The raceway termination location shall be permanently and visibly marked as "EV CAPABLE".

...

4.106.4.2.1 Multifamily development projects with less than 20 dwelling units; and hotels and motels with less than 20 sleeping units or guest rooms.

The number of dwelling units, sleeping units or guest rooms shall be based on all buildings on a project site subject to this section.

1. **EV Capable.** ~~Ten~~Fifteen (10~~5~~) percent of the total number of parking spaces on a building site, provided for all types of parking facilities, shall be electric vehicle charging spaces (EV spaces) capable of supporting future Level 2 EVSE. Electrical load calculations shall demonstrate that the electrical panel service capacity

and electrical system, including any on-site distribution transformer(s), have sufficient capacity to simultaneously charge all EVs at all required EV spaces at a minimum of 40 amperes.

The service panel or subpanel circuit directory shall identify the overcurrent protective device space(s) reserved for future EV charging purposes as "EV CAPABLE" in accordance with the *California Electrical Code*.

Exceptions:

~~1. When EV chargers (Level 2 EVSE) are installed in a number equal to or greater than the required number of EV capable spaces.~~

~~21.~~ When EV chargers (Level 2 EVSE) are installed in a number ~~less~~greater than the ~~required number of EV capable spaces~~five (5) percent of parking spaces required by Section 4.106.4.2.1, Item 3, the number of EV capable spaces required may be reduced by a number equal to the number of EV chargers installed over the five (5) percent required.

Notes:

- a. Construction documents are intended to demonstrate the project's capability and capacity for facilitating future EV charging.
- b. There is no requirement for EV spaces to be constructed or available until receptacles for EV charging or EV chargers are installed for use.

2. **EV Ready.** ~~Twenty-five~~Thirty (30) percent of the total number of parking spaces shall be equipped with low power Level 2 EV charging receptacles. For

multifamily parking facilities, no more than one receptacle is required per dwelling unit when more than one parking space is provided for use by a single dwelling unit.

Exception: Areas of parking facilities served by parking lifts.

3. **EV Chargers.** Five (5) percent of the total number of parking spaces shall be equipped with Level 2 EVSE. Where common use parking is provided, at least one EV charger shall be located in the common use parking area and shall be available for use by all residents or guests.

When low power Level 2 EV charging receptacles or Level 2 EVSE are installed beyond the minimum required, an automatic load management system (ALMS) may be used to reduce the maximum required electrical capacity to each space served by the ALMS. The electrical system and any on-site distribution transformers shall have sufficient capacity to deliver at least 3.3 kW simultaneously to each EV charging station (EVCS) served by the ALMS. The branch circuit shall have a minimum capacity of 40 amperes, and installed EVSE shall have a capacity of not less than 30 amperes. ALMS shall not be used to reduce the minimum required electrical capacity to the required EV capable spaces.

Exception: EV chargers shall not be required for affordable housing projects. Additionally, the number of required EV capable spaces is permitted to be calculated as ten (10) percent of the number of parking spaces and the number of required EV ready spaces is permitted to be calculated as twenty-five (25) percent of the number of parking spaces for affordable housing projects.

4.106.4.2.2 Multifamily development projects with 20 or more dwelling units, hotels and motels with 20 or more sleeping units or guest rooms.

The number of dwelling units, sleeping units or guest rooms shall be based on all buildings on a project site subject to this section.

1. **EV Capable.** ~~Ten~~Fifteen (15) percent of the total number of parking spaces on a building site, provided for all types of parking facilities, shall be electric vehicle charging spaces (EV spaces) capable of supporting future Level 2 EVSE. Electrical load calculations shall demonstrate that the electrical panel service capacity and electrical system, including any on-site distribution transformer(s), have sufficient capacity to simultaneously charge all EVs at all required EV spaces at a minimum of 40 amperes.

The service panel or subpanel circuit directory shall identify the overcurrent protective device space(s) reserved for future EV charging purposes as "EV CAPABLE" in accordance with the *California Electrical Code*.

Exception: When EV chargers (Level 2 EVSE) are installed in a number greater than ~~five~~fifteen (15) percent of parking spaces required by Section 4.106.4.2.2, Item 3, the number of EV capable spaces required may be reduced by a number equal to the number of EV chargers installed over the ~~five~~fifteen (15) percent required.

Notes:

- a. . Construction documents shall show locations of future EV spaces.
- b. There is no requirement for EV spaces to be constructed or available until receptacles for EV charging or EV chargers are installed for use.

2. **EV Ready.** ~~Twenty-five~~Thirty (2530) percent of the total number of parking spaces shall be equipped with low power Level 2 EV charging receptacles. For multifamily parking facilities, no more than one receptacle is required per dwelling unit when more than one parking space is provided for use by a single dwelling unit.

Exception: Areas of parking facilities served by parking lifts.

3. **EV Chargers.** ~~Five~~Fifteen (15) percent of the total number of parking spaces shall be equipped with Level 2 EVSE. Where common use parking is provided, at least one EV charger shall be located in the common use parking area and shall be available for use by all residents or guests.

When low power Level 2 EV charging receptacles or Level 2 EVSE are installed beyond the minimum required, an automatic load management system (ALMS) may be used to reduce the maximum required electrical capacity to each space served by the ALMS. The electrical system and any on-site distribution transformers shall have sufficient capacity to deliver at least 3.3 kW simultaneously to each EV charging station (EVCS) served by the ALMS. The branch circuit shall have a minimum capacity of 40 amperes, and installed EVSE shall have a capacity of not less than 30 amperes. ALMS shall not be used to reduce the minimum required electrical capacity to the required EV capable spaces.

Exception: The number of required EV chargers is permitted to be calculated as five (5) percent of the number of parking spaces for affordable housing projects. Additionally, the number of required EV capable spaces is permitted to be calculated as ten (10) percent of the number of parking spaces and the number of required EV ready spaces is permitted to be calculated as twenty-five (25) percent of the number of parking spaces for affordable housing projects.

4.106.4.2.2-13 Electric vehicle charging stations (EVCS).

Electric vehicle charging stations required by Section 4.106.4.2.1, Item 3, and Section 4.106.4.2.2, Item 3, shall comply with Section 4.106.4.2.2-13.

...

4.106.4.2.2-13.1 Location.

EVCS shall comply with at least one of the following options:

1. The charging space shall be located adjacent to an accessible parking space meeting the requirements of the *California Building Code*, Chapter 11A, to allow use of the EV charger from the accessible parking space.
2. The charging space shall be located on an accessible route, as defined in the *California Building Code*, Chapter 2, to the building.

Exception: Electric vehicle charging stations designed and constructed in compliance with the *California Building Code*, Chapter 11B, are not required to comply with Section 4.106.4.2.2-13.1 and Section 4.106.4.2.2-13.2, Item 3.

4.106.4.2.2-13.2 Electric vehicle charging stations (EVCS) dimensions.

...

4.106.4.2.2-13.3 Accessible EV spaces.

In addition to the requirements in Sections 4.106.4.2.2-13.1 and 4.106.4.2.2-13.2, all EVSE, when installed, shall comply with the accessibility provisions for EV chargers in the *California Building Code*, Chapter 11B. EV ready spaces and EVCS in multifamily developments shall comply with *California Building Code*, Chapter 11A, Section 1109A.

4.106.4.2.34 EV space requirements.

...

4.106.4.2.45 Identification.

...

4.106.4.2.56 Electric Vehicle Ready Space Signage.

...

SECTION 6. Section 4.106.5 is hereby added to read as follows:

4.106.5 Low-impact development (LID).

New development or alterations to existing developed sites shall comply with Chapter 12.84 of Title 12 of the Los Angeles County Code.

SECTION 7. Section 4.106.6 is hereby added to read as follows:

4.106.6 Cool roof for reduction of heat island effect.

Roofing materials shall comply with the solar reflectance and thermal emittance requirements of this Section.

Exceptions:

1. Roof repair.

2. Roof replacement when the roof area being replaced is equal to or less than fifty (50) percent of the total roof area.

3. Installation of building-integrated photovoltaics.

4. Installation of a steep-sloped roof (roof slope > 2:12) in climate zone 16 on other than a low-rise multifamily building.

5. Additions resulting in less than 500 square feet of added roof area or less than fifty (50) percent of the total roof area, whichever is greater.

6. Roof construction that has a thermal mass over the roof membrane, including areas of vegetated (green) roofs, weighing at least 25 pounds per square foot.

4.106.6.1 Solar reflectance.

Roofing materials shall have a minimum 3-year aged solar reflectance equal to or greater than the values specified in Table 4.106.6(1) and Table 4.106.6(2).

Solar reflectance values shall be based on the aged reflectance value of the roofing product or the equation in Section A4.106.5.1, if the CRRC testing for aged solar reflectance is not available.

4.106.6.2 Thermal emittance.

Roofing materials shall have a CRRC initial or aged thermal emittance equal to or greater than the values specified in Table 4.106.6(1) and Table 4.106.6(2).

4.106.6.3 Solar reflectance index alternative.

Roofing materials having a Solar Reflectance Index (SRI) equal to or greater than the values specified in Table 4.106.6(1) and Table 4.106.6(2) may be used as an

alternative to compliance with the 3-year aged solar reflectance and thermal emittance values.

SRI values used to comply with this Section shall be calculated using the SRI Calculation Worksheet (SRI-WS) developed by the California Energy Commission or in compliance with ASTM E1980-01, as specified in the current California Energy Code. Solar reflectance values used in the SRI-WS shall be based on the aged reflectance value of the roofing product or the equation in Section A4.106.5.1, if the CRRC-certified aged solar reflectance is not available. Certified thermal emittance used in the SRI-WS may be either the initial value or the aged value listed by the CRRC.

Note: The Solar Reflectance Index Calculation Worksheet (SRI-WS) is available by contacting the Energy Standards Hotline at 1-800-772-3300, website at www.energy.ca.gov or by email at Title24@energy.ca.gov.

SECTION 8. Tables 4.106.6(1) and 4.106.6(2) are hereby added to read as follows:

TABLE 4.106.6(1) – LOW-RISE RESIDENTIAL

ROOF SLOPE	MINIMUM 3-YEAR AGED SOLAR REFLECTANCE	THERMAL EMITTANCE	SRI
≤2:12	0.65	0.85	78
>2:12	0.25	0.85	20

TABLE 4.106.6(2) – HIGH RISE RESIDENTIAL BUILDINGS, HOTELS AND MOTELS

ROOF SLOPE	MINIMUM 3-YEAR AGED SOLAR REFLECTANCE	THERMAL EMITTANCE	SRI
≤2:12	0.65	0.75	78
>2:12	0.25	0.75	20

SECTION 9. Section 4.408 is hereby amended to read as follows:

4.408 CONSTRUCTION WASTE REDUCTION, DISPOSAL AND RECYCLING

4.408.1 Construction waste management.

Newly-constructed projects and additions and alterations to existing buildings shall Recycle and/or salvage for reuse a minimum of ~~sixty-five (65)~~ percent of the non-hazardous construction and demolition waste debris in accordance with either Section 4.408.2, 4.408.3, or 4.408.4, or meet a more stringent local construction and demolition waste management ordinance, whichever is more stringent. Calculate the amount of materials diverted by weight or by volume, but not by both.

...

SECTION 10. Section 5.106.3 is hereby added to read as follows:

5.106.3 Low-impact development (LID).

New development or alterations to existing developed sites shall comply with Chapter 12.84 of Title 12 of the Los Angeles County Code.

SECTION 11. Table 5.106.5.3.1 is hereby amended to read as follows:

TABLE 5.106.5.3.1

TOTAL NUMBER OF ACTUAL PARKING SPACES	NUMBER OF REQUIRED EV CAPABLE SPACES	NUMBER OF EVCS (EV CAPABLE SPACES PROVIDED WITH EVSE)²
0-9	<u>0</u> 2	0
10-25	<u>4</u> 5	<u>0</u> 2
26-50	<u>8</u> 11	<u>2</u> 4
51-75	<u>13</u> 19	<u>3</u> 5
76-100	<u>17</u> 26	<u>4</u> 9
101-150	<u>25</u> 38	<u>6</u> 13
151-200	<u>35</u> 53	<u>9</u> 18
201 and over	<u>20</u> 30 percent of total ¹	<u>25</u> 33 percent of EV capable spaces ¹

1. Calculation for spaces shall be rounded up to the nearest whole number.

2. ~~The number of required EVCS (EV capable spaces provided with EVSE) in column 3 count toward the total number of required EV capable spaces shown in column 2.~~

SECTION 12. Section 5.106.11 is hereby added to read as follows:

5.106.11 Cool roof for reduction of heat island effect.

Roofing materials shall comply with the solar reflectance and thermal emittance requirements of this Section.

Exceptions:

1. Roof repair.
2. Roof replacement when the roof area being replaced is equal to or less than fifty (50) percent of the total roof area.
3. Installation of building-integrated photovoltaics.

4. Additions resulting in less than 500 square feet of added roof area or less than fifty (50) percent of the total roof area, whichever is greater.

5. Roof construction that has a thermal mass over the roof membrane, including areas of vegetated (green) roofs, weighing at least 25 pounds per square foot.

5.106.11.1 Solar reflectance.

Roofing materials shall have a minimum 3-year aged solar reflectance equal to or greater than values specified in Table 5.106.11.

Solar reflectance values shall be based on the aged reflectance value of the roofing product or the equation in Section A5.106.11.2.1, if the CRRC testing for aged solar reflectance is not available.

5.106.11.2 Thermal emittance.

Roofing material shall have a CRRC initial or aged thermal emittance equal to or greater than the values specified in Table 5.106.11.

5.106.11.3 Solar reflectance index alternative.

Roofing material having a Solar Reflectance Index (SRI) equal to or greater than the values specified in Table 5.106.11 may be used as an alternative to compliance with the 3-year aged solar reflectance and thermal emittance values.

SRI values used to comply with this Section shall be calculated using the SRI Calculation Worksheet (SRI-WS) developed by the California Energy Commission or in compliance with ASTM E1980-01, as specified in the current California Energy Code. Solar reflectance values used in the SRI-WS shall be based on the aged reflectance value of the roofing product or the equation in Section A5.106.11.2.1, if the CRRC-

certified aged solar reflectance is not available. Certified thermal emittance used in the SRI-WS may be either the initial value or the aged value listed by the CRRC.

Note: The Solar Reflectance Index Calculation Worksheet (SRI-WS) is available by contacting the Energy Standards Hotline at 1-800-772-3300, website at www.energy.ca.gov or by email at Title24@energy.ca.gov.

SECTION 13. Table 5.106.11 is hereby added to read as follows:

TABLE 5.106.11

ROOF SLOPE	MINIMUM 3-YEAR AGED SOLAR REFLECTANCE	THERMAL EMITTANCE	SRI
≤2:12	0.68	0.85	82
>2:12	0.28	0.85	27

SECTION 14. Section 5.408.1 is hereby amended to read as follows:

5.408.1 Construction waste management.

Newly-constructed projects and additions and alterations to existing buildings shall Recycle and/or salvage for reuse a minimum of sixty-five (65) percent of the non-hazardous construction and demolition waste debris in accordance with either Section 5.408.1.1, 5.408.1.2, or 5.408.1.3; or meet a local construction and demolition waste management ordinance, whichever is more stringent. Calculate the amount of materials diverted by weight or volume, but not by both.

SECTION 15. Appendix A4 is hereby amended to read as follows:

APPENDIX A4

RESIDENTIAL VOLUNTARY MEASURES

~~Some of the~~ The measures contained in this appendix are not mandatory unless adopted by a city, county or city and county as specified in Section 101.7 and provide additional measures that except to the extent indicated elsewhere in this Code.

~~Designers, builders, and property owners may wish~~ are encouraged to consider all of these measures during the planning, design, and construction process.

SECTION 16. Section A4.108.1 is hereby amended to read as follows:

A4.108.1 Innovative concepts and local environmental conditions.

The provisions of this eCode are not intended to prevent the use of any alternate material, appliance, installation, device, arrangement, method, design, or method of construction not specifically prescribed by this eCode. ~~This code does not limit the authority of city, county, or city and county government to make necessary changes to the provisions contained in this code pursuant to Section 101.7.1.~~

SECTION 17. Section A4.306.1 is hereby amended to read as follows:

A4.306.1 Innovative concepts and local environmental conditions.

The provisions of this eCode are not intended to prevent the use of any alternate material, appliance, installation, device, arrangement, method, design, or method of construction not specifically prescribed by this eCode. ~~This code does not limit the authority of city, county, or city and county government to make necessary changes to the provisions contained in this code pursuant to Section 101.7.1.~~

SECTION 18. Section A4.411.1 is hereby amended to read as follows:

A4.411.1 Innovative concepts and local environmental conditions.

The provisions of this eCode are not intended to prevent the use of any alternate material, appliance, installation, device, arrangement, method, design, or method of construction not specifically prescribed by this eCode. ~~This code does not limit the authority of city, county, or city and county government to make necessary changes to the provisions contained in this code pursuant to Section 101.7.1.~~

SECTION 19. Section A4.509.1 is hereby amended to read as follows:

A4.509.1 Innovative concepts and local environmental conditions.

The provisions of this eCode are not intended to prevent the use of any alternate material, appliance, installation, device, arrangement, method, design, or method of construction not specifically prescribed by this eCode. ~~This code does not limit the authority of city, county, or city and county government to make necessary changes to the provisions contained in this code pursuant to Section 101.7.1.~~

SECTION 20. Section A4.601.1 is hereby amended to read as follows:

A4.601.1 Scope.

The measures contained in this appendix are not mandatory ~~unless adopted by a city, county, or city and county as specified in Section 101.7~~ except to the extent indicated elsewhere in this Code. The provisions of this sSection outline means of achieving enhanced construction or reach levels by incorporating additional green building measures. In order to meet one of the tier levels designers, builders or property owners are required to incorporate additional green building measures necessary to meet the threshold of each level.

SECTION 21. Section A4.601.2 is hereby amended to read as follows:

A4.601.2 Prerequisite measures.

Tier 1 and Tier 2 thresholds require compliance with the mandatory provisions of this eCode and incorporation of the required prerequisite measures listed in Section A4.601.4.2 for Tier 1 and A4.601.5.2 for Tier 2. ~~Prerequisite measures are also identified in the Residential Occupancies Application Checklist in Section A4.602.~~

~~As specified in Section 101.7, additional prerequisite measures may be included by the enforcing agency to address specific local environmental conditions and may be listed in the Innovative Concepts and Local Environmental Conditions portions of the checklist.~~

SECTION 22. Section A4.602 is hereby amended to read as follows:

RESIDENTIAL OCCUPANCIES APPLICATION CHECKLIST

...

~~¹Green building measures listed in this table may be mandatory if adopted by a city, county, or city and county as specified in Section 101.7. Reserved.~~

...

SECTION 23. Section A4.701.1 is hereby amended to read as follows:

A4.701.1 General.

The voluntary measures of this eCode are designed and promulgated to be adopted by reference and made mandatory by local ordinance ~~pursuant to Section 101.7.~~ Jurisdictions wishing to adopt the voluntary provisions of this eCode as an enforceable regulation governing structures and premises should ensure that certain

factual information is included in the adopting ordinance and that the measures are appropriate and achievable and are considered to be suitable as mandatory by the city, county, or city and county. The following sample adoption ordinance addresses several key elements of a code adoption ordinance, including the information required for insertion into ~~the~~such code text.

...

SECTION 24. The Appendix A5 heading is hereby amended to read as follows:

APPENDIX A5

NON-RESIDENTIAL VOLUNTARY MEASURES

The measures contained in this appendix are not mandatory ~~unless adopted by a city, county, or city and county as specified in Section 101.7 and provide additional measures that~~except to the extent indicated elsewhere in this Code. ~~d~~Designers, builders and property owners may wish are encouraged to consider all of these measures during the planning, design, and construction process.

SECTION 25. Section A5.601.1 is hereby amended to read as follows:

A5.601.1 Scope.

The measures contained in this appendix are not mandatory ~~unless adopted by local government as specified in Section 101.7~~except to the extent indicated elsewhere in this Code. The provisions of this ~~s~~Section outline means of achieving enhanced construction or reach levels by incorporating additional green building measures for newly constructed nonresidential buildings as well as additions and alterations. In order

to meet one of the tier levels designers, builders or property owners are required to incorporate additional green building measures necessary to meet the threshold of each level. Refer to the provisions in Section 301.3 for non-residential ~~additions and alterations~~construction scope and application.

SECTION 26. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 Edition of the California Green Building Standards Code. Some of these changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Green Building Standards Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code contained in this ordinance are reasonably necessary because of local climatic, geological, or topographical conditions in the County of Los Angeles due to the potential for seismic activity in the region, topographical conditions that contribute to the spread of wild fires, and climatic conditions that impact air quality and increase the risk of wild fires. Without limiting the foregoing, the County makes additional findings herein:

GREEN BUILDING STANDARDS CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
301.1, 301.1.1	Climatic and Topographic	Environmental resources in the County of Los Angeles are scarce due to varying, and occasionally immoderate, temperatures and weather conditions. Expanding the scope of the mandatory requirements of this Code for all residential additions and alterations, and for residential buildings of seven stories or greater in height, will achieve a greater reduction in greenhouse gases, higher efficiencies of energy, water, and material usage, and improved environmental air quality.
301.3, 301.3.3	Climatic and Topographic	Environmental resources in the County of Los Angeles are scarce due to varying, and occasionally immoderate, temperatures and weather conditions. Expanding the scope of the mandatory requirements of this Code for nonresidential buildings and residential buildings of seven stories or greater in height that are greater than or equal to 25,000 square feet in floor area will achieve a greater reduction in greenhouse gases, higher efficiencies of energy, water, and material usage, and improved environmental air quality.
4.106.4.1, 4.106.4.1.1, 4.106.4.2, 4.106.4.2.1, 4.106.4.2.2, 4.106.4.2.3	Climatic	The County of Los Angeles is a densely populated area, with elevated levels of greenhouse gas emissions. The proposed modification to increase the number of EV charging spaces and stations will help to promote the use of electric vehicles and significantly reduce local air and noise pollution and greenhouse gas emissions, thereby improving the health of the County's residents, businesses and visitors.
4.106.5	Climatic and Topographic	The County of Los Angeles is a densely populated area having residential buildings constructed within a region where water is scarce and maintaining storm water runoff quality is required. The proposed low-impact development measures

GREEN BUILDING STANDARDS CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
		will allow greater conservation of rain water, increase in groundwater recharge, reduction of storm water runoff, and improvement in storm water runoff quality.
4.106.6, 4.106.6.1, 4.106.6.2, 4.106.6.3, Table 4.106.6(1) Table 4.106.6(2)	Climatic	Environmental resources in the County of Los Angeles are scarce due to varying, and occasionally immoderate, temperatures and weather conditions. Adding mandatory requirements for cool roofs for residential occupancies will achieve a greater reduction in greenhouse gases, higher efficiencies of energy, and improved environmental air quality.
5.106.3	Climatic and Topographic	The County of Los Angeles is a densely populated area having buildings constructed within a region where water is scarce and maintaining storm water runoff quality is required. The proposed low-impact development measures will allow greater conservation of rain water, increase in groundwater recharge, reduction of storm water runoff, and improvement in storm water runoff quality.
Table 5.106.5.3.1	Climatic	The County of Los Angeles is a densely populated area, with elevated levels of greenhouse gas emissions. The proposed modification to increase the number of EV charging spaces and stations will help to promote the use of electric vehicles and significantly reduce local air and noise pollution and greenhouse gas emissions, thereby improving the health of the County's residents, businesses and visitors.
5.106.11, 5.106.11.1, 5.106.11.2, 5.106.11.3, Table 5.106.11	Climatic	Environmental resources in the County of Los Angeles are scarce due to varying, and occasionally immoderate, temperatures and weather conditions. Adding mandatory requirements for cool roofs for nonresidential occupancies will achieve a greater reduction in greenhouse gases, higher efficiencies of energy, and improved environmental air quality.

CODE SECTION	CONDITION	EXPLANATION
A5.601.1	Climatic and Topographic	Environmental resources in the County of Los Angeles are scarce due to varying, and occasionally immoderate, temperatures and weather conditions. Expanding the scope of the mandatory requirements of this Code for nonresidential buildings and residential buildings of seven stories or greater in height that are greater than or equal to 25,000 square feet in floor area will achieve a greater reduction in greenhouse gases, higher efficiencies of energy, water, and material usage, and improved environmental air quality.

SECTION 27. This ordinance shall become operative on January 1, 2023.

[TITLE31GREENBUILDCODE2022CSCC]

ORDINANCE NO. _____

An ordinance amending Title 33 – Existing Building Code – of the Los Angeles County Code, by adopting and incorporating by reference the 2022 California Existing Building Code, with certain changes and modifications.

The Board of Supervisors of the County of Los Angeles ordains as follows:

SECTION 1. Chapters 2 through 4, 15 and 16, and Appendix A, Chapters A1, A3, A4, and A5, which incorporate by reference, and modify, portions of the 2019 California Existing Building Code, are hereby repealed.

SECTION 2. Chapter 1 is hereby amended to read as follows:

100 ADOPTION BY REFERENCE

Except as hereinafter changed or modified, Sections 102 through 119 of Chapter 1 of Title 26 of the Los Angeles County Code are adopted and incorporated by reference into this Title 33 as if fully set forth below, and shall be known as Sections 102 through 119 of Chapter 1 of Title 33 of the Los Angeles County Code.

Except as hereinafter changed or modified, Chapters 2 through ~~4~~5, 15 and 16, and Appendix A, Chapters A1, A3, A4, and A5 of that certain code known and designated as the ~~2019~~2022 California Existing Building Code, as published by the California Building Standards Commission, are adopted and incorporated by reference into this Title 33, as if fully set forth below, and shall be known as Chapters 2 through ~~4~~5, 15 and 16, and Appendix A, Chapters A1, A3, A4, and A5 of Title 33 of the Los Angeles County Code.

A copy of the ~~2019~~2022 California Existing Building Code shall be at all times maintained by the Building Official for use and examination by the public.

SECTION 3. Section 302.6 is hereby added to read as follows:

302.6 Parapets and appendages.

302.6.1 General compliance. Whenever the Building Official determines by inspection that, as a result of inadequate construction or bracing to resist horizontal forces, an existing parapet or appendage attached to and supported by an exterior wall of a building is likely to become a hazard to life or property in the event of earthquake disturbance, and such parapet or appendage is not an immediate hazard or danger, as described in Section 102, the Building Official may provide the owner of the building or other person or agent in control of the building, where such parapet or other appendage exists, with a written notice specifying the hazards and the inadequacies of the construction or bracing. The owner of the building or other person or agent in control of the building shall, within 12 months from the date of such written notice, eliminate the hazard as set forth below. Any person receiving notice as set out in this Section may appeal, in the manner provided by Section 102.4, to the Building Board of Appeals.

302.6.2 Wall anchor. The parapet or appendage shall be removed and the remainder of the wall shall be anchored at the roof line, or it shall be reconstructed so that it will conform structurally as nearly as practicable to the requirements of Chapter 16 of the Building Code, or it shall be otherwise braced and

strengthened in a manner satisfactory to the Building Official, so that it will resist a reasonable degree of horizontal forces without becoming dislodged or at risk of falling.

302.6.3 **Inspection of existing condition.** Where, in the opinion of the Building Official, it is necessary to open a portion of roof, wall, or ceiling of a building in order to determine the structural condition of any parapet or appendage, the Building Official may order the owner to make such opening, and the owner shall comply with said order at the owner's sole cost and expense.

SECTION 4. Section 302.7 is hereby added to read as follows:

302.7 **Existing glass.** Whenever the Building Official determines by inspection that an existing glass installation, in rooms having an occupant load of more than 100 persons or a means of egress serving an occupant load of more than 100 persons, as determined by Chapter 10 of the Building Code, is likely to become a hazard in the event of accidental human impact, as described in Section 2406.4 of the Building Code, and such installation does not comply with the provisions for glazing in such locations, the Building Official may provide the owner of the building or other person or agent in control of the building where such glazing exists with a written notice of such condition. The owner of the building or other person or agent in control of the building shall, within 90 days after receiving said notice, replace such glass or otherwise cause the installation to conform to the requirements of the Building Code.

SECTION 5. Section A401.2 is hereby amended to read as follows:

A401.2 **Scope.** The provisions of this eChapter ~~apply to~~ may be used for voluntary seismic improvements to existing buildings of wood construction that

contain residential occupancies and are assigned to Risk Category II, and where the structure has a soft, weak or open-front wall line, and there exists one or more stories above.

SECTION 6. Section A403.1 is hereby amended to read as follows:

[BS] A403.1 General. Modifications required by the provisions in this ~~e~~Chapter shall be designed in accordance with the ~~California~~ Building Code provisions for new construction, except as modified by this ~~e~~Chapter.

Exception: Buildings for which the prescriptive measures provided in Section A404 apply and are used.

Alteration of the existing lateral force-resisting system or vertical load-carrying system shall not reduce the strength or stiffness of the existing structure, unless the altered structure would remain in conformance to the ~~b~~Building ~~e~~Code and this ~~e~~Chapter.

SECTION 7. Section A404.1 is hereby amended to read as follows:

[BS] A404.1 Limitation. These prescriptive measures shall apply only to two-story buildings and only when deemed appropriate by the ~~code~~Building ~~e~~Official. These prescriptive measures rely on rotation of the second floor diaphragm to distribute the seismic load between the side and rear walls around a ground floor open area. In the absence of an existing floor diaphragm of wood structural panel or diagonal sheathing at the top of the first story, a new wood structural panel diaphragm of minimum thickness of $\frac{3}{4}$ inch (19.1 mm) and with 10d common nails at 6 inches

(152 mm) on center shall be applied. A California licensed architect or engineer shall demonstrate compliance with the requirements of Section A404.1 and shall approve and stamp the construction documents.

SECTION 8. Section A405.1 is hereby amended to read as follows:

[BS] A405.1 New materials. New materials shall meet the requirements of the ~~California~~ Building Code, except where allowed by this ~~e~~Chapter.

SECTION 9. Section A407.1 is hereby amended to read as follows:

[BS] A407.1 Structural observation.

Structural observation, in accordance with Section 1704.6 of the ~~California~~ Building Code, is required, regardless of seismic design category, height, or other conditions. Structural observation shall include visual observation of work for conformance to the approved construction documents and confirmation of existing conditions assumed during design.

SECTION 10. Section A407.3 is hereby amended to read as follows:

[BS] A407.3 Testing and inspection.

Structural testing and inspection for new construction materials, submittals, reports and certificates of compliance shall be in accordance with Sections 1704 and 1705 of the ~~California~~ Building Code. Work done to comply with this ~~e~~Chapter shall not be eligible for Exceptions 1, 2, or 3 of Section 1704.2 of the ~~California~~ Building Code or for the exception to Section 1705.13.2 of the ~~California~~ Building Code.

SECTION 11. The provisions of this ordinance contain various changes, modifications, and additions to the 2022 Edition of the California Existing Building Code.

Some of these changes are administrative in nature in that they do not constitute changes or modifications to requirements contained in the building standards published in the California Existing Building Code.

Pursuant to California Health and Safety Code sections 17958.5, 17958.7, and 18941.5, the Board of Supervisors hereby expressly finds that all of the changes and modifications to requirements contained in the building standards published in the California Building Standards Code contained in this ordinance are reasonably necessary because of local climatic, geological, or topographical conditions in the County of Los Angeles due to the potential for seismic activity in the region, topographical conditions that contribute to the spread of wild fires, and climatic conditions that impact air quality and increase the risk of wild fires. Modifications that are administrative in nature, or adopt voluntary appendices, do not require findings pursuant to the Health and Safety Code and applicable law. Without limiting the foregoing, the County makes additional findings herein:

EXISTING BUILDING CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
302.6.1 to 302.6.3	Geologic	The greater Los Angeles/Long Beach region is a densely populated area having buildings constructed over and near a vast array of fault systems capable of producing major earthquakes, including, but not limited to, the 1994 Northridge Earthquake. The purpose of the amendments is to prevent inadequate construction or bracing to increase resistance to horizontal forces, thus minimizing hazards to life or property in the event of an earthquake.

EXISTING BUILDING CODE AMENDMENTS		
CODE SECTION	CONDITION	EXPLANATION
302.7	Geologic	The greater Los Angeles/Long Beach region is a densely populated area having buildings constructed over and near a vast array of fault systems capable of producing major earthquakes, including, but not limited to, the 1994 Northridge Earthquake. The purpose of the amendment is to minimize injuries caused by shattering glass in the event of an earthquake.
A401.2	Geologic, Administrative, Voluntary Appendix	The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. The purpose of this amendment is to provide voluntary building standards to constituents that are performing seismic retrofitting for existing structures.
A404.1	Administrative, Geologic, Voluntary Appendix	The Los Angeles region is situated over a vast array of earthquake fault systems capable of producing major earthquakes, including but not limited to the 1994 Northridge Earthquake. The purpose of this amendment is to provide voluntary building standards to constituents that are performing seismic retrofitting for existing structures. Due to these factors, the County requires a licensed architect or engineer stamp and approval of the construction documents.

SECTION 12. This ordinance shall become operative on January 1, 2023.

[TITLE33EXISTINGBUILDCODE2022CSCC]

**NOTICE OF HEARING
REGARDING ORDINANCES AMENDING TITLES 26 (BUILDING CODE),
27 (ELECTRICAL CODE), 28 (PLUMBING CODE), 29 (MECHANICAL CODE),
30 (RESIDENTIAL CODE), 31 (GREEN BUILDING STANDARDS CODE), AND
33 (EXISTING BUILDING CODE) OF THE LOS ANGELES COUNTY CODE**

NOTICE IS HEREBY GIVEN that a public hearing will be held by the Board of Supervisors regarding the adoption of ordinances amending Titles 26 (Building Code), 27 (Electrical Code), 28 (Plumbing Code), 29 (Mechanical Code), 30 (Residential Code), 31 (Green Building Standards Code), and 33 (Existing Building Code) of the Los Angeles County Code.

Said hearing will be held in the Hearing Room of the Board of Supervisors, Room 381B, Kenneth Hahn Hall of Administration, 500 West Temple Street (corner of Temple Street and Grand Avenue), Los Angeles, California, 90012, on November 15, 2022, at 9:30 a.m.

The proposed ordinances will amend Titles 26 (Building Code), 27 (Electrical Code), 28 (Plumbing Code), 29 (Mechanical Code), 30 (Residential Code), 31 (Green Building Standards Code), and Title 33 (Existing Building Code) of the Los Angeles County Code by repealing the provisions contained in these Titles, which had incorporated by reference the 2019 Edition of the California Building Standards Code and replacing them with provisions incorporating by reference the applicable portions of the 2022 Edition of the California Building Standards Code, published by the California Building Standards Commission, with certain changes and modifications.

Copies of the applicable portions of the 2022 Edition of the California Building Standards Code, published by the California Building Standards Commission, are on file with the Executive Office and are open to public inspection.

Notice is further given that at the conclusion of the hearing, the Board of Supervisors may adopt the proposed ordinances, decline to adopt the proposed ordinances, or make amendments to the ordinances that are justified by the evidence presented and warranted by local conditions.

If you do not understand this notice or need more information, please call Mr. Razmig Shamim of Public Works, Building and Safety Division, at (626) 458-6388. Our office hours are Monday through Thursday from 7 a.m. to 5:45 p.m.

Upon 72 hours' notice, the County can provide program information and publications in alternate formats or make other accommodations for people with disabilities. In addition, documents are available at the Kenneth Hahn Hall of Administration in Los Angeles (500 West Temple Street), which is accessible to individuals with disabilities. To request accommodations ONLY, or for more ADA information, please contact our ADA Coordinator at (626) 458-5100 or the California Relay Service 711, Monday through Thursday from 7 a.m. to 5:30 p.m.

Para más información, por favor llame a Obras Públicas al (800) 752-6096, de lunes a jueves entre las 7 a.m. y 5:30 p.m.

The Honorable Board of Supervisors
County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Supervisors:

**TRANSPORTATION CORE SERVICE AREA
TRAFFIC REGULATIONS IN THE UNINCORPORATED COMMUNITIES
OF CHARTER OAK, CITY TERRACE, AND EAST LOS ANGELES
(SUPERVISORIAL DISTRICT 1)
(3 VOTES)**

SUBJECT

Public Works is seeking Board approval to implement traffic regulations to support traffic safety and enhance traffic flow in the unincorporated communities of Charter Oak, City Terrace, and East Los Angeles.

IT IS RECOMMENDED THAT THE BOARD:

1. Find that adopting and/or rescinding traffic regulation orders and posting the corresponding regulatory and advisory signage are categorically exempt from the provisions of the California Environmental Quality Act.
2. Adopt a traffic regulation order prohibiting parking for a period longer than 2 hours on the south side of Arrow Highway between Fenimore Avenue and 553 feet west of Citrus Avenue in the unincorporated community of Charter Oak.
3. Adopt a traffic regulation order establishing a tow away zone on the west side of Rowan Avenue between De Garmo Avenue and a point 315 feet north of De Garmo Avenue in the unincorporated community of City Terrace in accordance with Section 15.64.510 of the Los Angeles County Code.

4. Adopt a traffic regulation order establishing a tow away zone on the east side of Rowan Avenue between De Garmo Avenue and a point 300 feet north of De Garmo Avenue in the unincorporated community of City Terrace in accordance with Section 15.64.510 of the Los Angeles County Code.
5. Rescind a traffic regulation order establishing a disabled persons' parking zone on the northside of Mandalay Drive between a point 290 feet east and a point 310 feet east of Carmelita Avenue in the unincorporated community of City Terrace as established on August 3, 1999.
6. Rescind a traffic regulation order prohibiting parking for a period longer than 20 minutes from 11 a.m. to 1 p.m. on the west side of Garfield Avenue between Ferguson Drive and a point 90 feet north of Ferguson Drive in the unincorporated community of East Los Angeles as established on April 20, 2010.
7. Adopt a traffic regulation order prohibiting parking for a period longer than 20 minutes from 7 a.m. to 1 a.m. on the west side of Garfield Avenue between Ferguson Drive and a point 90 feet north of Ferguson Drive in the unincorporated community of East Los Angeles.
8. Rescind a traffic regulation order establishing a passenger loading zone on the east side of Record Avenue between a point 355 feet and a point 385 feet north of Dennison Street in the unincorporated community of East Los Angeles as established on September 13, 2011.
9. Adopt a traffic regulation order establishing a passenger loading zone from 7 a.m. to 5 p.m. on the east side of Record Avenue between a point 330 feet and a point 385 feet north of Dennison Street in the unincorporated community of East Los Angeles.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of the recommended actions is to support traffic safety and enhance traffic flow. Requests for these traffic regulations were generated by residents or community groups. The affected areas are indicated on the enclosed maps (Attachments A, B, and C).

Implementation of Strategic Plan Goals

These recommendations support the County Strategic Plan: Strategy II.3, Make Environmental Sustainability our Daily Reality. The recommended actions support a clean, flexible, and integrated multi-modal transportation system that improves mobility and traffic safety.

FISCAL IMPACT/FINANCING

There will be no impact to the County General Fund. Sufficient funds are included in the Road Fund Fiscal Year 2022-23 Budget to cover the minor costs of removing and installing the necessary signs and markings.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The California Vehicle Code authorizes the Board to implement these traffic regulations that are required prior to enforcement by the California Highway Patrol and the Sheriff's Department.

ENVIRONMENTAL DOCUMENTATION

The establishment of these regulations, including the installation of related traffic control devices required to notify the motoring public is categorically exempt from the provisions of the California Environmental Quality Act pursuant to Section 15301(c) of the California Environmental Quality Act Guidelines and Class I(x) 7 of the Environmental Reporting Procedures and Guidelines approved by the Board on November 17, 1987.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

Implementation of these traffic controls will have a positive impact by enhancing traffic flow and safety. Upon the Board's approval of these traffic regulations, the corresponding signs and markings will be installed within 12 weeks.

The Honorable Board of Supervisors
November 1, 2022
Page 4

CONCLUSION

Please return one adopted copy of this letter to Public Works, Traffic Safety and Mobility Division. Also, please forward adopted copies of this letter to the Sheriff's Department, Contract Law Enforcement Bureau; Field Operations Support Service; Parking Enforcement Detail; and the California Highway Patrol's Baldwin Park and East Los Angeles offices.

Respectfully submitted,

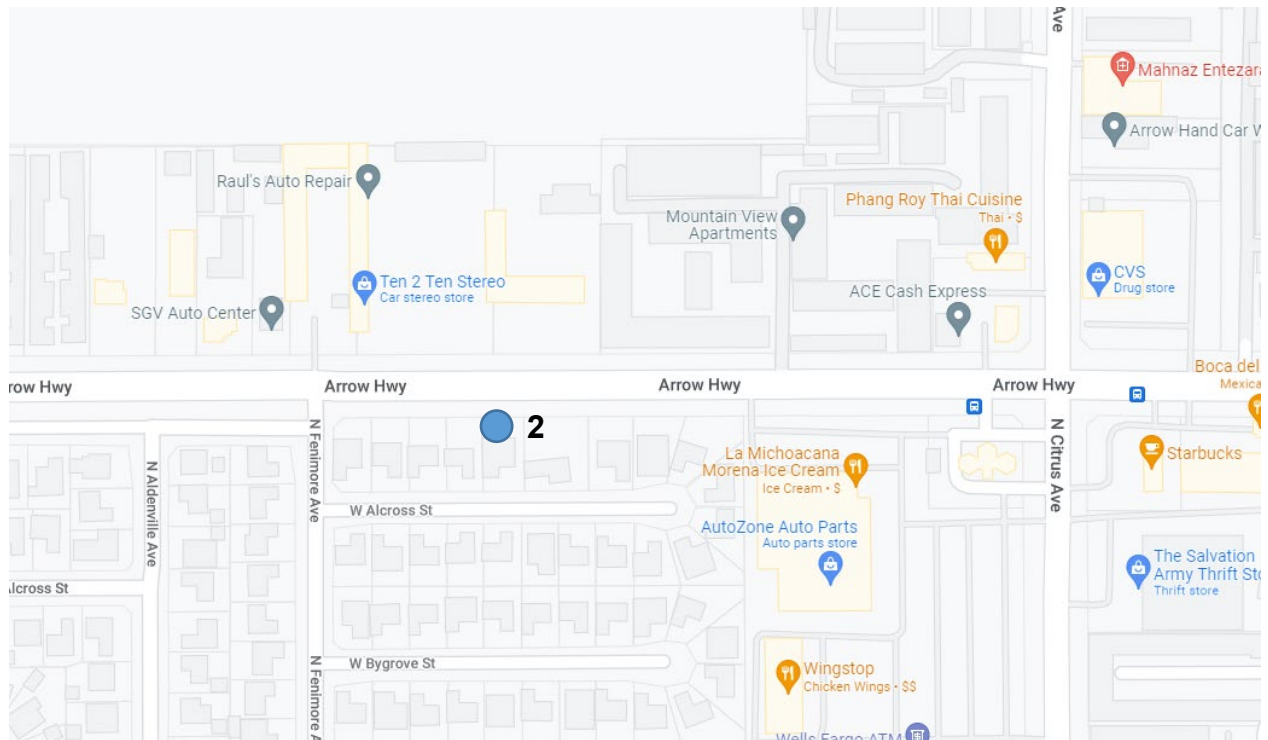

MARK PESTRELLA, PE
Director of Public Works

(SUPERVISORIAL DISTRICT 2)
(3 VOTES)**

SUBJECT

Public Works is seeking Board approval to implement traffic regulations to support traffic safety and enhance traffic flow in the unincorporated communities of Athens/Westmont, Florence/Firestone, and View Park/Windsor Hills.

IT IS RECOMMENDED THAT THE BOARD:

1. Find that adopting and/or rescinding traffic regulation orders and posting the corresponding regulatory and advisory signage are categorically exempt from the provisions of the California Environmental Quality Act.
2. Adopt a traffic regulation order establishing a stop control for northbound traffic on Halldale Avenue at its intersection with westbound 98th Street in the unincorporated community of Athens/Westmont.
3. Rescind a traffic regulation order establishing a passenger loading zone from 7 a.m. to 8:30 a.m. and from 1 p.m. to 3 p.m., school days only, on the west side of Lillian Street between a point 185 feet south of and a point 365 feet south of Randolph Street in the unincorporated community of Florence/Firestone as established on April 19, 2011.
4. Adopt a traffic regulation order establishing a passenger loading zone from 7 a.m. to 8:30 a.m. and from 1 p.m. to 3:30 p.m., school days only, on the west side of Lillian Street between a point 32 feet south of and a point 365 feet south of Randolph Street in the unincorporated community of Florence/Firestone.

5. Rescind a traffic regulation order establishing a disabled person's parking zone on the south side of 52nd Street between a point 93 feet and a point 113 feet east of Mullen Avenue in the unincorporated community of View Park/Windsor Hills as established on February 16, 2010.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of the recommended actions is to support traffic safety and enhance traffic flow. Requests for these traffic regulations were generated by residents or community groups. The affected area is indicated on the enclosed maps (Attachments A and B).

Implementation of Strategic Plan Goals

These recommendations support the County Strategic Plan: Strategy II.3, Make Environmental Sustainability our Daily Reality. The recommended actions support a clean, flexible, and integrated multi-modal transportation system that improves mobility and traffic safety.

County of Los Angeles
383 Kenneth Hahn Hall of Administration
500 West Temple Street
Los Angeles, California 90012

Dear Supervisors:

**TRANSPORTATION CORE SERVICE AREA
TRAFFIC REGULATION IN THE UNINCORPORATED COMMUNITY
OF WEST WHITTIER/LOS NIETOS
(SUPERVISORIAL DISTRICT 4)
(3 VOTES)**

SUBJECT

Public Works is seeking Board approval to support traffic safety and enhance traffic flow in the unincorporated community of West Whittier/Los Nietos.

IT IS RECOMMENDED THAT THE BOARD:

1. Find that adopting and/or rescinding traffic regulation orders and posting the corresponding regulatory and advisory signage are categorically exempt from the provisions of the California Environmental Quality Act.
2. Rescind a traffic regulation order prohibiting parking from 8 a.m. to 3 p.m., school days only, on the east side of Milna Avenue between Washington Boulevard frontage road and Ben Avon Street, in the unincorporated community of West Whittier/Los Nietos, as established on January 10, 2006.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

The purpose of the recommended actions is to support traffic safety and enhance traffic flow. The request to rescind this traffic regulation was generated by the community.

Implementation of Strategic Plan Goals

These recommendations support the County Strategic Plan: Strategy II.3, Make Environmental Sustainability our Daily Reality. The recommended actions support a clean, flexible, and integrated multi-modal transportation system that improves mobility and traffic safety.

FISCAL IMPACT/FINANCING

There will be no impact to the County General Fund. Sufficient funds are included in the Road Fund (B03 – Services and Supplies) Fiscal Year 2022-23 Budget to cover the minor costs of removing the necessary signs.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

The California Vehicle Code authorizes the Board to implement traffic regulations that are required prior to enforcement by the California Highway Patrol and the Sheriff's Department.

ENVIRONMENTAL DOCUMENTATION

The establishment of this regulation is categorically exempt from the provisions of the California Environmental Quality Act pursuant to Section 15301(c) of the California Environmental Quality Act Guidelines and Class I(x) 7 of the Environmental Reporting Procedures and Guidelines approved by the Board on November 17, 1987.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

Implementation of this traffic control will have a positive impact by enhancing traffic flow and safety. Upon the Board's approval of this traffic regulation, the corresponding signs and markings will be removed within 12 weeks.

The Honorable Board of Supervisors
November 1, 2022
