LA County's Model for Prevention and Promotion

Social Conditions

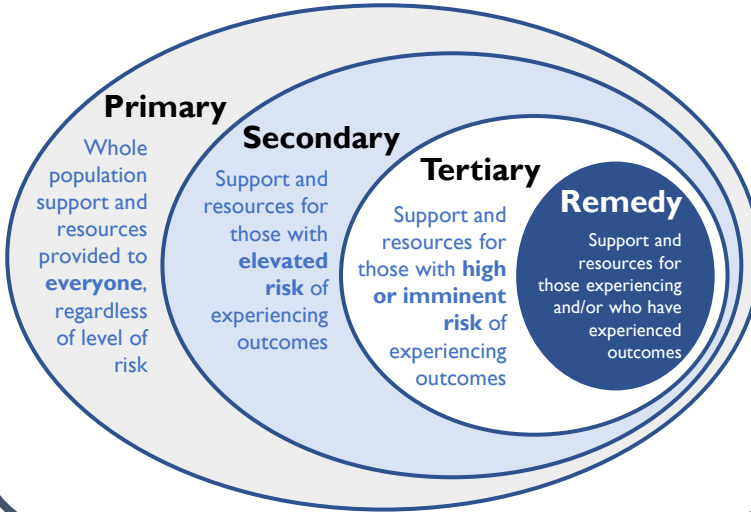

The intersecting structures and systems that shape our lives and influence our likelihood of experiencing positive and negative outcomes (i.e., level of risk).

These conditions are often created by and/or reinforced through government policy, resulting in both positive resources (e.g., public health, parks) and negative forms of harm and control (e.g., racism, ableism, concentrated poverty, environmental hazards, etc.).

Equitable Decision-Making & Community Agency

Policies and practices to ensure community voices (especially those with lived expertise) inform and shape how we deliver support and resources, especially to historically marginalized communities.

Levels of Risk & Prioritized Support

Prevention

Support and resources to stop the occurrence and/or worsening of negative population outcomes, harm, and suffering.

Promotion

Support and resources to strengthen the occurrence of positive population outcomes, well-being, and thriving.

Prevention and promotion can decrease individuals' level of risk, as can addressing and mitigating harmful social conditions through equitable decision-making and community agency. Together, this can cultivate healing, restoration, and justice.
