

DISPATCH CENTER EMERGING INFECTIOUS DISEASE SCREENING TOOL

During routine EMD call questioning, follow the chart below for all **medical calls**

Patient exhibiting any of the following symptoms:

- Measured body temperature $\geq 100^{\circ}\text{F}$
- Patient reports feeling febrile
- Cough
- Shortness of Breath

OR

Patient or close contact is undergoing testing
or has tested positive for COVID-19, in the past 21 days

OR

*International travel in the past 21 days

YES

NO

Notify responding crew of positive screen
for emerging infectious disease

No further action required.

*Recent travel is no longer a screening criteria for
COVID-19 due to documented community spread.
Travel history should still be considered
for MERS (Arabian Peninsula) and
Ebola (Democratic Republic of the Congo)
