Los Angeles County COVID-19 Community Testing Dashboard

Last Updated: December 15, 2022

This dashboard summarizes Antigen and COVID-19 Diagnostic Testing using the Polymerase Chain Reaction (PCR) Molecular test for SARS-CoV-2 at Community Testing Sites in Los Angeles County. This dashboard will be updated weekly. Data presented on testing completed at County- and City-operated Community Testing Sites only reflects a portion of the testing happening across LA County. Additional information on Countywide COVID-19 testing can be found on the Los Angeles County Department of Public Health Dashboard, Long Beach Public Health Dashboard, and the Pasadena Public Health Dashboard.
The graph reflects monthly testing volume and capacity at fixed/pop-up City, County, and State-supported COVID-19 community testing sites. From 2/6/22-2/28/22 testing volume and capacity at Federal COVID-19 community testing sites is captured under County Sites. Federal COVID-19 testing sites closed on 2/28/22. Additional testing volume and capacity for over 200 additional partner testing sites are not reflected. Unused capacity includes no shows and unscheduled appointments. The gray box corresponds to incomplete data. City closed all community testing sites on 12/4/21. This does not include the At-Home testing program and test kit distributions. As of October 1, 2022, totals include Antigen testing at County and State-supported sites.

1. The map reflects all community testing sites as of 12/10/22. 10-mile radius is used as a proxy for the State’s expectation that at least 75% of a region’s population has a testing site within 30 minutes drive in urban areas and 60 minutes drive in rural areas. Pop-up sites are now included under County/State Testing Sites.
