Los Angeles County COVID-19 Community Testing Dashboard
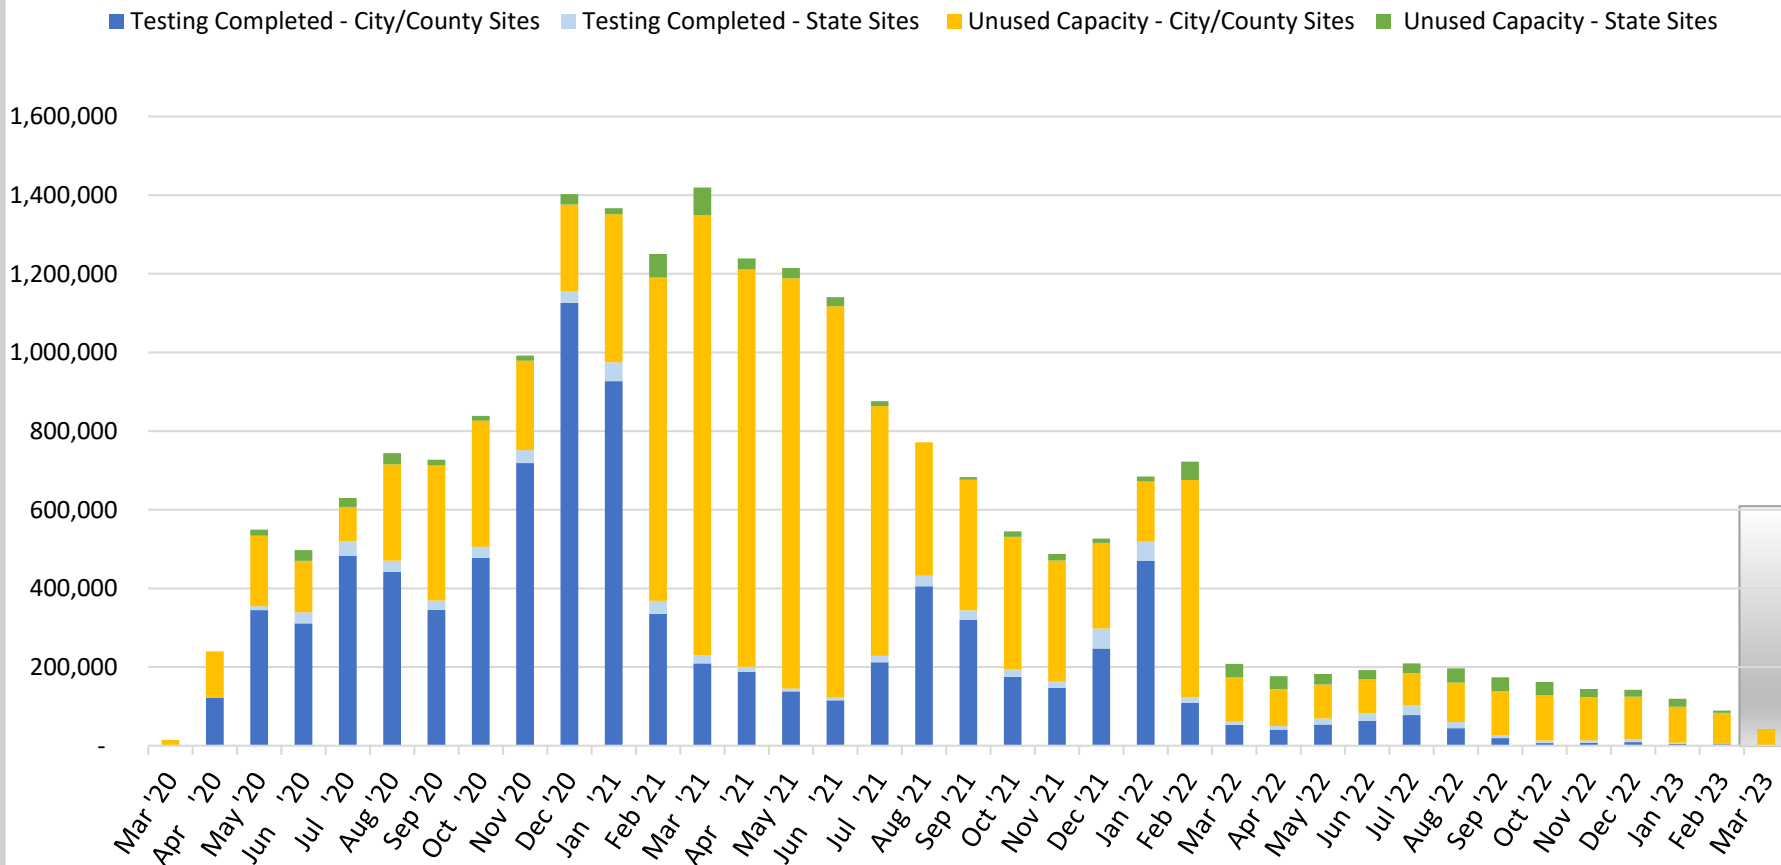

Last Updated:
March 23, 2023

This dashboard summarizes Antigen and COVID-19 Diagnostic Testing using the Polymerase Chain Reaction (PCR) Molecular test for SARS-CoV-2 at Community Testing Sites in Los Angeles County. This dashboard will be updated weekly. Data presented on testing completed at County- and City-operated Community Testing Sites only reflects a portion of the testing happening across LA County. Additional information on Countywide COVID-19 testing can be found on the [Los Angeles County Department of Public Health Dashboard](#), [Long Beach Public Health Dashboard](#), and the [Pasadena Public Health Dashboard](#).

Testing Volume/Utilization

Monthly COVID-19 Testing Capacity and Utilization at Community Testing Sites[1]

Legend: ■ Testing Completed - City/County Sites ■ Testing Completed - State Sites ■ Unused Capacity - City/County Sites ■ Unused Capacity - State Sites
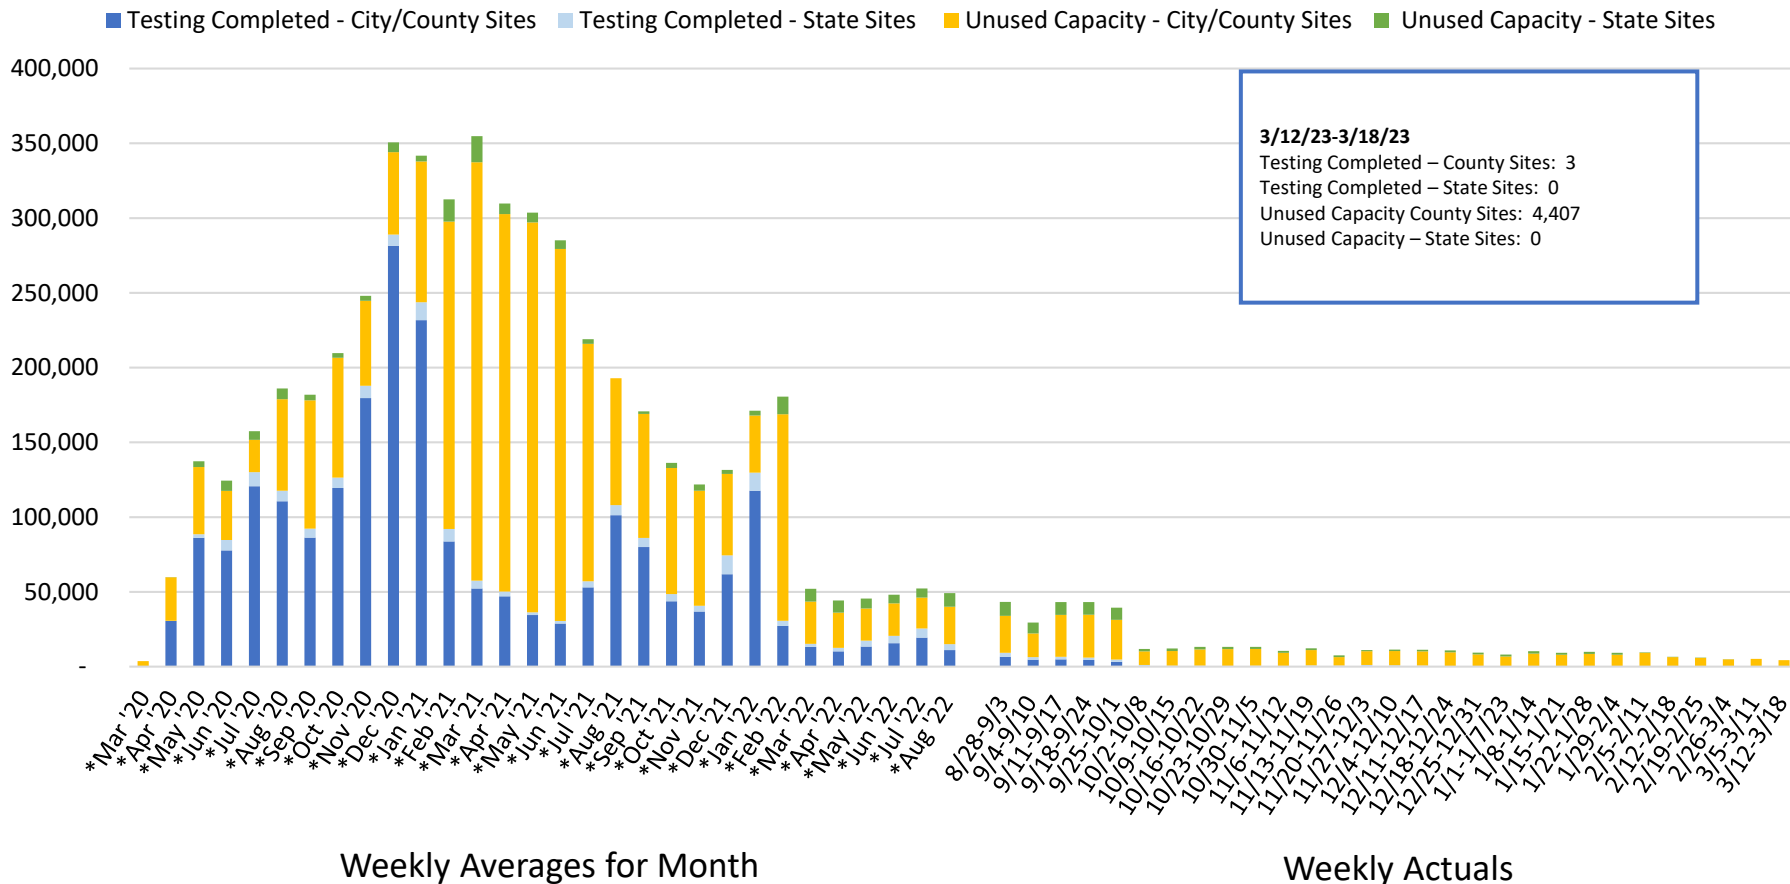

1. The graph reflects monthly testing volume and capacity at fixed/pop-up City, County, and State-supported COVID-19 community testing sites. From 2/6/22-2/28/22 testing volume and capacity at Federal COVID-19 community testing sites is captured under County Sites. Federal COVID-19 testing sites closed on 2/28/22. Additional testing volume and capacity for over 200 additional partner testing sites are not reflected. Unused capacity includes no shows and unscheduled appointments. The gray box corresponds to incomplete data. City closed all community testing sites on 12/4/21. State Closed all community testing sites on 3/4/23. This graph does not include the At-Home testing program and test kit distributions. As of October 1, 2022, totals include Antigen testing at County and State-supported sites.

LA County COVID-19 Testing and Test Kit Distribution Sites[1]

Legend

DPH Supported Library Distribution Sites

★ DPH Library Test Kit Distribution Sites(69)

COVID-19 Testing Sites

● County(46)

● Additional Testing Sites(324)

▢ 10-mile radius around each site

— Freeway

— Highway

---

1. The map reflects all community testing sites as of 3/18/23. 10-mile radius is used as a proxy for the State's expectation that at least 75% of a region's population has a testing site within 30 minutes drive in urban areas and 60 minutes drive in rural areas. Pop-up sites are now included under County/State Testing Sites.
