

Sample Screening Questions to ask along with the PHQ-9 (and GAD-7 as applicable):

- Any follow-up questions to any of participant's responses to a questionnaire that you believe would be helpful in determining appropriateness for prevention services or treatment.

Examples:

- Have any of these problems lasted longer than the 2 weeks that the questionnaire asked them about?
- Have they experienced these symptoms during another period in their life, and under what circumstances?
- Dialogue about how things are going in their life at the present time, such as:
 - Any possible risk factors, (poverty, loss of job, use of substances)
 - Do they have any challenges with family members at home (parent, child, sibling)?
 - Are they or a family member experiencing any returning or new medical conditions or illness? Do they have someone close to them who recently got diagnosed with COVID?
 - Has any of the recent civil unrest caused them increased problems, worries or concerns?
 - What kinds of protective factors are available to participant? How do they currently cope when feeling stressed? Do they have a support network and people to talk to about stressors or challenges in their life?
