

2023 Medical Response and Surge Exercise - Hospital Capacity Survey

Staffed beds mean those beds which are equipped and available for patient use. Staffed beds include those that are occupied and those that are vacant.

- Number of staffed Emergency Department beds that can be used for Pediatric patients at the beginning of the exercise, prior to receiving patients
- Number of staffed General Pediatric / Acute Care Pediatric beds at the beginning of the exercise, prior to receiving patients
- Number of staffed Pediatric ICU beds at the beginning of the exercise, prior to receiving patients
- Number of staffed Neonatal ICU beds at the beginning of the exercise, prior to receiving patients
- Number of staffed Pediatric Dialysis beds at the beginning of the exercise, prior to receiving patients
- Number of existing pediatric inpatients at the beginning of the exercise
- Number of existing adult inpatient at the beginning of the exercise
- Number of existing inpatients (pediatric and adult) who could be discharged to accommodate pediatric surge patients (decompress)
- Number of pediatric surge patients requiring admission for inpatient care based on triage assessment
- Number of pediatric surge patients that required admission that need transfer to another facility due to no capacity or service not available
- Number of pediatric surge patients requiring outpatient care who will not be admitted based on your triage assessment
- Number of existing pediatric inpatients and pediatric surge patients requiring admission for inpatient care with an appropriate staffed bed and after safe discharge of patients from the original patient census
