

Hospital Capacity Survey

Staffed beds mean those beds which are equipped and available for patient use. Staffed beds include those that are occupied and those that are vacant.

1. Number of staffed **Emergency Department** beds at the beginning of the exercise, prior to receiving patients
2. Number of staffed **Medicine** beds at the beginning of the exercise, prior to receiving patients
3. Number of staffed **Surgical** beds at the beginning of the exercise, prior to receiving patients
4. Number of staffed **Burn Floor** beds at the beginning of the exercise, prior to receiving patients
5. Number of staffed **Burn ICU** beds at the beginning of the exercise, prior to receiving patients
6. Number of existing **inpatients** at the beginning of the exercise
7. Number of existing **inpatients** who could be discharged to accommodate surge patients (decompress)
8. Number of existing **inpatients** after safe discharge (decompression) of patients from the original patient census
9. Number of **Burn Surge** patients requiring admission for inpatient care based on triage assessment
10. Number of **surge patients without burns** requiring admission for inpatient care based on triage assessment
11. Number of **Burn Surge** patients that required admission that need transfer to another facility due to no capacity or service not available
12. Number of **surge patients without burns** that required admission that need transfer to another facility due to no capacity or service not available
13. Number of **Burn Surge** patients requiring outpatient care who will not be admitted based on your triage assessment
14. Number of **surge patients without burns** requiring outpatient care who will not be admitted based on your triage assessment
