

Core Services:

Medical Clearance (MC);
Forensic Medical Evaluation (FM);
CSEC/SART Exam (sexual assault); and
Initial Medical Examination (IME)

Other Services:

Forensic Interviews (FI);
Adolescent Care and Transition (ACT);
Fetal Alcohol Spectrum Disorder (FASD);
Primary Care (PC)

Initial Medical Examination

For children being placed into out-of-home care, a comprehensive medical exam is conducted within 10 days of placement for children ages 0-3 or at high risk, and within 30 days for all other children. This exam is meant to assess a child's health needs and develop a plan for addressing any identified issues. The exam includes:

- Health/developmental history
- Physical exam
- Measurements (height, weight, blood pressure, etc.)
- Nutritional assessment
- Vision & hearing screening
- Dental screening
- Immunizations
- Lab tests
- Health education
- Age-appropriate brief mental health screening
- Fetal Alcohol Spectrum Disorder (FASD) screening
- The Hubs may serve as a medical home for DCFS-involved children requiring high level care coordination

OVERVIEW OF HUB SERVICES PROVIDED

Forensic Medical Evaluation

The forensic evaluation is a medical exam for the assessment of suspected child physical abuse, sexual abuse or neglect. It is requested by DCFS or law enforcement in cases where a medical exam may be helpful in assessing whether or not abuse or neglect has occurred and the extent of any injuries. The exam is conducted in a trauma-informed manner by a medical provider with specialized training.

It may include:

Obtaining medical history from the parent/caregiver and child (if verbal) about the child.

A full physical examination and the events related to the alleged abuse or neglect; similar to a well-child

check-up. In some cases, X-rays, other diagnostic imaging, or laboratory tests are conducted; Collection of evidence, including photo documentation, as needed; and, clinical care and initiation of treatment for injuries or effects of neglect or abuse, as needed.

A forensic interview may also be conducted at the request of DCFS or law enforcement by a Child Interview Specialist at the Medical Hub who is trained to speak with children in a way that is not suggestive or leading. The aim is to gather accurate information from the child and minimize the number of times they must be interviewed. This may be done in addition to a medical exam or

without a medical exam,
depending on case circumstances.
