

# CELEBRATING OUR NURSE PRACTITIONERS AND ADVANCED PRACTICE PROVIDERS

Los Angeles General Medical Center proudly celebrates Nurse Practitioner Week (November 9–15, 2025). The national theme, “NPs: Trusted Voices, Proven Care,” reflects the skill, compassion, and commitment our Nurse Practitioners bring to every patient they serve.

Nurse Practitioners (NPs) are advanced practice registered nurses who diagnose and treat illnesses, prescribe medications, and provide both primary and specialty care. They combine the expertise of a clinician with the personalized approach of nursing—ensuring patients receive comprehensive, compassionate care.

At LA General, our more than 150 NPs play a vital role across the hospital, from the emergency department to specialty and primary care clinics. They are trusted leaders, educators, and advocates who help improve outcomes and access to care for our community.

We also recognize our broader Advanced Practice Provider (APP) team—including Physician Assistants, Certified Nurse Midwives, Certified Registered Nurse Anesthetists, and Clinical Nurse Specialists—nearly 240 professionals dedicated to delivering high-quality care.

To all our NPs and APPs: thank you for your expertise, teamwork, and dedication to our patients. You make LA General stronger every day.
