

2026 ANNUAL MEDICAL & HEALTH EXERCISE (AMHE) KEY INFORMATION FOR EARLY PLANNING NOVEMBER 19, 2026 | 8:00 AM – 12:00 PM

The Healthcare Coalition (HCC) will conduct a **Critical Infrastructure: Targeted Violence and Power Outage Exercise**.

Goals:

- Hospitals to test Patient Surge (MCI)
- HCC (including Hospitals) will test Power Outage

Scenario:

Pre-exercise (2-3 days before exercise):

Heighten security posture following threats to the following critical infrastructure sectors in the Los Angeles area:

1. Commercial Facilities Sector (Sports Arena / Stadiums)
2. Energy Sector (Power Plants / Electric Sub-stations)
3. Healthcare and Public Health Sector

Day of Exercise: An Unmanned Aircraft System (UAS) drone attack at Olympic event near your facility results in an MCI and patient surge to emergency departments.

This is immediately followed by a targeted UAS strike at a local electric sub-station forcing your facility on back-up generator or resulting in total power loss.

Who Should Prepare: Hospital Emergency Managers and Facility Administrators / Managers of Ambulatory Surgery Centers, Clinics, Dialysis Centers, Home Health & Hospice entities, Long-term Care facilities and others in the Los Angeles County Healthcare Coalition. Additional details and registration information will be shared soon.
