SUBJECT: PEDIATRIC DATA DICTIONARY

REFERENCE

## **INCLUSION CRITERIA**

## IS THE PATIENT LESS THAN OR EQUAL TO 14 YEARS OF AGE?

### Definition

Checkbox indicating whether the patient is less than or equal to 14 years old

### Field Values

- Y: Yes
- N: No

### Uses

- Identify patients for inclusion into database
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- EMS Report Form
- Base Hospital Form
- ED Records

## GENERAL INFORMATION TAB

## MODE OF ARRIVAL

### Definition

Checkbox indicating whether the patient was transported to your facility by EMS via the 9-1-1 system ALS or walk into emergency department

### Field Values

- **Walk In**
- **EMS ALS**

### Uses

- Identify patients for inclusion into database
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- EMS Patient Care Record
- Notification Form
- Notification Log
- Base Hospital Form

## SEQUENCE NUMBER

### Definition

Unique, alphanumeric EMS record number provided by the EMS provider. Found pre-printed at the top right corner of EMS report form hard copies, or electronically assigned to electronic patient care records (ePCRs) from approved providers

### Additional Information

- Data entry cannot begin without this number
- Consists of two letters and six digits on pre-printed EMS Report Forms; or two letters, ten digits if obtained from an approved ePCR provider
- If sequence number is missing or incorrectly documented, every effort must be taken to obtain it – by reviewing the patient's medical record, or by contacting either the Prehospital Care Coordinator of the applicable base hospital or the EMS provider that transported the patient

### Uses

- Unique patient identifier

### Data Source Hierarchy

- ED Records
- EMS Patient Care Record
- Notification Form
- Notification Log
- Base Hospital Form

## VISITOR IDENTIFICATION NUMBER

### Definition

Unique, numeric record numbers.

### Additional Information

- Data entry cannot begin without this number
- Consists of digits.

### Uses

- Unique patient identifier

## PROVIDER

### Definition

Two-letter code for the EMS provider primarily responsible for the patient's prehospital care

### Field Values

| PUBLIC PROVIDERS |                       |    |                       |
|------------------|-----------------------|----|-----------------------|
| AF               | Arcadia Fire          | MB | Manhattan Beach Fire  |
| AH               | Alhambra Fire         | MF | Monrovia Fire         |

| LH               | La Habra Heights Fire | WC | West Covina Fire      |
| LV               | La Verne Fire         |    |                       |

- **ND:** Not Documented
- **NA:** Not Applicable

### Uses

- System evaluation and monitoring

### Data Source Hierarchy

- EMS Patient Care Record
- Notification Log
- Notification Form
- ED Records
- Base Hospital Form

## PH-DISPATCH DATE

### Definition

Date the provider was notified by dispatch of the incident

### Field Values

- Collected as **MMDDYYYY**

### Uses

- Establishes care intervals and incident timelines

### Data Source Hierarchy

- EMS Patient Care Record

## PH-DISPATCH TIME

### Definition

Time of day the provider was notified by dispatch of the incident

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Uses

- Establishes care intervals and incident timelines

### Data Source Hierarchy

- EMS Patient Care Record

## ED ARRIVAL DATE

### Definition

The date the patient arrived at your facility

### Field Values

- Collected as **MMDDYYYY**
- **ND**: Not documented

### Uses

- Establishes care intervals and incident timelines

### Data Source Hierarchy

- ED Records
- History and Physical

## ED ARRIVAL TIME

### Definition

The time of day that the patient arrived at your facility

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Uses

- Establishes care intervals and incident timelines

### Data Source Hierarchy

- ED Records
- History and Physical

## AGE

### Definition

Numeric value for the age (actual or best approximation) of the patient

### Field Values

- Up to two-digit positive numeric value

### Additional Information

- Enter the numeric age value Additional Information
- Required field for all notification calls
- Must also indicate unit of age Uses
- Allows for data sorting and tracking by age
- Assists with patient identification
- Epidemiological statistics

### Data Source Hierarchy

- Facesheet
- ED Records
- History and Physical

## AGE UNITS

### Definition

Checkboxes indicating units of measurement used to report the age of the patient

### Field Values

- **Years** – used for patients 2 years old or older
- **Months** – used for patients 1 month to 23 months old
- **Weeks** – used for patients whose age is reported in weeks instead of months
- **Days** – used for patients 1 to 29 days old
- **Hours** – used for patients who are newborn and up to 23 hours old
- **ND:** Not Documented
- **NA:** Not applicable

### Uses

- Assists with patient identification
- Epidemiological statistics
- System evaluation and monitoring

### Data Source Hierarchy

- Facesheet
- ED Records
- History and Physical

## PATIENT WEIGHT IN THE ED

**Definition:**

The patient's body weight measured and documented in the Emergency Department during the encounter.

**Field Value:**

- Numeric

**Unit of Measure:** Kilograms (kg)

**Notes:** Record the actual measured weight obtained in the ED. For medication dosing and quality reporting purposes, weight should be documented in kilograms only.

**Uses**

- Provides documentation of assessment and/or care
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other Hospital Records

## PATIENT WEIGHT UNITS

### Definition

Unit of measurement used to report weight

### Field Value

- **Kg**: Kilograms
- **Lbs**: Pounds
- **ND**: Not Documented
- **NA**: Not applicable

### Additional Information

- Required for all pediatric base hospital contacts

### Uses

- Assists with determination of appropriate treatment
- Epidemiological statistics

### Data Source Hierarchy

- ED Records
- History and Physical
- Other Hospital Records

## GENDER

### Definition

Checkbox indicating the gender of the patient

### Field Values

- **M:** Male
- **F:** Female
- **N:** Nonbinary
- **ND:** Not documented
- **NA:** Not Applicable

### Additional Information

- Patients who are undergoing or have undergone a hormonal and/or surgical sex reassignment should be coded using their stated preference
- Nonbinary is a gender option within the State of California for individuals whose gender identity is not exclusively male or female

### Uses

- Assists with patient identification
- Epidemiological statistics
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical

## LENGTH BASED TAPE- Location (Optional Entry)

### Definition

Color that corresponds with the length of an infant or child as measured on a length-based pediatric resuscitation tape Field

### Field Values

- **PH:** Prehospital
- **ED:** Emergency Department
- **ND:** Not documented
- **NA:** Not Applicable

### Additional Information

- Required field for all pediatric base contacts
- Document the measured weight in kilograms obtained from the length-based pediatric resuscitation tape
- If the pediatric patient is shorter or taller than the length-based pediatric resuscitation tape, mark the “Too Short” or “Too Tall” checkbox.

### Uses

- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- EMS Patient Care Record
- Notification Form
- Notification Log
- Base Hospital Form

## LENGTH BASED TAPE MEASURE-Colors (Optional Entry)

### Definition

Color that corresponds with the length of an infant or child as measured on a length-based pediatric resuscitation tape

### Field Values

- **Grey:** 3, 4, or 5 kg (newborn infants)
- **Pink:** 6-7 kg (~3 -6 mos)
- **Red:** 8-9 kg (~7-10 mos)
- **Purple:** 10-11 kg (~12-18 mos)
- **Yellow:** 12-14 kg (~19-35 mos)
- **White:** 15-18 kg (~3-4 yrs)
- **Blue:** 19-22 kg (~5-6 yrs)
- **Orange:** 24-28 kg (~7-9 yrs)
- **Green:** 30-36 kg, or about 80 lbs (~10-12 yrs)
- **Too Tall:** Patient is longer than tape
- **Too Short:** patient is shorter than tape
- **ND:** Not Documented
- **NA:** Not Applicable

### Additional Information

- Field for all pediatric base contacts
- Document the measured weight in kilograms obtained from the length-based pediatric resuscitation tape
- If the pediatric patient is shorter or taller than the length-based pediatric resuscitation tape, mark the “Too Short” or “Too Tall” checkbox, and estimate the patient’s weight in kilograms

### Uses

- Assists with determination of appropriate treatment
- Epidemiological statistics
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- EMS Patient Care Record
- Notification Form
- Notification Log
- Base Hospital Form

## WEIGHT BASED ON LENGTH TAPE (Optional Entry)

### Definition

Number that corresponds with the length of an infant or child as measured on a length-based pediatric resuscitation tape

### Field Values

- **Grey:** 3, 4, or 5 kg (newborn infants)
- **Pink:** 6-7 kg (~3 -6 mos)
- **Red:** 8-9 kg (~7-10 mos)
- **Purple:** 10-11 kg (~12-18 mos)
- **Yellow:** 12-14 kg (~19-35 mos)
- **White:** 15-18 kg (~3-4 yrs)
- **Blue:** 19-22 kg (~5-6 yrs)
- **Orange:** 24-28 kg (~7-9 yrs)
- **Green:** 30-36 kg, or about 80 lbs (~10-12 yrs)
- **Too Tall:** Patient is longer than tape
- **Too Short:** patient is shorter than tape
- **ND:** Not Documented
- **NA:** Not Applicable

### Data Source Hierarchy

- ED Records
- EMS Patient Care Record
- Notification Form
- Notification Log
- Base Hospital Form

## DATE OF FIRST SET OF VITAL SIGNS IN THE ED

**Definition:** The documented date at which the first complete set of vital signs was obtained during the encounter.

### Field Values

- Collected as **MMDDYYYY**

### Data Source Hierarchy

- Facesheet
- ED Records
- History and Physical

### Uses

- Establishes care intervals and incident timelines

### Data Source Hierarchy

- ED Records
- History and Physical
- Other Hospital Records

## TIME OF FIRST SET OF VITAL SIGNS in the ED

**Definition:** The documented clock time at which the first complete set of vital signs was obtained during the encounter.

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Uses

- Establishes care intervals and incident timelines

### Data Source Hierarchy

- ED Records
- History and Physical
- Other Hospital Records

## HEAD TO TOE ASSESSMENT DOCUMENTED BY RN OR FOCUSED ASSESSMENT

**Definition:**

Indicates whether a complete head-to-toe assessment or a focused assessment relevant to the patient's condition was performed and documented by a Registered Nurse (RN) during the encounter.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** "Yes" reflects documented evidence of either a full systematic assessment of all body systems or a targeted assessment addressing specific patient complaints or clinical concerns. "ND" indicates no assessment documented by the RN.

**Uses**

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## BLOOD PRESSURE DOCUMENTED

### Definition

Numeric values of the patient's systolic and/or diastolic blood pressure documented during the encounter.

\*Blood pressure (for patients < 3 years, documentation of capillary refill)

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not Documented
- **NA:** Not Applicable

### Uses

- Provides documentation of assessment and/or care
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Progress Notes
- Other Hospital Records

## RESPIRATORY RATE DOCUMENTED

### Definition

Numeric values of the patient's initial, unassisted respiratory rate documented during the encounter.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not Documented
- **NA:** Not Applicable

### Uses

- Provides documentation of assessment and/or care
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Progress Notes
- Other Hospital Records

## HEART RATE DOCUMENTED

**Definition**

Documentation of patient's pulse rate documented during the encounter.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not Documented
- **NA:** Not Applicable

**Uses**

- Provides documentation of assessment and/or care
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## TEMPERATURE

**Definition:** Indicates whether the patient's body temperature was measured and documented during the encounter.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** "Yes" reflects that a temperature value (regardless of route of measurement) was recorded in the medical record. "ND" indicates insufficient documentation to confirm that temperature was assessed.

### Uses

- Provides documentation of assessment and/or care
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Progress Notes
- Other Hospital Records

## PROVIDER IMPRESSION

### Definition

Four-letter code(s) representing the provider's impression of the patient's presentation

### Field Values

|             |                                    |             |                                         |             |                                    |
|-------------|------------------------------------|-------------|-----------------------------------------|-------------|------------------------------------|
| <b>ABOP</b> | Abdominal Pain/Problems            | <b>ELCT</b> | Electrocution                           | <b>PREG</b> | Pregnancy Complications            |
| <b>AGDE</b> | Agitated Delirium                  | <b>ENTP</b> | ENT/Dental Emergencies                  | <b>LABR</b> | Pregnancy/Labor                    |
| <b>CHOK</b> | Airway Obstruction/Choking         | <b>NOBL</b> | Epistaxis                               | <b>RARF</b> | Respiratory Arrest/Failure         |
| <b>ETOH</b> | Alcohol Intoxication               | <b>EXNT</b> | Extremity Pain/Swelling – Non-Traumatic | <b>SOBB</b> | Resp. Distress/Bronchospasm        |
| <b>ALRX</b> | Allergic Reaction                  | <b>EYEP</b> | Eye Problem – Unspecified               | <b>RDOT</b> | Resp. Distress/Other               |
| <b>ALOC</b> | ALOC – Not Hypoglycemia or Seizure | <b>FEVR</b> | Fever                                   | <b>CHFF</b> | Resp. Distress/Pulmonary Edema/CHF |
| <b>ANPH</b> | Anaphylaxis                        | <b>GUDO</b> | Genitourinary Disorder – Unspecified    | <b>SEAC</b> | Seizure – Active                   |
| <b>PSYC</b> | Behavioral/Psychiatric Crisis      | <b>DCON</b> | HazMat Exposure                         | <b>SEPI</b> | Seizure – Postictal                |
| <b>BPNT</b> | Body Pain – Non-Traumatic          | <b>HPNT</b> | Headache – Non-Traumatic                | <b>SEPS</b> | Sepsis                             |
| <b>BRUE</b> | BRUE                               | <b>HYPR</b> | Hyperglycemia                           | <b>SHOK</b> | Shock                              |
| <b>BURN</b> | Burns                              | <b>HYTN</b> | Hypertension                            | <b>SMOK</b> | Smoke Inhalation                   |
| <b>COMO</b> | Carbon Monoxide                    | <b>HEAT</b> | Hyperthermia                            | <b>STNG</b> | Stings/Venomous Bites              |
| <b>CANT</b> | Cardiac Arrest– Non-Traumatic      | <b>HYPO</b> | Hypoglycemia                            | <b>STRK</b> | Stroke/CVA/TIA                     |
| <b>DYSR</b> | Cardiac Dysrhythmia                | <b>HOTN</b> | Hypotension                             | <b>DRWN</b> | Submersion/Drowning                |
| <b>CPNC</b> | Chest Pain – Not Cardiac           | <b>COLD</b> | Hypothermia/Cold Injury                 | <b>SYNC</b> | Syncope/Near Syncope               |
| <b>CPMI</b> | Chest Pain – STEMI                 | <b>INHL</b> | Inhalation Injury                       | <b>CABT</b> | Traumatic Arrest – Blunt           |
| <b>CPSC</b> | Chest Pain – Suspected Cardiac     | <b>LOGI</b> | Lower GI Bleeding                       | <b>CAPT</b> | Traumatic Arrest – Penetrating     |
| <b>BRTN</b> | Childbirth (Mother)                | <b>FAIL</b> | Medical Device Malfunction – Fail       | <b>TRMA</b> | Traumatic Injury                   |
| <b>COFL</b> | Cold/Flu Symptoms                  | <b>NAVM</b> | Nausea/Vomiting                         | <b>UPGI</b> | Upper GI Bleeding                  |
| <b>DRHA</b> | Diarrhea                           | <b>BABY</b> | Newborn                                 | <b>VABL</b> | Vaginal Bleeding                   |
| <b>DIZZ</b> | Dizziness/Vertigo                  | <b>NOMC</b> | No Medical Complaint                    | <b>WEAK</b> | Weakness – General                 |
| <b>DEAD</b> | DOA – Obvious Death                | <b>ODPO</b> | Overdose/Poisoning/Ingestion            |             |                                    |
| <b>DYRX</b> | Dystonic Reaction                  | <b>PALP</b> | Palpitations                            |             |                                    |

### Additional Information

- First copy of Provider Impression cannot be a null value
- Do not enter more than one copy of the same Provider Impression code

### Uses

- System evaluation and monitoring
- Epidemiological statistics

### Data Source Hierarchy

SUBJECT: PEDIATRIC DATA DICTIONARY

REFERENCE

- Notification Log
- EMS Report Form
- Base Hospital Form

## NORMAL PEDIATRIC VITAL SIGNS

| Age Group              | Heart Rate (awake) | Respiratory Rate | Systolic BP (minimum)* |
|------------------------|--------------------|------------------|------------------------|
| Neonate (0–28 days)    | 100–205 bpm        | 30–60/min        | 60 mmHg                |
| Infant (1–12 months)   | 100–190 bpm        | 30–53/min        | 70 mmHg                |
| Toddler (1–2 yrs)      | 98–140 bpm         | 22–37/min        | 70 + (2 × age)         |
| Preschool (3–5 yrs)    | 80–120 bpm         | 20–28/min        | 70 + (2 × age)         |
| School Age (6–12 yrs)  | 75–118 bpm         | 18–25/min        | 70 + (2 × age)         |
| Adolescent (13–18 yrs) | 60–100 bpm         | 12–20/min        | 90 mmHg                |

### Additional Information

- **Hypotension definition (1–10 yrs):**  
Systolic BP < 70 + (2 × age in years)
- Hypotension is a **late sign of shock in pediatrics**
- **Always interpret vitals in clinical context (fever, crying, pain increase HR/RR)**

### Normal Pediatric Vital Signs (Neonate → Adolescent)

| Age Group             | Heart Rate (Awake) | Heart Rate (Asleep) | Respiratory Rate (Awake) | Respiratory Rate (Asleep) | Systolic BP (Minimum)* | SpO <sub>2</sub> (Room Air) |
|-----------------------|--------------------|---------------------|--------------------------|---------------------------|------------------------|-----------------------------|
| Neonate (0–28 days)   | 100–205            | 90–160              | 30–60                    | 30–60                     | 60 mmHg                | ≥95%                        |
| Infant (1–12 mo)      | 100–190            | 90–160              | 30–53                    | 24–40                     | 70 mmHg                | ≥95%                        |
| Toddler (1–2 yr)      | 98–140             | 80–120              | 22–37                    | 20–30                     | 70 + (2 × age)         | ≥95%                        |
| Preschool (3–5 yr)    | 80–120             | 65–100              | 20–28                    | 18–25                     | 70 + (2 × age)         | ≥95%                        |
| School Age (6–12 yr)  | 75–118             | 58–90               | 18–25                    | 14–20                     | 70 + (2 × age)         | ≥95%                        |
| Adolescent (13–18 yr) | 60–100             | 50–90               | 12–20                    | 10–16                     | 90 mmHg                | ≥95%                        |

## VITAL SIGNS NORMAL FOR AGE?

### Definition

Indicate whether vital signs were normal for age. Reference MCG NO. 1309

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Uses

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Additional Information

Circumstances should also be considered when assessing for and determining cause for concern regarding abnormal vital signs, ex. crying, sleeping

### Data Source Hierarchy

- ED Records
- History and Physical
- Other Hospital Records

## IF NO, WAS PROVIDER NOTIFIED?

### Definition

Indicate whether provider was notified of abnormal vital signs

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Uses

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical
- Progress Notes

## DATE PROVIDER WAS NOTIFIED

### Definition

Date provider was notified of abnormal vital sign

### Field Values

- Collected as **MMDDYYYY**

### Uses

- Establishes care intervals and incident timelines
- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical
- Progress Notes

## TIME PROVIDER WAS NOTIFIED

### Definition

Time provider was notified of abnormal vital sign

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Uses

- Establishes care intervals and incident timelines
- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical
- Progress Notes

## PAIN SCORE DOCUMENTED

### Definition

Indicate whether a pain score was documented

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Uses

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical
- Progress Notes

## PAIN SCALE USED

### Definition

Type of pain scale used appropriate for age

### Field Values

- **Numeric pain:** Pain assessed using a numeric rating scale, typically from 0 (no pain) to 10 (worst possible pain).
- **FACES:** Pain assessed using the Wong-Baker FACES® Pain Rating Scale, in which the patient selects the face that best represents their pain level.
- **FLACC:** Face, Legs, Activity, Cry, Consolability : Behavioral pain assessment tool commonly used for infants, young children, or patients unable to self-report pain.
- **Other:** Pain assessed using a method not listed above. Additional details should be documented when applicable.
- **ND:** Not Documented
- **NA:** Not Applicable

### Uses

- Provides documentation of assessment and/or care
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Progress Notes
- Other Hospital Records

## PAIN LEVEL

**Definition:**

Categorizes the patient's self-reported or clinically assessed pain intensity using a standardized numeric pain scale during the encounter.

**Field Type**

- **None** (0)
- **Mild** (1–3)
- **Moderate** (4–6)
- **Severe** (7–10)
- **ND** Not Documented
- **NA:** Not Applicable

**Notes:** Pain level should be based on the documented numeric rating scale (0–10) at the time of assessment. Select the corresponding category that aligns with the recorded score. "ND" indicates no documented pain assessment in the medical record.

**Uses**

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## SEVERE PAIN, WAS PAIN ADDRESSED?

### Definition

Indicate whether pain was addressed

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Uses

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical
- Progress Notes

## TYPE OF PAIN INTERVENTION

**Definition:**

Determine whether intervention was pharmacological/non-pharm

**Field Values**

- **Pharmacological**
- **Nonpharmacological**
- **ND:** Not documented
- **NA:** Not Applicable

**Uses**

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## DATE OF PAIN INTERVENTION

**Definition:**

Date of pain intervention

**Field Values**

- Collected as **MMDDYYYY**

**Uses**

- Establishes care intervals and incident timelines
- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## TIME OF PAIN INTERVENTION

**Definition:**

The time pain intervention

**Field Values**

- Collected as **HHMM**
- Use 24-hour clock

**Uses**

- Establishes care intervals and incident timelines
- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## PAIN REASSESSMENT

**Definition:**

Indicate whether pain was reassessed after the intervention

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Uses**

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## DATE PAIN WAS REASSESSED

**Definition:**

The time pain was reassessed after an intervention

**Field Values**

- Collected as **MMDDYYYY**

**Uses**

- Establishes care intervals and incident timelines
- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## TIME PAIN WAS REASSESSED

**Definition:**

The time pain was reassessed after an intervention

**Field Values**

- Collected as **HHMM**
- Use 24-hour clock

**Uses**

- Establishes care intervals and incident timelines
- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Progress Notes

## ED DIAGNOSIS

### Definition

Emergency department diagnosis as documented by a physician, advanced practice provider

### Field Values

- ICD-10 codes
- **OT:** Other

### Uses

- Provides documentation of assessment and/or care
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Other Hospital Records
- Progress Notes

## DISCHARGE DATE

### Definition

Date the patient was discharged from the emergency department

### Field Values

- Collected as **MMDDYYYY**

### Additional Information

- Applicable when the patient:
  - Expires
  - Is discharged
  - Leaves against medical advice (AMA)
  - Leaves without being seen (LWBS) or elopes
  - Is transferred to a rehabilitation, skilled nursing, or hospice unit (at your facility or another facility)
  - Is transferred to an acute inpatient unit at another facility

### Uses

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Hospital discharge summary
- Progress notes
- Billing sheet / Medical records coding summary sheet

## DISCHARGE TIME

### Definition

Time the patient was discharged from the emergency department

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Additional Information

- Applicable when the patient:
  - Expires
  - Is discharged
  - Leaves against medical advice (AMA)
  - Leaves without being seen (LWBS) or elopes
  - Is transferred to a rehabilitation, skilled nursing, or hospice unit (at your facility or another facility)
  - Is transferred to an acute inpatient unit at another facility

### Uses

- Establishes care intervals and incident timelines
  - Provides documentation of care
  - Assists with determination of appropriate treatment
  - System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Hospital discharge summary
- Progress notes
- Billing sheet / Medical records coding summary sheet

## ED DISPOSITION

### Definition

Checkbox indicating the patient's next phase of care after the Emergency Department (ED)

### Field Values

- **DC:** Discharged
- **P:** Pediatric Ward: Patient was admitted to a Pediatric Ward unit from the ED
- **I:** Pediatric: ICU Patient was admitted to the PICU from the ED
- **OR:** Patient went to the OR from the ED
- **DE:** Patient died in the ED
- **TX:** Transferred to another Acute Care Facility
- **O:** Other
- **ND:** Not Documented
- **NA:** Not Applicable

### Additional Information

- If "Post Hosp" is checked, "Hosp. Disposition" field is required

### Uses

- Provides documentation of care
- System evaluation and monitoring

### Data Source Hierarchy

- ED records
- Billing sheet / Medical records coding summary sheet
- Other hospital records
- Hospital discharge summary

## HOSPITAL DISPOSITION

### Definition

Checkbox indicating the patient's destination upon discharge from the acute care unit at your facility

### Field Values

- **Died in Hospital**
- **Discharged Alive**
- **Patient Made DNR**
- **Transferred to Another Acute Care Facility**
- **ND:** Not documented
- **NA:** Not Applicable

### Uses

- Provides documentation of care
- Assists with determination of appropriate treatment
- System evaluation and monitoring
- Epidemiological statistics

### Data Source Hierarchy

- ED records
- Billing sheet / Medical records coding summary sheet
- Other hospital records
- Hospital discharge summary

## IF TRANSFERRED SELECT HOSPITAL

### Definition

Code indicating to which acute care facility the patient was transferred to

- Billing Sheet / Medical Records Coding Summary Sheet
- Transfer Records

## PRIMARY REASON PATIENT WAS TRANSFERRED -Transfer Rationale

### Definition

Checkbox indicating the rationale for transfer of the patient, if applicable

### Field Values

|                     |                                                                                                                   |
|---------------------|-------------------------------------------------------------------------------------------------------------------|
| Age                 | Extended Care/Skilled Nursing Facility (SNF)/Long term Care                                                       |
| Special Situation   | Transfer required due to a unique clinical, social, legal, or operational circumstance not otherwise categorized. |
| Emergency Specialty | Decision based on financial status (i.e., cash or self-pay, uninsured)                                            |
| Mental Health       | Patient required higher level of care not available at transferring facility                                      |
| Trauma              | Patient transferred to a designated trauma center for definitive trauma care.                                     |
| Health Plan         | Health Plan decision                                                                                              |
| Other               | Transfer rationale other than above                                                                               |

- **ND:** Not documented
- **NA:** Not Applicable

### Additional Information

- If a patient is discharged home with hospice care, enter "Home"
- If a patient was residing in an Extended/Skilled Nursing Facility prior to hospital arrival and is discharged back to the same Extended/Skilled Nursing Facility, enter "Home"

### Uses

- Provides documentation of assessment and/or care
- System evaluation and monitoring

### Data Source Hierarchy

- ED records

- Hospital discharge summary
- Transfer Records

## VS TAKE PRIOR TO TRANSFER

**Definition:**

Indicates whether the patient's vital signs (e.g., heart rate, respiratory rate, blood pressure, temperature, oxygen saturation) were measured and documented within 30 minutes prior to transfer to another unit or facility.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** "Yes" reflects that at least one complete set of vital signs was recorded within the 30-minute window before transfer. "ND" indicates no documentation of vital signs within this timeframe.

**Uses**

- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED records
- Billing sheet / Medical records coding summary sheet
- Other hospital records
- Hospital discharge summary
- Transfer Records

## TRANSFER FORM COMPLETED

### Definition

Indicates whether a transfer form was completed or if the physician documented the clinical necessity for patient transfer to another facility.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** “Yes” reflects either completion of the formal transfer paperwork or explicit physician documentation supporting the need for transfer. “ND” indicates insufficient documentation to verify either.

- Billing sheet / Medical records coding summary sheet
- Other hospital records
- Hospital discharge summary
- Transfer Records

## SELECT ALL THAT APPLY

### Definition

Select all categories that apply to the patient encounter. Multiple selections may be made if the patient meets the criteria for more than one category. Select **None of the Above** only if none of the listed categories apply.

| Variable                  | Definition                                                                                                                                                                                                                                                                 |
|---------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>SOBB</b>               | <b>Shortness of Breath/Bronchospasm:</b> A patient presenting with shortness of breath, wheezing, bronchospasm, asthma exacerbation, reactive airway disease, or other lower airway obstruction resulting in respiratory distress or requiring treatment for bronchospasm. |
| <b>48HR RETURN</b>        | <b>48-Hour Return Visit:</b> A patient who returns to the emergency department within 48 hours of a previous ED discharge for the same, related, or worsening condition.                                                                                                   |
| <b>CHILD MALTREATMENT</b> | <b>Child Maltreatment:</b> Any case involving suspected or confirmed physical abuse, sexual abuse, emotional abuse, neglect, exploitation, or other forms of harm to a child, regardless of whether a formal report has been made.                                         |
| <b>CARDIAC ARREST</b>     | <b>Cardiac Arrest:</b> A patient who experiences cessation of effective cardiac mechanical activity, resulting in the absence of a detectable pulse and requiring resuscitative interventions such as CPR and/or advanced life support measures.                           |
| <b>NONE OF THE ABOVE</b>  | <b>None of the Above:</b> Indicates that the patient encounter does not meet the criteria for any of the listed categories (Shortness of Breath/Bronchospasm, 48-Hour Return Visit, Child Maltreatment, or Cardiac Arrest).                                                |

## **SOBB TAB**

## CHIEF COMPLAINT

### Definition

Two-letter code(s) representing the patient's most significant medical or trauma complaints

| Variable             | Definition                                                                                                                                                                                                                                   |
|----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| APNEIC EPISODES      | <b>Apneic Episodes:</b> A patient presenting with one or more episodes of cessation of breathing, either witnessed or reported, requiring medical evaluation. Includes brief resolved unexplained events (BRUE) and other episodes of apnea. |
| ASTHMA               | <b>Asthma:</b> A patient presenting with an acute asthma exacerbation characterized by airway inflammation, bronchoconstriction, wheezing, coughing, chest tightness, or respiratory distress requiring evaluation and/or treatment.         |
| CHOKING              | <b>Choking:</b> A patient presenting with actual or suspected airway obstruction caused by a foreign object, food, liquid, or other material resulting in respiratory symptoms or distress.                                                  |
| CROUP                | <b>Croup:</b> A patient presenting with symptoms consistent with viral laryngotracheobronchitis, including a characteristic barking cough, inspiratory stridor, hoarseness, or upper airway obstruction.                                     |
| FEVER                | <b>Fever:</b> A patient presenting with an elevated body temperature, either measured or reported by the caregiver, requiring medical evaluation.                                                                                            |
| FOREIGN BODY         | <b>Foreign Body:</b> A patient presenting with actual or suspected ingestion, aspiration, insertion, or retention of a foreign object requiring evaluation or intervention.                                                                  |
| NEAR DROWNING        | <b>Near Drowning:</b> A patient presenting after a submersion or immersion event resulting in respiratory impairment, regardless of symptom severity or outcome.                                                                             |
| OTHER                | <b>Other:</b> A patient encounter involving a respiratory, airway, or related condition that does not meet the criteria for any of the specified categories.                                                                                 |
| OVERDOSE             | <b>Overdose:</b> A patient presenting with actual or suspected ingestion, inhalation, injection, or exposure to a medication, drug, toxin, or other substance in an amount that may cause harm.                                              |
| RESPIRATORY ARREST   | <b>Respiratory Arrest:</b> A patient who experiences complete cessation of effective respirations requiring immediate resuscitative intervention, assisted ventilation, or advanced airway management.                                       |
| RESPIRATORY DISTRESS | <b>Respiratory Distress:</b> A patient presenting with signs of increased work of breathing, including but not limited to tachypnea, retractions, nasal flaring, grunting, or use of accessory muscles.                                      |
| SHORTNESS OF BREATH  | <b>Shortness of Breath:</b> A patient presenting with subjective difficulty breathing or dyspnea, with or without objective signs of respiratory compromise.                                                                                 |

| Variable              | Definition                                                                                                                                                                 |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>WHEEZING</b>       | <b>Wheezing:</b> A patient presenting with audible or auscultated wheezing suggestive of lower airway obstruction or bronchospasm, regardless of the underlying diagnosis. |
| <b>NOT DOCUMENTED</b> | <b>Not Documented:</b> Insufficient information is available in the medical record to determine whether the condition or presentation was present.                         |
| <b>NOT APPLICABLE</b> | <b>Not Applicable:</b> The data element does not apply to the patient encounter or is not relevant to the clinical presentation being evaluated.                           |

**Additional Information**

- If the patient has multiple complaints, enter in order of significance
- Do not enter more than one copy of the same chief complaint code

**Uses**

- System evaluation and monitoring
- Epidemiological statistics

**Data Source Hierarchy**

- ED Record
- EMS Patient Care Record
- Base Hospital Form
- Base Hospital Log
- Other hospital records

## OXYGEN DOCUMENTED IN TRIAGE

**Definition**

Indicate whether O2 saturation documented by triage nurse

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Uses**

- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## DATE PROVIDER AT BEDSIDE

### Definition

The date and time when a licensed healthcare provider (e.g., physician, nurse practitioner, or physician assistant) first arrives at the patient's bedside to perform an in-person clinical evaluation and assessment.

### Field Values

- Collected as **MMDDYYYY**

### Uses

- Measures timeliness of provider evaluation.
- Assesses compliance with emergency department and pediatric readiness performance metrics.
- Supports quality improvement initiatives related to patient flow and throughput.
- Evaluates response times for high-risk or time-sensitive pediatric presentations.
- Identifies potential delays in care and opportunities for process improvement.
- Assists in calculating key performance indicators such as arrival-to-provider time and provider response time.

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## TIME PROVIDER AT BEDSIDE

### Definition

The time the provider was at the bedside for evaluation

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Uses

- Measures timeliness of provider evaluation.
- Assesses compliance with emergency department and pediatric readiness performance metrics.
- Supports quality improvement initiatives related to patient flow and throughput.
- Evaluates response times for high-risk or time-sensitive pediatric presentations.
- Identifies potential delays in care and opportunities for process improvement.
- Assists in calculating key performance indicators such as arrival-to-provider time and provider response time.

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## BREATH SOUNDS DOCUMENTED

**Definition:**

Indicates whether the patient's work of breathing was documented during the encounter.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital record

## WHO DOCUMENTED BREATH SOUNDS

**Definition:** Identifies the clinician discipline(s) who assessed and documented the patient's breath sounds during the encounter.

**Field Values:** Can select multiple

- **RN:** Registered Nurse
- **RT:** Respiratory Therapist
- **OT:** Other
- **ND:** Not Documented
- **NA:** Not Applicable

**Notes:** Multiple selections are permitted if more than one clinician documented breath sounds. Selection reflects the discipline of the clinician who performed and documented the reassessment (Respiratory Therapist [RT] or Registered Nurse [RN]).

"OT" should be selected if documentation was completed by a discipline not listed and specified in a corresponding free-text field, if available. "ND" indicates no documented breath sound assessment in the medical record.

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital record

## OXYGEN SATURATION MONITORED DURING CARE OF THE PATIENT

**Definition**

Was oxygen saturation monitored during the encounter.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## WAS OXYGEN ADMINISTERED

### Definition

Was oxygen administered to the patient during the encounter.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## OXYGEN ROUTE

**Definition:**

Checkboxes indicating the type of device used to deliver oxygen to the patient

**Field Values**

- **BiPAP:** Bilevel Positive Airway Pressure: Noninvasive ventilation providing two levels of positive airway pressure during inhalation and exhalation.
- **Blow-By:** Oxygen delivered by directing a flow of oxygen toward the patient's face without a sealed interface.
- **BMV** Bag-Mask Ventilation: Manual ventilation using a self-inflating bag and face mask.
- **CPAP** Continuous Positive Airway Pressure: Noninvasive ventilation providing continuous positive airway pressure throughout the respiratory cycle.
- **ETT** Endotracheal Tube: Airway secured with a tube placed into the trachea for ventilation and oxygenation.
- **High-Flow:** Oxygen delivered at high flow rates, typically using a heated, humidified high-flow nasal cannula system.
- **NC:** Nasal Cannula: Oxygen delivered through prongs placed in the nostrils.
- **NRB:** Non-Rebreather Mask: Face mask with a reservoir bag used to deliver high concentrations of oxygen.
- **Trach** Oxygenation or ventilation provided through an existing tracheostomy tube.
- **SGA** Supraglottic Airway: Airway device placed above the vocal cords to maintain a patent airway and facilitate ventilation.

**Uses**

- Provides documentation of assessment and/or care
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## WORK OF BREATHING ASSESSED

### Definition

Indicates whether the patient's work of breathing was evaluated and documented during the encounter.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** "Assessment of work of breathing" includes documentation of clinical indicators such as use of accessory muscles, retractions, nasal flaring, grunting, or overall respiratory effort. "ND" indicates no clear documentation in the medical record.

### Uses

- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## TYPE OF MEDICATION GIVEN

**Definition:** Identifies the specific medication administered to the patient during the encounter.

**Field Values:**

- Albuterol
- Albuterol + Atrovent
- Prednisone
- Prednisolone
- Dexamethasone
- Methylprednisolone
- Magnesium Sulfate
- OT (Other)
- Pulmicort
- Racemic Epinephrine
- ND (Not Documented)
- NA: Not Applicable

**Notes:** Select the primary medication administered for the documented treatment event. “OT” should be selected if the medication given is not listed, if available. “ND” indicates insufficient documentation in the medical record.

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## 3 DOSES OF CORRECTLY DOSED BETA-2 AGONIST GIVEN IN FIRST HOUR

**Definition:**

Indicates whether the patient received three appropriately weight- and age-based dosed beta-2 agonist treatments within the first hour of presentation or treatment initiation.

**Field Values:**

- **Yes**
- **No**
- **Documentation patient clear <3 doses**
- **ND** (Not Documented)
- **Not Applicable**

**Notes:** “Yes” reflects that three separate doses were administered within 60 minutes and were dosed according to established clinical guidelines. “ND” indicates insufficient documentation to verify the number of doses, timing, or dosing accuracy.

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## DATE OF BETA- 2 AGONIST GIVEN

**Definition:**

The documented date at which a beta 2 agonist medication was administered to the patient during the encounter.

**Field Values**

- Collected as **MMDDYYYY**

**Uses**

- Establishes care intervals and incident timelines

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## TIME OF BETA- 2 AGONIST GIVEN

### Definition

The documented clock time at which a beta 2 agonist medication was administered to the patient during the encounter.

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## CORTICOSTEROIDS GIVEN BEFORE, DURING OR JUST AFTER SECOND BETA-2 AGONIST TREATMENT

**Definition:**

Indicates whether a corticosteroid was administered before, during, or immediately after the second beta-2 agonist treatment during the encounter.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** “Yes” reflects that corticosteroid administration occurred at any point prior to, concurrently with, or shortly following completion of the second beta-2 agonist treatment, as documented in the medical record. “ND” indicates insufficient documentation to determine timing.

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## DATE OF CORTICOSTEROID GIVEN

**Definition:**

The documented date at which a corticosteroid medication was administered to the patient during the encounter.

**Field Values**

- Collected as **MMDDYYYY**

**Uses**

- Establishes care intervals and incident timelines

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## TIME OF CORTICOSTEROID GIVEN

**Definition**

The documented clock time at which a corticosteroid medication was administered to the patient during the encounter.

**Field Values**

- Collected as **HHMM**
- Use 24-hour clock

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## BREATHING EFFORT AND RATE REASSESSED AFTER MEDICATION ADMINISTRATION

**Definition:**

Indicates whether the patient's breathing effort and respiratory rate were reassessed following medication administration.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## PATIENT UNDERWENT X-RAY IN ED

**Definition:**

Indicates whether the patient underwent diagnostic radiographic imaging (X-ray) during the encounter.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Notes:** “Yes” reflects that at least one plain radiograph study was completed during the visit, regardless of body site or number of views.

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## X-RAY RESULT

**Definition:**

Documents the final interpreted result of the patient's radiographic (X-ray) study as reported by a qualified radiologist or authorized provider.

**Field Values**

- **Normal** Findings documented as normal with no abnormalities identified.
- **PNA** Pneumonia: Findings consistent with or indicative of pneumonia.
- **OT** Other: Findings not represented by the listed options. Additionally details should be documented when applicable.
- **ND** Not Documented: The assessment or finding was not documented in the medical record.
- **NA** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## **UNSCHEDULED 48 HOUR RETURN TAB**

## PROVIDED WITH RESOURCES AT DISCHARGE-1st VISIT

**Definition:**

Indicates whether standardized educational materials were incorporated into the patient's emergency department (ED) discharge paperwork at the time of discharge.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## EDUCATIONAL MATERIALS BUILT IN THE EMERGENCY DEPARTMENT'S DISCHARGE PAPERWORK

**Definition:**

Indicates whether standardized educational materials were incorporated into the patient's emergency department (ED) discharge paperwork at the time of discharge.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not Documented
- **NA:** Not Applicable

Notes: "Yes" reflects that condition-specific or diagnosis-related educational materials were automatically generated or manually included in the discharge instructions provided to the patient and/or caregiver.

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## PATIENT ADMITTED OR TRANSFERRED AT RETURN VISIT

**Definition:**

Indicates whether the patient was admitted to the hospital or transferred to another facility during a return visit.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## **CHILD MALTREATMENT TAB**

## HOSPITAL SOCIAL WORKER NOTIFIED

### Definition

Indicates whether a social worker was notified to provide support and assistance during a suspected child maltreatment case.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## LAW ENFORCEMENT AGENCY NOTIFIED

**Definition**

Indicates whether a law enforcement agency was notified to provide support and assistance during a suspected child maltreatment case.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## DCFS/CPS NOTIFIED

### Definition

Checkbox indicating Department Child and Family Services called for suspected child maltreatment case.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## **DOCUMENTED IN CHART: SUSPECTED CHILD ABUSE FORM (SCAR, etc.) REPORT SUBMITTED VIA PHONE/ONLINE/FAX/MAIL**

### **Definition**

Indicates whether a Suspected Child Abuse Report (e.g., SCAR) was documented in the patient chart as submitted to the appropriate authority via phone, online portal, fax, or mail.

### **Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### **Additional Information**

Includes any formally documented report submission method (phone, online, fax, or mail).

### **Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## DOCUMENTED IN CHART MANDATED REPORTER NUMBER

### Definition

Indicates whether a Mandated Reporter Number has been documented in the patient chart.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## SART PATIENT

**Definition**

Sexual Assault Response Team (SART) Centers: A center specializing in forensic examinations in the case of an acute sexual assault/abuse event (defined as occurring within 120 hours), which has the capabilities of providing comprehensive medical and psychological forensic examinations and consist of a knowledgeable staff whose training, expertise, and state-of-the-art equipment exceeds the community standards.

## NEED SPECIALTY FORENSIC CARE (SART)?

### Definition

Indicates whether the patient requires specialized forensic medical services provided by a Sexual Assault Response Team (SART), including evidence collection, forensic examination, and coordinated care following a reported or suspected sexual assault.

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Data Source Hierarchy

- ED Records
- History and Physical
- Other hospital records

## IF YES, DID THEY GET APPROPRIATE REFERRAL TO SART CENTER

**Definition**

Indicates whether the patient received an appropriate referral to a Sexual Assault Response Team (SART) center when indicated.

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Data Source Hierarchy**

- ED Records
- History and Physical
- Other hospital records

## **CARDIAC ARREST TAB**

## CARDIAC ARREST

**Definition**

A non-traumatic out-of-hospital cardiac arrest where resuscitation is attempted by a 911 Responder (CPR and/or defibrillation). This also includes patients that receive an AED shock by a bystander prior to the arrival of 911 Responders

## INIT. CARDIAC ARREST DATE

### Definition

Date of the initial cardiac arrest

### Field Values

- Collected as **MMDDYYYY**

### Uses

- Establishes care intervals and incident timelines
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- EMS Patient Care Record
- Base Hospital Form
- ED Records
- Progress Notes
- Other Hospital Records

## INIT. CARDIAC ARREST TIME

### Definition

Time of the initial cardiac arrest

### Field Values

- Collected as **HHMM**
- Use 24-hour clock

### Uses

- Establishes care intervals and incident timelines
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- EMS Patient Care Record
- Base Hospital Form
- ED Records
- Progress Notes
- Other Hospital Records

## **SOCIAL WORKER NOTIFIED**

### **Definition**

Was Social Worker Notified

### **Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### **Uses**

- System evaluation and monitoring

### **Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## LAW ENFORCEMENT AGENCY NOTIFIED

**Definition**

Was law enforcement notified

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Uses**

- Establishes care intervals and incident timelines
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## **FAMILY PRESENCE DURING CODE/ PRONOUNCEMENT DOCUMENTED**

### **Definition**

Was family present during code/pronouncement

### **Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### **Uses**

- Establishes care intervals and incident timelines
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### **Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## ONE LEGACY NOTIFIED AND DOCUMENTED IN CHART

**Definition**

Was one legacy notified and documented in chart

**Field Values**

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

**Uses**

- Assists with determination of appropriate treatment
- System evaluation and monitoring

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## CORONER NOTIFIED AND DOCUMENTED IN CHART

### Definition

Coroner Notified of death and documented in chart

### Field Values

- **Y:** Yes
- **N:** No
- **ND:** Not documented
- **NA:** Not Applicable

### Uses

- Established care intervals and incident timelines
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### Data Source Hierarchy

- ED Records
- Progress Notes
- Other Hospital Records

## **CARES**

### **Cardiac Arrest Registry to Enhance Survival**

## **WAS HYPOTHERMIA CARE, ALSO KNOWN AS TARGETED TEMPERATURE MANAGEMENT (TTM), INITIATED OR CONTINUED IN THE HOSPITAL**

### **Definition**

Hypothermia care is provided in the hospital if measures were taken to reduce the patient's body temperature by either non-invasive means (i.e. administration of cold intravenous saline, external cold pack application to armpits and groin, use of a cooling blanket, torso vest or leg wrap devices) or by invasive means (i.e. use of a cooling catheter inserted in the femoral vein).

o NOTE: Maintaining "normothermia" is considered TTM if the hospital is actively managing the patient with a TTM protocol

### **Field Values**

- **Yes**
- **No**
- **ND:** Not Documented
- **Not Applicable**

### **Additional Information**

Was Hypothermia Care Initiated/ Continued in the Hospital Definition

Yes Measures were taken to reduce the patient's body temperature by either non-invasive or invasive means in the hospital.

No Measures were not taken to reduce the patient's body temperature in the hospital.

### **Uses**

- Establishes care intervals and incident timelines
- Assists with determination of appropriate treatment
- System evaluation and monitoring

### **Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## NEUROLOGICAL OUTCOME AT DISCHARGE FROM HOSPITAL

### Definition/Description:

- The neurological outcome of the patient at the time of hospital discharge, defined by the simple and validated Cerebral Performance Categories (CPC) scale.
- Survival without higher neurological function is suboptimal; therefore, it is important to attempt to assess neurological outcome at time of discharge.

### Fields

#### Pediatric/Neonate Cerebral Performance Categories Scale CARES Coding

- **PCPC 1 (Normal)** - Age-appropriate level of functioning; preschool child developmentally appropriate; school-age child attends regular classes.
  - Neonate – No obvious neurological abnormalities. Good Cerebral Performance (CPC 1)
- **PCPC 2 (Mild cerebral disability)** – Able to interact at an age-appropriate level; minor neurological disease that is controlled and does not interfere with daily functioning (i.e. seizure disorder that is well controlled with medication); preschool child may have minor developmental delays, but more than 75% of all daily living milestones are above the 10th percentile; school-age child attends regular school, but grade is not appropriate for age, or child is failing appropriate grade because of cognitive difficulties.
  - Neonate – Minor neurological abnormality; neurological disease that is controlled and does not interfere with daily functioning. Moderate Cerebral Disability (CPC 2)
- **PCPC 3 (Moderate cerebral disability)** – Below age-appropriate functioning; neurological disease that is not controlled and severely limits activities; most activities of preschool child's daily living developmental milestones are below the 10th percentile; school-age child can perform activities of daily living but attends special classes because of cognitive difficulties and/or has a learning deficit.
  - Neonate – Neurological disease that is not controlled (i.e. breakthrough seizures despite medications which affect responsiveness to environment). Moderate Cerebral Disability (CPC 2)
- **PCPC 4 (Severe cerebral disability)** – Preschool child's activities or daily living milestones are below the 10th percentile, and child is excessively dependent on others for provision of activities of daily living; school-age child may be so impaired as to be unable to attend school and is dependent on others for provision of activities of daily living; abnormal motor movements for both preschool and school-age child may include non-purposeful, decorticate, or decerebrate responses to pain. Severe Cerebral Disability (CPC 3)
  - Neonate – Obvious severe neurological disorder. Abnormal motor movements may include non-purposeful, decorticate, or decerebrate response to pain.
- **PCPC 5 (Coma or vegetative state)** - Any degree of coma. Unaware, even if awake in appearance, without clear or consistent interaction with environment. Unresponsive with no evidence of cortical function (not aroused by verbal stimuli). Possibility of some reflexive response, spontaneous eye-opening, and sleep-wake cycles. Coma, vegetative state (CPC 4)

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records

## WHY WAS HYPOTHERMIA CARE/TTM NOT INITIATED OR CONTINUED IN THE HOSPITAL

### Definition:

Indicates the reason that hypothermia care was not initiated or continued in the hospital setting. Instructions for Coding:

- Select the primary reason that hypothermia care was not initiated or continued, according to the medical record.

### Fields

- **Awake:** Patient is awake and responsive to medical staff upon initial presentation to hospital.
- **Following commands:** Patient is alert and responsive to medical staff upon initial presentation to hospital.
- **DNR/Family:** request Patient has a valid Do Not Resuscitate (DNR) order in place, or family requests that hypothermia care not be provided. Unwitnessed cardiac arrest
- **Unwitnessed cardiac arrest: Patient** has a cardiac arrest that is neither seen nor heard.
- **Unshockable rhythm:** First monitored cardiac rhythm upon application of manual monitor/defibrillator or AED was asystole, idioventricular/PEA, or unknown unshockable.
- **No TH program in place** Destination hospital does not have therapeutic hypothermia program in place.
- **Other:** Reason for not initiating/continuing hypothermia care does not fall into one of the defined categories.
- **Unknown:** Information not available in medical record
- **Not Documented**
- **Not Applicable**

### Data Source Hierarchy

- ED Records
- Progress Notes
- Other Hospital Records
- Discharge Summary

## WAS THE FINAL DIAGNOSIS ACUTE MYOCARDIAL INFARCTION

**Definition:**

Diagnoses of acute myocardial infarction (MI) via electrocardiogram (ECG), cardiac markers, angiography, or autopsy.

**Fields:**

- **Yes:** There was a final diagnosis of an acute myocardial infarction.
- **No:** There was no final diagnosis of an acute myocardial infarction.
- **Not Documented**
- **Not Applicable**

**Additional Information**

- This diagnosis refers to the index cardiac arrest event only. Instructions for Coding:
- If the final diagnosis was acute MI, code as “Yes.”
  - o NOTE: STEMI and NSTEMI are included in a final diagnosis of acute MI.
- If the final diagnosis was not acute MI, code as “No.”
- In the case of transfer patients, this field should be completed by the final hospital of care.

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records
- Discharge Summary

## CORONARY ANGIOGRAPHY PERFORMED

**Definition:**

Coronary angiography is a therapeutic procedure that uses contrast dye, usually containing iodine, and x-ray to detect blockages in the coronary arteries.

**Fields:**

- **Yes:** Coronary angiography procedure was performed on the patient. Provide date and time (initial groin puncture of the femoral artery) of the procedure.
- **No:** Coronary angiography procedure was not performed on the patient.
- **Not Documented**
- **Not Applicable**

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records
- Discharge Summary

## WAS A CARDIAC STENT PLACED

**Definition:**

A cardiac stent is a small mesh, expandable tube that is used to treat narrowed or blocked arteries. A stent is placed during a percutaneous coronary intervention (PCI) procedure to keep a coronary artery open.

**Fields:**

- **Yes:** A cardiac stent was placed.
- **No:** A cardiac stent was not placed.
- **Not Documented**
- **Not Applicable**

**Additional Information**

- If a cardiac stent was placed during this angiography (does not apply to previously placed stents), code as "Yes."
- If a cardiac stent was not placed during this angiography, code as "No." Was A Cardiac Stent Placed Definition

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records
- Discharge Summary

## CABG PERFORMED

**Definition:**

Coronary artery bypass grafting (CABG) is a surgical procedure to restore normal blood flow to an obstructed coronary artery.

**Fields:** Indicate whether CABG was performed during this hospitalization.

- **Yes:** If CABG was performed, code as
- **No:** If CABG was not performed, code as
- **Not Documented**
- **Not Applicable**

**Additional Information**

- Yes Coronary artery bypass grafting (CABG) was performed.
- No Coronary artery bypass grafting (CABG) was not performed.
- Unknown Information not available in medical record.

**Data Source Hierarchy**

- ED Records
- Progress Notes
- Other Hospital Records
- Discharge Summary
