Incident Manageable by Base Hospital? → no → **Contact Medical Alert Center 866.940.4401**

yes → **Which hazard**

Which hazard branches into: **Biological**, **Radiological**, **Unknown**, **Chemical**

Biological
- Symptoms? → no → Field or home decon. Transport or follow-up with PMD
- Symptoms? → yes → Symptoms may be unrelated to current incident or contaminant may be unknown → Decontaminate and treat as needed

Radiological
- Exposed → Symptoms? → no / yes → Provide tx per treatment protocols
- Contaminated → Life threatening condition? → no → Field decon
- Life threatening condition? → yes → Administer life saving treatment/medication prior to decon → Field decon

Unknown
- Properties of hazard apparent? (solid, powder, liquid, vapor) → Obtain victims signs and symptoms and triage priorities
- Consider life saving treatment/meds in conjunction with decon → Field decon

Chemical
- Have product name or code number? → no (to Unknown)
- Have product name or code number? → yes → Contact poison control 800.222.1222 → Obtain victims signs and symptoms and triage priorities → **S**alivation **L**acrimation **U**rination **D**efecation **GI** upset **E**mesis present? → no → Field decon
- **S**alivation **L**acrimation **U**rination **D**efecation **GI** upset **E**mesis present? → yes → DuoDote or equivalent nerve agent antidote may be given prior to decon if nerve agent contamination suspected

Field decon → Provide tx per treatment protocols → Notify appropriate receiving hospitals with decon capability

Provide receiving facility with:
- # of victims
- Name of hazard and properties if known
- Signs/symptoms
- Type of decon (water, soap/water, disrobing only)
- Treatment given
- Poison control info as obtained
- Ambulance ETA
