APPROVAL OF A MEMORANDUM OF AGREEMENT/SPACE USE AGREEMENT BETWEEN THE DEPARTMENT OF MENTAL HEALTH AND JOHN WESLEY COMPREHENSIVE HEALTH INSTITUTE FOR A CO-LOCATED FEDERALLY QUALIFIED HEALTH CENTER (SUPERVISORIAL DISTRICT 4) (3 VOTES)

SUBJECT

Request approval to execute a Memorandum of Agreement/Space Use Agreement between the Department of Mental Health and John Wesley Comprehensive Health Institute for co-location of physical health care services at Rio Hondo Community Mental Health Center.

IT IS RECOMMENDED THAT THE BOARD:

1. Approve and authorize the Director of Mental Health (Director) or his designee, to prepare, sign, and execute a Memorandum of Agreement/Space Use Agreement (MOA), substantially similar to the Attachment, between the Department of Mental Health (DMH) and John Wesley Comprehensive Health (JWCH) Institute, for the provision of accessible and coordinated physical and mental health care services on the site of Rio Hondo Community Mental Health Center (Rio Hondo CMHC) and American Indian Counseling Center (AICC) in Service Area (SA) 7. For Fiscal Year (FY) 2014-15, DMH will expend \$90,000 one-time cost, funded by State Mental Health Services Act (MHSA) revenue to provide minor alterations and improvements to Rio Hondo CMHC for the program. The term of the MOA will be effective upon your Board's approval through June 30, 2015, with four one-year automatic renewal extensions.
2. Delegate authority to the Director, or his designee, to prepare, sign, and execute amendments to the MOA provided that any such amendment: 1) authorizes any necessary revisions to the space

allocation and use of space conditions, or operations of the program with the mutual consent of all parties, including the lessor of the Rio Hondo CMHC and AICC site; 2) approval of County Counsel, or designee, is obtained prior to execution of any such amendment; and 3) the Director notifies your Board and the Chief Executive Officer (CEO) of MOA changes in writing within 30 days after execution of each amendment.

PURPOSE/JUSTIFICATION OF RECOMMENDED ACTION

Approval of the recommended actions will allow DMH and JWCH to provide truly integrated healthcare within a behavioral health home model, where comprehensive behavioral health care and related services are coordinated for the benefit of the enrolled clients. Under the Affordable Care Act, we are challenged to find new, more effective and efficient ways to provide quality services to our consumers. An opportunity exists to test a new model by co-locating a healthcare provider agency, JWCH, within a site housing two mental health programs, Rio Hondo CMHC and AICC, to provide truly integrated and easily accessible mental health and healthcare in one location. It is well known that multiple barriers to healthcare exist for mental health clients, including transportation, finances, insurance, or even the mental illness itself.

In a recent survey of clients at the Rio Hondo Wellness Center, 80 percent of the respondents indicated that if physical health care services were available at Rio Hondo CMHC and AICC, they would either use the health clinic to access physical health care services for the first time, or change healthcare providers in order to have all of their healthcare and mental health care needs met in a coordinated manner at Rio Hondo CMHC and AICC. Coordination of services at a site that consumers trust will facilitate coordinated care by the mental and physical healthcare doctors and clinicians treating our mutual clients.

Having JWCH, a Federally Qualified Health Center (FQHC), co-locate at Rio Hondo CMHC and AICC will greatly benefit clients with physical healthcare needs from Rio Hondo CMHC and AICC. JWCH will offer clients from both Rio Hondo CMHC and AICC on-site health exams and lab tests to determine their physical health condition. Those services not offered at the JWCH satellite site at Rio Hondo CMHC and AICC will be available through the JWCH clinic network, thus clients who need additional treatment, diagnostics, or specialty services, not offered at the satellite site, will be referred to a full-service JWCH clinic. Additionally, the JWCH physical healthcare team will confer with the on-site Rio Hondo CMHC or AICC mental health team to ensure coordination of care, with the proper client/patient authorization.

JWCH approached and engaged DMH to collaborate in this effort towards integrated care of mental health clients in an established outpatient clinic, resulting in the proposed agreement between the parties. JWCH has prior experience working with DMH on two other collaborative projects in SA 7, serving the homeless mentally ill. Also, JWCH has provided health care services under the Project 50 program in Downtown L.A., illustrating that they have served some of our most challenging clients in a collaborative effort, to their benefit. As a result of their experience, JWCH has already resolved time consuming challenges that occur when disparate systems of communication, billing, and charting procedures are utilized such as those in the mental health and health care industries. Thus, the learning curve for JWCH to implement a co-located project within a DMH clinic is expected to be short.

The health services will be primarily targeted to Adult, Older Adult, and Transition Age Youth age groups of Rio Hondo CMHC and AICC clients who have an established relationship with the clinic,

who may not have a health care provider, and/or have barriers to accessing health care services in the community. As stated in the MOA, JWCH will provide health care services to projected 2.5 to 3 clients per hour, with a maximum of 24 clients in an eight-hour period. JWCH will staff this project with one medical assistant, a Nurse Practitioner or Physician's Assistant, a receptionist, and a supervising medical doctor. Additionally, JWCH will bill the appropriate plans available to them for physical health care services provided to the clients, and will fully fund the costs of medical supplies needed for start-up, as well as medication and lab work provided to the indigent/uninsured clients. JWCH will also assist with enrolling Rio Hondo CMHC or AICC clients into physical healthcare plans available to JWCH. DMH will not serve as a payer of last resort.

The goal of this project is to demonstrate the effectiveness and efficiency of having a healthcare provider co-located within a DMH directly operated clinic for the provision of integrated health and mental health care. This project will increase coordination between health and mental health providers; it will decrease medical errors due to lack of information being shared between the providers; and it will increase accessibility for clients. In the end, a secondary goal and outcome will be to achieve decreased costs and suffering, as consumers receive more coordinated and integrated care, which will reduce emergency room visits and hospitalization.

Implementation of Strategic Plan Goals

The recommended actions support the County's Strategic Plan Goal 3, Integrated Services Delivery.

FISCAL IMPACT/FINANCING

There is no monetary payment between DMH and JWCH Institute. DMH will provide space, telephone services, and office machines at no cost to the Health Care Partner (JWCH).

For FY 2014-15, DMH will expend \$90,000 one-time cost funded by State MHSA revenue to provide minor alterations and improvements to Rio Hondo CMHC for the implementation of the program. Funding for the one-time expenditure is included in the DMH's FY 2014-15 Adopted Budget.

There is no net County cost impact associated with these actions.

FACTS AND PROVISIONS/LEGAL REQUIREMENTS

FQHCs provide comprehensive health care services to underserved communities. In line with the Affordable Care Act implementation, this project allows for the co-location of a FQHC (specifically, JWCH) at the site of Rio Hondo CMHC and AICC, clinics operated by DMH. Through this project, DMH will be positioned to demonstrate the successful integration of health and mental health care services using a Behavioral Health Home Model which benefits both the clients of Rio Hondo CMHC and AICC with coordinated health and mental health services in one easily accessible location.

The attached MOA contains provisions on: 1) responsibilities of DMH and JWCH including services to be provided by JWCH, staffing, estimated number of clients to be served, and billing for services by JWCH; 2) sharing of confidential information and records between DMH and JWCH; 3) insurance and indemnification; and 4) space utilization.

Rio Hondo CMHC and AICC are located at 17707 Studebaker Road, Cerritos, a DMH leased site. JWCH will utilize a designated portion of this site and will use the space solely for the provision of

health services in accordance with the MOA and lease agreement between DMH and the lessor. Negotiations are currently in progress for DMH to purchase the subject property, and the MOA will continue with DMH and JWCH if this change in ownership occurs.

JWCH's headquarters are located in SA 4, and its clinic sites are located in SAs 4, 6, and 7, including Supervisorial District 4 where Rio Hondo CMHC and AICC are located.

During the course of this project, DMH will evaluate the effectiveness of the co-located services on increased physical health treatment, as well as improved physical health, for the clients of Rio Hondo CMHC and AICC. If the project is successful, DMH may return to your Board to seek an extension of this MOA beyond the initial term and the four one-year automatic extensions. Additionally, DMH will explore the possibility of expanding the program to establish similar co-located projects throughout the County on a competitive basis.

The attached MOA format has been approved as to form by County Counsel. DMH clinical and administrative staff will administer the MOA, evaluate programs to ensure that quality services are provided to clients, and ensure that the MOA provisions and Departmental policies are followed.

IMPACT ON CURRENT SERVICES (OR PROJECTS)

Board approval of the attached MOA will ensure ready access to health services for mental health clients of Rio Hondo CMHC and AICC, thus improving the quality of care provided to mental health clients and overall quality of life.

The goal of a co-located health center within a mental health clinic is for this to become a model to be used throughout the County. It will also test the theory that the provision of related services (health and mental health), in a "one-stop" setting, will improve outcomes for mental health clients who often suffer from a variety of health conditions but who lack access to appropriate health care services. The treating physicians and clinicians from both the health and mental health clinics will coordinate services, medications, and expertise to offer more effective treatment for clients with a variety of co-occurring disorders.

I. PURPOSE/GOALS

It is well known that multiple barriers to healthcare exist for mental health clients, including transportation, finances, insurance, and even the mental illness itself. An opportunity exists to test the integration of a healthcare provider in a mental health center.

In a recent survey of clients at the Rio Hondo Wellness Center, 80% of the respondents indicated that if health services were available at Rio Hondo CMHC, they would use the health clinic to access health care for the first time, or change healthcare providers in order to have all of their healthcare and mental health care needs met at Rio Hondo.

This project allows for the co-location of a Federally Qualified Health Center (FQHC), (specifically, JWCH) at the site of Rio Hondo CMHC and AICC, clinics operated by DMH. JWCH has experience working in collaboration with DMH through Project 50, a homeless program located in downtown Los Angeles. Through this new project, JWCH will provide primary health services to the clients of Rio Hondo CMHC and of AICC.

The health services would be targeted primarily to Adult, Older Adult, or Transition Aged Youth clients of Rio Hondo CMHC and AICC who have an established relationship with the mental health clinic, and who may not have a health care provider, or have barriers to accessing health care in the community.

The clinical goals of a co-located program include increased coordination between medical treatment providers, decreased medical errors due to lack of information shared between providers, and increased accessibility for clients. In the end, a secondary goal and outcome will be decreased costs and suffering, as consumers receive more coordinated and integrated care, which will reduce emergency room visits and hospitalizations. The goal is for this to become a model program in the County, with measurable evidence of improved health care access and collaboration between medical treatment providers and the benefit of improved treatment outcomes for our consumers.

II. PLANNED SERVICES

JWCH will conduct routine medical examinations, treatment, chronic disease management activities, laboratory diagnostics, follow-up, dispensing of medications to treat ailments, and referrals to specialty care. JWCH will utilize medication assistance programs for clients, including assistance with applying for PAP drugs. JWCH will also use its available resources to purchase bulk medications, e.g. via their federal 340 B drug pricing program. JWCH will offer reproductive health services, including family planning services. With the proper consents signed, the medical team onsite will also conference with the mental health team on site to ensure coordination of care. Mental health clients who present with medical needs will be provided health exams and lab tests at the site. Flu shots, vaccinations,

testing for specific illnesses and HIV testing can also be provided. Clients identified as a result of testing or exams to need a higher level of medical care will be linked to specialty services. Health education materials, including information on chronic diseases, exercise, HIV and STD prevention and treatment will also be provided. The site will be connected to the larger JWCH clinic network, so clients who need additional treatment and diagnostics which are not provided on site will be referred to a full-service JWCH clinic.

implementing regulations related to transactions and code sets, privacy, and security.

- 4.0 Each party further agrees that, should it fail to comply with its obligations under HIPAA, it shall indemnify and hold harmless the other party (including the other party's officers, employees, and agents), for damages to the other party that are attributable to such failure.
