

Your recent meeting feedback & our next steps

What you liked

- There was a lot of detailed, clear information presented. The presenters were very knowledgeable and the information on how SAPC and DMH are working together to address large issues was helpful.
- The insights provided in group discussions were helpful in learning about available resources and personal experiences.

What we can improve

- There were technical issues that limited participation including: mic access, breakout room access, chat access, and issues with links.
- Participants felt they did not have enough time to review materials ahead of time and would like a central file location to review materials instead of receiving links in the chat.

Our actions

- We are troubleshooting technical issues and appreciate your patience as we solve them. We understand the frustration of not being able to participate in breakout sessions and will provide additional options when technical issues interfere.
- All relevant materials are made available on the BHSA site and sent out via listserv 1-week prior to each session. If you are not receiving them, please reach out to us directly to troubleshoot.
