* CORS data collection was delayed until mid 2013 so compliance rate might be understated.

**MAP, TF-CBT, and Triple P compliance rates do not include data for inactive treatment cycles reported to CiMH at the time of the data transition to DMH. Data reported on here only includes information contained in our DMH PEI OMA system.

MHIP does not collect a "post" measure. Pre/Post changes reported are determined from first questionnaire with scores to last questionnaire with scores.

***PSC-35 data collection began on July 1, 2019.

****All treatment cycles that began on or after 7/1/2019 no longer require the general OQ/YOQ/YOQ-SR measures except for the following practices which utilize these measures as their sole outcome measure: CORS (OQ), Stepped Care (OQ) and FFT (YOQ/YOQ-SR)."

*****Treatment cycle counts highlighted in grey denotes no changes since the previous report (June 2022).
