

Attention agenda item #4&5 Salvador Gonzalez To whom it may concern it has been brought to my attention that you want to build a maximum security jail house for serious offenders. The location you are proposing is within 600ft of existing residential homes and 3 primary schools. This area is heavily congested on any given day and is in a high risk fire and flood zone. In the event of an evacuation how will you be able to guarantee that the detainees will not be a threat to our community? I do not believe you have done your due diligence in obtaining zoning reports and hazard reports. You are endangering the existing communities lives. Please consider accommodating these prisoners in an area with not so many zoning hazards away from residential homes.

Thank you,  
Salvador Gonzalez
