

JJCC-CAC Meeting (October 27, 2022) Written Public Comments (Agenda Item IV)

1. George Rios

I haven't heard any other public comments, and the last time I believe it was only two. It is disappointing that there are not more community members.

I have called in the past, and to be quite honest it has felt somewhat useless, perhaps that is part of the problem

It always seems you only want to hear from younger people and their concerns, or the families of the youth in trouble. They are not the full population of Los Angeles.

It seems the discussions on this board ignore the comments and concerns unless they are from the preferred group.

I am a Tax payer and I voter, as are other community members that have spoken in the past.

However, our opinions don't seem to matter to most of the members of this committee.

I would like to recommend that public members be added to this and other committees that are not appointed by city government, and not elected by the committee.
